REGISTERED No. C. 696

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 4, 1916.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 9th September 1915.

On and after 6th November and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Delhi. Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Delhi and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*.

J. P. HEWETT,
Secretary to the Government of India."

Rates of Subscription.

	per annum.
	Rs. a. p.
Subscription for *Gazette* and Supplement	15 0 0

EXTENSION OF TERM OF EXCLUSIVE PRIVILEGE.

Notice is hereby given that an application for the extension of the term of exclusive privilege, No. 79 of 1901, for improvements in Indian hand-looms, has been left at the Patent Office on behalf of A. A. Kuppusamy Iyer. The application will be taken under consideration on 26th May 1916, and notices of objection, accompanied by full statements in duplicate of the reasons therefor, should be filed with the Controller of Patents, 1, Council House Street, Calcutta, on or before that date.

RENEWAL FEES PAID.

294 of 1908. Saxby & Farmer (India) Ld. (To 26 February 1917.)
373 of 1908. Akbar Ali. (To 4 March 1917.)
315 of 1909. Jost. (To 25 February 1917.)
100 of 1912. Wheatley & ors. (To 28 February 1917.)
133 of 1912. Brownlie. (To 18 March 1917.)

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

1905.

154, (Timmis).

1911.

155, (Cedford Gas Process Co., Ld.). 444, (Kahn).

EXTENSION OF COPYRIGHT IN DESIGN.

Class 1. No. 28 of 1911. Llewellyn Wynn Williams, Engineer, late of Railway Appliances Works, Cathcart, Scotland, now of Railway Appliances Works, Darlington, England, April 12, 1911. (Copyright in design extended for five years.)

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Tempo-

rary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

Quinoidine Tablets are available in 1-lb. tins.

Transit charges are in addition to the above prices in every case.

Drugs are sold strictly cash and in advance. Price of Postage must accompany the price of the drug (when the drug is required by Post) No charges are made when drugs are sent by Rail. The name of the Railway Station, Steamer or Post Office must be written distinctly when the parcels are required by Rail, Steamer or by Post. A scale of Postage is given below:—

For ¼ and ½ lb. 4 As.; 1 lb. 6 As.; 2 lbs. 10 As.; 3 lbs. 12 As.; 4 lbs. 1 Re.; 5 lbs. Re. 1 As. 4; and for 6 lbs. Re. 1 As. 6.

NOTICE.

Tenders are hereby invited for the right to sell by retail country spirit (flavoured and plain) at the following shops:—

1. Khoja Bazar, Sibi,
2. Chauk Bazar, Sibi,
3. Loralai,

for a period of one year, from 1st April 1916 to 31st March 1917.

2. Each tender must be sealed, and addressed to the Revenue Commissioner in Baluchistan, and must be accompanied by a deposit of Rupees two hundred. The cover containing the tender should be superscribed with the words "Tender for the right to sell by retail country spirit at the shop in the $\frac{\text{Loralai Bazar}}{\text{Khoja Bazar, Sibi}}$" and should be sent so as to reach the $\frac{}{\text{Chauk Bazar, Sibi}}$ Revenue Commissioner at Quetta before 12 o'clock noon on the 6th day of March 1916, after which no tender will be considered. The deposits of unsuccessful tenderers will be returned.

3. Tenders for each shop should be offered separately. The Revenue Commissioner reserves to himself the power to accept any tender whatever without assigning any reason for doing so, but licenses for the two shops in Sibi will not be granted to any one individual.

4. The latest figures of sale of country spirit at the three shops are given below in gallons :—

Shop.	1912-13.	1913-14.	1914-15.	1915-16 (actuals for first 9 months only).
Loralai	1,200	1,205	1,300	800
Khoja Bazar, Sibi	481	599	384	283
Chauk Bazar, Sibi	383	402	491	299

5. The following are the rates of Government still head duty paid direct into the treasury and the issue price of the spirit paid to the distillery contractor, Quetta :—

No. 1242-*C. & I.*—In accordance with the provisions of section 37 of the Indian Factories Act, XII of 1911, the Chief Commissioner, Delhi, is pleased to publish for general information the following draft amendments which it is proposed to make in the rules published with his notification No. 6071-C. & I., dated the 9th August 1913, for the better control of factories situated in Delhi Province and notice is hereby given that the said notification will be taken into consideration on or after the 20th April 1916.

2. Any objection or suggestion which may be received from any person with respect to the said draft notification before the date aforesaid will receive consideration.

The following new rules shall be added :—

16 (3) Except in factories provided with water flushed latrines connected with the water borne sewage system, all latrines shall be provided with receptacles on the dry earth system, and satisfactory arrangements must be made for the regular removal and disposal of excreta. The receptacles must be tarred inside and out at least once a year.

16 (4) All drains carrying waste or sullage water shall be constructed in masonry or other impermeable material and shall be regularly flushed and, where possible, connected with some recognised drainage line,

21. B. The second motion line shaft in cotton-ginning factories thall be completely enclosed by a continuous wall or unclimbable fencing with only so many openings as are necessary for access to the shaft for removing cotton seed, cleaning and oiling and such openings shall be provided with gates or doors which shall be kept closed and locked.

For the existing rule 25 the following shall be substituted :—

In every factory a muster roll or an attendance register shall be kept up either in English or Urdu, in which shall be recorded each day the names of all persons '*employed*' within the precincts of the factory. In the case of every woman or child it shall show for each working day the time of beginning and ending of each period of employment and opposite the name of each child shall be recorded the number of his certificate of age and fitness. The register must be entered up at the commencement of each working period and shall always be kept available during working hours for immediate inspection.

For the existing rule 31 the following shall be substituted :—

31. Copies of the abstract of the Act and rules can be obtained in the English, Urdu, Hindi and Punjabi languages from the Inspector at the price of one anna each. Copies of the rules in English and Vernacular can be obtained from him at 2 annas each, and of the Act in English and Urdu at 7 annas 6 pies and 1 anna 6 pies each, respectively.

Dated Delhi, the 29th February 1916.

No. 1264-*C & I.*—The following draft amendments which it is proposed to make in the rules made under Section 9 of the Indian Petroleum Act, 1899, which were published in Punjab Government Notification No. 90, dated 15th February 1909, are published for criticism. The

draft will be taken into consideration on or after the 1st of April 1916, together with any remarks or suggestions received on or before that date :—

DRAFT AMENDMENTS.

(1) In rule 6, Chapter IV, Part II, of the said rules, for the words " forty gallons " the words " sixty-five gallons " shall be substituted.

(2) In condition 3 of license form B, condition 1 of license form H, condition 1 (for dangerous petroleum in the case of the holder of a license in form H) of license form I, and condition 1 of license form K, appended to the said rules :—

(*a*) for the words " forty gallons " after the words " not more than " the words " sixty-five gallons " shall be substituted ; and

(*b*) the following shall be added as sub-clause (7) :—

" (7) When the capacity exceeds forty but does not exceed sixty-five gallons..... 10 B. W. G."

By order,

G. F. DEMONTMORENCY,
Personal Assistant to Chief Commissioner, Delhi.

THE HON'BLE THE AGENT TO THE GOVERNOR-GENERAL IN CENTRAL INDIA.

NOTIFICATION.

DEPARTMENT OF EDUCATION.

NOTIFICATIONS.

EXAMINATIONS.

Delhi, the 28th February 1916

No. 21.—The following amendments are made in the rules for the encouragement of the study of oriental languages, published with the Department of Education Notification no. 80, dated the 6th June 1914:—

In rule I add the following to the first paragraph :—

(*xii*) Engineer officers of the Imperial Branch of State Railways and officers of the Superior Revenue Establishment recruited in England.

Insert the following as the last sub-paragraph of rule I :—

Engineer officers of the Imperial Branch of State Railways and officers of the Superior Revenue Establishment recruited in England are eligible for rewards for passing the Proficiency and High Proficiency examinations in any vernacular language of the province in which they are serving. The Railway Board will decide in each case whether an officer should or should not be permitted to appear for the examination.

No. 24.—The following amendments are made in the rules for the encouragement of the study of oriental languages, published with the Department of Education Notification no. 80, dated the 6th June 1914 :—

In rule XVII, substitute "The Malayalam Ninth Reader" for "The Malayalam Twelfth Reader" as one of the text-books for the High Proficiency examination in Malayalam.

In Appendix B, in the List of authorised text-books in Malayalam, for "Twelfth Reader" substitute "Ninth Reader."

E. D. MACLAGAN,
Secretary to the Government of India.

Tthe 1st March 1916.

No. 833-D.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, and in pursuance of the agreement made with the Chief of the State of Jaipur, dated the 7th August 1869, and the agreements made with the Chief of the State of Jodhpur, dated the 27th January 1870, the 18th April 1870, and the 18th January 1879, which provide for the lease to the British Government of the salt-sources of Sambhar, Didwana and Pachbhadra within the said States, and in supersession of the Notification of the Government of India in the Finance Department, No. 1750-Exc., dated the 20th March 1907, the Governor General in Council is pleased to declare that, on and after the 1st March 1916, the duty to be paid on salt manufactured at any of the said salt-sources shall be one rupee and four annas for each maund of $82\frac{2}{7}$ pounds avoirdupois.

No. 835-D.—In exercise of the powers conferred by section 7 of the Indian Salt Act, 1882 (XII of 1882), as applied to the territories administered by the Agent to the Governor-General in Baluchistan as such Agent, and in supersession of the Notification of the Government of India in the Foreign Department, No. 1051-I. A., dated the 20th March 1907, the Governor-General in Council is pleased to direct that, on and after the 1st March 1916, a duty of one rupee and four annas per maund of $82\frac{2}{7}$ pounds avoirdupois shall be paid :—

(1) on salt imported into such territories from the Kalat State; and
(2) on salt, other than salt in respect of which any duty leviable under the said section has already been paid, imported into the town of Quetta.

Simla, the 2nd March 1916.

No. 352-Est.-A.—Lieutenant-Colonel S. H. Godfrey, C.I.E., of the Political Department is granted privilege leave for 2 months and 16 days combined with furlough for 29 days with effect from the 19th February 1916.

No. 353-Est.-A.—Lieutenant-Colonel F. G. Beville, C.I.E., of the Political Department is posted as Political Agent in Baghelkhand with effect from the 19th February 1916.

J. B. WOOD,
Secretary to the Government of India.

Simla, the 1st March 1916.

No. 247-G.—The Governor General in Council is pleased to recognise the appointment of Mr. Gordon Anderson as Acting Consul for Norway at Rangoon, during the absence of Mr. H. A. Rees.

Delhi; the 3rd March 1916.

No. 936-D.—Under section 3 of the Persian Coast and Islands Order in Council, 1907, the Governor General in Council is pleased to appoint Major Arthur Henry Eyre Mosse, on special duty under the orders of the Political Resident in the Persian Gulf, to be a Judicial Assistant to His Majesty's Consul-General for Fars and the Coasts and Islands of the Persian Gulf.

A. H. GRANT,
Secretary to the Government of India.

APPOINTMENTS.

The 29th February 1916.

No. 190.-E.-Camp.—Major E. B. Peacock, I. A., Military Accounts Department, Additional Deputy Financial Adviser, Military Finance, is appointed to officiate as Deputy Financial Adviser, Military Finance, during the absence on leave of Mr. W. C. Ashmore, C.I.E., with effect from the 21st February 1916.

J. B. BRUNYATE,
Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

NOTIFICATIONS.

GEOLOGY AND MINERALS.

Delhi, the 4th March 1916.

No. 786-1.—Mr. Harold Lancaster is appointed Junior Inspector of Mines in India with effect from the 22nd February 1916.

PATENTS AND DESIGNS.

The 4th March 1916.

No. 779-5.—The following draft of an amendment to the Indian Patents and Designs Rules, 1912, which it is proposed to make in exercise of the powers conferred by sections 48(2) and 77 (1) of the Indian Patents and Designs Act, 1911 (II of 1911), is published as required by section 77 (2) of the said Act for the information of all persons likely to be affected thereby, and notice is hereby given that the said draft will be taken into consideration on or after the 1st day of May 1916.

Any objection or suggestion which may be received for any person with respect to the draft before the date specified will be considered by the Governor General in Council.

Draft amendment.

The following proviso shall be added to rule 36 of said rules, namely :—

"Provided that the requirements of this rule and of sub-clause (*b*) of clause (1) of section 48 of the Act shall be dispensed with as regards printed cotton piece goods except handkerchiefs."

SALT.

The 1st March 1916.

No. 1545-Exc.—In exercise of the powers conferred by section 7 of the Indian Salt Act, 1882 (XII of 1882), and in supersession of the Notification of the Government of India in the Finance Department, No. 1748-Exc., dated the 20th March 1907, the Governor General in Council is pleased to direct that, on and after the 1st March 1916, the duty to be paid on salt manufactured in, or imported by land into, British India shall be as follows :—

(*a*) in the case of salt manufactured in any part of British India other than Aden and of salt (other than salt manufactured at the salt-sources of Sambhar, Didwana or Pachbhadra in the Rajputana Agency, on which a duty has been imposed by the Notification of the Government of India in the Foreign and Political Department, No. 833-D. of this date) imported by land into any part of British India, one rupee and four annas for each maund of $82\frac{2}{7}$ pounds avoirdupois ; and

(*b*) in the case of salt manufactured in Aden and intended for local consumption in that Settlement, or for export to ports or places on the Arabian littoral situated between latitude eleven and latitude twenty north and longitude thity-nine and longitude forty-five east, one rupee for each 140 pounds avoirdupois.

II. The foregoing order shall not affect the orders contained in any notification of the Government of India not hereinbefore expressly mentioned.

No. 1547-Exc.—In exercise of the powers conferred by section 7 of the Indian Salt Act, 1882 (XII of 1882), as in force in British Baluchistan, and in supersession of the Notification of the Government of India in the Foreign Department, No. 1049-I. A., dated the 20th March 1907, the Governor General in Council is pleased to direct that on and after the 1st March 1916, a duty of one rupee and four annas per maund of $82\frac{2}{7}$ pounds avoirdupois shall be paid :—

(1) on all salt imported into British Baluchistan from the Kalat State ; and

(2) on salt, other than salt in respect of which any duty leviable under the said section has already been paid, imported into the markets of Pishin and Killa Abdulla Khan.

C. E. LOW,
Secretary to the Government of India.

PART V.

Bills introduced in the Indian Legislative Council, Reports of Select Committees presented to the Council, and Bills published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to prevent the grant to unqualified persons of titles implying qualifications in western medical science, and the assumption and use by such persons of such titles was presented to the Indian Legislative Council on the 1st March 1916:—

WE, the undersigned, Members of the Select Committee to which the Bill to prevent the grant to unqualified persons of titles implying qualifications in western medical science, and the assumption and use by such persons of such titles was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us, annexed thereto.

Paper No. 1—From P. B. Warburton, Esq., I.C.S., Secretary to the Chief Commissioner of Coorg, dated 11th November, 1915; from the Hon'ble Sir Elliot Graham Colvin, K.C.S.I., Chief Commissioner of Ajmer-Merwara, dated 20th November, 1915; from W. M. Hailey, Esq., C.S.I., C.I.E., Chief Commissioner of Delhi, dated 23rd November, 1915, and enclosure; and from the Hon'ble Lieutenant-Colonel Sir George Roos-Keppel, K.C.S.I., K.C.I.E., Chief Commissioner, North-West Frontier Province, dated 29th November, 1915.

Paper No. 2—From the Hon'ble Lieutenant-Colonel Sir John Ramsay, K.C.I.E., C.S.I., Agent to the Governor General and Chief Commissioner in Baluchistan, dated 2nd December, 1915; from the Hon'ble Mr. S. P. O'Donnel, Secretary to Government, United Provinces, dated 4th December, 1915, and enclosure; from the Hon'ble Mr. J. Donald, M.A., I.C.S., Secretary to the Government of Bengal, dated 8th December, 1915, and enclosures; and from the Hon'ble Mr. B. C. Allen I.C.S., Chief Secretary to the Chief Commissioner of Assam, dated 1st December, 1915, and enclosures.

Paper No. 3.—From the Hon'ble Mr. C. M. Webb, I.C.S., Secretary to the Government of Burma, dated 1st December, 1915; from the Hon'ble Mr. C. S. Findlay, I.C.S., Legal Secretary to the Chief Commissioner, Central Provinces dated 11th December, 1915; from the Hon'ble Mr. J. T. Marten, I.C.S., Second Secretary to the Chief Commissioner, Central Provinces, dated 17th December, 1915, and enclosures; and from the Hon'ble Mr. J. P. Bedford, I.C.S., Acting Secretary to the Government of Madras, Public (Medical) Department, dated 11th December, 1915.

Paper No. 4.—From the Hon'ble Mr. E. L. L. Hammond, I.C.S., Secretary to the Government of Bihar and Orissa, dated 13th December, 1915; and from P. W. Monie, Esq., I.C.S., Acting Secretary to the Government of Bombay, dated 15th December, 1915, and enclosures.

Paper No. 5.—From H. M. Veitch, Esq., I.C.S., Registrar of the High Court of Judicature at Fort William in Bengal, Appellate Side, dated 10th December, 1915; from E. J. Turner, Esq., Assistant Secretary, Revenue and Statistics Department, India Office, London, dated 30th November, 1915, and enclosure; from the Hon'ble Mr. J. Donald, M.A., I.C.S., Secretary to the Government of Bengal, dated 18th January, 1916, and enclosure; and from the Hon'ble Mr. J. P. Thompson, I.C.S., Revenue Secretary to the Government of the Punjab, dated 21st January, 1916, and enclosures.

Paper No. 6—From Dr. M. N Ghose, M. C. P. S. (National Medical College), President of the "Private Medical College Graduates' Association of Bengal," dated 11th January, 1916.

Paper No. 7—From B. Chakravarti, Esq., President of a public meeting held at Overtoun Hall, Calcutta, dated 28th January, 1916.

2. We have made certain drafting changes in the long title, the preamble and the short title, and also in clauses 3 and 4, which, we think, improve the form of the Bill. Although no change of substance has been made in clauses 3 and 4, we think we ought to place on record the fact that, in connection with these clauses, we discussed the question of the position of the students of the third and fourth year in existing institutions.

It was pointed out that it would be open to Government, by exercising the powers conferred

by the latter portion of clause 3, to authorise such institutions to grant certificates to such persons, and the Hon'ble Member in charge of the Bill having expressed his intention of indicating, when dealing with the Bill in Council, that Government would adopt this policy, we decided that no amendment in the Bill was necessary in this respect.

3. In clause 5, we have reduced the fine to which a member of an association contravening clause 4 is liable from ₹1,000 to ₹500, as we think that a fine of that amount will be sufficient, having regard to the circumstances of the case.

4. We have recast clause 6, and we think that, while bringing out what is, in our opinion the intention of that clause, we have been able to effect some simplification in its language. We have also provided that a first offence against this section shall be punishable with a reduced fine of ₹250, while for a subsequent offence we retain the ₹500 fine. We are influenced in this decision by the fact that the fine under the English Medical Act in similar circumstances is £20. We have further inserted an important proviso in this clause, excepting from its operation the use by persons of titles which were in use by them at the commencement of the Act. This important modification of the Bill seems to us to go very far to meet the criticisms that have been directed at the Bill on the ground that it would infringe vested interests.

5. We have provided against hasty or ill-grounded prosecutions by requiring complaints either to be made by order of the Local Government, or by the Council of Medical Education, with the previous sanction of the Local Government, and as a further precaution we have restricted the trial of offences under the Act to the Courts of Presidency and First Class Magistrates.

6. At the suggestion of the Hon'ble Member in charge of the Bill, we have added to the institutions scheduled to the Bill, the Board of Examiners, Medical College, Madras.

2. The publication ordered by the Council has been made as follows :—

NOTE.

While noting with satisfaction the modification of the Bill to the effect that the proposed law shall not affect the use of medical titles already granted, and that no prosecutions for the offences created by the same, shall be initiated except by Local Governments, I am unable to persuade myself that the measure, even in this slightly modified form is either necessary, or that the principles and provisions are not of a controversial nature. It is practically conceded that this measure is little needed to prevent any present evil arising from the state and management of the private medical institutions in British India, while, on the other hand, the Bill does not affect the use in India of foreign bogus titles and foreign titles granted on very inferior qualifications. Nothing proves the drastic and highly controversial nature of this measure more conclusively than the prohibition, on pain of criminal prosecution and conviction, of the issue and use of even certificates implying any qualification in the western medical science otherwise than by the authorities mentioned in the proposed Act. So, if I attend lessons and lectures in First Aid delivered by a private professor and get a certificate from him that I am fairly competent to render First Aid, we are both liable to criminal prosecution and conviction, although without that certificate—nay without having had any lessons in First Aid—I may, with impunity, poison or maim one for life in my attempt to render First Aid to one. It is difficult to conceive the exact object of this Bill, while it is not intended, as it would be clearly impossible, to prevent practice in western medical science by wholly unqualified persons. As pointed out by the Government of Madras, even in Great Britain the law has not gone so far. It seems to me that, if a law to protect European medical titles is needed at all, a short Act scheduling the titles intended to be so protected and prohibiting the unauthorised grant and use of such titles, should amply carry out the object.

2. Last year, His Excellency the President invited and advised this Council to avoid introducing, whether by way of legislation or moving Resolutions, matters of a controversial nature, in consequence of the grave crisis affecting the whole Empire, a crisis which makes complete harmony throughout the Empire a vital necessity and an Imperial asset, while the war should last. The non-official Members have been most loyally observing this necessary rule, thus inaugurated for the guidance of the Council during the war, and I am altogether unable to reconcile myself to the claim that this measure anywise constitutes an exception to this rule. Quite the reverse in every way, whether we regard the nature and scope of the Bill and its admitted inadequacy or the subjective alarm it has caused throughout the country.

3. It is worth noting that the Government of Madras is of opinion that no necessity for such a Bill has risen in that Presidency, and that it is not probable that persons practising some travesty of European medicine without possessing any qualification deceive anybody. The Government of the Punjab is of opinion that the best course would be to drop this Bill for the present, until we are in a position to gauge the effect of the Medical Registration Acts and also devise an effective method of dealing with the use in this country of bogus foreign degrees. I really venture to submit that this is a very wise course to adopt, and I would beg and pray Government to postpone the further consideration of this Bill.

C. VIJIARAGHAVACHARIAR.

February 26th, 1916.

NOTE.

I agree that the Bill is contentious, and I do not propose to traverse the other points in the above minute of my Hon'ble friend Mr. Achariar. I do not, however, think that the Bill deserves opposition now, as the amendments made by the Select Committee have met almost all the contentions urged against it.

GHANASYAM BARUA.

February 26th, 1916.

BILL No. 15 OF 1915.

[AS AMENDED BY THE SELECT COMMITTEE.]

[Words in italics indicate amendments suggested by the Select Committee.]

A Bill to regulate *the grant of titles implying qualifications in western medical science, and the assumption and use by* unqualified *persons of such titles.*

WHEREAS it is expedient to *regulate* the grant of titles implying qualifications in western medical science, and the assumption and use by *unqualified* persons of such titles; It is hereby enacted as follows:—

1. This Act may be called the Indian Medical Degrees Act, 1916.

Short title.

2. In this Act "western medical science" means the western methods of Allopathic medicine, Obstetrics and Surgery, but does not include the Homœopathic or Ayurvedic or Unani system of medicine.

Definition.

3. The right of *conferring*, granting, or issuing in British India degrees, diplomas, licenses, *certificates or* other documents stating or implying that the *holder*, grantee or recipient thereof is qualified to practise western medical science, shall be exercisable only by the authorities specified in the Schedule and by *such* other authority *as* the Governor General in Council may, by notification in the Gazette of India, and subject to such conditions and restrictions as he thinks fit *to impose*, authorize in this behalf.

Right to confer degrees, etc.

4. Save as provided by section 3, no person in British India shall *confer*, grant, or issue, or hold himself out as entitled to *confer*, grant, or issue any degree, diploma, license, *certificate* or other document stating or implying that the *holder*, grantee or recipient is qualified to practise western medical science.

Prohibition of unauthorised conferment of degrees, etc.

5. Whoever contravenes the provisions of section 4 shall be *punishable with* fine which may extend to one thousand rupees; and if the person so contravening is an association, every member of such association, who knowingly and wilfully authorises or permits the contravention, shall *be punishable with fine which may extend to five hundred rupees.*

Contravention of section 4.

6. Whoever voluntarily and falsely assumes, or uses *any* title *or description or any addition to his name implying that he holds a degree, diploma, license or certificate conferred*, granted *or issued* by any authority referred to in section 3, or *recognized* by the General Council of Medical Education of the United Kingdom, or *that he is qualified to practise western medical science* shall be *punishable with* fine which may extend to *two* hundred *and fifty* rupees, *or, if he subsequently commits, and is convicted of, an offence punishable under this section, with fine which may extend to five hundred rupees*:

Penalty for falsely assuming *or using medical* titles.

Provided that nothing in this section shall apply to the use by any person of any title, description, or addition which, prior to the commencement of this Act, he used in virtue of any degree, diploma, license or certificate conferred upon, or granted or issued to, him.

7. *No Court shall take cognizance of an offence punishable under this Act, except upon complaint made by order of the Local Government, or upon complaint made, with the previous sanction of the Local Government, by a Council of Medical Registration established by any enactment for the time being in force in the province.*

Cognizance of offences.

8. *No Court inferior to that of a Presidency Magistrate or a Magistrate of the first class shall try any offence punishable under this Act.*

Jurisdiction of Magistrates.

SCHEDULE.

(*See section 3.*)

1. Every University established by an Act of the Governor General in Council.
2. The State Medical Faculty in Bengal.
3. The College of Physicians and Surgeons of Bombay.
4. *The Board of Examiners, Medical College, Madras.*

A. P. MUDDIMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Indian Legislative Council on the 1st day of March, 1916 :—

No. 3 OF 1916.

A Bill to amend the Indian Tariff Act, 1894, and for other purposes.

WHEREAS it is expedient to amend the Indian Tariff Act, 1894, and to repeal so far as it relates to this Act, and re-enact with amendments section 22 of the Sea Customs Act, 1878; It is hereby enacted as follows :—

III of 1894.

III of 1878.

1. (*1*) This Act may be called the Indian Tariff (Amendment) Act, 1916.

Short title and retrospective effect.

(*2*) It shall be deemed to have come into force on the 1st day of March, 1916, and any sums due on account of new duties leviable thereunder or of any deficiency between the duties which have been paid and the duties which are leviable thereunder shall be deemed to be duties short levied within the meaning of section 39 of the Sea Customs Act, 1878, and that Act shall apply accordingly.

III of 1878

2. In this Act the Indian Tariff Act, 1894 (hereinafter referred to as the said Act), means the Indian Tariff Act, 1894, as subsequently amended.

Definition.

III of 1894.

3. For section 3 of the said Act the following section shall be substituted, namely :—

Substitution of new section 3 in Act VIII of 1894.

"3 (*1*) There shall be levied and collected in every port to which this Act applies, the duties specified in the second and third schedules.

(*2*) The Governor General in Council may, by notification in the Gazette of India, fix, for the purpose of levying the said duties, tariff values of any articles enumerated, either specifically or under general headings, in the said schedules as chargeable with duty *ad valorem*, and may alter any tariff values for the time being in force.

(*3*) Different tariff values may be fixed for different classes or descriptions of the same article."

4. For the second, third, fourth and fifth schedules of the said Act, the schedules contained in the first schedule to this Act shall be substituted.

Substitution of new schedules for schedules II, III, IV and V of Act VIII of 1894.

5. The enactments specified in the second schedule to this Act are repealed to the extent specified in the fourth column thereof.

Repeals.

SCHEDULE I.

SCHEDULES TO BE SUBSTITUTED IN THE INDIAN TARIFF ACT, 1894.

(See section 4).

"SCHEDULE II—IMPORT TARIFF.

PART I.

Articles which are free of duty.

No.	Names of Articles.
	I.—Food, Drink and Tobacco—
1	HOPS.
2	SALT imported into British India and issued, in accordance with rules made with the previous sanction of the Governor-General in Council, for use in any process of manufacture; also salt imported into the port of Calcutta and issued with the sanction of the Government of Bengal to manufacturers of glazed stone-ware; also salt imported into any port in the provinces of Bengal and Bihar and Orissa and issued, in accordance with rules made with the previous sanction of the Governor-General in Council, for use in curing fish in those provinces. (For the general duty on salt, see No. 39.)
	II.—Raw materials and produce and articles mainly unmanufactured—
	HIDES AND SKINS, RAW.
3	HIDES AND SKINS, raw or salted.
	SEEDS.
4	OIL-SEEDS imported into British India by sea from the territories of any Native Prince or Chief in India.
	TEXTILE MATERIALS.
5	COTTON, raw.
6	WOOL, raw.
	MISCELLANEOUS.
7	MANURES, all sorts, including animal bones and the following chemical manures :—Basic slag, nitrate of soda, muriate of potash, sulphate of potash, kainit salts, nitrate of lime, calcium cyanamide and mineral superphosphates.
8	PULP OF WOOD, RAGS and other paper-making materials.
	III.—Articles wholly or mainly manufactured—
	APPAREL.
9	UNIFORMS AND ACCOUTREMENTS appertaining thereto, imported by a public servant for his personal use.
	ARMS, AMMUNITION AND MILITARY STORES.
10	The following classes of ARMS, AMMUNITION AND MILITARY STORES :— (*a*) Articles falling under the 5th, 6th, 8th, 9th or 10th item of No. 45, when they appertain to a firearm falling under the 1st or 3rd item and are fitted into the same case with such firearm. (*b*) Arms forming part of the regular equipment of an officer entitled to wear diplomatic, military, naval or police uniform. (*c*) A sword, a revolver, or a pair of pistols, when accompanying an officer of His Majesty's regular forces or a commissioned officer of a volunteer corps, or certified by the commandant of the corps to which such officer belongs, or, in the case of an officer not attached to any corps, by the officer commanding the station or district in which such officer is serving, to be imported by the officer for the purpose of his equipment. 	(*h*) Morris tubes and patent ammunition imported by officers commanding British and Indian regiments or volunteer corps for the instruction of their men.
	CHEMICALS, DRUGS AND MEDICINES.
11	ANTI-PLAGUE SERUM.
12	QUININE and other alkaloids of cinchona.
	HARDWARE, IMPLEMENTS AND INSTRUMENTS.
13	The following AGRICULTURAL IMPLEMENTS, when constructed so that they can be worked by manual or animal power, namely, winnowers, threshers, mowing and reaping machines, elevators, seed-crushers, chaff-cutters, root-cutters, horse and bullock gears, ploughs, cultivators, scarifiers, harrows, clod-crushers, seed-drills, hay-tedders, and rakes.
14	The following DAIRY APPLIANCES, when constructed so that they can be worked by manual or animal power, namely, cream separators, milk sterilizing or pasteurizing plant, milk aërating and cooling apparatus, churns, butter dryers, and butter workers.
•15	INSTRUMENTS, APPARATUS and APPLIANCES, imported by a passenger as part of his personal baggage and in actual use by him in the exercise of his profession or calling.
16	WATER-LIFTS, SUGAR-MILLS, OIL-PRESSES, and parts thereof, when constructed so that they can be worked by manual or animal power.
	MACHINERY.
17	MACHINERY AND COMPONENT parts thereof as defined in No. 58 imported by the owner of a cotton spinning or weaving mill and proved to the satisfaction of the Collector of Customs to be intended for use in a cotton spinning or weaving mill.
18	The following ARTICLES used in the manufacture of cotton, namely, bobbins (warping), forks for looms, healds, heald cords, heald knitting needles, laces, lags and needles for dobbies, pickers (buffalo and others), picking bands, picking levers, picking sticks (over and under), reed pliers, reeds, shuttles (for power looms), springs for looms, strappings, and weft forks.
19	DRAWING-IN-FRAMES imported by the owner of a cotton weaving mill and proved to the satisfaction of the Collector of Customs to be intended for use in the weaving of cotton.
	METALS.
20	CURRENT SILVER, NICKEL, BRONZE, AND COPPER COIN of the Government of India.
21	GOLD BULLION and coin.
	PAPER.
22	TRADE CATALOGUES AND ADVERTISING CIRCULARS imported by packet, book, or parcel post.
	YARNS AND TEXTILE FABRICS.
23	COTTON TWIST AND YARN, and COTTON SEWING OR DARNING THREAD.
24	SECOND-HAND OR USED GUNNY BAGS made of jute.
	MISCELLANEOUS.
25	ART, the following works of :—(1) statuary and pictures intended to be put up for the public benefit in a public place, and (2) memorials of a public character intended to be put up in a public place, including the materials used, or to be used in their construction, whether worked or not.
26	BOOKS, printed, including covers for printed books, maps, charts, and plans, proofs, music and manuscripts.

SCHEDULE II—IMPORT TARIFF.

PART I—*concld.*

Articles which are free of duty.

No.	Names of Articles.
27	The following articles, when imported by the owner of a cotton weaving mill and proved to the satisfaction of the Collector of Customs to be intended for use in the weaving of cotton or the baling of woven cotton goods :—
	Aniline blue, bisulphate of soda, China clay, chloride of magnesium, chloride of zinc, dressalin, Epsom salts, farina, Farinina, flannel taping, Glauber salts, glutina, glycerine substitutes, heald varnish, hoop iron, hoop steel, rivets for bales, sewing needles, sizing paste, sizing wax, soda ash, starch, velvet pulp.
	IV.—Miscellaneous and unclassified—
28	ANIMALS, living, all sorts.
29	SPECIMENS ILLUSTRATIVE OF NATURAL SCIENCE, including also antique coins and medals.

SCHEDULE II—IMPORT TARIFF.

PART II.

Articles which are liable to duty at special rates.

No.	Names of articles.	Unit or method of assessment.	Rate of duty.
	I.—Food, Drink and Tobacco—		R A.
	FISH.		
30	FISH, SALTED, wet or dry . . .	Indian maund of 82⅔ lbs. avoirdupois weight.	Such rate or rates of duty not exceeding twelve annas as the Governor-General in Council may, by notification in the *Gazette of India*, from time to time prescribe.
	LIQUORS.		
31	ALE, Beer, and Porter . . .	Imperial gallon or 6 quart bottles.	Four annas and six pies.
32	CIDER and other fermented liquors .	Ditto.	Ditto.
33	SPIRIT, which has been rendered effectually and permanently unfit for human consumption	*Ad valorem* . .	7½ per cent.
34	PERFUMED SPIRITS	Imperial gallon or 6 quart bottles.	18 12
35	LIQUEURS, Cordials, Mixtures and other preparations containing spirit—		
	(*a*) Entered in such a manner as to indicate that the strength is not to be tested.	Ditto.	14 10
	(*b*) If tested	Imperial gallon or 6 quart bottles of the strength of London proof.	11 4 and the duty to be increased or reduced in proportion as the strength of the spirit exceeds or is less than London proof.
36	All other sorts of SPIRIT . . .	Ditto.	Ditto.
37	WINES—		
	Champagne and all other sparkling wines not containing more than 42 per cent of proof spirit.	Imperial gallon or 6 quart bottles.	4 6
	All other sorts of wines not containing more than 42 per cent. of proof spirit.	Ditto.	1 12
	Provided that all sparkling and still wines containing more than 42 per cent of proof spirit shall be liable to duty at the rate applicable to All other sorts of Spirit.		
	SUGAR.		
38	SUGAR, all sorts, including Molasses and Saccharine produce of all sorts, but excluding confectionery (see No. 74).	*Ad valorem.*	10 per cent.
	OTHER FOOD AND DRINK.		
39	SALT, excluding salt exempted under No. 2.	Indian maund of 82⅔ lbs. avoirdupois weight.	The rate at which excise duty is for the time being leviable on salt manufactured in the place where the import takes place.
	TOBACCO.		
40	TOBACCO, unmanufactured . .	Pound.	1 0
41	CIGARS AND CIGARETTES . . .	*Ad valorem.*	50 per cent.
42	All other sorts of TOBACCO manufactured	Pound.	

SCHEDULE II—IMPORT TARIFF.

PART II—*contd.*

Articles which are liable to duty at special rates.

No.	Names of articles.	Unit or method of assessment.	Rate of duty.
	II.—Raw materials and produce and articles mainly unmanufactured—		R A.

43	COAL, COKE AND PATENT FUEL . .	Ton.	0 8
	OILS.		
44	PETROLEUM, including also naphtha and the liquids commonly known by the names of rock-oil, Rangoon oil, Burma oil, kerosine, paraffin oil, mineral oil, petroline, gasoline, benzol, benzoline, benzine, and any inflammable liquid which is made from petroleum, coal, schist, shale, peat or any other bituminous substance, or from any products of petroleum, but excluding the following classes of petroleum :— Petroleum which has its flashing point at or above two hundred degrees of Fahrenheit's thermometer and is proved to the satisfaction of the Collector of Customs to be intended for use exclusively for the batching of jute or other fibre, or for lubricating purposes. Petroleum which has its flashing point at or above one hundred and fifty degrees of Fahrenheit's thermometer and is proved to the satisfaction of the Collector of Customs to be intended for use exclusively as fuel or for some sanitary or hygienic purpose (*see* No. 80).	Imperial gallon.	One anna and six pies.
	III.—Articles wholly or mainly manufactured—		
	ARMS, AMMUNITION AND MILITARY STORES.		
45	Subject to the exemptions specified in No. 10—		
	(1) Firearms other than pistols, including gas and air-guns and rifles.	Each	50 0
	(2) Barrels for the same, whether single or double.	„	30 0
	(3) Pistols	„	15 0
	(4) Barrels for the same, whether single or double.	„	10 0
	(5) Main springs and magazine springs for firearms, including gas guns and rifles.	„	8 0
	(6) Gun stocks and breech blocks .	„	5 0
	(7) Revolver-cylinders, for each cartridge they will carry.	„	2 8
	(8) Actions (including skeleton and waster), breech bolts and their heads, cocking pieces, and locks (for muzzle-loading arms).	„	1 8
	(9) Machines for making, loading, or closing cartridges for rifled arms.	„	10 0
	(10) Machines for capping cartridges for rifled arms.	„	2 8
			or 20 per cent. *ad valorem* whichever is higher.
			Proviso 1.—No duty in excess of 20 per cent. *ad valorem* shall be levied upon any of the articles specified in items Nos. 1 to 10 of this entry when they are imported in reasonable quantity, for his own private use, by any person lawfully entitled to possess the same.

SCHEDULE II—IMPORT TARIFF.

PART II—*concld.*

Articles which are liable to duty at special rates.

No.	Names of articles.	Unit or method of assessment.	Rate of duty.
			R A.
			Proviso 2.—When any articles which have been otherwise imported, and upon which duty has been levied or is leviable under items Nos. 1 to 10, are purchased retail from the importer by a person lawfully entitled as aforesaid, in reasonable quantity for his own private use, the importer may apply to the Collector of Customs for refund or remission (as the case may be) of so much of the duty thereon as is in excess of 20 per cent. *ad valorem*; and if such Collector is satisfied as to the identity of the articles and that such importer is in other respects entitled to such refund or remission, he shall grant the same accordingly.
46	GUNPOWDER for cannons, rifles, guns, pistols and sporting purposes.	*Ad valorem* . . .	20 per cent.
47	Subject to the exemptions specified in No. 10 all articles other than those specified in entry No. 45 which are ARMS OR PARTS OF ARMS within the meaning of the Indian Arms Act (excluding springs used for air-guns which are dutiable as hardware, under No. 97), all tools used for cleaning or putting together the same, all machines for making, loading, closing or capping cartridges for arms other than rifled arms and all other sorts of ammunition and military stores, and any articles which the Governor General in Council may by notification in the Gazette of India declare to be ammunition or military stores for the purposes of this Act.	*Ad valorem* . . .	20 per cent.
	CHEMICALS, DRUGS AND MEDICINES.		
48	OPIUM and its alkaloids . . .	Seer of 80 tolas . .	24 0
	METALS.		
49	SILVER, BULLION OR COIN, not otherwise specified (*see* Nos. 20 and 29).	Ounce . . .	0 4
50	SILVER PLATE, silver thread and wire, and silver manufactures, all sorts.	*Ad valorem* . . .	15 per cent. Provided that where the silver contained in an article can be ascertained or where an official or recognized certificate of assay in such form as the Government of India may prescribe, is presented showing the amount of silver contained in an article, the Collector of Customs shall levy duty at the rate of 4 annas per ounce on the amount of silver so determined, and at the rate of 7½ per cent. on the difference between the value of such silver calculated at the market value of silver and the real value of the article.
	TEXTILE FABRICS.		
51	COTTON piece goods, hosiery, thread other than sewing or darning thread and all other manufactured cotton goods not otherwise specified.	*Ad valorem* . . .	3½ per cent.

SCHEDULE II—IMPORT TARIFF.

PART III.

Articles which are liable to duty at 2½ per cent. *ad valorem*.

No.	Names of Articles.
	I.—Food, Drink and Tobacco—
	GRAIN, PULSE AND FLOUR.
52	GRAIN AND PULSE, all sorts, including broken grain and pulse, but excluding flour (*see* No. 71).
	PROVISIONS AND OILMAN'S STORES.
53	VINEGAR in casks.
	II.—Raw materials and produce and articles mainly unmanufactured—
	METALLIC ORES AND SCRAP IRON OR STEEL FOR RE-MANUFACTURE.
54	IRON OR STEEL, old.
	WOOD AND TIMBER.
55	FIREWOOD.
	III.—Articles wholly or mainly manufactured—
	CHEMICALS, DRUGS AND MEDICINES.
56	COPPERAS, green.
	HARDWARE, IMPLEMENTS AND INSTRUMENTS.
57	TELEGRAPHIC INSTRUMENTS AND APPARATUS, and parts thereof, imported by or under the orders of a railway company.
	MACHINERY.
58	MACHINERY, namely, prime-movers and component parts thereof, including boilers and component parts thereof; also including locomotive and portable engines, steam-rollers, fire engines, and other machines in which the prime-mover is not separable from the operative parts. MACHINERY (and component parts thereof), meaning machines or sets of machines to be worked by electric, steam, water, fire or other power not being manual or animal labour, or which, before being brought into use, require to be fixed with reference to other moving parts; and including belting of all materials for driving machinery. Provided that the term does not include tools and implements to be worked by manual or animal labour, and provided also that only such articles shall be admitted as component parts of machinery as are indispensable for the working of the machinery and are, owing to their shape or to other special quality, not adapted for any other purpose. *Note.*—This entry includes machinery and component parts thereof made of substances other than metal, but excludes the articles exempted under No. 17, No. 18 and No. 19.
	METALS—IRON AND STEEL.
59	IRON, angle. „ bar, rod and channel, including channel for carriages. „ pig. „ rice bowls.

SCHEDULE II—IMPORT TARIFF.

PART III—*contd.*

Articles which are liable to duty at 2½ per cent. *ad valorem.*

No.	Names of Articles.
60	IRON OR STEEL, anchors and cables.
	„ „ beams, joists, pillars, girders, screw piles, bridge work and other such descriptions of iron or steel, imported exclusively for building purposes; including also ridging, guttering and continuous roofing.
	„ „ bolts and nuts, including hook-bolts and nuts for roofing.
	„ „ hoops and strips.
	„ „ nails, rivets and washers, all sorts.
	„ „ pipes and tubes and fittings therefor, such as bends, boots, elbows, tees, sockets, flanges and the like.
	„ „ rails, chairs, sleepers, bearing and fish-plates, spikes (commonly known as dog-spikes), switches and crossings, other than those described in No. 63, also lever-boxes, clips and tie-bars.
	„ „ sheets and plates, all sorts excluding discs and circles which are dutiable under No. 104.
	„ „ wire, including fencing wire and wire-rope, but excluding wire-netting which is dutiable under No. 104.
61	STEEL, angle.
	„ bar, rod, and channel, including channel for carriages.
	„ cast including spring blistered and tub steel.
	„ ingots, blooms, billets and slabs.
	METALS OTHER THAN IRON AND STEEL.
62	LEAD sheets, for tea-chests.
	RAILWAY PLANT AND ROLLING STOCK.
63	RAILWAY MATERIAL for permanent-way and rolling-stock, namely, cylinders, girders, and other material for bridges, rails, sleepers, bearing and fish-plates, fish-bolts, chairs, spikes, crossings, sleeper fastenings, switches, interlocking apparatus, brake gear, couplings and springs, signals, turn-tables, weigh-bridges, engines, tenders, carriages, wagons, traversers, trollies, trucks, and component parts thereof; also the following articles when imported by or under the orders of a railway company, namely, cranes, water cranes, water tanks, and standards, wire and other materials for fencing.
	Provided that for the purpose of this entry "railway" means a line of railway subject to the provisions of the Indian Railways Act, 1890, and includes a railway constructed in a Native State under the suzerainty of His Majesty and also such tramways as the Governor-General in Council may, by notification in the *Gazette of India*, specifically include therein.
	Provided also that only such articles shall be admitted as component parts of railway material as are indispensable for the working of railways and are, owing to their shape or to other special quality, not adapted for any other purpose.
	MISCELLANEOUS.
64	PRINTING AND LITHOGRAPHING MATERIAL, namely, presses, type, ink, brass rules, composing sticks, chases, imposing tables, and lithographic stones, stereo-blocks, roller moulds, roller frames and stocks, roller composition, standing screw and hot presses, perforating machines, gold blocking presses, stereotyping apparatus, metal furniture, paper folding machines, and paging and numbering machines, but excluding paper (*see* No. 106).
65	RACKS for the withering of tea leaf.
66	SHIPS AND OTHER VESSELS for inland and harbour navigation, including steamers, launches, boats and barges, imported entire or in sections.
67	TEA-CHESTS of metal or wood, whether imported entire or in sections, provided that the Collector of Customs is satisfied that they are imported for the purpose of the packing of tea for transport in bulk.

SCHEDULE II—IMPORT TARIFF.

PART IV.

Articles which are liable to duty at 7½ per cent. *ad valorem*.

No.	Names of Articles.
	I.—Food, Drink and Tobacco—
	FISH.
68	FISH, excluding salted fish (*see* No. 30).
69	FISHMAWS, including singally and sozille, and sharkfins.
	FRUITS AND VEGETABLES.
70	FRUITS AND VEGETABLES, all sorts, fresh, dried, salted or preserved.
	GRAIN, PULSE AND FLOUR.
71	FLOUR.
	PROVISIONS AND OILMAN'S STORES.
72	PROVISIONS AND OILMAN'S STORES AND GROCERIES, all sorts, excluding vinegar in casks (*see* No. 53).
	SPICES.
73	SPICES, all sorts
	SUGAR.
74	CONFECTIONERY.
	TEA.
75	TEA.
	OTHER FOOD AND DRINK.
76	COFFEE.
77	All other sorts of Food and Drink not otherwise specified.
	II.—Raw materials and produce and articles mainly unmanufactured—
	GUMS, RESINS AND LAC.
78	GUMS, RESINS AND LAC, all sorts.
	METALLIC ORES
79	METALLIC ORES, all sorts.
	OILS.
80	All sorts of animal, essential, mineral, and vegetable non-essential OILS, excluding petroleum as defined in No. 44, but including—
	Petroleum which has its flashing point at or above two hundred degrees of Fahrenheit's thermometer and is proved to the satisfaction of the Collector of Customs to be intended for use exclusively for the batching of jute or other fibre or for lubricating purposes; and
	Petroleum which has its flashing point at or above one hundred and fifty degrees of Fahrenheit's thermometer and is proved to the satisfaction of the Collector of Customs to be intended for use exclusively as fuel or for some sanitary or hygienic purpose.
	SEEDS.
81	SEEDS, all sorts, excluding oil-seeds imported into British India by sea from the territories of any Native Prince or Chief in India (*see* No. 4).

SCHEDULE II—IMPORT TARIFF.

PART IV—*contd.*

Articles which are liable to duty at 7½ per cent. *ad valorem.*

No.	Names of Articles.
	TALLOW, STEARINE AND WAX.
82	TALLOW AND STEARINE, including grease and animal fat, and WAX of all sorts not otherwise specified.
	TEXTILE MATERIALS.
83	TEXTILE MATERIALS, the following :—
	Silk waste, and raw silk including cocoons, raw flax, hemp, jute and all other unmanufactured textile materials not otherwise specified.
	WOOD AND TIMBER.
84	WOOD AND TIMBER, all sorts, not otherwise specified, including all sorts of ornamental wood.
	MISCELLANEOUS.
85	CANES AND RATTANS.
86	COWRIES, and SHELLS.
87	IVORY, unmanufactured.
88	PRECIOUS STONES AND PEARLS, unset.
89	All other raw materials and produce and articles mainly unmanufactured, not otherwise specified.
	III.—Articles wholly or mainly manufactured—
	APPAREL.
90	APPAREL, including drapery, boots and shoes, and military and other uniforms and accoutrements, but excluding uniforms and accoutrements exempted from duty under No. 9, and silver thread (*see* No. 50).
	ARMS, AMMUNITION AND MILITARY STORES.
91	EXPLOSIVES, namely, blasting gunpowder, blasting gelatine, blasting dynamite, blasting roburite, blasting tonite, and all other sorts, including detonators and blasting fuse.
	CARRIAGES AND CARTS.
92	CARRIAGES AND CARTS, including motor cars, motor cycles and motor wagons, bicycles, tricycles, jinrikshas, bath chairs, perambulators, trucks, wheelbarrows, and all other sorts of conveyances and component parts thereof.
	CHEMICALS, DRUGS AND MEDICINES.
93	CHEMICALS, DRUGS AND MEDICINES, all sorts, not otherwise specified.
	CUTLERY, HARDWARE, IMPLEMENTS AND INSTRUMENTS.
94	CLOCKS AND WATCHES and parts thereof.
95	CUTLERY.
96	ELECTROPLATED WARE.
97	HARDWARE, IRONMONGERY AND TOOLS, all sorts, not otherwise specified.
98	All other sorts of IMPLEMENTS, INSTRUMENTS, APPARATUS AND APPLIANCES and parts thereof, not otherwise specified.
	DYES AND COLOURS.
99	DYEING AND TANNING SUBSTANCES, all sorts, and paints and colours and painters' materials, all sorts.

SCHEDULE II—IMPORT TARIFF.

PART IV—*contd.*

Articles which are liable to duty at 7½ per cent. *ad valorem.*

No.	Names of Articles.
	FURNITURE, CABINETWARE AND MANUFACTURES OF WOOD.
100	FURNITURE, CABINETWARE and all other manufactures of wood not otherwise specified.
	GLASSWARE AND EARTHENWARE.
101	GLASS AND GLASSWARE, all sorts, Chinese and Japanese ware, lacquered ware, earthenware, china and porcelain.
	HIDES AND SKINS AND LEATHER.
102	HIDES AND SKINS not otherwise specified, LEATHER AND LEATHER MANUFACTURES, all sorts, not otherwise specified.
	MACHINERY.
103	MACHINERY and component parts thereof meaning machines or parts of machines to be worked by manual or animal labour.
	METALS—IRON AND STEEL.
104	All sorts of IRON AND STEEL and manufactures thereof, not otherwise specified.
	METALS OTHER THAN IRON AND STEEL.
105	All sorts of METALS OTHER THAN IRON AND STEEL, and manufactures thereof, not otherwise specified.
	PAPER, PASTEBOARD AND STATIONERY.
106	PAPER AND ARTICLES MADE OF PAPER AND PAPIER MACHÉ, PASTEBOARD, MILLBOARD, AND CARDBOARD all sorts, and STATIONERY, including ruled or printed forms and account and manuscript books, labels, advertising circulars, sheet or card almanacs and calendars, Christmas, Easter, and other cards, including cards in booklet form, including also wastepaper and old newspapers for packing, but excluding trade catalogues and advertising circulars imported by packet, book, or parcel post (*see* No. 22).
	YARNS AND TEXTILE FABRICS.
107	YARNS AND TEXTILE FABRICS, that is to say :— Flax twist and yarn, and manufactures of flax ; Haberdashery and Millinery ; Hemp manufactures ; Hosiery, excluding cotton hosiery (*see* No. 51) ; Jute twist and yarn, and jute manufactures, excluding second-hand or used gunny bags (*see* No. 24) ; Silk yarn, noils, and warps, silk thread, silk piece-goods, and other manufactures of silk ; Woollen yarn, knitting wool, and other manufactures of wool including felt ; All other sorts of yarns and textile fabrics, not otherwise specified.
	MISCELLANEOUS.
108	ART, works of, excluding those specified in No. 25.
109	BRUSHES AND BROOMS.

SCHEDULE II—IMPORT TARIFF.

PART IV—*concld.*

Articles which are liable to duty at 7½ per cent. *ad valorem.*

No.	Names of Articles.
110	BUILDING AND ENGINEERING MATERIALS, including asphalt, bricks, cement, chalk and lime, clay, pipes of earthenware, tiles, and all other sorts of building and engineering materials not otherwise specified.
111	CANDLES.
112	CORDAGE AND ROPE AND TWINE OF VEGETABLE FIBRE.
113	FIREWORKS.
114	FURNITURE, TACKLE AND APPAREL, not otherwise described, for steam, sailing, rowing and other vessels.
115	IVORY, manufactured.
116	JEWELLERY AND JEWELS, including gold plate and other manufactures of gold, but excluding silver plate and other manufactures of silver (see No. 50).
117	MATCHES.
118	MATS AND MATTING.
119	OILCAKES.
120	OILCLOTH AND FLOOR CLOTH.
121	PACKING—ENGINE AND BOILER—all sorts, excluding packing forming component part of any article included in Nos. 58 and 63.
122	PERFUMERY, excluding perfumed spirits (*see* No. 34).
123	PITCH, TAR AND DAMMER.
124	POLISHES AND COMPOSITIONS.
125	PRINTS, ENGRAVINGS AND PICTURES, including photographs and picture-cards.
126	RUBBER tyres for motors and motor cycles, and rubber tubes for tyres, and other manufactures of rubber, not otherwise specified.
127	SMOKERS' REQUISITES, excluding tobacco (*see* Nos. 40 to 42).
128	SOAP.
129	STARCH AND FARINA.
130	STONE AND MARBLE, and articles made of stone and marble.
131	TOILET REQUISITES, not otherwise specified.
132	TOYS, playing cards and requisites for games and sports.
133	UMBRELLAS, including parasols and sunshades, and fittings therefor.
134	All other articles wholly or mainly manufactured, not otherwise specified.
	IV.—Miscellaneous and unclassified—
135	CORAL.
136	FODDER, bran and pollards.
137	All other articles not otherwise specified, including articles imported by post.

"SCHEDULE III.—EXPORT TARIFF.

No.	Names of Articles.	Per	Rate of duty. R	A.
	JUTE, other than Bimlipatam jute.			
1	RAW JUTE—			
	(1) Cuttings	Bale of 400 lbs.	0	10
	(2) Rejections	,, ,, ,,	1	8
	(3) All other descriptions . .	,, ,, ,,	2	4
2	JUTE MANUFACTURES, when not in actual use as coverings, receptacles or bindings for other goods—			
	(1) Sacking, (cloth, bags, twist, yarn, rope and twine).	Ton of 2,240 lbs.	10	0
	(2) Hessians and all other descriptions of jute manufactures not otherwise specified.	,, ,, ,,	16	0
	RICE.			
3	RICE, husked or unhusked, including rice flour, but excluding rice bran and rice dust, which are free.	Indian maund of 82⅔ lbs. avoirdupois weight.	0	3
	TEA.			
4	TEA	100 lbs.	1	8

"

SCHEDULE II.

REPEALS.

(See section 5).

No.	Year.	Short Title.	Extent of Repeal.
VIII	1878	The Sea Customs Act, 1878	Section 22 so far as it relates to this Act.
III	1896	The Indian Tariff Act (1894) Amendment Act, 1896.	The whole.
VIII	1910	The Indian Tariff (Amendment) Act, 1910 .	The whole.
VI	1911	The Indian Tariff (Amendment) Act, 1911 .	The whole.
XVII	1914	The Second Repealing and Amending Act, 1914	The entry in the first schedule regarding the Indian Tariff Act, 1894.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to revise the Indian Tariff Act of 1894 so as to enable the Government of India to obtain increased revenue from customs duties. It is proposed to raise to 7½ per cent. the general tariff rate of 5 per cent. on imported articles, which has remained unchanged since 1894; to enhance to 2½ per cent. the present privileged rate of one per cent. applicable to certain descriptions of iron and steel, and to impose import duties on a number of articles now free of duty. This will involve a considerable reduction in the articles which now appear in the free list. But, on the other hand, the free list in the new Tariff Schedule will include certain articles which have hitherto been exempted under executive orders only.

2. It is also proposed to make special increases in the duties applicable to arms and ammunition, beer, wines and spirits; cigars and cigarettes and other manufactured tobacco; sugar; silver plate and other silver manufactures.

3. The increase in the rate now applicable to arms and ammunition from 10 per cent. *ad valorem* to 20 per cent. is proposed on general and political grounds. It is not intended to alter the existing specific duties on certain items included under this head; but the Import Schedule provides that any article included in these items on which a specific duty is imposed shall pay, whichever is greater, the specific duty or duty at the rate of 20 per cent. *ad valorem* The present duty on ale, beer, porter and cider is 3 annas per gallon, and it is proposed to raise this to 4½ annas per gallon. A similar increase in the excise rate on beer produced in India is contemplated. The rates relating to spirits are recast in the Bill, partly to carry out the general policy of enhancement, and partly to avoid certain administrative difficulties which have arisen in connection with the treatment prescribed in 1910 for the assessment of liqueurs, cordials, perfumed spirits and toilet preparations. The rate for potable spirits will be raised to the level of the English rates, and the increase in the rate on denatured spirits follows the analogy of the increase in the general import tariff. It is also proposed to withdraw the preferential rate of R7-13-0 per proof gallon on spirits used in drugs, medicines or chemicals. The quantitative rate on cigars and cigarettes is to be replaced by an *ad valorem* rate of 50 per cent. This will raise to some extent the incidence of taxation on the cheaper and increase it materially on the dearer brands; will remove certain practical difficulties in applying the present quantitative rates and will add to the revenue. An increase in the rate of manufactured tobacco, other sorts, is proposed on the analogy of the increase in the case of cigars. The object of the increased duty on silver plate and other silver manufactures is to remove the present anomalous position under which Indian silversmiths and Indian manufacturers of silver thread and silverware are penalised through having to pay the special rate for silver on the raw material, while the imported manufactured article pays duty at the general 5 per cent. rate.

4. It is also proposed to levy export duties on jute and tea.

5. The Bill will, if passed into law, give effect to the above increases in and modifications of the existing duties from the 1st March, the date of its introduction.

6. This opportunity is being used to amend the Tariff and Sea Customs Acts in certain respects where experience has shown that amendment is desirable. In order to secure greater flexibility in the fixing of tariff values both in the interests of trade and of Government, tariff values will be omitted from the new Schedules and will in future in all cases be fixed by notification. Power will also be expressly taken to fix different tariff values for different classes or descriptions of the same article. The Import Schedule will also be re-arranged so as to group the different articles separately either in the free list or under the rates of duty to which they are respectively liable, an arrangement which for administrative purposes is more suitable than that pursued hitherto.

W. S. MEYER.

The 23rd February, 1916.

A. P. MUDDIMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Indian Legislative Council on the 1st day of March 1916 :—

No. 4 of 1916.

A Bill further to amend the Indian Income-Tax Act, 1886.

WHEREAS it is expedient further to amend the Indian Income-Tax Act, 1886 ; It is hereby enacted as follows :— of 1886.

Short title and commencement.

1. (*1*) This Act may be called the Indian Income-Tax (Amendment) Act, 1916.

(*2*) It shall come into force on the 1st day of April, 1916.

of 1886.

Amendment of section 4, Act II of 1886.

2. In section 4 of the Indian Income-Tax Act, 1886 (hereinafter called the said Act), for the figures "1886" the figures "1916" shall be substituted.

Amendment of section 5, Act II of 1886.

3. In section 5, clause (*j*) of the said Act, after the word "any" the words "company or" shall be inserted.

Amendment of section 31, Act II of 1886.

4. To section 31 of the said Act the following sub-section shall be added, namely :—

"(*3*) Any agreement made in accordance with the provisions of this section shall be determined, as regards any tax not already due thereunder, by any change, subsequent to the making of such agreement, in the rates at which the tax is assessable under Part II or Part IV, as the case may be, with effect from the date on which such change comes into force."

Amendment of section 33, Act II of 1886.

5. In section 33 of the said Act, the words "during or within three months after the end of the year" are hereby repealed.

Amendment of section Act II of 1886.

6. In sub-section (*1*) of section 38 of the said Act, after the word and numeral "Part IV" the following shall be inserted, namely, "for determining the procedure to be followed on applications for refund of the tax chargeable under this Act".

Insertion of new section 39A in Act II of 1886.

7. After section 39 of the said Act, the following section shall be inserted, namely :—

Limitation of claims for refund.

"39A. No claim for refund of tax under this Act shall be allowed, unless it is made within one year from the end of the year to which the claim relates."

Substitution of new Second Schedule to Act II of 1886.

8. For the Second Schedule to the said Act, the following Schedule shall be substituted, namely :—

"THE SECOND SCHEDULE.

SOURCES OF INCOME AND RATES OF TAX.

(See section 4.)

FIRST COLUMN.	SECOND COLUMN.
Sources of Income.	Rate of Tax.
PART I.	
SALARIES AND PENSIONS.	
1. Any salary, annuity, pension or gratuity paid in British India to or on behalf of any person residing in British India or serving on board a ship plying to or from British Indian ports, whether on account of himself or another person. 2. Any salary, annuity, pension or gratuity paid by the Government, or by a local authority established in the exercise of the powers of the Governor General in Council in that behalf, to or on behalf of a British subject within the dominions of a Prince or State in India in alliance with His Majesty.	(*a*) If the income amounts to Rs. 1,000 per annum, or Rs. 83-5-4 per mensem, but is less than Rs. 2,000 per annum or Rs. 166-10-8 per mensem—four pies in the rupee. (*b*) If the income amounts to Rs. 2,000 per annum or Rs. 166-10-8 per mensem, but is less than Rs. 5,000 or Rs. 416-10-8 per mensem—five pies in the rupee. (*c*) If the income amounts to Rs. 5,000 or Rs. 416-10-8 per mensem, but is less than Rs. 10,000 or Rs. 833-5-4 per mensem—six pies in the rupee. (*d*) If the income amounts to Rs. 10,000 or Rs. 833-5-4 per mensem, but is less than Rs. 25,000 or Rs. 2,083-5-4 per mensem—nine pies in the rupee. (*e*) If the income amounts to Rs. 25,000 or Rs. 2,083-5-4 per mensem or upwards—one anna in the rupee.
PART II.	
PROFITS OF COMPANIES.	
Profits of a company	One anna in the rupee on the whole of the net profits made in British India by the company during the year ending on the day on which the company's accounts have been last made up, or, if the company's accounts have not been made up within the year ending on the thirty-first day of March in the year immediately preceding that for which the assessment is to be made, then on the whole of the net profits so made during the year ending on the said thirty-first day of March. Provided that a shareholder in the company who satisfies the Collector that his annual income from all sources in the income tax year last preceding that in which his share of such profits was received, was less than any one, as the case may be; of the amounts tabulated below, shall be entitled to a refund, calculated on any dividend paid him by the company in regard to the profits made during the said period, at the rates specified against each such amount, namely :— Amount. — Refund. 1. Less than Rs. 1,000. — One anna in the rupee. 2. Rs. 1,000 or upwards but less than Rs. 2,000. — Eight pies in the rupee. 3. Rs. 2,000 or upwards but less than Rs. 5,000. — Seven pies in the rupee. 4. Rs. 5,000 or upwards but less than Rs. 10,000. — Six pies in the rupee. 5. Rs. 10,000 or upwards but less than Rs. 25,000. — Three pies in the rupee.

THE SECOND SCHEDULE—*contd.*

FIRST COLUMN.	SECOND COLUMN.
Sources of income.	Rate of Tax.
PART III.	
INTEREST ON SECURITIES.	
Interest becoming due on or after the first day of April, 1916, and payable in British India, on— (*a*) promissory notes, debentures, stock or other securities of the Government of India (including securities of the Government of India whereon interest is payable out of British India by draft on any place in British India), or (*b*) debentures or other securities for money issued by or on behalf of a local authority or company.	One anna in the rupee on such interest, Provided that, if the owner of the security satisfies the Collector that his annual income from all sources in the income-tax year last preceding that in which the interest is paid was less than any one, as the case may be, of the amounts tabulated below, he shall be entitled to a refund, calculated on any such interest, at the rates specified against each such amount, namely :— Amount. — Refund. 1. Less than Rs 1,000. — One anna in the rupee. 2. Rs. 1,000 or upwards but less than Rs. 2,000. — Eight pies in the rupee. 3. Rs. 2,000 or upwards but less than Rs. 5,000. — Seven pies in the rupee. 4. Rs. 5,000 or upwards but less than Rs 10,000. — Six pies in the rupee. 5. Rs. 10,000 or upwards but less than Rs 25,000. — Three pies in the rupee.
PART IV.	
OTHER SOURCES OF INCOME.	
Any source of income not included in Part I, Part II or Part III of this Schedule.	(*a*) If the annual income is assessed at— not less than Rs. 1,000 but less than Rs. 1,250 the tax shall be Rs. 20; not less than Rs. 1,250 but less than Rs. 1,500 the tax shall be Rs. 28; not less than Rs 1,500 but less than Rs. 1,750 the tax shall be Rs. 35; not less than Rs. 1,750 but less than Rs. 2,000 the tax shall be Rs. 42. (*b*) If the annual income is assessed at Rs. 2,000 or upwards but is less than Rs. 5,000—five pies in the rupee. (*c*) If the annual income is assessed at Rs. 5,000 or upwards but is less than Rs. 10,000—six pies in the rupee. (*d*) If the annual income is assessed at Rs. 10,000 or upwards but is less than Rs. 25,000 —nine pies in the rupee. (*e*) If the annual income is assessed at Rs. 25,000 or upwards—one anna in the rupee.

"

Repeal of sub-sections (3) and (4) of section 2 of Act XI of 1903.

9. Sub-sections (*3*) and (*4*) of section 2 of the Indian Income-Tax (Amendment) Act, 1903, are hereby repealed.

STATEMENT OF OBJECTS AND REASONS.

This Bill proposes to amend the Indian Income Tax Act, 1886 (Act II of 1886), with a view to obtaining additional revenue by means of a graduated scale of taxation applicable to all income, the tax on which has not actually become due by the 1st April 1916.

Existing exemptions and incomes below Rs. 5,000 will be left untouched; but it is proposed that larger incomes under Parts I and IV should pay six pies in the rupee if less than Rs. 10,000; nine pies in the rupee if not less than Rs. 10,000 but less than Rs. 25,000; and one anna in the rupee if amounting to Rs. 25,000 or more.

Income falling under Part II of the Second Schedule of the existing Act, that is, profits of companies, will be taxed at one anna in the rupee if the company's taxable profits in the year are not less than Rl,000. Income falling under Part III, that is, interest on securities, will also be taxed in the first instance at the one-anna rate. But in both cases individual shareholders or holders of securities will be granted abatement on the tax paid or complete exemption, as the case may be, if their total income of all kinds falls below one of the limits set forth in the graduated scale.

Clause 3 of the Bill provides for the exemption of profits of companies when these amount to less than Rs. 1,000 in the year. This follows the correct construction of the law as it stands at present, but it is considered desirable to insert an explicit provision to this effect.

Clause 4 of the Bill provides for the determination of compositions effected under section 31 of the existing Act when new rates of taxation come into operation, and is stated for possible future convenience in a permanent or general form.

The rules of assessment under Parts II and III of the amended Schedule prescribed in clause 8 provide for the grant of the personal abatements and exemptions, already mentioned, by a system of refunds. The amount of the refund admissible will be determined, for the convenience of the taxpayer himself as well as of the Administration, with reference to the total income of the preceding year. As the refund system, which the present Act only provides for expressly in cases falling under section 33, will thus assume increased importance, it is thought desirable, as in clause 6 of the Bill, to provide for power to make rules for determining the procedure to be followed on applications for refunds, and, as in clause 7, to apply a general time limit of one year to all refund claims, in lieu of the period of three months at present specifically prescribed for cases falling under section 33 of the existing Act.

Proceedings of the Indian Legislative Council.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915.
(5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Tuesday, the 22nd February, 1916.

PRESENT :

The Hon'ble SIR WILLIAM CLARK, K.C.S.I., C.M.G., *Vice*-President, *presiding*, and 48 Members, of whom 42 were Additional Members.

STATEMENT LAID ON THE TABLE.

The Hon'ble Sir Reginald Craddock:—" I beg to lay on the table a statement* regarding Press prosecutions under the Press Act, 1910, and in regard to newspapers which have ceased publication or whose securities have been enhanced, since the outbreak of the war, in reply to a question asked by the Hon'ble Khan Bahadur Mir Asad Ali Khan on the 1st October, 1915.

QUESTIONS AND ANSWERS.

The Hon'ble Maharaja Ranajit Sinha of Nashipur asked :—

Rise in the price of food-stuffs

1. " (*a*) Will the Government be pleased to state if the price of food-stuffs is now generally higher than that of the corresponding period of the previous year ?

(*b*) Do the Government propose to take any steps with a view to restricting the export of rice ? "

* *Vide* Appendix A, page 45 *post*.

[*Mr. Low; Rai Sita Nath Ray Bahadur; Sir R. W. Gillan.*] [22ND FEBRUARY, 1916.]

The Hon'ble Mr. Low replied:—

"(*a*) I lay on the table a statement * from which it will be seen that the prices of foodstuffs were not in the latter part of December 1915, the latest date for which figures for all India are available, generally higher than in the corresponding period of the preceding year. In many cases they were decidedly lower.

(*b*) The answer is in the negative. I may add that the price of rice in Calcutta has, it is understood, declined since the latter part of December last."

The Hon'ble Rai Sita Nath Ray Bahadur asked:—

Proposed Commercial Conference in London in June 1916.

2. "(*a*) Has the attention of the Government been drawn to the following statement which appeared in 'Capital' (published in Calcutta) of the 28th January last:—

'With a view to focussing the opinion of the commercial community in all parts of the Empire, the British Imperial Council of Commerce and Boards of Trade throughout the United Kingdom and British Dominions is convening a Conference in London in June next. A provisional programme has recently been circulated to the members for their consideration. It is expected that there will be a representative attendance of delegates from the Oversea Dominions and Dependencies, with which the Council is in constant consultation?'

(*b*) Has the Government of India, in its Commerce and Industry Department, received any intimation regarding the Conference referred to in (*a*)?

(*c*) If so, will the Government be pleased to place before the Council the information it has received?"

The Hon'ble Mr. Low replied:—

"(*a*) The reply is in the affirmative.

(*b*) and (*c*) The Government of India have received no such intimation."

The Hon'ble Rai Sita Nath Ray Bahadur asked:—

Scheme for a direct Railway line from Calcutta to Barisal vid Noapara or Khulna.

3. "(*a*) Will the Government be pleased to state what further progress since my previous question on the subject asked in Council on the 16th September, 1914, has been made in connection with the scheme for a direct Railway line from Calcutta to Barisal *viâ* Noapara or Khulna?

(*b*) Is it in contemplation, in this scheme, to have a junction somewhere near the Gournadi Police-station in the District of Backerganj, with one branch going to Barisal and another going to a point near the present Jhapur Ghât steamer station?

(*c*) If the answer to (*b*) is in the affirmative, does the scheme also contemplate that the branch going to Jhapur Ghât is to be connected by ferry steamer service with Chandpur (on the Assam-Bengal Railway System) on the other side of the Megna river?

(*d*) If the answers to (*b*) and (*c*) are in the affirmative, does the scheme provide a route which will be shorter than the existing route connecting Calcutta with the Assam-Bengal Railway System?"

The Hon'ble Sir R. W. Gillan replied:—

"(*a*) A detailed survey for a line of railway from Khulna *viâ* Gopalganj and Gournadi to Barisal with the branches mentioned in the reply to question (*b*) has been completed by the Eastern Bengal Railway. The views of the Government of Bengal are awaited.

(*b*) The scheme contemplates a junction at Gaila station, about 2½ miles west of Gournadi, from which point branches take off to Faridpur and Pinglakati Ghât.

* Not included in these Proceedings.

[22ND FEBRUARY, 1916.] [*Sir R. W. Gillan; Rai Sita Nath Ray Bahadur; Major-General Holloway; Mr. Low; Mr. Setalvad.*]

(*c*) A branch line from a point near Madaripur or Burghatta on the Faridpur Branch to a terminus on the main Ganges River, some 12 miles from Chandpur, which would permit of a wagon ferry connection with the latter, has been mentioned as a possible future extension, but forms no part of the scheme as actually drawn up.

(*d*) The scheme, together with the extension mentioned in the reply to question (*c*), if constructed, would provide a route shorter than the existing route connecting Calcutta with the Assam-Bengal Railway System."

The Hon'ble Rai Sita Nath Ray Bahadur asked :—

4. "(1) Has the Government given any contracts to firms and individuals in India for the supply of provisions and other articles for the purposes of the present war?

Names of firms and individuals given contracts for supplying provisions, etc., in connection with the present war

(2) If the answer to (1) is in the affirmative, will the Government be pleased to state—

(*a*) the names of such firms and individuals, and

(*b*) the nature of the provisions and other articles which they are to supply?"

The Hon'ble Major-General Holloway replied :—

"Many contracts have been given in India for supplies of all sorts required in the present war. Under foodstuffs alone, contracts for at least sixty different articles have been made at various places, but these contracts are made locally, and it is not thought that the circumstances justify the trouble and delay of compiling a complete list of them."

THE INDIAN PORTS (AMENDMENT) BILL.

The Hon'ble Mr. Low—"Sir, I beg to present the Report of the Select Committee on the Bill further to amend the Indian Ports Act, 1908."

THE HINDU AND MUSSULMAN DISPOSITION OF PROPERTY BILL.

The Hon'ble Mr. Setalvad:—"Sir, I beg to introduce the Bill which stands in my name, and to move that it be referred to the Select Committee mentioned on the Agenda.

"The Bill proposes to remove certain disabilities under which Hindus and Mussulmans labour in regard to the disposition of their property, and Members must have noticed that it is merely an enabling Bill, a Bill that enables Hindus and Mussulmans to dispose of their property in favour of unborn persons, if they choose to do so. At present what the Courts have held about dispositions of property by Hindus and Mussulmans is this, that it is not competent to a Hindu or Mussulman to make a trust settlement in favour of persons not born; that it is also not competent to him to make any bequest by his will in favour of unborn persons, the effect being that, if a bequest is made by a will in favour of persons who are not in existence at the date of the death of the testator, from which date in the eye of the law the will speaks, those people are not competent to take it. The results of this administration of the law are obviously very inconvenient, unjust and unfair. I will illustrate what I mean by giving one or two instances. Take, for instance, a Hindu or Mussulman having one son and one grandson. By his will he wants to provide for his son, and also for

his grandsons, not only the one grandson in existence at the time, but also for other grandsons that may be born to his son. If he, by his will, provides that his son should, for life, enjoy his property and that after the son's death all the grandsons in existence at the date of the death of the son should take the property; and if it happens that at the death of the testator there is only one grandson in existence, but that at the date of the death of the son there are three more grandsons in existence, then the result is that the one grandson who was in existence at the date of the testator's death takes all the property to the entire exclusion of the other three grandsons born to that son. You will see, therefore, that the most cherished intention and desire of the testator, in these circumstances, are absolutely defeated. Many more instances can be given in which the same thing happens, and every lawyer must be conversant with cases coming up in the Courts every day where, in this manner, the most cherished intentions and desires of both settlors and testators are absolutely defeated.

"And because of this rule which denies to Hindus and Muhammadans the power of disposing of their property in favour of unborn persons, marriage settlements to provide for the issue of a Mussulman or a Hindu marriage are impossible.

"Now, the reason why the Courts have held that Mussulmans and Hindus are incompetent to make dispositions in favour of unborn persons is this, namely, that both according to Hindu and Muhammadan law it is considered essential that for the validity of a gift, there should be delivery of possession, and an unborn person is incompetent to accept a gift or to take delivery of possession. It is therefore that the Courts have held that it is not competent to a Hindu or Muhammadan to make any bequest or to make any settlement in favour of a person who is not competent to take possession.

"Sir, the reason of this rule, requiring transfer of possession as essential to the validity of a gift, has no religious origin—there is nothing of religion in it. The reason for it is not to be found in any precept of Hindu or Muhammadan law. In fact, there is nothing in the Koran about delivery of possession. This insistence on delivery of possession with regard to the validity of gifts is to be found in all archaic systems of law and among all nations in their early stages of development. If you go to the ancient German law, you find that a conveyance is inconceivable and impossible without what is called 'livery of seisin.' Under that law, an elaborate ceremony had to be gone through in order to effect this 'livery of seisin.' The donor and donee go to the land; a knife is produced, a sod of turf is cut, the twig of a tree is broken off, and the donor then hands over the sod and the twig to the donee. The donor further hands over the knife with which he cuts the sod to the donee, who keeps it very carefully as material evidence of the transaction. Further, the donor takes off his hand the war-glove by which he is supposed to protect the land in battle and the donee puts it on: his hand is 'vested' or 'invested' with the land. The origin of the expression that 'land is vested' in a person, it is said, is to be traced to this ceremony. When under Roman influence writings came to be used, the signing or sealing was not the important thing, but the delivery of the parchment as symbol of the land was everything.

"In England, too, for several centuries delivery of possession was insisted on as an essential with regard to the validity of a conveyance or a gift, and we find the Courts in Bracton's time insisting on this delivery of possession being actual and real. The *donatio* by itself was nothing unless followed by *traditio*. But, Sir, all this has passed away as society developed and progressed, and in England all those archaic forms of delivery of possession have vanished. The same, Sir, would have happened with regard to Hindu and Muhammadan law in this country if their normal growth and development had not been arrested as it was (I shall presently show how) on the advent of British rule in India.

"By the Statute of 1781, being 21 Geo. III, Chapter 70, so far as Calcutta was concerned, the Hindu and Muhammadan personal law was assured to His Majesty's Indian subjects; and the same was done in 1897

[22ND FEBRUARY, 1916.] [*Mr. Setalvad.*]

by 37 Geo. III, Chapter 142, with regard to Bombay and Madras. Now these Statutes, enacted though they were with the beneficent object of preserving and securing to the people of India their ancient laws, have, in fact, had the effect of preventing their normal growth and development and not allowing them to adapt their systems to the needs of a progressive society. Hindu and Muhammadan law being thus assured to Indian subjects by those Statutes, the only source of that law was the ancient texts; and the Courts, in administering the Hindu and Muhammadan law, had to find that law in those ancient texts, and they administered the law rigidly as they found it in those texts. Sir, the result has been, that while, under the blessings of British rule, the Hindu and Muhammadan communities have progressed wonderfully in trade, in industries, in commerce and in acquisition of wealth, and while in matters of contract, evidence, etc., they have been given laws based on English law, their personal laws, affecting them most with regard to property, inheritance and succession, have failed to respond to the progressive needs of those societies. If, as I have said, the Hindu and Muhammadan laws had developed themselves normally, the present disability with which we are concerned in this Bill would certainly have disappeared. As I have shown, that disability works very serious injustice, and defeats the cherished intentions of many Hindus and many Muhammadans. That both communities have, for a long time past, wished to be liberated from this disability is, I submit, very clear from the fact that although, so far as Hindus are concerned, the Privy Council, as early as 1872, declared in the Tagore case this disability, you find hundreds of Hindus—and hundreds of Muhammadans, orthodox Shias and Sunnis—year after year, making wills and settlements in which they give property to unborn persons. And any lawyer in the land will be able to tell you that year after year hundreds of cases come before the Courts where these settlements and wills are produced and are declared invalid, so far as provision for unborn persons is concerned, thus defeating the most cherished desires of Hindu and Muhammadan testators and settlors. With regard to Muhammadans, I may point out that, so far as Shias are concerned, it has been held that it is open to them to create successive life estates; and Amir Ali, in his book on Muhammadan Law, points out that with regard to them it is doubtful whether a gift to an unborn person is invalid. He seems to think that such gifts are valid in their case. I am only pointing out this with a view to showing that, even according to the strict Muhammadan Law with regard to Shias, there are high authorities who maintain the opinion that there is no objection to their being allowed freedom in this respect. However that may be, I submit, Sir, that the real consciousness of those communities at the present day is in favour of the change I have advocated. There must be thousands of Hindus and Mussalmans who have property and who are most anxious in some manner to provide for their unborn progeny, and as the law stands at present they are effectually prevented from doing so. The whole object of the proposed legislation is to remove that disability.

"I may point out, Sir, that what is proposed by this Bill is not to enlarge in any manner the disposing power of a Hindu or a Muhammadan. *Ex hypothesi* the Bill only contemplates the removal of this disability in cases where otherwise there is a disposing power. What I mean is that it does not empower, or propose to empower any coparcener in a joint Hindu family to dispose of any property which it would otherwise not be competent to him to do. Equally, it does not propose to empower any Mussulman to will away his property to the extent of more than one-third. All that is contemplated is that within the present disposing power a Hindu or Muhammadan has, it shall be competent to him to exercise that power in favour of an unborn person which he is now prevented from doing. I may again emphasise the fact that this is merely an enabling Bill. If there are Hindus and Mussalmans who are of opinion that they should not and ought not to make any dispositions in favour of unborn persons, there is nothing in the Bill that compels them to do so. Any Hindu or Mussalman still holding the view that it is not right for him to dispose of property in favour of an unborn person need not do so. There is nothing in the Bill to compel him to do that; *but*

as regards those who do wish to do so, and that number is a very large one in the country, all that the Bill seeks is to remove a disability from those people and allow them to do what they want to do. As I have already pointed out, there is nothing religious about this insistence of delivery of possession; the Bill does not interfere in the least with any religious notions, and the real present-day consciousness of both the communities is against the present disability. All that the measure proposes to do is only to give legislative sanction to what the country and what the people, both Hindus and Mussalmans, have really wanted for a very very long time. I can say, Sir, how often in my professional career I have been consulted both by Hindus and Muhammadans, orthodox Hindus and Muhammadans, Shias and Sunnis, to show them any way by which they could get rid of this disability of making provision for unborn children and grand-children, and how disappointed they are when they are told that it was not possible under the law as it stood to do that; and my experience must also be the experience, I take it, of every lawyer in the land. Therefore, as I have submitted, all that I am seeking by this Bill to do is to place the Hindu and Mussalman communities on the same footing as the other communities in India, and leave them free,—they are not compelled by this Bill to do anything—if they so choose, to make provision for unborn persons, in favour of their children or grand-children or other relations who may be hereafter born. The Parsis and Christians have liberty to do so, let the Mussalmans and Hindus have the same liberty. Sir, I may refer to one noteworthy fact, *viz.*, that after this Bill had been published and the public became aware of it, it was reproduced at least in Bombay in all the daily English papers and in all the vernacular papers, and there has been not a note of dissent in the country with regard to it. If it had been felt as any measure which they did not want or which was against their views or cherished desires in the matter, that feeling would certainly by this time have found some expression in the public press; but as I have said not a note of dissent is sounded in any of the papers. As I have already pointed out, this Bill merely seeks to give legislative sanction to what both communities, Hindus and Mussalmans, have wanted for a long time. They will be relieved of this disability which, in practice, works very great injustice, and excludes from the enjoyment of property people whom testators and settlors intend to benefit, to their great disappointment. There may be questions of detail with regard to the provisions of the Bill which will have to be considered in Select Committee; and the actual form which the final legislation should take is a matter that will have to be threshed out in Select Committee.

"I see from the Agenda, Sir, that my Hon'ble and learned friend, Mr. Dadabhoy, has given notice of an amendment which in effect comes to this, that the Bill be not referred to Select Committee at this stage, but that further opinions be invited from the country."

The Hon'ble the Vice-President:—"Order, Order. The Hon'ble Member can speak on the amendment when it is moved; he cannot discuss it before Mr. Dadabhoy has moved his amendment."

The Hon'ble Mr. Setalvad:—"I then move that the Bill be referred to a Select Committee, consisting of the Hon'ble Sir Reginald Craddock, the Hon'ble Mr. G. R. Lowndes, the Hon'ble Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad, the Hon'ble Pandit Madan Mohan Malaviya, the Hon'ble Mr. C. H. Kesteven, the Hon'ble Mr. H. Wheeler, the Hon'ble Sir Ibrahim Rahimtoola, the Hon'ble Mr. Chakravarti Vijiaraghavachariar, the Hon'ble Mr. A. P. Muddiman, the Hon'ble Mr. J. G. Cumming, and myself, with instructions to report on or before the 24th of March, 1916."

The Hon'ble Mr. Dadabhoy—"Sir, I rise to say a few words at this stage on the proposed Bill generally, and particularly with reference to the amendment of which I have given notice. My Hon'ble friend has explained the object and scope of his Bill with ability, and has fully dealt

[22ND FEBRUARY, 1916.] [*Mr. Dadabhoy.*]

with the important modifications which it proposes to make in the existing law. The Bill, though brief, is very important, and seeks to effect a very important change, one might say a radical change, both in Hindu and Muhammadan Law. Sir, I do not propose to enter into any detailed examination of the several provisions of this Bill at this stage beyond remarking that the measure is of an enabling nature, and permits Hindus and Muhammadans to make transfers of property *inter vivos* and by testamentary dispositions for the benefit of unborn persons within the prescribed statutory limits. As the Calcutta High Court has laid down, the cardinal rule governing Hindu wills is that the person capable of taking under a will should be such a person as could take a gift *inter vivos* and therefore, must, either in fact or in contemplation of law, be in existence at the date of the death of the testator. The recent Indian case-law has also made it abundantly clear that, under the law as administered at present by our Courts, effect cannot be given to settlements and dispositions of property for the benefit of unborn persons. As my Hon'ble friend Mr. Setalvad has pointed out, the only object of his Bill is to vest powers in our Courts to carry out the settlor's or testator's intention which, at present, they are not legally competent to do. The rule of law about a gift or a bequest in favour of an unborn person, as far as I am aware and as has been pointed out by the Privy Council, is not sanctioned by any express authoritative text of Hindu Law. The scheme of settlement that a gift should take effect after the death of the donor and that subject to a prior limited interest, involves modes of disposition not contemplated by the old Hindu Law-givers. As Mr. Setalvad has pointed out, with them a gift meant an immediate divesting of the interests of the donor, and the vesting of the same in the donee. The Hindu Law of wills, though a natural development of the Hindu law of gift, in reality is a creation of the British Indian Courts and the British Indian Legislature. To remove, then, the restrictions on the powers of gift *inter vivos* as laid down in the Shastric texts and on testamentary dispositions, is to extend the basic principle of Hindu Law and the law relating to Hindu wills which follows Hindu Law. But, Sir, it would be more in conformity with the modern and enlightened opinions of the two great communities, Hindu and Muhammadan, that they should have power to make testamentary dispositions to the same extent and subject to the same statutory limitations as are allowed in the case of the other communities. The proposed modification of the law will place these two communities on a footing of equality with the other communities in British India.

"Again, the rule against perpetuities is maintained in its integrity by the insertion in the Bill of the provisions of the Transfer of Property Act in that behalf. As I have just remarked the provisions of the Bill, from the more enlightened point of view, may be regarded as suitable and acceptable, but my Hon'ble friend will have to justify his position fully and very strongly on the grounds of public necessity, public policy and expediency before he can expect a full measure of support from this Council or the public generally. As far as I am aware, though the proposed modification of the law is very desirable, no serious inconvenience has been felt by the Hindu or Muhammadan community by reason of the law rendering invalid transfers in favour of unborn persons. Moreover, Sir, the British Government has systematically upheld and recognised the policy of preserving the privileges and the personal laws of the people of this country. This policy of non-intervention has been ensured by an Act of Parliament, the preamble of which says—

'That the inhabitants should be maintained and protected in the enjoyment of all their ancient laws, usages, rights and privileges.'

And this policy, Sir, as the Council is aware, has been reiterated and re-enunciated in several later enactments, passed both in England and in India, and now forms the foundation of all Acts of the Governor General in Council relating to dispositions of property. In this connection the Law Commissioners have also expressed a very definite and strong view, and, Sir, I shall take the liberty of reading a passage from their report. They observe—

'Hindu and Muhammadan Law derive their authority respectively from Hindu and Muhammadan religion It follows that, as a British Legislature cannot make Muhammadan

or Hindu religion, so neither can it make Muhammadan or Hindu Law. A code of Muhammadan Law, or a digest of any part of that law, if it were enacted as such by the Legislative Council of India, would not be entitled to be regarded by Muhammadans as the very law itself, but merely as an expression of law, which possibly might be incorrect.'

Further on they observe—

'The Privy Council has already ruled that estates cannot be created by Hindus in contravention of the principles which underlie the Thellusson Act, or subject to conditions which are void for repugnancy'.

In these circumstances, Sir, it remains to be seen what measure of support and what reception this Bill would receive from the country.

"In my opinion the Bill, if the law is to be self-contained and comprehensive, does not go far enough; in a sense it is incomplete. The other sections of the Transfer of Property Act, such as sections 16, 17, 18, 22—29, 31—34, and even section 35, are so intimately connected with the sections which the Hon'ble Member has selected for adoption that, in my humble opinion, the Bill may defeat its purpose and is likely to engender difficulties in practice. Section 2 (*d*) of the Transfer of Property Act, 1882 (IV of 1882) lays down that nothing in Chapter II of that Act shall affect any rule of Hindu or Muhammadan Law; and according to the interpretation of the Privy Council and the High Courts, Hindu Law does not allow a gift in favour of a person who is not in existence at the date of the gift. Section 3 of the Hindu Wills Act, 1887 (XXI of 1887), has created similar disabilities as regards bequests by will. Sections 100 and 101 of the Indian Succession Act of 1865 cannot, according to the interpretation of the High Courts, apply to Hindu Wills, except with regard to dispositions in favour of persons in existence at the date of the death of the testator. This disability exists both as regards dispositions taking effect during a man's lifetime as well as in regard to those which are to take effect after the donor's death. The Bill before the Council is intended to remove the disability in the case of wills, but it is not clear that a similar legislation will not have to be undertaken either separately or by incorporation in this Bill, to remove the disability in the case of gifts also. In fact, I would rather extend the principle of the Bill to the interdependent sections of the Transfer of Property Act, and would make the whole of Chapter II of that Act applicable to Hindus and Muhammadans generally, although section 2, clause (3) was framed and added at the instance of the Indian Non-Official Members of the Council and purely out of deference to the supposed religious susceptibilities of Hindus and Muhammadans.

"Sir, I shall now say a word or two on the amendment, of which I have given due notice. My Hon'ble friend, in moving that this Bill be referred to a Select Committee, has asked that instructions may be issued to the Committee to report on this Bill on or before the 24th March next. My Hon'ble friend has also stated at the end of his speech that, since the publication of this Bill not a single note of dissent has been heard or received. Now, Sir, I shall briefly mention the circumstances under which this Bill has been published. A rather unusual procedure has been adopted in the present case. The Bill was allowed to be introduced under rule 23 of the Rules of Legislative Business by publication, and this Bill was published in the Gazette of India of the 22nd January 1916.

"I understand, Sir, that the Provincial Governments have been informally consulted and a sprinkling of non-official opinion has also been taken on this Bill. But I find that the publication of this Bill has only recently been made. In Madras, this Bill was published in the provincial gazette on the 18th of February,—barely a week ago; in Bombay and Bengal, it was published on the 17th of February; in the United Provinces, on the 18th of February; in Bihar and Orissa, on the 15th of February, and in the Provinces which I represent—the Central Provinces—on the 18th of February. My Hon'ble friend has asked this Council to believe that not a single note of dissent has been received. I appeal to this Council to say if the public have had sufficient time to express either a note of dissent or a note of approval on this Bill. This Bill was published barely a week ago, and I, for one, Sir, cannot understand

the reason why it should be so rushed through this Council. It is not a very urgent or emergent piece of legislation that it should be undertaken and passed through the Council this Session. It is a matter of principle, Sir, that all legislative measures, except those of a specially emergent character, must be referred to the country for an expression of public opinion before they are dealt with by this Council; and that is a wholesome principle. I therefore most respectfully, but at the same time most emphatically, protest against this Bill being rushed through the Council without giving the public a proper and adequate opportunity of expressing their opinions on it. Sir, I move my amendment not in any spirit of opposition. As I have pointed out, my entire sympathy is with the Hon'ble Member, and, so far as I am personally concerned, I hold with him that the Bill is a necessity; in fact, my Hon'ble friend has, in my opinion, rendered a public service by bringing this Bill forward and introducing it in the Council. But I cannot be a party to proceedings which will expedite the passage of this Bill through this Council in such a way. If the changes proposed by my Hon'ble friend will meet a public want, it will certainly strengthen our hands if we collect public opinion on it. If, on the other hand, there be reason to fear that the Bill will not receive public support, the necessity for a reference to the country becomes all the greater. On either hypothesis, the case for a reference to the country is extremely strong, and I therefore move the amendment which stands in my name, that the Bill be circulated for the purpose of eliciting public opinion thereon."

The Hon'ble Khan Bahadur Mian Muhammad Shafi:—"Sir, in rising to support the amendment moved by my Hon'ble friend, Mr. Dadabhoy, I propose to keep strictly within the scope of the amendment itself, and do not intend to discuss the merits of the Bill at this stage. As I understand it, except in cases of urgency, the ordinary procedure with regard to the introduction and the subsequent stages of a proposed legislative enactment is, that after a Bill has been introduced in this Council, it is published in the various provincial gazettes, the opinions of Local Governments are asked for, and the Local Governments, in submitting their opinions, take a further step, that is to say, they consult representative bodies of the various communities in their own provinces with reference to the advisability or usefulness of the proposed measure. Now, what the Hon'ble Mr. Setalvad asks this Council to do, is to drive a coach and four through the ordinary procedure and refer his Bill to a Select Committee with the instruction that the Select Committee should send in its report by the 24th of March next. I venture to think that no ground whatsoever has been made out by my learned friend in support of this extraordinary procedure proposed in his Resolution. It seems to me, Sir, that bearing in mind the nature of the proposed legislation, and remembering the fact that it is not a case like that of the Wakf Bill where the Courts of this country or even the highest judicial tribunal of the Empire—I mean the Privy Council—have laid down with reference to a branch of the Muhammadan or Hindu law a proposition which is in direct contradiction to what is believed by Hindu and Muhammadan text-writers or by the people themselves to be the principle of their personal law—in which case, and in which case alone, it becomes necessary to resort to legislative aid in order to set matters right—that the case being not of this kind but, according to my learned friend himself, being expressly intended to introduce a modification in the personal law of the Hindus and Muhammadans, it seems to me that, over the heads of these communites, to ask the Council to reduce the proposed modification into the form of a statutory enactment is, to say the least, to tread upon very slippery ground, which might give rise to serious discontent in the minds of those orthodox people who are, as a matter of principle, opposed to interference by legislative enactment with their personal laws.

"Sir, as I have just said, I do not propose to discuss the merits of the Bill at this stage. Whatever our own ideas as a result of enlightened modern education may be, the question remains whether this Council is justified in

passing an enactment which introduces important modifications in Hindu and Muhammadan law without consulting representative bodies of the two communities, without consulting representative individuals belonging to those communities, and then sending the Bill, together with the opinions thus obtained, to a Select Committee for consideration. It may be that, on being circulated in the various provinces for opinion, the Bill will receive the support of representative bodies and of representative individuals belonging to the two communities concerned, in which case my Hon'ble friend's course will become much easier than at present, and the Legislative Council will give its sanction to this measure without the slightest hesitation. But should the Bill meet with opposition from a very large proportion of the two communities, I venture to think that, in that case, the Government will pause before giving legislative sanction to this modification of their personal law. Therefore, it seems to me, Sir, that in the absence of any ground of urgency, it would be absolutely wrong on the part of the Legislative Council to rush through this legislation, as I said, over the heads of the people themselves. It is upon this ground that, at this stage, I entirely support the amendment moved by my Hon'ble friend Mr. Dadabhoy without discussing the merits of the Bill.

"There is one observation I should like to make in connection with a remark made by the Hon'ble Mr. Setalvad. He has told us that, since the publication of his Bill in the public press, he has not noticed any dissent from the principle of the Bill in any newspaper or coming from any province of India. That is, if I may venture to say so, placing the cart before the horse. When a Member of this Council seeks to introduce a change in either the personal law of any of the two main communities in this country, or even in the statutory law of the land, it is for him to make out a case in support of that change. It is not for those who wish to caution the Legislative Council in so important a matter concerning the personal law of the two communities to justify their position. It is for the advocate of the change to show that the change which he advocates has public support, that he has behind his back the consensus of opinion of the two communities mainly concerned with the proposed change. My learned friend, in his speech, has not referred us to any support either in the public press or on the part of any representative body in any province whatsoever which he has received as regards the principle of his measure. To say that there has been no dissent is neither here nor there; and the time, as pointed out by my friend the Hon'ble Mr. Dadabhoy, has been so short that it is really impossible to expect that the representative organs of the country, or the representative bodies of the two communities should, within so short a time, have expressed their dissent from this measure. I have no doubt that to the representatives of the two communities it has never even occurred, until possibly the present proposal was placed in their hands either yesterday or this morning, that Mr. Setalvad wanted to rush this measure through the Council in this manner. I have no doubt that they are under the belief that the ordinary rules of procedure which have obtained in this Council for years past will hold good, and that this Bill will be duly circulated among the Local Governments, and that Local Governments will ask representative bodies for their opinion—and it is at that stage that representatives will express their opinion and the public press of the country will discuss it. To say that this abnormal course, as is suggested by my learned friend, should be followed in regard to this particular Bill, simply because there has been no note of dissent in the public press, is to put forward an argument which really has no leg to stand upon. For these reasons, I give my support to the amendment moved by my Hon'ble friend Mr. Dadabhoy."

The Hon'ble Sir G. M. Chitnavis:—"Sir, however good the principle of this Bill may be, I beg to support the amendment proposed by my friend the Hon'ble Mr. Dadabhoy. This is essentially a Bill which should go to the country for a full criticism before it goes to a Select Committee. The Bill has not been as prominently before the public as the Hon'ble Mr. Setalvad thinks it has been; nor, as stated by the Hon'ble Mr. Dadabhoy, has sufficient

[22ND FEBRUARY, 1916,] [*Sir G. M. Chitnavis; Rai Ghanasyam Barua Bahadur; Mr. Lowndes.*]

time been given to the people concerned to give it full consideration. It is desirable that in a Bill of this nature, full opportunity should be given for criticism. Large interests are affected, and the suggestions that may be made by the people in case the Bill is more widely circulated will, I am sure, be of great value to the Select Committee also. I am therefore of opinion that it will not be wise for the Legislature to depart from the ordinary course in the case of this Bill, and I therefore beg to support the amendment."

The Hon'ble Rai Ghanasyam Barua Bahadur:—"I beg to support the amendment moved by my Hon'ble friend Mr. Dadabhoy. In doing so, I should not be supposed to be opposing the Bill itself at this stage. But I agree that a measure like this, which affects the two biggest communities of India, should not be hurried through without proper consultation. I don't think we shall be justified in doing so; and notwithstanding all that has been put forward in favour of the Bill, I am not convinced that any good reason has been shown to exist for considering or passing the Bill without obtaining the opinion of the Indian public in the usual way, so that the Council may be in a position to judge of its merits in all its phases. I am aware there is a volume of opinion in favour of the Bill. I am also aware that opinions against it are not wanting. Some people of the orthodox sections might consider it even a sacrilege to make innovations like this on the basis of modern law. We must see what the country thinks of this measure before we can say anything on it, and for that, public opinion properly and thoroughly obtained in the usual way is absolutely necessary. I, therefore, beg to support the amendment, and I hope the Council will see its way to defer the Bill till it has been circulated and the requisite information has been obtained properly."

The Hon'ble Mr. Lowndes:—"Sir, so far as this Bill seeks to remedy what appears to be an obvious anomaly in the legal position of the Hindu and Muhammadan communities, the principle of the Bill commands my entire sympathy. If this principle is capable of assimilation into the personal law of the two communities, I feel very little doubt that a great benefit will result from it. I think that the Hon'ble Mover was very wise in stating emphatically, at the outset of his speech, that there was no proposal to touch the doctrine of joint-family property of the Hindus, or to enlarge the testamentary power of the Muhammadans. I think it is clear that there is no such proposal involved in the Bill at all.

"Though there is a proposal in the form of an amendment before this Council that the Bill should not go to Select Committee but should be circulated, I think it may be as well to emphasise, in the first place, what the anomaly I have referred to is, which appears to me to be a very clear one I think I can explain best what I mean by an illustration. I would take the case of the ordinary marriage settlement as known to English lawyers, the outline of which—which is all I propose to deal with—is probably well known to most of us present here. The proposition is that a father whose son or daughter is about to be married desires to make a provision definitely for the issue of that marriage; and the ordinary form that such a disposition takes is that property is handed over to trustees upon trust to pay the income to the husband or wife, as the case may be, for life, and after their death the fund to be distributable among the children. Now that, I think, everyone will agree is a very proper and wise provision to make, and one which the law would look upon eminently with favour. Members of the community to which the Hon'ble Mr. Dadabhoy belongs can make this provision and, in my experience, frequently do so, Members of the community to which the Hon'ble Mover of this Bill belongs cannot make it; and it seems to me very desirable that they should be enabled to make it. The object of the Bill is very largely to enable this to be done.

"I would take one other very simple and very typical instance, the case of a Hindu father who has only one daughter and no son, and whose natural and—I would say—proper desire is, in the hopes of having grandsons, to make some provision for them. He would naturally desire by his will to leave his

property to his daughter for life, and after her death to be distributed among her sons. He cannot do so at present, and one of the main objects of the Bill is to enable him to do so. Again, I submit the proposition will be considered by all of us a very reasonable one.

"So much then for the main objects of the Bill which I think, if I may say so, will commend themselves to all reasonable men. I am not of course dealing with the details of the Bill in any way at all. When we come to do that, I think that clause 6 of the Bill will require very careful consideration It does not stand on quite the same footing as the main principle to which I have referred, but I do not think anything will be gained by my discussing it in any way now, as it is a somewhat technical question. I should only like to point out that a very similar Bill to this one was passed in the Madras Council two years ago (in 1914) enabling Hindus (it did not attempt to deal with the question of Muhammadans) to make similar dispositions to those which this Bill proposes they should be able to make now, and no provision similar to that contained in clause 6 found its place in that Bill, which is now part of the law of Madras.

"So far then, dealing with the principles of this Bill, I frankly express my approval of its principle, if it can be adapted to the necessities of the communities. But I certainly feel that there is a larger question shadowed in the background, and that is, that very difficult question of how far it is legitimate and how far it is possible to alter the personal law of Hindus or Muhammadans. That is a subject which has always been very jealously guarded under all legislative attempts in this country. I have been looking through the files of the discussions on the Transfer of Property Act when it was first passed, and I find that the greatest care was taken to see that no infringement whatever was made of the personal law of either Hindus or Muhammadans, and this was made a great point in the discussions all through, and only I may say when that was seen to be clearly provided for did the opposition to the Bill really fall through. It is not only that one has to be very careful in dealing with such a matter as that, but that, I think, we must proceed very slowly with it. There is no doubt that any innovation of this sort ought only to be made if the Council is satisfied that the communities concerned really want it, and it is, I think, not open to question that questions of this sort take a very long time to filter down into the minds of the mass of the community. We had a very striking instance of this in India, not very many years ago, when a Bill dealing with a peculiarly technical question of Hindu Law, which is usually known as the question of the gains of learning, was introduced by a very learned Hindu lawyer in the Madras Council and was passed, not hurriedly, not in any sense being rushed through as it is suggested is being attempted on this occasion; the Bill was introduced in 1891 and was only passed in Council in 1900, after an interval of nine years; yet it was evident that a knowledge of what was being done had not come to the members of the community concerned; and immediately after the passage of the Bill, when apparently the matter came up for discussion more freely, the Government of Madras, and indeed the Government of India, was bombarded with petitions against it from every quarter and from many influential persons, with the result that the Governor's assent to the Bill had finally to be withheld, and it has never gone into the Statute-book up to the present time. I think that is rather a warning that in any case where you are dealing even with the fringe of Hindu or Muhammadan Law, it is necessary to proceed very slowly and very carefully. The learned Mover of this Bill suggested that it did not really touch upon any essential question of either Hindu Law or Muhammadan Law. I doubt whether that can be accepted as a sound proposition. It is of the essence of both the systems of law referred to that no gift either *inter vivos* or by will can be made to an unborn person; and though it is only proposed to alter the law by making it permissive to do so, there is no doubt that in infringing upon that principle, in enlarging it, possibly for the more modern needs of society, you are touching upon one of the essentials of the system of law in each case. And in this connection I would also remark that it may be that it has not been wise to join the question of Hindus and Muhammadans together. It is possible, of

course, that the Hindu community may be ripe for such a change as this, and that it may not be considered by them generally to touch anything which is of the very essence of their law, which is of course founded on their religion. It may equally well be that the Muhammadan community is not in a position to accept such a change at the present time, or indeed at any time. And we are undoubtedly in a more difficult position here in that the Bill attempts to deal jointly with both communities. I would suggest, therefore, that it is eminently necessary that we should proceed slowly and very cautiously before we attempt to introduce such a change into either system of law, and particularly into both of them jointly. It is for this reason that though, as I have said frankly, the principle appeals to me as a lawyer as a just and right one, I myself would accede to the amendment which has been proposed by Mr. Dadabhoy."

The Hon'ble Sir Reginald Craddock :—"Sir, I should like in a few words to supplement what my Hon'ble friend, Mr. Lowndes, has said on the subject of the amendment proposed by Mr. Dadabhoy, and to explain the attitude of the Government in regard to the Bill. It is one of general willingness to accede to legislation removing disabilities of the kind contemplated by the Bill, provided that the communities concerned show a clear and widely-felt desire to be released from those disabilities. Now, the Hon'ble Mover, as has been pointed out, is somewhat optimistic in saying that his Bill has evoked no criticism from the public. It is quite true that we have obtained certain opinions by circulating the Bill only administratively, but practically all the Local Governments have complained that the time is too short to secure a thorough ventilation of the measure and sufficient ascertainment of the views of the two great communities who would be affected by it. With regard to those opinions, so far as they go, I may say that Hindu opinion generally seems to favour the Bill, but even in their case, there are many who express considerable hesitation and a few who are definitely opposed. On the other hand, in the case of Muhammadans, the opinions opposed to the measure appear to be of larger volume than those in favour of it. Also among high judicial authorities there is considerable difference of opinion. Although the Hon'ble Mover has stated, and the Hon'ble Mr. Lowndes has to some extent confirmed the view, that the Bill in itself does not desire to go beyond this particular object, there is yet a strong body of criticism, and anxiety and doubt have been expressed, regarding the possible extent to which the personal law of the Hindus and Muhammadans might be invaded by the measure; and in the Punjab especially stress is laid on the importance of preserving the customary law, which has such prominence in that province. It has been pointed out (I merely mention it as an example) that the saving clause of the Bill saves only enactments which govern Hindu and Muhammadan Law, and makes no reference to the personal law of those communities.

There is also strong criticism as to the inexpediency of including in a single Bill two communities whose personal law on the subject of the disposition and devolution of property differs so widely as does the personal law of the Hindus and the personal law of the Muhammadans. Having regard therefore to these doubts and apprehensions, the Government feel that though they may, and do in fact, sympathise with the desire of the Hon'ble Mover of this Bill to emancipate the Hindus and Muhammadans from the restraints which may be felt by them, yet it is incumbent upon them to feel sure that the measure has won a wider and more general approval among both communities concerned than the papers before them at present disclose. It has also become evident from the debate that the amendment proposed by Mr. Dadabhoy meets with very general support, and practically no opposition on the part of the Non-official Members of the Council; and for these reasons the Government have decided to support the amendment moved by Mr. Dadabhoy."

The Hon'ble Mr. C. Vijiaraghavachariar :—"Sir, may I be permitted to speak on the motion that the Bill be referred to a Select Committee."

[*The Vice-President; Mr. C. Vijiaraghavachariar; Mr. Setalvad*] [22ND FEBRUARY, 1916.]

The Hon'ble the Vice-President:—"The debate is on the amendment that the Bill be circulated for the purpose of eliciting opinions."

The Hon'ble Mr. C. Vijiaraghavachariar:—"Very well, Sir, I shall then confine my remarks to the amendment. The original motion is that the Bill be referred to a Select Committee with instructions to report on or before the 24th March next. Therefore the Bill cannot be passed in this session. In consequence the arguments resting on the basis that it should not be passed hastily have not much of substance in them. The question now is only whether and at what stage this Bill shall be taken up either by the Hon'ble and learned Member in charge of it, and I am sure the non-official Members of the Bombay Legislative Council would be sufficiently patriotic to give him a fresh lease at the Report stage; or at what other stage may the Bill be subsequently taken up. It seems to me that the difference between the original motion and the amendment is practically immaterial, and I think that the Hon'ble Member would do very well to accept the sense of the Council and withdraw the original motion and accept the amendment. I also believe that there is absolutely no need to import passion into the discussion of a measure like this. The Hon'ble and learned Member in charge of the Bill has made a very clear statement telling us exactly where we are. The Hon'ble the Law Member and the Hon'ble the Home Member, I believe, have somewhat traversed the original motion, but, Sir, I accept your ruling, and I shall not go into the merits of the original motion now. I may say that I am in entire accord and sympathy with the object and principles of the Bill, and also with the reasons put forward by the Hon'ble and learned Member, Mr. Setalvad, in support of the measure. Subject to this observation I am obliged to support the amendment, but I would venture to ask him not to call for a vote on the original motion, but to accept the sense of the Council for a postponement. My ground is a very narrow one; I am always against rapid legislation, however desirable that legislation may be in itself. Therefore, while declining to accept the reasons advanced in support of the amendment by my Hon'ble friends Mr. Dadabhoy and Mr. Shafi, I accept the mere amendment, namely, that the next stage shall be, not the report stage but the earlier stage that it be referred to a Select Committee, and that it now be circulated for the purpose of further eliciting opinion thereon."

The Hon'ble Mr. Setalvad:—"Sir, in view of the discussion that has taken place in Council, I may at once say that I have no desire to rush this Bill through at all. If the wish of Hon'ble Members is, that there should be more time, more deliberation, more consideration of the measure in the country and by the press, I, for one, am quite agreeable to that course being adopted. My only desire in moving the proposition, of which I had given notice, was that I considered that the two communities concerned had suffered so long and so patiently under this disability, that the time had now arrived when they should be speedily relieved of it. While, therefore, acceding to the suggestion made, Sir, with regard to the postponement of the measure in the manner suggested by my Hon'ble friend Mr. Dadabhoy, there are one or two things which I desire to say with regard to what has fallen from some Hon'ble Members.

"With regard to my Hon'ble friend Mr. Dadabhoy, I am afraid that he has not yet really grasped the scope of this little Bill, because I understood him to say that the Bill dealt only with wills, and that he would desire that the Bill should go further and deal also with gifts *inter vivos* If my learned friend would study this little Bill, he would see that the Bill proposes to deal with both those matters. It proposes to deal with all dispositions of property, and if he would look into the definition clause, he would see that it includes dispositions *inter vivos* and also bequests by will. Therefore, his complaint that the Bill does not go far enough in that way is certainly, under the terms of the Bill, not justified. Then, my learned

[22ND FEBRUARY, 1916.] [*Mr. Setalvad; Khan Bahadur Mian Muhammad Shafi; The Vice President.*]

and Hon'ble friend said that no serious inconvenience is felt by the Hindus and Muhammadans. I think my Hon'ble friend must be entirely oblivious to what is happening with regard to those Hindus and Muhammadans who, as I have said, in hundreds are making these bequests, year after year, although it is well known now for many years, both by Hindus and Muhammadans, that the Courts do not hold these bequests to be valid. And you find it day after day in your experience as a lawyer that both orthodox Hindus and Muhammadans—"

The Hon'ble Khan Bahadur Mian Muhammad Shafi :—" I rise to a point of order, Sir. Does this part of my Hon'ble friend's speech arise out of the amendment which he has accepted ? I intentionally refrained from discussing all these questions, because it seemed to me that they were irrelevant."

The Hon'ble the Vice-President :—" The Hon'ble Mr. Dadabhoy mentioned these points in his speech. They were in order then because he wished to point out the complexity of the measure before the Council As the Hon'ble Mr. Dadabhoy did mention them, I think it is only fair and proper that Mr. Setalvad should have the right of reply."

The Hon'ble Mr. Setalvad :—" I was pointing out, Sir, that my Hon'ble and learned friend must be oblivious of the real facts when he says that no serious inconvenience is felt by Hindus and Muhammadans. It is the common experience of every lawyer in the land, that orthodox Hindus and Muhammadans—my experience is, the more orthodox the Hindu or Muhammadan is the more keen he is to provide for his unborn generations—both Shias and Sunnis, day after day come and seek advice how to get out of this disability forced on them by the decision of the Courts. To say that there is no serious inconvenience felt by Hindus and Muhammadans in this matter is certainly to ignore existing facts. As I said, they have laboured under this disability for a very long time, and it does not matter if they labour under it for a little while longer; but to say that no serious inconvenience is felt, is certainly to ignore the real facts of the situation.

" Then my Hon'ble friend, Mr. Lowndes, referred to the Gains of Science Bill in Madras. But there is not sufficient analogy between that Bill and this, if I may venture to point out. This Bill is really an enabling Bill; it does not affect any persons who do not want to avail themselves of it, while the Gains of Science Bill affected all Hindus whether they wished to come under it or not. It affected not only the person who acquired those gains of science who was enabled by that Bill to keep those gains, but it also affected people who would otherwise have got those gains under the joint-family system, and who were deprived of them under that Bill. Therefore, it was not an enabling Bill merely, as this Bill is, but it was a Bill which, in substance and in fact, really touched and altered very largely the personal law of the Hindus. Therefore, I venture to submit, there is no analogy between that Bill and this, and that instance is certainly not in point.

" Then I am sorry Mr. Lowndes expressed the view that he regretted that Muhammadans had been joined in this Bill. And the view was also expressed by the Hon'ble the Home Member, that it was a pity that one Bill was brought in for both Hindus and Muhammadans whose personal law, as he pointed out, differed in many material respects. That is so, but in regard to this particular disability, there is no divergence at all between Hindus and Muhammadans. The disability is exactly the same in both instances. The disability is common to both the communities, and the reason for that disability is also the same in both the laws. As I have pointed out, delivery of possession is essential in both cases, and there cannot be any acceptance by, or delivery of possession to, unborn persons. Therefore, so far as this disability is concerned, the position is

absolutely identical with regard to Hindus and Muhammadans. I venture to submit, Sir, that it would be a great pity if Muhammadans were left out of the provisions of this Bill as suggested. It is for the Muhammadans no doubt, who will be affected by the Bill, to make up their minds about it, but I do say that it would be a great pity if the Muhammadans were left out from this enabling Bill. As I pointed out, Sir, my experience—and it must be the experience of other lawyers in the country also—is that you find an equal number of Muhammadans, if not more, who want to do this, who have time after time made gifts to unborn persons which the Courts have set aside as invalid. Therefore the need, the necessity and the desire to have it must be and is as keen among Muhammadans as it is among Hindus, and it would certainly be a thousand pities if Muhammadans were left out of this Bill as suggested in some quarters. As I said, I am quite willing that there should be further consideration of this measure, and that more time should be given for the purpose. But I say, whatever you do, I do hope and trust that the legislation, whatever the shape and whenever passed, will be with regard to both the communities at the same time, and that one community would not be left out. If, however, in spite of these views, which I venture to express, the Muhammadan community as a community do not want it, then certainly I should not desire that the Hindus should also not get it. If we have a very clearly expressed and overwhelming opinion that the Muhammadans as a community do not want it, then certainly we cannot force it upon them, and the Hindus alone may have to be dealt with. I do hope and trust that in a matter of this sort, where the disabilities, as I have pointed out, are absolutely identical, are based on the same reasons and are felt as an injustice in exactly the same manner by both communities, that one community would not be left out from the benefits of the provisions of this Bill which, I venture to submit, it is very necessary to provide for."

The Hon'ble Mr. Dadabhoy:—"Sir, I think I am entitled to reply to the speeches on my amendment. After what has fallen from the Hon'ble the Law Member and the Hon'ble the Home Member, it seems to me absolutely unnecessary to prolong this discussion. The Hon'ble the Home Member has pointed out that the opinions of the Provincial Governments were taken and also the views of some non-official gentlemen, and that, so far as public opinion has been ascertained, the Hindu opinion is in some cases in favour of the Bill, and in some cases it is against it; whereas in the case of the Muhammadan community, there is a great volume of opposition. This remark which has fallen from the Hon'ble the Home Member makes it perfectly clear that the necessity for a reference to the country is much stronger, and I am very pleased that the Hon'ble the Home Member and the Hon'ble the Law Member have pointed out, and have unequivocally declared, that in the case of such communal legislation we should move slowly and cautiously. With that principle, I feel sure that the whole Council is in complete accord.

"My Hon'ble friend Mr. Setalvad has made one or two observations with reference to me in respect to which I should like to say a word. I have not overlooked the definition of the words 'disposition of property' which my friend has pointed out. In fact all that I said was, that there were other sections of the Transfer of Property Act which were so closely interdependent on the sections which the Hon'ble Mover has selected and which were left untouched, that there was some reason to apprehend that the Bill would defeat its purpose and possibly engender difficulties in practice. My Hon'ble friend is also in error in stating that I said that no inconvenience was felt at present by the Hindu and Muhammadan communities. But what I said was, that no serious inconvenience was felt by the Hindus and Muhammadans, and I repeat that, except in the Presidency-towns, such as Bombay and Calcutta, nobody ever thinks of making dispositions of property in favour of unborn persons. Very probably there is a strong desire in the Presidency-towns, but, so far as we aware, in other places there is no such desire.

[22ND FEBRUARY, 1916.] [*Mr. Dadabhoy; Maharaja Ranajit Sinha of Nashipur.*]

"I shall not detain the Council with any further observations. Only I express my gratitude to the Hon'ble Home Member and the Hon'ble Legal Member for having agreed to my amendment."

The amendment was put and agreed to.

RESOLUTION *RE* CONSTITUTION OF A SANITARY BOARD.

The Hon'ble Maharaja Ranajit Sinha of Nashipur:—"Sir, with your permission, I beg leave to move the Resolution that stands against my name and which runs thus:—

'This Council recommends to the Governor General in Council that a Sanitary Board consisting of officials and non-officials be constituted under the Government of India to advise as to the sanitary needs of the country.'

"The question of the improvement of sanitation is already engaging the earnest attention of the Government, which is evident from their Resolution of 23rd May, 1914, and therefore it is superfluous on my part to dwell on the subject at any great length to establish its claim upon the special consideration of the Government. Sir, there is hardly any district which is free from the havoc of fever, specially of a malarial type, cholera, small-pox and diseases of respiratory organs. Plague has cast its root deep into the soil of the country; and has made India, like other diseases, its permanent habitation. It appears that mortality is increasing gradually.

"There are altogether 968 municipal towns, and the total population of these towns is 19,536,931. Out of this total population, 646,074 died from all causes in 1914. The figure for 1913 was 611,769; and fever alone contributed to 200,977 in 1914, and 197,221 in 1913.

"Deaths from other causes, such as cholera, plague, and respiratory diseases, were as follows:—

	1914.	1913.
Cholera	30,461	23,015
Plague	35,537	32,154
Respiratory diseases	76,523	69,316

"Now if we take the whole of British India, including towns, it appears that out of the population of 240,995,560, total number of deaths from all causes was 7,057,806 in 1914; whereas the figure in 1913 was 6,845,018. The annual sanitary reports of 1915 are not yet published, so the figures for that year could not be found, but I am afraid, there will not be any appreciable improvement in that year's return. Sir, there are many towns and districts whose populations are gradually decreasing, and so sanitation can no longer be left as a matter of local concern only, but it has become an Imperial question also, and the Government of India in their Resolution on sanitation has also declared that Government of India retains in their hands the power of giving general direction of a policy of public health

"Sir, education and sanitation are the watch-words of modern India, and Sir Guy Fleetwood Wilson very justly remarked in his budget speech of 1913 that they are 'twins of phenomenal development.' In one sense, sanitation to my mind appears to be the first of our needs. We must live before we can be educated. Since the creation of a separate portfolio much progress has undoubtedly been made, and education has been able to make a more rapid progress than sanitation. The member in charge of these departments, who is generally and popularly known as an Education Member, has naturally to devote more time and attention to education, and whenever he goes out on

tour in different provinces, he comes in contact with persons, both officials and non-officials, who are interested in education, and he gets an opportunity of interchanging his views with them; further, he has the advantage of discussing every important matter connected with education with University Professors and Principals of both Government and private colleges. But in case of sanitation he meets very few people in big cities and towns, where sanitary conditions are comparatively better, who could enlighten him as to the real needs of moffussil towns and villages in respect of sanitation; and thus he has very little opportunity of consulting non-official views in the matter. He is to remain generally contented with what he could gather from officials. There are many things in which it becomes necessary to consult laymen also, specially in our countries. In matters like this co-operation of the public is necessary. The Government of India have also declared that such co-operation should be secured. Paragraph 1, page 4, of Indian Sanitary Policy runs thus :—

'It must rest on a knowledge of the people, their conditions of life, their prejudices, social customs and habits, their surroundings and financial means; and it must secure their co-operation.'

By my Resolution I have asked nothing further than to associate non-officials with officials in such an important matter. The mixed board would serve the purpose of an advisory board to the Government of India. At present the Government of India looks on its Sanitary Commissioner as its sole adviser in sanitary matters, and the Government have very little opportunity of getting non-official advice or mixed views of both experts and laymen. If such a board be created the non-official members would have to discharge their responsibilities, they would be the medium of communicating public views on matters of sanitation, and they would be able to gather information from different quarters, and would have an opportunity of discussing them with people who have best local experience in these matters, and when these non-official members would meet together they would have the benefit of interchanging their views each other, with the officials and experts, and the decision which would be arrived at by such discussion would, I hope and am sure, be more sound and profitable. As for instance, if a question arises whether the railway has obstructed natural drainage, and that is one of the main causes of malaria, the non-official members of different provinces may collect information in their own provinces whether the malaria really increased after railway construction, and when they meet at the board they may furnish such information which may be useful and valuable for the experts in arriving at a definite conclusion in the matter, and the board may advise the Government accordingly. Then, again, the proceedings of this board may be annually published and circulated to different provinces which may be of great value to them. There had been conferences at Madras and Lucknow in which both officials and non-officials, both experts and laymen, were invited, so it appears that the Government of India also adopted their policy. These conferences do not meet often, and those who attend have less responsibilities, whereas, if there be a permanent body, better results can be expected.

"It may be said that there are already sanitary boards in each province, and so there is no further necessity of creating a board here. First of all these local sanitary boards have recently been associated with non-official members, and their general function is to sanction schemes brought before them. Secondly, members of provincial sanitary boards have no opportunity of discussing any subject of common interest with people of other provinces, and so they are naturally to depend upon their own findings in matters which could be better dealt with by free interchange of views with the experienced people of different provinces. The Government of India have said in their Resolution that an experiment in clearing jungle and undergrowth will shortly be undertaken. The research committee handed over to the Bengal Government a sum of Rs. 50,000 for the experiment; but the experts there did not think it worthwhile to try the same. The local sanitary boards have no hand in the matter, though the popular belief is still high that the clearance of jungle and undergrowth will reduce the mortality from fever.

[22ND FEBRUARY, 1916.] [*Maharaja Ranajit Sinha of Nashipur; Maharaja Sir Manindra Chandra Nandi; Sir C. Sankaran Nair.*]

"Sir, when I sent a notice to move the Resolution at the last Simla session, I was told that this being a controversial matter would not be discussed there. Sir, I failed to understand how this Resolution could be treated as such ; there is nothing in it controversial, there can be no harm if such a board be constituted ; rather I would think this would help in solving many important matters of sanitation. If the Government so think this may be created as an experimental measure, and, if it does not work well, may be abolished later on.

"Then as regards the constitution of the board, I venture to suggest that it should consist of twelve members with the Hon'ble Member in charge of sanitation or the Director-General of the Medical Services as its President, and the Sanitary Commissioner as the Secretary. Other members may be nominated from amongst the additional members of Your Excellency's Council or from outside as the Government think.

"With these observations, I beg to commend the Resolution to the Government and Council for their acceptance."

The Hon'ble Maharaja Sir Manindra Chandra Nandi of Kasimbazar.—"Sir, I beg to support this Resolution. There can be no question that the sanitary needs of the country are among the first requirements, and it is also essential that the co-operation of the people should be secured for the furtherance of sanitary measures. This object could be attained by such a proposal as is contained in the Resolution moved by my Hon'ble friend, the Maharaja of Nashipur. I hope this Resolution will be accepted by the Government."

The Hon'ble Sir C. Sankaran Nair.—"Sir, I rise to oppose this motion. The Resolution contemplates the interposition of a certain body, a Sanitary Board, between the Government of India and the Local Governments. The speeches have been, however, directed to showing the advisability of enlisting non-official co-operation. My Hon'ble friend has suggested a body of 12 men to form that Board, and he said that the few non-officials in that board of 12 men were to be the representatives of the various provinces in India, to bring to the notice of the Government of India their various sanitary needs. This is not satisfactory. Then, I am not sure whether my friend has fully realized the present policy of the Government of India, and the effect of his Resolution, if carried, thereon. That policy is indicated in the Resolution to which my friend referred ; it is to leave the administration really to the Local Governments, and the local bodies. As it is put there.—

'The policy of the Government of India is to keep the control of research under itself, but to decentralise the other branches of sanitation.'

"But I quite concede that if there are reasons sufficient for the Government of India taking the administration into their own hands, then they are bound to change that policy ; and the question for this Council to decide is whether there are such reasons, whether the administration by the Local Governments and the local bodies have been so unsatisfactory in these respects that there should be a greater interference by the Government of India, and whether such interference is likely to lead to better results. Sir, one of the main reasons, which the Hon'ble Mover has put forward, is the state of the country from a sanitary point of view. He has referred to the increasing mortality in India. Without conceding that there is that increasing mortality throughout the whole of the country, I am prepared to concede that in various tracts of the country there is an increasing mortality, sufficient to cause disquiet. There is also heavy infantile mortality. It is also true that tracts of country which were considered immune from malaria before are now malaria-stricken. Health resorts of ancient days are now avoided. All this may be conceded. It may also be true that some of these results may have been brought about by certain acts to which the Government itself may be taken to have been a party. I, therefore, do not blame my friend,

[*Sir C. Sankaran Nair.*] [22ND FEBRUARY, 1916.]

if it is competent for me to do so, for challenging a policy which has led to these results. But all the same I am perfectly satisfied that this Resolution would be, if accepted by the Council, a retrograde step, and it would not be in furtherance of the interests which he wishes to serve. Let us come to grips with the question. Now, first of all, take the local bodies. How does the question stand with reference to the municipalities? The first and the most important need is the supply of pure water; because unless you supply pure water to the municipalities, it would be harsh to ask the inhabitants to fill up their tanks or wells or other sources of supply. These supply very often impure water and are breeding grounds of mosquitoes.

"Even if you supply pure drinking water, the difficulty is that in many cases there are strong objections raised by orthodox people to use pipe water and to discard either tank water or well water, however impure it might be. Further, it may be very inequitable to ask a man to close a tank even after supply of pipe water. If the cost of filling up the tank is more than the actual cost of the land itself, the Board may hesitate to proceed to the length of directing the man to fill it up. Again, the Council has to bear in mind that every depression in the land, every pool, every tank may be a potential nursery ground for the breeding of mosquitoes. All these things seem to show that the matter is one which is essentially local; it must be attended to by local men, and it has to be settled by co-operation between the local authorities and the local inhabitants; it has to be settled by them not with reference to any fixed rule which any central board can lay down. How can a Sanitary Board of the kind suggested by the Resolution be of any practical benefit so far as these local bodies are concerned.

"As the Hon'ble Members are aware in many of these municipalities there is a non-official majority, in almost all, with very few exceptions, there are non-officials who can make their voices heard; there is here, therefore, non-official co-operation. The sanitary administration by local bodies might not have been very successful. But there are many reasons for it. I do not mean to say, and my friend must not understand me to say, that I lay the blame entirely on the non-officials; if it will give my friend any comfort I can tell him what is said in one of the latest Reports I have received; the Sanitary Officer in that Report does not hesitate to say that in a certain class of government buildings 'a line of red fire buckets half filled with water and mosquito larvae' are always found. These local bodies act under the Sanitary Boards who act generally as advisors of Local Governments, and non-officials may be appointed as members of those Boards.

"They were constituted under a Government of India Notification in which it was pointed out to the Local Governments that they should seek non-official co-operation. In some of the Provinces you have non-official Members, in other Provinces the Governments have not yet seen their way to appoint them, my Hon'ble friend now wants an all-India Sanitary Board over the Provincial Boards. How that will improve the state of things he does not say. He has not said anything to show that these Sanitary Boards or the Local Governments have not performed their duties properly and rendered all assistance to the local bodies.

"If my friend wants his Imperial Sanitary Board to advise the India Government only on those matters which are now dealt with by them, we have only to see what they are, to find out that they can do very little. The main functions of the Government of India consist in giving financial assistance and deputing scientific men for investigation. Till the war broke out, we have been very liberal. As to the latter we have been supplying our scientific men from the Research Department for the purpose of investigation whenever the Local Government have asked for them. It is true that at present we have had to withdraw them on account of the war; most of the men appointed were members of the Indian Medical Service, and they formed part of the Military Reserve, and on account of the war they have had to be withdrawn and the inquiries closed. But their inquiries have proved very fruitful, and it is for the Local Governments to take action wherever needed. I will refer to Bengal

to illustrate the general position. It is true that in thousands and thousands of square miles of Bengal malaria now prevails where it did not prevail before. Dr. Bentley, who has examined the question with the results of those who have examined the question before him, is of opinion that the increase of malaria is mainly due to the embankments made by Railway Companies and for the purposes of irrigation by others. I have discussed the matter with the Chief Sanitary Commissioner; it is his opinion and mine also that, if these conclusions are accepted, the Local Governments will have to devise some means for the purpose of meeting the difficulty which is created by these embankments; some means must be devised for letting in flood water for the inundation of lands, because otherwise the lands are exhausted, and cultivation deteriorates, the people become poorer, and greater facilities are afforded for the propagation of mosquitoes. We have to call in the irrigation engineers to help us to devise means in order to let in water at proper seasons, and after the necessity ceases. to drain the land of the water.

"That is a problem to be worked out by the sanitary staff with the help of the engineers, and I have little doubt that the Government of Bengal will take the matter into consideration at a very early period. A central Sanitary Board or the Government of India cannot do much. The initiative has to be taken by the Local Government, and as I said I have little doubt that the Bengal Government will soon proceed to take action on Dr. Bentley's Report. All that we can do, is to give them Research officers, if they want any, in order to make any investigation, and to send them irrigation engineers and, if money is wanted, as there is little doubt it will be, to give them what we can. In any of these respects I do, not see what a Sanitary Board here can do. On the other hand, a Sanitary Board here can prove obstructive, it all depends on the sort of men you have. As it now stands, when the recommendations of the Government of Bengal come up, it rests with the Government of India to act upon them, and we hope to act promptly. We usually do not interfere with the measures which the Local Governments put forward; but if the non-official and official members here take a view, from their experience of other parts of India, which may not be in accord with the view taken by the Local Government, difficulties might be created. Because the conditions in the various provinces of India are different, that what may be very desirable in one place would be very detrimental in another province. Officials differ as well as non-officials. The necessity of consulting these Boards might thus create difficulties in the way of the Government of India. I submit therefore to you, Sir, and I submit to the Members of this Council, that I do not see that much benefit will be derived by the interposition of a Sanitary Board between the Government of India and the Local Governments. It is much better to leave these things to the Local Governments and the local bodies themseves. One sympathises with the object of the Hon'ble Mover, and it is rather distasteful to me to ask the Council to reject a motion prompted by such excellent motives. I would therefore ask the Hon'ble Mover to withdraw his motion, with the full assurance that every suggestion that may have to be made or that may be made by the non-official Members here, will receive full and sympathetic consideration. There has been only one request made since I came to the Council here, and that was at the last meeting, and we accepted that Resolution. But, if my Hon'ble friend cannot see his way to do that, I must ask the Council to reject this motion, because I foresee, as I said, possibilities where a Board might stand in the way of prompt action by the Government of India, where prompt action might be necessary and useful. They might also be mischievous in some respects. I therefore beg, Sir, to move that this motion be rejected."

The Hon'ble Mr. Vijiaraghavachariar:—"Sir, I am sorry I cannot congratulate the Government on their attitude with regard to the important prayer embodied in this Resolution. It is even difficult to quite understand what this attitude is It strikes me that some of the arguments advanced by the Hon'ble Member in charge of the Education Department would be just the reason why the Resolution should be accepted by the Council.

[*Mr. Vijiaraghavachariar; Sir C. Sankaran Nair.*] [22ND FEBRUARY, 1916.]

For instance, he has told us that there are local conditions here and there, such as the hesitation by the orthodox communities regarding the use of pipe water, and things of that sort; but I should think that that is just the reason why such a Board should be created. The Hon'ble Member may rest assured that among the non-official Additional Members, some orthodox people would always find their way here, and they would be of immense use if they were added to this Sanitary Board in advising the Government of India as to what measures should exactly be taken in matters of sanitation due to special conditions. It is stated that a good deal of the sanitary reform shall depend upon the attitude of the people everywhere. Now, this attitude of the people can be better discerned and described to the Government of India by such a Board as the Resolution asks for for appointment. The Hon'ble the Education Member said a good deal about the undesirability of interference by the Government of India with the powers of the Local Governments in sanitary matters. Is it in contemplation on the part of the Government of India to divest itself of all its control in sanitary matters over Local Governments, or is it going to continue to retain its present degree of control? Whatever sort and extent of control it means to retain, we do not mean to ask to-day for interfering with it. The Resolution does not mean to ask for the alteration of the scope and purview of that control, but it says that, in the exercise of that control, Government, instead of leaving the whole question in the hands of the Director-General and the Sanitary Commissioner, may be pleased to take a Board and to let that Board assist the Government in coming to final conclusions. I fail to understand what exactly is meant by saying that the effect would be michievous. Why does the Hon'ble Member suppose that a Board would be more apt to thwart the Government than the Director-General and the Sanitary Commissioner with the Government?"

The Hon'ble Sir C. Sankaran Nair:—"I did not say 'would'; I said 'might'."

The Hon'ble Mr. Vijiaraghavachariar:—"Might! Well, thank you. I am quite willing to jump from the indicative to the potential mood. But in either case how does it matter, how does it arise that a Board consisting of a number of men—twelve good men and true—with experts, officials and non-officials, Indians and Europeans, would take to throwing difficulties in the way of sanitation? Why should they be expected to thwart the intentions of Local Governments more than a couple of very distinguished gentlemen, no doubt, but who have very little time to give to these things, the Director-General and the Sanitary Commissioner with the Government of India?

"Now let us take the existing state of facts. What do we find? The Sanitary Department with the Research Branch is just now as ill-kept as ill-kept can be. It is entirely recruited from the Indian Medical Service. The Hon'ble Sir Pardey Lukis only a couple of years ago told the Royal Commission that the Indian Medical Service is losing its attractions for the best youths of England, and that there is a constant deterioration in the quality of the candidates who present themselves for the Indian Medical examinations twice a year in England.

"The Sanitary Commissioner, on the other hand, has also supplied us with another important fact. He has told us that the members of the Indian Medical Service are generally unwilling to enter the Sanitary Department and the Bacteriological Department. He said in his evidence before the Royal Commission two years ago, that the permanent cadre is a discontented lot, and that the officiating members are being forced into it against their own wishes. And such are the men who are to constitute the Sanitary and the Research Department, and to save the dumb millions from preventible diseases and preventible deaths!! That is not all. Why should the recruitment of this service be confined to the Indian Medical Service? And where are they now?

[22ND FEBRUARY, 1916.] [*Mr. Vijiaraghavachariar; The Vice-President; Sir Pardey Lukis; Maharaja Ranjit Sinha of Nashirpur.*]

These men are gone on account of the war. To constitute this service out of discontent and out of deterioration and make it, too, part of the military organization of the country and war reserve, liable to recall at any time, is certainly not to realise the very heavy responsibility of the Government to the dumb peasantry of this country in this vital connection. These officers are now fighting a new and fell disease in Europe, which I shall call 'Kultur'; but, pending the play and the complete destruction of this 'Kultur,' you allow malaria and a host of other diseases in India to have free play. Is that fair? Now, suppose we had a Board containing non-official Indians. They certainly would not be party to such a constitution and recruitment nor to a total withdrawal of the men from this country and leaving the people victims to diseases in increasing numbers. I cannot, in these circumstances, understand the exact attitude of the Government, and I doubt very much whether the Government has quite realised its own position in this connection. I exceedingly doubt it. May I inquire how many more minutes I have?"

The Hon'ble the Vice-President :—"Two."

The Hon'ble Mr. Vijiaraghavachariar :—"Thank you. This Sanitary Department has had a very chequered life. I believe it is over half a century old, and the Sanitary Commissioner has admitted before the Royal Commission that the first and the larger part of it was characterised by vacillations in policy, but that since the dawn of this century, Government has been developing a steady forward policy. And these are the results of the forward policy, namely, the staff is constituted, as I said, of inferior materials and drawn from a war reserve so as to starve the service frequently. Therefore, I very respectfully submit that we have every evidence before us that the Resolution is in very good order, and the challenge thrown out by the Government that acceptance of it by this Council would be a retrograde step has not, I believe, been warranted by all these circumstances. The policy of the Government, if the motion is rejected, would be that we should wait till after the war, and then for many a long year we shall only be having absolutely academical researches and nothing more. What is wanted is people on the spot to cope with the dangers as they arise, and to deal with them on the spot and collect and test facts, and then go to add to and modify theories. What is now proposed is theory first, theory second and theory thirdly, and later on, or not at all, attempts at practical measures. I very much protest against this sort of attitude which the Government has assumed in reference to this very important matter. Give us a Board, give us an Advisory Board of officials and non-officials, and we shall soon find the phenomenon of the death-rate going down everywhere in the country."

The Hon'ble the Vice-President :—"Order, order. I must ask the Hon'ble Member to bring his remarks to a close."

The Hon'ble Mr. Vijiaraghavachariar :—"With the greatest pleasure, Sir."

The Hon'ble Sir Pardey Lukis :—"May I rise to point out one error in the eloquent speech of my Hon'ble friend opposite. He has alluded very frequently to me personally in connection with Sanitation. I should like to point out that the Director-General of the Indian Medical Service has nothing whatever to do with Sanitation. The final authority on this subject is the Sanitary Commissioner with the Government of India, who deals direct with the Education Department without the files coming before me at all."

The Hon'ble Maharaja Ranajit Sinha of Nashipur :—"Sir, I am sorry that the Hon'ble Member in charge of Sanitation could not accept

[*Maharaja Ranajit Sinha of Nashipur.*] [22ND FEBRUARY, 1916.]

my Resolution. Perhaps I have been misunderstood in certain matters. I do not desire that the Board suggested should be an executive one, and that it shall have the power to reject any proposals of the Local Governments in any matter. It should be merely an Advisory Board, and this Board, consisting of officials and non-officials, would, I think, be in a better position to advise the Government as to local conditions, because the non-officials would not be taken from one province only, but would be drawn from the different provinces. They would have thus an opportunity of a free interchange of views, and might settle matters more satisfactorily than the Sanitary Commissioner, who has only an expert knowledge of the matter. The Government of India have Sanitary Conferences. Now what is the necessity for Sanitary Conferences when the Government of India gets expert opinions? The reason is, that these Sanitary Conferences are conferences at which both officials and non-officials, laymen and experts, are present This Board will be practically a kind of Sanitary Conference; it will be called a Sanitary Board which will act as an Advisory Board.

"Sir, I fail to understand the reasons which prompted my Hon'ble friend the Member in charge of Sanitation to reject this proposal. It is presumably the wish of Government that non-officials should be associated with officials in such matters, and I have only asked for that. I have not gone any further. The Board will not be able to thwart any scheme which is brought forward by Local Governments. It will have nothing to do with any such schemes. The Sanitary Commissioner is now the sole adviser of the Government of India. I wish that Government should have the benefit of the experience and advice of non-official members also. I am thankful to my friend, the Hon'ble Member for Education, for his sympathy and for his promise that the opinions of non-officials will always receive his best consideration, but I regret that I do not see my way to withdraw the Resolution."

The motion was put and rejected.

RESOLUTION *RE* THE EARMARKING OF THE ASSIGNMENTS OF PUBLIC WORKS CESSES TO CERTAIN SPECIFIED PURPOSES.

The Hon'ble Maharaja Ranajit Sinha of Nashipur:—"Sir, with your permission, I beg to move my next Resolution, though I am not sure what will be its fate also. The Resolution runs thus:—

'This Council recommends to the Governor General in Council that the Local Governments and Administrations may be instructed to earmark such proportion of the assignments of Public Works Cesses to the local bodies as they deem pro er for the purpose of supply of pure drinking water and for other sanitary measures.'

"The question of rural sanitation is of great concern to us all though it is more difficult and perplexed than that of urban areas, and though it may take a long time before one could expect real and material progress, but still, Sir, I think, if our action be steady and methodical, we can expect a satisfactory solution at no distant date. The Government paid special attention to this important part of sanitation in the year 1908, when an annual grant of thirty lakhs (Rs. 30,00,000) was made to the Local Governments, but since the assumption of the exalted office of Viceroyalty by Lord Hardinge, the Government of India have moved more rapidly; the total grants which have been made to Local Governments and Administrations amount to about five crores of rupees, both recurring and non-recurring.

"In addition to this, the Government of India in 1913 made more liberal annual grants in assigning entire proceeds from local cesses, which used

[22ND FEBRUARY, 1916.] [*Maharaja Ranajit Sinha of Nashipur.*]

to be credited to the Governments, to District Boards of certain provinces, namely, Bengal, Bihar and Orissa, United Provinces of Agra and Oudh, Punjab and the North-West Frontier Province, and this grant amounted to Rs. 90,76,533 in 1914-15. We cannot ask for any further doles at the present juncture, when it is our paramount duty to sacrifice whatever we possess for the successful termination of the war in order to uphold the prestige and honour of the British Arms. So instead of asking for any further grant, I have ventured to suggest that whatever we have got should be properly utilized. It is clear that the local cesses which were surrendered to District Boards were given for the purpose of rural sanitation. The Government of India in their Resolution of 1914 remarked :—'In addition, grants amounting to 82·23 lakhs a year, have been made to District Boards in certain provinces, a substantial portion of which will be expended on rural sanitation;' and from the speeches of the Hon'ble members at the time of the Budget discussion in March 1913 would go to show that they also took the same view.

"Now let us see how far the intentions of the Government of India have been carried out in practice, and how far public expectations have been fulfilled. The following figures would show the amount of cesses surrendered and the amount spent by District Boards for rural sanitation in the years 1913-14 and 1914-15 :—

	Grant.	Amount spent.	Grant.	Amount spent.
	1913-14.	1913-14.	1914-15.	1914-15.
Bengal	29,90,367	4,78,373	30,72,802	7,66,466
Bihar and Orissa . . .	23,26,704	1,95,948	25,51,453	3,28,561
United Provinces of Agra and Oudh.	Not available.	1,11,850	32,02,744	1,52,821
Punjab	2,21,072	31,048	Not available.	31,042
North-West Frontier Province	26,973	8,762	28,460	11,528
				12,90,418

"From this statement, which I have just now read, it appears that the total grants for 1913-14 was Rs. 87,67,860, whereas District Boards spent only Rs. 8,25,981; and in the year 1914-15 the total grant amounted to Rs. 90,76,533, whereas they spent only Rs. 12,90,418. From the figures which my Hon'ble friend, Sir Edward Maclagan, very kindly supplied to me, and for which I am grateful to him, it appears that the District Boards of these five provinces, prior to this grant in 1912-13, spent Rs. 4,93,676 for water-supply, drainage and other sanitary purposes; and I presume that they used to spend similar sums for that purpose; and if this sum be deducted from their expenditure for the years 1913-14 and 1914-15, the figures will stand thus: Rs. 3,32,305 for 1913-14 and Rs. 7,96,742 for 1914-15; in other words out of the total grants of Rs. 1,78,44,393, only Rs. 11,29,047 were spent, *i.e.*, about 6 per cent has been expended on this important matter. It is thus evident that the local bodies have failed to appreciate the intention of the Government of India in making this grant, and so the time has come when some positive action needs to be taken. It is undoubtedly very generous on the part of the Government of India to adopt the policy of non-interference; but, Sir, the exigencies of the case demand it. The Government stands in the position of a donor in this case, they, in a manner, gave a broad hint how their gift should be utilized, and if the donee fail to carry out the intentions of the donor, I think the latter is perfectly justified to dictate the terms; specially, the District Boards as now constituted, do not stand in the same position as Municipalities. The District Magistrates are *ex-officio* Chairmen of such boards, and they have not got a non-official majority, and so I think the Government could safely guide them to adopt the proper course. There is a precedent in this respect. The District Boards have been instructed to earmark a certain percentage for primary education and

[*Maharaja Ranajit Sinha of Nashipur; Sir Edward Maclagan.*] [22ND FEBRUARY, 1916.]

I cannot understand why they cannot be asked to earmark a certain proportion of their extra income for sanitation. Sir, I have an experience of twenty years as member of the District Board, and I always found that they were reluctant to spend more for water-supply and the like, as they think that the improvement of rural sanitation is beyond the range of practical politics. Sir Charles Elliot, while Lieutenant-Governor of Bengal, issued a circular that at least Rs. 5,000 a year should be spent by each Board for rural water-supply, but I often found that the circular was never acted upon. Sir, it is not possible that the Government would be able to make a substantial grant for the improvement of rural sanitation for years to come, and if the substantial portion of the new grant be not utilized for this special purpose, I am afraid we cannot expect any material progress in the near future.

"His Excellency Lord Carmichael invited a conference at Darjeeling in October 1912 to consider about the rural water-supply. Both myself and my Hon'ble friend Rai Sitanath Ray Bahadur, who is here, attended the conference. Then there was no possibility of such Imperial grant, and it was suggested that some portion of the Road Cess might be earmarked for the purpose, and when this grant was announced by Sir Guy Fleetwood Wilson we were confident that a long-felt want in this respect would be removed at no distant date, but our cherished hopes have not as yet been fulfilled.

"Sir, in rural sanitation water-supply form the principal factor, and both Government and the people are one on this point. The Government of India, in their letter to the Local Governments concerned in March 1913, also expressed the hope that a substantial portion of this grant would be set apart for rural water supply and the like. It runs thus:—

'The Government of India leave it to Local Governments, if necessary, to what specific purposes this increased income should be devoted. But they trust that a substantial portion of this sum will be set apart for the improvement of rural water-supply, for anti-malarial measures, for the protection of grains, stores and markets in plague infected localities, and generally for the sanitation of villages and small towns.'

"By this Resolution I have not asked the Government of India to prompt the Local Governments what proportion of the grant should be earmarked, but have left the matter entirely to their discretion. I am sure Local Governments will not grudge any instructions on the part of the Supreme Government in this connection.

"One word more and I am done. Sir, it is a known fact that on account of the insanitary condition of the villages, many people have left their sweet ancestral homes and settled in towns and so, practically speaking, very few people of light and culture could be seen in the villages. The Government is anxious to revive the old system of our village union and Punchayat and improve its condition; but unless the rural sanitation could be improved, I am afraid the Government won't find any suitable resident in the village who could take interest in the village improvement and competent to look after its affairs.

"With these observations, I commend the Resolution for the acceptance of the Council."

The Hon'ble Sir Edward Maclagan:—"Sir, the Hon'ble Member has described the facts which have led to his Resolution. Briefly speaking, there were portions of certain cesses which up to the year 1913 were, in the five provinces of northern India, taken over by the Local Governments. From April, 1913, these portions of cesses have been handed over to District Boards. He wants us now to insist on certain definite portions of that additional income being used for certain sanitary measures which he mentioned.

"He asked a question on this subject last September, and, in reply to his question, he was informed that the Government of India had left it to Local Governments to determine, if necessary, to what specific purposes the increased

[22ND FEBRUARY, 1916.] [*Sir Edward Maclagan; Maharaja Ranajit Sinha of Nashipur.*]

income above referred to should be devoted, but they had, at the same time, intimated that they trusted that a substantial portion of this sum would be devoted to the purposes which he has mentioned.

"I venture to think that the Government of India have gone as far as is advisable in the matter, and I would deprecate any further specification of the exact items upon which this money should be spent. The amount of money required for sanitary purposes differs a great deal in different districts, and not only from district to district, but from time to time, and it would not be fair on Local Governments to require them to ear-mark certain portions of the money that is to be given to each district for use in a particular way. The system of ear-marking of the income of District Boards by Government is one which has prevailed in various places, and opinions about it have differed. But the Decentralisation Commission in their report have pronounced on the whole against it, and have stated that restrictions on the manner in which districts should allot their funds should be swept away. The Government of India have so far supported this view that in their Resolution on local self-government, 1915, they have stated that they expect these restrictions should be gradually relaxed. In the face of all these pronouncements, it would be very difficult for us to go back and to say that, when we have given certain additional income to District Boards, we should insist on their using a certain proportion of it for those specific purposes which the Hon'ble Member refers to. In any case, the local bodies have, so far as I am aware, had unrestricted power over this additional income during the last two years, and it would be a little difficult for us to step in at this stage and to insist on their using it for certain purposes.

"I am sorry, therefore, that we cannot accept the Resolution of the Hon'ble Member as it stands. But what he wants is really not so much that particular items should be car-marked in each district, as that the bulk of this money should be spent on these sanitary measures. If we can take steps to meet his wishes in that respect, I think that perhaps he may be satisfied. He has mentioned the amounts which he says have been given to the districts and the portions of these amounts which they have spent on sanitation. I do not altogether accept the position that very little has been spent We cannot tell exactly how much out of that particular additional income has been spent on these sanitary objects, but we can tell how much has been spent on sanitation and water-works in the various provinces. The amount which has been spent on these items in those five provinces has risen from about five lakhs in 1912-13, before this money was given, to about thirteen lakhs in 1914-15, that is to say, it has more than doubled in two years. He expects us to make quicker progress than that; but when you consider how long it takes for a sanitary project to be taken up, passed, and considered, I am not sure that the progress made is not satisfactory in itself. At the same time, I quite agree that it would be a good thing, and possibly it would lead to valuable results in the direction which the Hon'ble Member contemplates, if the Local Governments and District Boards were invited to examine the figures again, and if the Hon'ble Member will be prepared to amend his Resolution, I would suggest for his consideration that he may recast it in the following terms :—

'That this Council recommends to the Governor General in Council that the attention of the Local Governments concerned may be invited to the orders issued by the Government of India on 1st March, 1913, regarding the transfer of certain local and public works cesses to district bodies, in which the Government of India expressed a wish that a substantial part of the income thus provided should be set apart for the improvement of rural water-supply, for anti-malarial measures, for the protection of grain stores and markets in plague infected localities, and generally for the sanitation of villages and small towns.'

"If the Hon'ble Member is prepared to have his Resolution amended in this way, I may say that Government are prepared to accept it."

The Hon'ble Maharaja Ranajit Sinha of Nashipur:—"Sir, I am indeed grateful to the Hon'ble Sir Edward Maclagan for being

prepared to accept my Resolution in a modified form. I am not very keen that a particular sum must be ear-marked if a substantial sum is set apart for sanitation. I want to impress upon Government and the Council that this new grant which was made for the purpose of rural sanitation was not actually utilised for that purpose. The Government of India in 1913 drew the attention of the Local Governments that a substantial portion of this amount should be set apart for the purpose of rural water-supply and other sanitary measures; and when the Government are prepared to accept the Resolution to that extent, I have no objection to accept the amendment as proposed, and so, with your permission, Sir, I beg to move the amended Resolution."

The Hon'ble the Vice-President:—"You must first ask for permission to withdraw your first Resolution, and then move the amended Resolution."

The Hon'ble Maharaja Ranajit Sinha of Nashipur:—"I beg to withdraw my original Resolution."

The Hon'ble the Vice-President:—"The Resolution is by permission withdrawn."

The Hon'ble Maharaja Ranajit Sinha of Nashipur:—"Then, Sir, with your permission, I beg to move the amended resolution:—

'That this Council recommends to the Governor General in Council that the attention of the Local Governments concerned may be invited to the orders issued by the Government of India on 1st March, 1913, regarding the transfer of certain local and public works cesses to district bodies, in which the Government of India expressed a wish that a substantial portion of the income thus provided should be set apart for the improvement of rural water-supply, for anti-malarial measures, for the protection of grain stores and markets in plague infected localities, and generally for the sanitation of villages and small towns.'"

The Resolution, as amended was put and accepted.

The Council adjourned to Wednesday, the 1st of March, 1916.

A. P. MUDDIMAN,

Secretary to the Government of India,
Legislative Department.

DELHI:

The 29th February, 1916.

APPENDIX A.

[*Vide* Proceedings, page 124.]

Statement regarding Press prosecutions under the Press Act, 1910.

Province.	Number of press (*a*) prosecutions under the Press Act, 1910, since the outbreak of war.	Number of newspapers, English and Vernacular, that have ceased publication since the outbreak of war.	Number of newspapers (*b*) whose securities have been enhanced (together with amount of security) since the outbreak of war.
1. Madras	*Nil*	37	*Nil*
2. Bombay	*Nil*	26	*Nil*
3. Bengal	6	66	*Nil*
4. United Provinces . . .	*Nil*	23	*Nil*
5. Punjab	*Nil*	42	*Nil*
6. Burma	*Nil*	11	1 From ₹500 to ₹1,000.
7. Bihar and Orissa . . .	*Nil*	8	*Nil*
8. Central Provinces . . .	*Nil*	3	*Nil*
9. North-West Frontier Province .	*Nil*	2	*Nil*
10. Assam	*Nil*	*Nil*	*Nil*
11. Coorg	*Nil*	*Nil*	*Nil*
12. Delhi	*Nil*	7	4 One from ₹2,000 to ₹10,000. Two from ₹500 to ₹2,000. One from ₹1,000 to ₹2,000.
TOTAL .	6	220	5

N. B.—The above figures were collected in response to the question asked by the Hon'ble Mir Asad Ali on the 1st October 1915. They are accordingly up to that date only.

(*a*) The reference is to prosecutions under sections 16 (2) or 23 of the Act.

(*b*) The reference is to newspapers which previously gave some security which has been enhanced.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE DEPARTMENT.

SPEECH OF THE HONOURABLE FINANCE MEMBER PRESENTING THE FINANCIAL STATEMENT FOR 1916-17.

Speech of the Honourable Finance Member

INTRODUCING THE

FINANCIAL STATEMENT FOR 1916-17.

Introductory.

Some general effects of the War on trade and finance.

MY LORD,

I rise to present the Financial Statement for 1916-17. As usual there will be no debate to-day, and before we get to the stage of discussion with reference to the Financial Statement as such, it will be necessary to proceed with some very urgent legislation which I shall presently have to introduce. We shall, however, begin the discussion stage on the 9th March. The figures in the Financial Statement will subsequently undergo such amendments as may be required by our later information or suggested by the discussions in Council. The Budget in its final form will be presented on the 21st March, the usual closing debate taking place on the 24th.

2. We are still under the shadow of the great European war, and we must unhappily assume that that colossal conflict will continue throughout 1916-17. I need not repeat what I said at the opening of my last year's speech as to the many ways in which the war affects our financial and economic position, but I may fitly reiterate the difficulties which existing circumstances cause in regard to the preparation of correct financial estimates. These difficulties are not so great as they were at this time last year when we had only the actuals of a few months of war to go upon. But they still remain very considerable, for circumstances may well occur which would materially alter the prognostications we are at present able to make. As I said last year, we must not be too pessimistic, but at the same time, with all that the war and its economic results may yet have in store for us, sanguine estimating is entirely out of place.

3. I commenced my speech last year by indicating some of the immediate effects of the war on our economic and financial position. Since then, to use a nautical metaphor, while we are still in very heavy waters, our ship has settled down to navigation on a more even keel, and we have been free from the sudden and disturbing shocks which the outbreak of war brought about. We have, for example, had no recurrence of the great rush on postal savings banks deposits which I mentioned in paragraph 7 of my last year's speech and which reduced the aggregate amount held in these banks from 24¼ crores at the beginning of August 1914 to somewhat less than 15 crores on the 31st of March last. In the current year, there was some increase in the deposits during the earlier months, and though latterly this has changed into a decrease, we estimate that on the 31st March the total savings bank balances, including accruals of fresh interest, will still be 17 lakhs in excess of the figure for 1st April 1915. Nor have we had any recurrence of a special demand for the encashment of currency notes. On the contrary, while our active note circulation* stood at about 47 crores at the beginning of the current year, it had mounted up to 54 crores in February.

4. The Railway returns show satisfactory activity in internal trade, while the exchange position has been satisfactorily maintained. The sale of reverse Councils on London, in the shape of deferred telegraphic transfers, was only necessary during a period commencing in June last and ending in September; thereafter an extraordinarily strong demand for Council drafts on India set in, which has been maintained till the present date. The stability of our exchange, indeed, stands in marked contrast to the exchange troubles that have afflicted the belligerent countries in Europe, including Great Britain herself.

5. On the other hand, if the difficulties of the opening months of the war have not been specifically repeated, the second year has brought its own perplexities. The very strength of exchange, though a healthy sign in itself, has proved a somewhat

* That is excluding notes in Government Reserve treasuries and at the headquarter offices of the Presidency Banks.

inconvenient problem, in view of the very large indirect remittances which, as I shall show more fully later, we have had to make by incurring military expenditure in India which is recoverable from the Home Government. Money market conditions, again, have become very stringent, and the situation has been aggravated by the depression of Government paper. We have found it necessary to place far more stringent restrictions upon expenditure, and also to restrict the borrowings of public bodies in India, and we ourselves are now shut off from fresh borrowing in the Home market. Thus, though in some respects we may have less to fear from the element of surprise than a year ago, we have settled down to a fuller realisation of the test of endurance which this prolonged war imposes on us.

6. We have moreover been badly treated by the monsoon. The last cold weather rains were unusually plentiful, and the outlook at the beginning of the year was promising. The south-west monsoon, however, arrived late, and was weak and unsteady in July and August, particularly in the north-west of India. A line drawn from Bombay to Delhi may be said roughly to have divided the area on the east, in which the rainfall was good or excessive, from that on the west in which it was deficient. Excessive rain produced serious, and sometimes disastrous, floods in Assam, where the hill section of the Assam-Bengal Railway was so badly damaged that it had to be closed for a time; in the Noakhali and Tipperah districts of Bengal; and in the Cawnpore and Lucknow tracts of the United Provinces. In the west, on the other hand, a continued shortage of rain threatened at one time to have very serious consequences. Fortunately opportune rainfall in September and October greatly improved the prospects of the important *rabi* crops in the Punjab, and changed the position considerably for the better elsewhere, especially in Gujarat where there would otherwise have been famine.

This year's winter rains, again—long delayed and scanty—have proved very inadequate in Northern India, though what fell last month distinctly improved the previous situation.

The conditions described have of course materially affected the land revenue, and have involved a certain amount of outlay, to which I shall refer later, on the conveyance of fodder, and to some extent on direct relief. On the whole, however, the results, from the financial standpoint, have been much less serious than at one time seemed probable. A splendid wheat crop was harvested at the beginning of the year, and there was a satisfactory outturn of sugarcane and cotton. The jute crop, on the other hand, showed a decrease of some three million bales. As regards the crops at present on the ground, the wheat over a large area has suffered from want of rain; the cotton area and outturn are estimated at some 30 per cent below those of last year; the prospects of the oil-seed crop and sugarcane are fair; and the season has on the whole been favourable for the rice crop, except where it has suffered from floods.

7. The depressing effects of the war on the foreign trade of India of course continue, and scarcity and dearness of freight add to the effects produced by the closure of ordinary trade channels and by special restrictions which have been necessary for military and public purposes. As an instance of the way in which freight has risen in the course of the war, and of the diversion of merchant shipping to military and naval purposes, I may mention that recent information shows that jute freights from Calcutta to Dundee are eight times what they were before the war began, while in the case of light seeds from Bombay to Marseilles the increase is ninefold. These specimen figures will give some idea of the extent to which shortage and costliness of freight have hampered trade operations.

There is no need to go into detail in regard to the various special restrictions which have been placed on exports and imports in the course of the war, but speaking generally such control has become much closer during the current year. The general policy throughout has been (*a*) to restrict the trade in foodstuffs and articles capable of being turned to warlike uses in the case of countries whence they can pass to the enemy; (*b*) to stimulate the export of a few articles to the United Kingdom and allied countries, or countries which are making munitions for the Allies; and (*c*) to restrict the export of a very few articles owing to their being needed in India.

8. The combined operation of these causes, together with the stoppage of trade from and to enemy countries, has naturally resulted in the contraction of the volume of our sea-borne trade. In the year 1914-15, two-thirds of which was under war conditions, the total trade of India amounted to 354 crores (£236 million) against 491 crores (£327 million) in 1913-14, there having been a decrease, in respect of

private merchandise, of 25 per cent under imports and 27 per cent under exports. Taking the first nine months of the current official year, the exports of private merchandise are much the same as in the corresponding period of 1914-15 (142 crores against 141), while imports are about 12 crores less (97 against 109), the advantage that 1914-15 obtains owing to its including 4 months of peace having been largely counterbalanced by the great dislocation in trade in September and October which followed the exploits of the "Emden." While our trade is considerably diminished with most countries, and has of course completely stopped with enemy nations and with Belgium, there has been some compensation in the shape of larger exports to the United Kingdom. In the first nine months of the current year these—in the case of the more important articles—exceeded the figure of the corresponding period of 1913-14 by 9 crores.

9. On the export side the volume of trade has expanded in some directions under the demand for our tea, hides and skins, raw jute and jute and cotton manufactures—shipment of these articles taken together, having increased, as compared with the corresponding nine months of 1914-15, by 15¾ crores. Exports of tea, gunny bags and cloth have in fact reached a record figure. The prices of all these commodities have improved: those of jute in particular have largely recovered from the depression to which I referred in paragraph 14 of my last year's speech; raw jute standing a few days ago at R52-8 per bale of 400 lbs. against R37-8 on the corresponding date last year. Cotton prices too have risen, the last quotation per candy (784 lbs.) of *oomras* at Bombay being R254 against R157 on the corresponding date in 1915, and R222 before the war broke out. This recovery in price, and the requirements of Japan, which has taken over one million cwt. more than in the corresponding period of 1914-15, have helped to counteract to some extent the loss of the Continental markets to which Indian cotton is in normal times ordinarily shipped: but the contraction in the exports of this staple is nevertheless over 11 crores. Exports of seeds, too, have fallen off considerably. I shall refer to wheat exports and prices towards the end of my speech, in connection with the Wheat Scheme, but I may mention here that the exports of wheat have been about 650,000 tons, which is approximately the same as in the corresponding period of 1914-15, though a great deal less than the exports of the year preceding (about 1,100,000 tons). This year the transactions would of course have been much larger than they were but for the fact that the Government, in the interests of Indian consumers, found it necessary to put special restrictions upon export.

10. On the import side our trade for the current financial year remains much below the level reached before the war, and so far shows little recovery from the sudden drop which occurred at the outbreak of hostilities; and this of course has had a very prejudicial effect on our customs revenue. I shall refer later on to the particular Tariff heads most affected.

I now pass on to the task of laying before the Council our estimates for the present and the coming year.

Forecast of financial conditions in 1915-16 and 1916-17.

Revised Estimate of Revenue and Expenditure for 1915-16.

11. The general position is brought out in the following table*, which compares the current year's Budget and the Revised Estimate now put forward:—

[In millions of pounds.]

	Budget, 1915-16.			Revised, 1915-16.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Revenue . . .	49·650	30·750	80·400	51·868	30·638	82·506
Expenditure . . .	52·607	31·828	84·435	53·968	31·296	85·264
Deficit (—) .	—2·957	—1·078	—4·035	—2·100	—·658	—2·758

*But see adjustment referred to at the close of paragraph 17 and the final table in paragraph 61.

Revenue—Imperial.

12. We budgeted this year for a total Imperial revenue of about £49·6 million. The Revised Estimate shows £51·8 million, or an increase of about £2·2 million.

This is due entirely to an increase of £2·3 million under the net receipts from State Railways, *i.e.*, gross receipts, less working expenses and portion of surplus profits paid to companies. In the current year's Budget we estimated the gross receipts at £35·3 million and the net at £14·9 million—against £35·6 million and £15·2 million the corresponding figures taken in the Revised Estimate for 1914-15, and £37·5 million and £17·5 million the respective figures for 1913-14. We had to estimate with caution in view of the altered state of things brought about by the war, remembering that the first four months of 1914-15 were under peace conditions. Fortunately the railways have done considerably better than we expected : the gross receipts are now taken at £37·7 million, and the net at £17·2 million. The improvement is attributable partly to more active internal trade and partly to coal which would usually have been sea-borne being diverted to railway routes in consequence of the shortage of tonnage.

13. There is a net decrease of about £100,000 under the remaining heads of revenue, produced mainly by a falling off under Customs and the Imperial share of Land Revenue, counterbalanced by increase under some other heads.

(1) The Land Revenue deterioration (£220,000) is accounted for by the unsatisfactory character of the south-west monsoon in various parts of the country, to which I have already alluded, especially in the United Provinces, the Punjab, and Bombay *quâ* Gujarat and Sind. The position would, of course, have been much more serious but for the late rains which finally arrived in Gujarat and elsewhere.

(2) Under Customs the decline of revenue—mainly due to war conditions, including scarcity of shipping and heavy freights—has been larger by £310,000 than was anticipated in the Budget. The most important shortages anticipated are in respect of rice (export duty), cotton manufactures, metals and manufactures of metals, and petroleum, while we get some rise in sugar and manufactured articles.

(3) On the other hand two Imperial heads—Posts and Telegraphs, and Opium—show a satisfactory improvement, totalling £270,000. Under Salt, too, there is a rise of £15,000; but this is mainly due to speculative clearances made in the last few weeks in the expectation of an enhancement of duty. There is also, turning to heads which are largely Provincial, an improvement aggregating £210,000 in the Imperial share of Stamps and Income Tax, which is to some extent counterbalanced by a falling off of £70,000 under the Imperial share of Excise, the revenue from which is readily depressed by adverse trade and seasonal conditions.

These, however, are little more than the normal variations between estimates and actuals or semi-actuals to which we are accustomed in an ordinary year.

(4) The asisgnments of Imperial revenue to Local Governments have increased by £130,000, owing chiefly to the payment to the Government of Bihar and Orissa of a contribution promised to it to meet the initial outlay on the High Court buildings at Bankipur.

(5) The outstanding feature of the revenue history of the period is thus the excellent return from Railways, in spite of conditions which at the outset appeared adverse. As I shall show shortly, the expenditure side presents as striking a feature in the excess under military expenditure, and these two items may be noted as constituting the only really important departures from the estimates we made in forecasting, twelve months ago, the prospects of an unprecedentedly doubtful year.

Expenditure—Imperial.

14. We budgeted for a total Imperial expenditure of £52·6 million, which has now to be raised to £53·9 million. This increase is entirely due to larger outlay on Military Services, amounting in all to £1·6 million. In the Budget we took the total outlay under this head at £21·4 million, against £21·8 million in the Revised Estimate for 1914-15, the decrease being due mainly to cutting down of all avoidable expenditure with reference to the financial situation. I may explain that the figures I am now handling include the contribution made by India towards the war by her defrayal of the normal charges in connection with troops she has sent outside her borders, but they do not of course take into account expenditure which we incur out here

merely on behalf of His Majesty's Government—in regard to such matters for instance as the supply of munitions and war material—and which we recover from them.

The large increase over our Budget anticipation is due mainly to the following causes:—

(1) Revised arrangements with His Majesty's Government in regard to the practical application of the general formula that India should make no saving by war conditions. The sea transport charges, for instance, which we have to incur on our own account, are at present very small, owing to the cessation of normal drafts and reliefs of British troops, and in the Budget we considered ourselves entitled to take this as a legitimate saving. After further discussion, however, it has been decided that we ought to pay the same charge as if normal conditions had prevailed; and including retrospective application of this principle to the war period of 1914-15, we have had to make an extra payment on this account of about £540,000.

(2) It has similarly been decided that although the Territorial troops who have been sent out to us in exchange for regular British troops on the Indian establishment were at first less in number than the troops they have replaced, we ought to pay the same amount as if we had had our normal establishment of regulars all along; and adding food charges to pay and allowances, this decision results in an extra cost of about £400,000.

(3) The military operations we have had to undertake on the North-West Frontier have involved an additional cost of about £260,000, to which must be added another £90,000 in respect of operations at Aden.

(4) We shall also have had to spend about £260,000 more for various special measures connected with the internal security of the country and possible eventualities on the frontier.

Taking *net* military outlay, *i.e.*, gross expenditure less receipts, this now stands at £21·8 million against £20·2 million taken in the Budget.

15. As regards the civil heads, there is an excess of about £150,000 under furlough allowances, due to a partial relaxation of the restrictions on leave which were imposed at the beginning of the war. On the other hand, there is a saving of £120,000 on the interest payable on capital deposited by Railway Companies resulting from a curtailment of their intended borrowings.

The other items on the expenditure side reflect the results of a stricter policy of retrenchment. The scope for retardation of expenditure is of course much less on the Imperial than the Provincial side, since the latter includes all the main heads of civil administration; and in both cases it had already been restricted by the reduced allotments which we made in the budget of the current year. The total saving on the non-military Imperial heads amounts, however, to as much as £260,000, so that, taking the military services into account, the increase on the expenditure side as a whole is £1·3 million, which falls short of the improvement in revenue by some £900,000.

Revenue and Expenditure—Provincial.

16. The Provincial revenues were taken in the Budget at £30¾ million, and expenditure at £31·8 million, leaving a deficit of over £1 million to be met by drawings on the Provincial balances. The figures now are—revenue £30·638 million, expenditure £31·296 million, deficit £658,000. Like ourselves, the Provincial Governments have suffered in respect of their Land Revenue and Excise, their total loss under these heads, as compared with Budget anticipation, being about £380,000. There has also been a falling off of £120,000 in the Forest revenue—of which nearly £80,000 occurs in Burma and is due to shortage of freight and reduced demand for timber occasioned by the war. On the other hand, the Provinces share our fortune in having had better returns—to the extent of £215,000—under Stamps and Income Tax.

The reduction of expenditure, amounting in all to some £500,000, occurs under Civil Works, Education and Land Revenue. I must in this connection convey our appreciative acknowledgment of the loyal and thorough way in which the Local Governments have responded to our call for retrenchment both as regards 1915-16 and 1916-17, with the result, in the case of the present year, that though their original Budget grants were restricted at the outset, and their revenues have not quite come up to expectations, the Provinces are now expected to close the year with an aggregate deficit of some £400,000 less than their Budgets allowed for.

General Results—Imperial and Provincial.

17. The aggregate figures of Imperial and Provincial revenue and expenditure are brought out in the statement in paragraph 11, and I need only emphasise the following points:—

(1) The revenue is £2,100,000 more than we anticipated in the Budget, there being an increase of £2·2 million under Imperial, and a decrease of £100,000 under Provincial.

(2) The expenditure is £0·8 million more than we anticipated. There has been a saving of some £500,000 under Provincial, but an increase of £1·3 million under Imperial.

(3) Consequently the Imperial deficit is reduced from £3 million to £2·1 million, the Provincial from £1 million to £0·6 million, and the aggregate from £4 million to £2·7 million.

But as I shall explain later on (paragraph 60), our Budget proposals for the coming year will react on our revenue of 1915-16 to the extent of an addition thereto of about £110,000, so that the Imperial deficit becomes £2 million, or more exactly £1,986,000.

Revised estimate, 1915-16. Ways and Means position.

18. I now turn to the ways and means arrangements of the current year. Our Budget programme contemplated the continuance of the temporary loan of £7 million taken from the Gold Standard Reserve in the earlier months of the war and the renewal of the temporary debt, also amounting to £7 million, which had been raised by the Secretary of State in 1914-15 in the form of short-term India bills. Apart from these transactions, our Budget expectations as to the outlay to be financed and the resources by which it was to be covered were as follows:—

(In millions of pounds.)

Outlay.		*Resources.*	
Imperial deficit	3·0	From balances	5·0
Provincial deficit	1·0	Rupee borrowing	8·0
Capital outlay—		Fresh sterling borrowing	6·5
Railways	8·0	Famine Insurance and miscellaneous items	0·1
Irrigation	1·1		
Delhi	0·3	Total	14·6
Discharge of debt (India bonds and Indian Midland Railway debentures)	1·0		
Unfunded debt	0·2		
Total	14·6		

19. The opening balance of the year (in India and England together) was estimated at £21·4 million and the closing balance at £16·4 million.

The actual opening balance has, however, turned out to be £22·7 million. This is mainly accounted for by the fact that the Imperial deficit for 1914-15, which we had taken at £2·8 million, proved to be £1 million less, owing mainly to unexpectedly better receipts under Railways and heavy clearances of Salt towards the close of the year. There was also some further lapse under capital expenditure.

20. The figures in paragraph 18 will now stand as follows:—

(In millions of pounds.)

Outlay.		*Resources.*	
Imperial deficit (*vide* end of para. 17)	2·0	From balances	5·0
Provincial deficit	0·6	Rupee borrowing	3·3
Capital outlay—		Sterling borrowing	3·1
Railways	4·9	Unfunded debt	0·7
Irrigation	0·9	Special war receipts	1·7
Delhi	0·3		
Discharge of debt	4·0		
Famine insurance and miscellaneous items.	1·1		
		Total	13·8
Total	13·8		

21. As regards outlay, I have already explained the decrease in the Imperial and Provincial deficits. The Railway programme was reduced by some £250,000 almost at the outset in consequence of pressure from the Treasury at home against undertaking new works. The remaining falling off under this head as compared with Budget anticipations is due to difficulties in obtaining Railway material, etc., from

home and the economies enjoined with reference to the existing financial situation. There is also a minor saving under the Irrigation programme, and a slight excess, which will be explained later on, in the Delhi expenditure.

The various items that make up the Famine Insurance and Miscellaneous head, instead of almost counterbalancing one another as was anticipated in the Budget, have, on the whole, involved a substantial net outlay, owing mainly to heavier withdrawals of deposits and advances for our troops in the field, and also transactions connected with Council Bills. This head is thus transferred to the outlay side, while on the other hand the entry 'Unfunded Debt' is now expected to yield us a net receipt, and is transferred to the resources side of the account just given.

Lastly we have applied £3 million of the savings available under the outlay side of our original programme to the reduction by that amount of the £7 million which we temporarily borrowed from the Gold Standard Reserve in 1914-15; and as the Secretary of State's Council drawings have enabled him to discharge this liability at home, the Reserve is thus in a stronger position, actually as well as potentially, in the event of any future weakening in exchange. It will be noticed that this sum of £3 million corresponds roughly to the amount by which, in the special circumstances of the year, we have had to curtail the sum originally destined for Railway capital expenditure, so that that lapse may be regarded as having been employed in the next best way—that of strengthening our general position for the remainder of the war.

22. As regards resources, the increase of £300,000 as compared with the Budget estimate under rupee borrowing is due to the 50 lakhs received from the special Post Office section of the loan of 1915 to which I shall refer in greater detail later on. On the other hand the net sterling borrowing has fallen from £6·5 to £3·1 million since, in present circumstances, the Secretary of State has only found it possible to raise £3·4 million out of the £6·5 million of fresh sterling borrowing which the Budget calculations took credit for, while he has had to discharge some £300,000 of Railway debentures which he had originally intended to renew.

Under Unfunded Debt, in view of the heavy withdrawals from postal savings banks in 1914-15, we assumed in the Budget, as a matter of precaution, that there would be further withdrawals amounting to £1 million in the current year, which would, however, be largely counterbalanced by Provident Fund and other deposits. The anticipation of heavy withdrawals has happily not been realized. These amount to £170,000 only, of which £120,000 has gone into the post office section of the new loan. Thus the Unfunded Debt head has yielded receipts amounting (after including the large subscriptions to Provident Funds managed by Government and the accrual of fresh interest on savings bank accounts) to £700,000, instead of a net outlay of £200,000 as anticipated in the Budget.

We have also obtained certain special receipts arising from war conditions which we are temporarily carrying in our balances. These include £850,000 from the liquidation of hostile firms, and about £700,000 obtained from the employment of captured enemy vessels, as well as a balance on our wheat operations to which I shall refer later, and which we are holding in suspense until the wheat scheme is finally closed.

The transactions above described bring us to a closing balance of £17·7 million in India and England, exclusive of the amount held in the balance of the Home Treasury on account of the Gold Standard Reserve.

Budget Estimate of Revenue and Expenditure for 1916-17 on present basis of taxation.

23. The following table brings out, on the present basis of taxation, our Budget anticipations for 1916-17, as compared with the Revised Estimate for the current year.

[In millions of pounds.]

	Revised, 1915-16.			Budget, 1916-17.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Revenue . . .	51·868	30·638	82·506	52·004	30·548	82·552
Expenditure . . .	53·968	31·296	85·264	54·599	30·913	85·512
Deficit (—) .	—2·100	—·658	—2·758	—2·595	—·365	—2·960

Revenue—Imperial.

24. Assuming a normal south-west monsoon in 1916, we take the Imperial revenue for 1916-17 at £52 million, or about £130,000 more than what we are now expecting in the current year.

The satisfactory results of the working of the Railways this year justify our assuming a considerably higher return than was considered safe a year ago, and we have put up both the gross receipts and the net revenue by more than £1⅔ million, as compared with the current year's budget. This head, however, is one under which it is specially necessary to take cautious estimates, since a relatively small percentage of error may lead to a difference in the aggregate sufficient to affect the financial position to a material extent. Even apart from the war and possible further trade restrictions connected therewith, the outlook for 1916-17 is not wholly satisfactory in view of the unfavourable south-west monsoon of the current year and the unsatisfactory winter rains, and we think, after very careful examination, that it is not safe to count on a full repetition of the record railway revenue which we count on obtaining this year. Thus our estimates, for gross receipts (£37·2 million) and for net railway revenue (£16·6 million), are from five to six hundred thousand pounds below the Revised Estimate of the current year, or to be more exact, £610,000 in the case of net revenue.

On the other hand we expect an increase of more than £400,000 under Opium. This is associated with a brisk demand in the Far East, which has led to an increase in the indents from the Straits Settlements and Hong Kong, whose Governments we supply direct, and has enabled us to raise the upset price of the opium which we sell by auction up to R1,800 a chest with effect from January last, so that we obtain the full benefit of the higher prices throughout 1916-17, as against a part only of the current year. Also, on a re-examination of the existing cost of production, we have somewhat enhanced the charge which we recover from Local Governments for opium supplied to them for excise purposes. We expect, too, a large increase in the demand for the export of opium to England for medical purposes, which has come into being from the shutting down of the Turkish market.

25. The variations under other heads are less important. In the Imperial share of Land Revenue we expect an improvement of £133,000 as compared with this year's yield, which has been reduced in some tracts by remissions and suspensions following the unsatisfactory monsoon. We allow too for a continued growth of revenue under Posts and Telegraphs, and for a reduction in the assignments of Imperial revenue to Local Governments owing to the absence of certain special contributions given in the current year. Interest receipts also show a substantial improvement owing to a larger investment in respect of the Paper Currency Reserve to which I shall refer at a later stage.

On the other hand, our Salt revenue is not likely to be again disturbed, as it has been for the last two years, by clearances towards the close of the year with a view to the evasion of a threatened increase in the salt duty; so we cannot count in 1916-17 on the additional revenue obtained this year.

For Customs as a whole we are practically repeating the Revised Estimate of the current year. We allow for a possible fall in the demand for silver and in the imports of piece-goods, but also for the fact that a considerable improvement is expected under sugar in view of the new tariff valuations, which reflect the high prices arising from the war.

Expenditure—Imperial.

26. On the expenditure side we have to provide for about £600,000 more than in the current year owing largely to increased provision for Postal and Telegraph and Military expenditure, amounting to about £280,000 and £150 000 respectively. In the former case the increase is mainly due to the necessity for replenishment of stores, stocks having been depleted in the current year.

Under Interest on Debt, there is comparatively little change. As each new rupee loan is raised the interest charges increase; but on the other hand we shall avoid next year a considerable payment of interest to the Gold Standard Reserve through the discharge of £3 million of the temporary loan which we took from it in 1914-15, and there will also be some saving, which I shall explain later on, in respect of sterling India Bills. There will, however, be some increase in

the interest on capital deposited by Railway companies, as a whole year's interest payments will fall due upon their borrowings (through the Secretary of State) in the current year.

27. We estimate the net expenditure on military services at £22 million, against £21·8 million in the Revised Estimate for the current year. We shall be relieved in 1916-17 of certain arrear charges which we had to meet this year—*vide* paragraph 14 above. But in view of sudden military requirements which are likely to arise in a time of war, such as contributed to the large excess over our Budget Estimate in the current year, we think it only prudent to provide for some moderate reserve to meet such unexpected and minor contingencies.

I may mention here that, speaking very roughly—for the actual readjustment of charges in respect of the many units involved is an exceedingly complicated matter, and calculations are liable to further disturbance by changes in the strength and composition of the expeditionary forces fighting outside India—our contribution to His Majesty's Government in respect of the cost of the troops we have furnished for fighting the battles of the King-Emperor outside his Indian dominions will amount to about £11 million from the commencement of the war up to the 31st March 1916, and may be provisionally taken at £8 million for 1916-17. The amount is increasing with the additions which have from time to time been made to the contingents originally furnished by India. We have also during this period incurred a considerable outlay in India, which would not have come upon us but for the war.

28. Taking Imperial revenue and expenditure together, and still adhering to the present basis of taxation, our deficit for next year is likely to be £2·6 million, against £2·1 million estimated in present conditions for 1915-16, and £1·8 million which actually occurred in 1914-15, the first year of the war.

Revenue and Expenditure—Provincial.

29. The Provincial revenues are taken in the new Budget at £30·5 million, and the expenditure at £30·9 million, the deficit, to be met by drawings on Provincial balances, being thus restricted to about £400,000.

A small deterioration of £90,000 under revenue, as compared with the Revised Estimate, is due to non-recurrence of the special assignments of Imperial revenue mentioned in paragraph 13, partly counterbalanced by some expected recovery under the Land Revenue head following the depression of the current year. The further curtailment of expenditure amounts to about £400,000, this being effected by retrenchment in public works outlay. With the further prolongation of the war, economy in every direction is imperative, and the Local Governments, as I have already said, have co-operated most cordially and effectively in this policy.

30. It will, however, be seen from the following statement, which brings together the Provincial outlay under the heads Education, Medical and Civil Works for the last few years, that the retrenchments which have been made under Education and Medical are not in any way of a sweeping character. The Medical head of course includes sanitation outlay.

[In thousands of pounds.]

Year.	Education.	Medical.	Civil Works.
1911-12	1,963	1,088	4,619
1912-13	2,490	1,142	4,936
1913-14	3,056	1,199	5,950
1914-15	3,182	1,362	6,128
1915-16 (Budget).	3,270	1,299	4,892
1915-16 (Revised).	3,064	1,351	4,586
1916-17 (Budget).	3,137	1,318	3,945

It will thus be observed that the Education and Medical expenditure is still on a somewhat higher level than in the pre-war year, 1913-14, and, as regards Education, much above the outlay in the years 1911-13. There has been a very considerable

retrenchment under Civil Works as is only natural, since this head works as a regulator of Provincial finance, enabling expansion of expenditure when times are good and reduction when they are bad.

General Results—Imperial and Provincial.

31. Reverting to the table in paragraph 23, we estimate that, on the present basis of taxation, the total revenue, Imperial and Provincial, for 1916-17 will be £82·5 million and the total expenditure £85·5 million, resulting in an Imperial deficit of about £2·6 million, and a Provincial deficit of about £400,000. The latter, as I have said, will be met by drawing on the balances at the credit of Local Governments. We have now to consider how the Imperial deficit is to be faced.

Additional taxation proposals.

32. In dealing with the Budget for the current year we determined, with the approval of the Secretary of State, not to impose any additional taxation with reference to the large deficit then anticipated for 1915-16 and that of 1914-15. Though assuming continuance of the war during 1915-16, we were not at that time warranted in anticipating its long duration thereafter, and we therefore found our requirements for the time being by temporary and exceptional measures. We renewed temporary borrowings to the extent of £7 million which we had made from the Gold Standard Reserve in 1914-15, and the Secretary of State did the same in regard to short-term India bills to a like amount which he had raised in London. It was also proposed that the Secretary of State should raise about £6½ million by fresh borrowing at home while we were to issue a rupee loan of £3 million in this country. Even so, however, we had to reduce our programme of Railway and other capital expenditure from about £14 million, the sum taken in the Budget for 1914-15, to £9·4 million. Circumstances are now altogether different. We must assume that the war will continue for yet another year, and, it may be, longer. The Secretary of State has been unable, owing to the financial situation at home, to raise the full amount of the fresh borrowing in London contemplated for this year, and it has become our evident duty to provide for our own requirements without outside assistance, while the supplying capacity of the Indian money market is limited. We have also to recollect that the termination of the war, when it comes, will leave us with heavy financial demands upon us. We shall still, in all probability, have a large amount of temporary debt to pay off, and must also prepare for the liquidation of the rupee loan raised this year, which has to be repaid by 1923. We shall likewise have to surrender nearly £2 million which we shall have received in connection with the liquidation of hostile firms and the employment of captured enemy vessels and are using temporarily to meet our own requirements. On the revenue side, again, we must recognise that the experiences and lessons of the war must also add in some directions to our permanent military charges; and, lastly, it is desirable that we should be in a position, when peace returns, or as soon after as may be, to provide further funds for such beneficent purposes as the improvement of education and sanitation.

In paragraph 54 of my speech introducing the Financial Statement for 1915-16, I said that the Government would not hesitate to resort to increased taxation to meet a deficiency in revenue which promised to be of a more or less abiding character. That contingency has now to be faced. The war continues, and we cannot go on, year after year, with uncovered deficits. We consider it essential in the present uncertain outlook to increase our revenue resources in order to make good the anticipated Imperial deficit of the coming year and also to supply a substantial surplus. I now proceed to indicate the methods by which, with the approval of His Majesty's Government, we propose to effect this.

33. In the first place we propose to raise a sum of about £2·1 million by new and enhanced customs duties in the manner which I now proceed to explain :—

Our general import tariff has been at the rate of 5 per cent *ad valorem* since 1894. We now propose, save in the case of sugar, to raise it to 7½ per cent *ad valorem*, and we hope thereby to get an increase of revenue of about £420,000, excluding the duty on metals which I deal with later. In this, as in other cases, I have, in calculating enhanced receipts, made allowance for decrease in consumption following the higher rates.

In the case of sugar, in view of the large imports of this article and India's facilities for internal supply, we consider that we shall not be inflicting any real hardship on the consumer by fixing the import duty at 10 per cent, by which we hope to raise an extra £400,000.

34. Next we propose a material curtailment of the free list. The present list is based partly on the existing tariff law and partly on executive concessions, with the result that revenue is being unnecessarily surrendered, and the increasing range of exemption encourages applications for still further concessions. We propose hereafter to confine the statutory free list to the following items :—

First.—Gold coin and bullion; and current Indian silver, nickel, bronze and copper coin.

Second.—Certain essential materials—raw hides and skins, raw cotton, raw wool and paper-making materials.

Third.—Certain agricultural requisites—machines and implements for husbandry, dairy appliances, and manures, including certain chemical manures.

Fourth.—Certain articles, the exemption of which follows logically from our practice of levying an excise on cotton goods and beer, namely, cotton yarns and cotton thread, cotton spinning and weaving machinery, certain stores and articles used in the manufacture of cotton goods, and hops.

Fifth.—A few specific articles, the exemption of which is either (*a*) supported by the practice of most countries—animals, works of art devoted to public purposes, books, natural science specimens, uniforms of public servants and military officers, and arms forming part of their equipment; or (*b*) justified by their special importance in Indian conditions—quinine and anti-plague serum.

We have further included in the statutory free list the conditional exemption hitherto granted by executive instructions to salt imported for manufacturing purposes; and also the exemptions in favour of oil-seeds imported by sea from a Native State, and in regard to the professional equipment imported by passengers, trade catalogues and circulars imported by post, and second-hand gunny bags.

35. The following articles now on the free list will hereafter pay duty at 2½ per cent *ad valorem*, which will still leave them 5 per cent below the general tariff rate :—

Grain and pulse; tea chests and lead sheets used in their manufacture, and tea racks; firewood; printing and lithographing material; machinery other than the cotton spinning and weaving machinery above indicated; railway material, including telegraphic apparatus imported for railways; and ships. Coal, coke and fuel will be taxed at a quantitative rate of 8 annas per ton, which is roughly equivalent to 2½ per cent *ad valorem*.

While taxing grain and pulse at 2½ per cent in ordinary circumstances, the Government will be prepared, when necessary, to consider the question of exempting them by executive order in famine years.

Railway material imported by railways worked by the State is, and will remain, free under section 20 of the Sea Customs Act, as Government stores. Railway material for other railways, including those owned by the State but leased to Companies, will be taxed at 2½ per cent. The taxation of this latter class of railway material follows logically on the proposed equivalent taxation of machinery and ships, these three groups of imports having always been equally treated.

36. The remaining articles now on the free list, which have got on to it more or less accidentally, and in regard to which there is no reason either for complete exemption or specially favourable terms, will be taxed at 7½ per cent under the general tariff rate. These are fresh fruits and vegetables, fish maws, bamboos, bristles and fibres, horn, raw jute, oil cakes, plants, precious stones and pearls, gum olibanum, motor cars for goods, and earth, common clay and sand.

37. The above modifications of the existing free list are estimated to give us £160,000.

38. The duty on iron and steel, which is now one per cent *ad valorem*, will be raised to 2½ per cent; and that on other metals, which is now 5 per cent, will go up to 7½ per cent, following the increase in the general rate on imports. These increases will yield about £80,000.

39. I now come to articles which are subject to special rates of duty under the existing tariff. We propose, as I shall explain directly, to enhance the existing rates

in the case of arms, liquors, tobacco and silver manufactures. I shall then briefly refer to some articles on which we propose to leave the existing tariff rates untouched, and finally pass on to two important additions to our list of dutiable exports.

40. As regards arms and ammunition, the effect of the present tariff is, generally speaking, that these are ultimately taxed at a rate of 10 per cent *ad valorem*. We propose to double this, the additional revenue expected being some £20,000.

41. The taxation of liquors involves considerable complications, so I will deal with the matter class by class—

(1) The duty on ale, beer, porter and cider is now 3 annas per gallon against 8*d*. per gallon in England. We propose to raise this to 4½ annas, and, in accordance with the usual practice, to make a similar increase in the excise duty on locally manufactured beer.

(2) The rates on spirits will be recast as follows, and the rate now prescribed for potable spirit will, again in accordance with previous practice, apply to spirit of the same description manufactured in India and technically known as "foreign spirit."

(*a*) Perfumed spirit, per liquid gallon R18-12.

(*b*) Liqueurs, cordials, mixtures and other preparations containing spirit—(1) if entered in such a manner as to indicate that the strength is not to be tested, R14-10 per liquid gallon; (2) if tested, R11-4 per proof gallon.

(*c*) Spirit which has been rendered effectually and permanently unfit for human consumption, 7½ per cent *ad valorem*.

(*d*) Spirit, other sorts, per proof gallon R11-4.

(3) In explanation of these proposals I may observe that :—

(*a*) The rate on potable spirit, which is of course much the most important item, is to be raised from R9-6 to R11-4 per proof gallon so as to bring the Indian rate of duty to the level of the English rate, which is approximately 15 shillings per proof gallon.

(*b*) The preferential rate of R7-13 per proof gallon which was accorded by the tariff of 1910 to spirit contained in drugs, medicines or chemicals is now to be withdrawn. This preferential rate evoked protests from manufacturing chemists in India, who had to pay for imported spirit required by them for the local manufacture of drugs at the rate applicable to potable spirit, and were therefore placed at a disadvantage compared with manufacturing chemists outside India. To remove this disability administrative arrangements have been in force since 1910 under which Indian manufacturing chemists have been able to obtain spirit at the rate of R7-13 per proof gallon. We propose to adjust these difficulties, and at the same time to obtain a larger revenue, by taxing the spirit now in question at the same rate as potable spirit.

(*c*) Similarly, administrative difficulties have arisen in connection with the treatment prescribed in 1910 for the assessment of liqueurs, cordials and perfumed spirit and toilet preparations. The proposals now put forward follow closely the procedure adopted in England in the treatment of these spirituous preparations. A higher liquid gallon rate, *viz*., R18-12, corresponding to the English rate of £1-5, is proposed for perfumed spirit; and a somewhat lower liquid gallon rate is proposed for all spirit not tested, other than perfumed spirit. The present position is that perfumed spirit pays R13 per liquid gallon, while liqueurs, etc., pay at the same rate, and without any statutory option of test with reference to proof strength, an omission which weighs unduly on the weaker liqueurs.

(4) The duty on champagne and sparkling wines now stands at R3-12 per gallon, which it is proposed to raise to R4-6, while the duty on still wines will be increased from R1-8 to R1-12 per gallon. The imports of these articles are on the decline, and it is thought that a higher rate would not be fiscally productive. The increase we are now making is, moreover, proportionately nearly the same as that which we propose under spirits.

(5) We estimate that we shall get about £130,000 from the above proposals, inclusive of £20,000 from the excise on beer and spirits.

42. The present rates of duty on tobacco, cigars and cigarettes are as follows :—

	R	A.	P.	
On unmanufactured tobacco	1	0	0	per lb.
On cigars	1	10	0	„
On cigarettes weighing 3 lbs. or more per 1,000	1	4	0	„
On cigarettes of less weight	5	2	0	per 1,000.
On manufactured tobacco, other sorts	1	2	0	per lb.

43. (1) We leave the rate on unmanufactured tobacco unaltered, as the present duty is approximately 100 per cent *ad valorem.*

(2) The quantitative rate on cigars and cigarettes is to be replaced by an *ad valorem* rate of 50 per cent. In the case of cigars this rate may be taken as equivalent to an increase of about 30 per cent on the present quantitative rate. As regards cigarettes, the aggregate duty collections now represent approximately 30 per cent of value; but the present quantitative rate presses heavily on the very cheap brands, invoiced at R6-14 a thousand, which form the bulk of the imports. The duty represents, in their case, 45 per cent of value, while in the case of a large number of the better brands of cigarettes, particularly those imported from Egypt, the proportion of duty to value is considerably less, running between 9 and 35 per cent. A certain amount of inconvenience and loss is also caused to importers by the necessity of weighing the cigarettes to ascertain the duty leviable at the quantitative rates. The substitution of an *ad valorem* rate will thus have the double effect of drawing some additional revenue from the better class of cigarettes without adding materially to the burden on the cheaper class, and of removing the practical difficulties in applying the present quantitative rates.

(3) We propose to raise the rate on manufactured tobacco, other sorts, from R1-2 to R1-8 per lb., which will be roughly proportionate to the increase of duty in the case of cigars.

(4) We hope to get about £30,000 from these changes in connection with tobacco.

44. We do not propose any increase in the duty of 4 annas an ounce imposed on imported silver in 1910, which represents an *ad valorem* rate of some 15 or 16 per cent. In the case of silver manufactures, however, which at present come under the general tariff, we propose to make a change, to remove a disability under which Indian silversmiths labour. They have now to pay duty at 4 annas per ounce for the silver required for the manufacture of their goods, while silverware and silver thread imported into India only pay duty at the general rate. We now propose that where the importer can give the Collector of Customs proof as to the silver contents of an article made or partly made of silver, the duty on such silver contents shall be at the rate applicable to silver, namely 4 annas per ounce, the residual value of the article being taxed at 7½ per cent. Where, however, no such proof is forthcoming, the whole duty will be at 15 per cent *ad valorem.* Executive instructions will, however, issue exempting from this special tax articles which only contain an inconsiderable proportion of silver.

45. We are not modifying the duty of 1½ annas a gallon imposed on imported petroleum in 1910, which is equivalent to some 20 per cent *ad valorem.* We also leave the export duty on rice unaltered. I shall refer presently to the case of salt.

46. The only other important item in the existing tariff on which I have not yet touched is cotton manufactures. For the last 20 years the position has been that cotton twists and yarns of all kinds are free of duty, while a duty at the rate of 3½ per cent is imposed on woven goods of all kinds, whether imported or manufactured in Indian mills. We propose to leave the position here as it stands.

The Council will naturally ask why, at a time when fiscal necessities compel us to make a material enhancement of the tariff in nearly every other direction, we should leave cotton alone. Well, the Government of India have not failed to represent their view that there should be a material increase in the cotton import duties, while the cotton excise, which has formed the subject of such widespread criticism in this country, should be left unenhanced, subject to the possibility of its being altogether abolished when financial circumstances are more favourable. But His Majesty's Government, who have to consider the position from a wider standpoint, felt that the

raising of this question at the present time would be most unfortunate, as it would provoke a revival of old controversies at a time when they specially desired to avoid all contentious questions both here and in England, and might prejudice the ultimate settlement of the larger issues raised by the war. His Majesty's Government feel that the fiscal relationship of all parts of the Empire as between one another and the rest of the world must be reconsidered after the war, and they desire to leave the question raised by the cotton duties to be considered then, in connection with the general fiscal policy which may be thought best for the Empire, and the share, military and financial, that has been taken by India in the present struggle. His Majesty's Government are aware of the great interest taken in this question in India and of the impossibility of avoiding some reference to it when new taxation has to be raised, but they are confident that their decision is in the best interests of India and that premature discussion of this particular issue could only be harmful. We fully realise the force of these arguments at the present juncture, and consequently we are reluctantly compelled not to propose any modification in respect of the cotton duties.

47. Our final proposal connected with the tariff is the imposition of an export duty on two important staples, namely, tea and jute. Both these industries have been specially prosperous during the war, and in the case of jute I think there is already a considerable consensus of opinion that if the financial situation created by the war should necessitate heavy additional taxation, this is one of the first articles which might legitimately be taxed. The case of tea is hardly less strong, especially in view of the fact that, in spite of its largely industrial character, the tea business has for 30 years been exempted from income tax.

I may add that in the case of tea, we have a precedent for special taxation in the recent action of the Ceylon Government, which, after the war broke out, imposed an export duty of R1½ per 100 lbs. We propose to follow this example and adopt the same rate, a measure which is estimated to produce some £300,000 of revenue in the coming year. Our proposals contemplate, however, the exemption of forward contracts entered into before the present date. We also propose to exempt tea waste.

48. Jute is an article which can well bear a special rate of export duty, not only because of the present prosperity of the trade, but in view of the monopoly which India has in this product. The only existing special taxation on jute is a small cess levied in Calcutta and Chittagong, the proceeds of which go to the Improvement Trust in the case of Calcutta, and the local Port Trust in the case of Chittagong. It was accepted, however, when these cesses were imposed, that they were not to prejudice any future claim of Government to tax jute for our Imperial purposes.

Our present proposal is to tax both the raw and the manufactured article. In the case of raw jute we contemplate a general rate of R2-4 per bale of 400 lbs., which is approximately equivalent, at present prices, to an *ad valorem* duty of 5 per cent. There are, however, certain classes of jute, known technically as "cuttings" and "rejections", which are of much smaller value, and we therefore propose a special rate of 10 annas per bale on cuttings and R1-8 on rejections.

Manufactured jute falls under two main classes, known to the trade as sacking and hessians, respectively. We propose a duty of R10 per ton on sacking and R16 per ton on hessians—a rate which, in each case, corresponds approximately to the taxation, at 'raw jute' rates, of the material used in the production of the goods.

49. We propose, however, following the spirit of section 20 of the Sea Customs Act, to exempt from this duty manufactured jute which is exported under specific demand from His Majesty's Government, *i.e.*, in pursuance of War Office contracts.

Also, as in the case of tea, we propose to exempt forward contracts entered into before the present date, a concession which will appreciably diminish the revenue to be obtained from the new duty in the first year. We estimate this at about £580,000.

50. The tariff changes above indicated will apply to external trade by land, from which another £30,000 is expected, as well as to that by sea. In the aggregate, they are estimated, as I have already stated, to bring in a total increased revenue of about £2·1 million. I shall, during the present sitting, introduce a Bill embodying the legislation required, and I shall ask Your Excellency's permission to suspend the rules of business so as to admit of the immediate nomination of a Select Committee thereon and an instruction to them to report at a very early date. It will be readily

understood that it is most essential to get the fiscal changes which we propose passed into law as soon as possible, and with effect from the present date, since otherwise there would be large clearances of goods to avoid the higher duties.

51. The next source from which we propose to derive increased revenue is Salt. Between 1888 and 1902 salt was, generally speaking, taxed at R2½ per maund. Then a cycle of prosperity permitted a gradual reduction of the duty to R2 per maund in 1903, to R1½ in 1905, and to R1 in 1907, at which figure it now stands. The maund on which this duty is calculated is a little more than 82 lbs.; consequently, the existing rate amounts to only about one-fifth of an anna per lb.

Enhancement of the salt tax has always been looked on as a reserve to be utilised when war or other financial calamities should come upon us, and in making the reductions of the tax which I have noted above our predecessors had in view the increase thus afforded in the potentialities of this reserve. It is only natural, therefore, that in the present situation we should turn to an increase in the salt duty. On the other hand, it has to be remembered that the duty is largely paid by the poorer classes; and that the increases proposed in our customs tariff will to some extent fall upon poor consumers. In the interests of the poor, therefore, we propose to make only a very small increase in the salt tax, *i.e.*, to increase it from R1 to R1¼ per maund. This rate will still be less than that levied only nine years ago, and the taxation will now amount to about ¼ anna per lb. We estimate the extra revenue obtainable from this increase in 1916-17 at £600,000.

It may interest the Council in this connection to be informed that Italy, too, derives a considerable amount of revenue from salt. This was put down in the Italian budget for 1914-15 at the equivalent of £3·6 million, and the taxation has recently been raised so as to bring in another £800,000. Our salt revenue on the present basis of taxation is estimated at £3·4 million, and with the extra duty at £4 million. Italy, therefore, is raising rather more than we do from salt, and from a population which is about one-seventh of that of British India.

52. Here, too, it is necessary to apply the increase to imported and, generally speaking, to locally produced salt, with effect from the 1st March. The enhancement of salt duty will not require special legislation. It can be effected under the law by notification by the Governor General in Council.

Locally produced salt in Burma has hitherto been taxed at less than the general rate of duty, though the tendency has been gradually to work up to this. We shall consider later whether the present enhancement should not also involve a proportionate increase in the special Burma taxation.

53. I now come to Income Tax, in regard to which I may first note that this term now replaces the old designation 'Assessed Taxes' in Heads VIII and 10 of our Revenue accounts, since there is at present no other tax to reckon with under these heads. The first general income tax for British India was enacted in the year 1860, and it may be noted that all incomes above R500 a year paid 4 per cent, or about 8 pies in the rupee, and that profits on land were assessed, except in the case of cultivators of land whose rent value was less than R600 per annum. This Act had a short life, but it was succeeded by various other income tax and license tax enactments, ending with the present Income Tax Act of 1886.

54. The main features of this Act are as follows. It exempts—

(*a*) Incomes derived from land assessed to land revenue and from agriculture.

(*b*) Incomes derived from property solely employed for religious or public charitable purposes.

(*c*) Salaries of officers and soldiers employed in a military capacity, when these do not exceed R500 a month, or R6,000 a year.

(*d*) All incomes which would otherwise be taxable if these are less than R1,000 a year.

The last exemption originally stood at R500, but this limit was raised to R1,000 in 1903. With the exception of that change, the Act of 1886 has remained in force to this day.

The taxation arrangements which it authorises are as follows :—

Salaries and pensions are assessed at 4 pies in the rupee if between R1,000 and R1,999 per annum. If above that amount, they pay 5 pies in the rupee.

Other incomes, derived from sources outside profits of companies and interest on securities, if they are between R1,000 and R1,999, pay on a scale of fixed rates which varies from R20 to R42, and approximates roughly in its total effect to a 4 pie rate. Incomes of R2,000 or upwards similarly derived pay at the 5 pie rate.

Profits of companies are uniformly assessed at 5 pies in the rupee. The same rate is levied upon interest on securities; but here the holder may get an exemption or a rebate at the 4 pie rate, as the case may be, if he can prove that his income from all sources is less than R1,000, or falls between R1,000 and R1,999.

55. Speaking generally, therefore, our normal income tax rate is 5 pies in the rupee, which is about equivalent to 6*d.* in the pound, and it may be noted that, when the Act was introduced, the English income-tax stood at 8*d.* in the pound.

Since then, as is well known, very great changes have been made in the English income tax: the principle of graduation has been introduced, the rates have been very much raised, and since 1910 there has been a super-tax which is now levied on incomes above £3,000. In 1914, just before the war—the super-tax apart—the rates of income tax ranged from 9*d.* to 1*s.* 3*d.* in the pound. These were doubled after the war, and in 1915 there was a further increase of 40 per cent on the previously doubled rate, while the limit of exemption was reduced and the scale of previous abatements cut down. The English income tax, apart again from the super-tax, may, therefore, now be said to run from 2*s.* 1*d.* to 3*s.* 6*d.* in the pound. The contrast afforded by India is thus very marked.

Now it is not necessary, or desirable, to propose any such heroic measures as those which have been forced upon Chancellors of the Exchequer in England; but our income-tax here is undoubtedly very low, and there will be general agreement, I think, that, at a time when it has become necessary to increase taxation materially, and to hit the poor in some measure by the raising of the salt tax, more money should be exacted from the incomes of the relatively well-to-do.

56. Our proposals for obtaining more money from the income-tax are as follows:—

(*a*) We propose to leave all existing exemptions untouched, and also to make no alteration in the taxation of persons whose incomes, official or private, are less than R5,000 per annum.

(*b*) In the case of incomes under Parts I and IV of Schedule II of the Act, *i.e.*, salaries and pensions, and incomes from the "other sources" mentioned above, which exceed the last-mentioned sum, we propose to enhance the tax in the following way:—

(1) Incomes from R5,000 to R9,999 will pay 6 pies in the rupee, or 7½*d.* per pound.

(2) Incomes from R10,000 to R24,999 will pay 9 pies in the rupee, or 11¼*d.* in the pound.

(3) Incomes of R25,000 and upwards will pay 1 anna in the rupee, which is equivalent to 1*s.* 3*d.* in the pound.

(*c*) Profits of companies will be assessed at the 1 anna rate; but this will be subject to abatement, or exemption, to individual shareholders who can show that their total income is such as to warrant a lower rate of taxation or none at all. Thus a shareholder whose income is less than R1,000 per annum from all sources would obtain a refund of the entire tax previously recovered on his dividends; a man whose total income is R5,000 would obtain a refund of the amount recovered in excess of the 6 pie rate; and so on.

We also propose, following what we are advised to be the correct construction of the law as it stands at present, as well as the actual practice in some provinces, to exempt altogether (as would be the case if it were a matter of an individual) the profits of companies which amount to less than R1,000.

(*d*) Interest on securities will be taxed similarly, *i.e.*, the initial rate will be 1 anna, but the holders can obtain refunds of the whole or of part of the sum recovered with reference to their actual income of all kinds.

57. The total number of income tax assessees in 1914-15, counting companies as persons, was about 332,000. Of these about 216,000 were assessed on incomes between R1,000 and R1,999, and 79,000 between R2,000 and R4,999. Consequently, no less than 295,000 of the present assessees will be unaffected by the new rates of taxation

we propose, which will fall on the 37,000 who are relatively well-to-do. Of these, again, about 24,000, on incomes between R5,000 and R9,999, will only have their tax increased by 1 pie on the rupee.

58. We expect in all to get £900,000 from this increased taxation. Here again I shall introduce a Bill to-day making the required amendments in Act II of 1886. But in this case it will not be necessary, as in regard to salt and customs, to make the new taxation applicable before the 1st April 1916. Arrears of income tax not paid by that date, but recovered subsequently, will be assessed at the old rates. The new rates will apply to all income the tax on which has not actually become due till the 1st April.

I may add that we propose to restrict the amendments of the Income Tax Act to those which are necessary to carry out the new scheme of taxation I have outlined. There are other matters, no doubt, in respect of which the existing Act might suitably be amended or made clearer, but these can wait till a season of greater leisure.

59. Lastly, I may explain that under the terms of the existing financial settlements with the provinces, income tax is a divided head, and the additional revenue accruing from our proposals will thus be shared between Imperial and Provincial. But as this additional taxation is imposed solely for Imperial purposes, the amount which technically accrues to the provinces will be set-off by a counter-adjustment from Provincial to Imperial under the head 'Transfers between Imperial and Provincial Revenues.' The same procedure was followed in 1910 in respect of the additional taxation then imposed under 'Stamps' and 'Excise.' A like adjustment will also be made on this occasion in respect of that portion of the additional duty on locally produced beer and 'foreign spirit' which will be credited to Provincial revenues under the terms of the settlements.

60. I now sum up the financial effect of the proposals above explained. We intend to get an additional revenue of—

(*a*) £2,150,000 from Customs and consequential changes in the excise duties on liquors.

(*b*) £600,000 by an enhancement of the duty on Salt.

(*c*) £900,000 by an increase under Income Tax.

Or in all a little over £3·6 million as against an estimated Imperial deficit of £2·6 million. This leaves us with a surplus of £1,052,000 which, though somewhat less than we have aimed at in the years just preceding the war, will supply a useful and much needed source of strength against the contingencies which face us in the future.

The imposition of a portion of our proposed taxation from 1st March (*vide* paragraph 58) will also yield about £110,000 in the current year, thus diminishing (as I have already noted) the Imperial deficit for 1915-16 indicated in paragraph 17 to about £2 million.

61. Consequently the statement given in paragraph 23 must be taken as superseded by the revised statement below, which shows our revenue and expenditure position for 1915-16 and 1916-17 as determined by the taxation measures above expounded.

[In millions of pounds.]

	Revised, 1915-16.			Budget, 1916-17.		
	Imperial.	Provincial.	Total.	**Imperial.**	Provincial.	Total.
Revenue . . .	**51·982**	30·638	82·620	**55·651**	30·548	86·199

Surplus + or deficit — .	**—1·986**	—·658	—2·644	**+1·052**	—·365	+·687

Rupee borrowing.

62. Before I pass on to the general ways and means arrangements for the coming year, it will be desirable to make a few remarks on the subject of our rupee borrowing.

In paragraph 56 of my speech introducing the last Financial Statement I announced our intention of raising a loan of £3 million (4½ crores) in India in the current year, the time and the best method of borrowing being reserved for later consideration.

The internal conditions in India were generally favourable at the period of the year when we usually take into consideration the question of issuing a new loan. Trade was slack and money easy; the balances of the Presidency Banks stood at a high level; and though there was little demand for rupee securities and the market was extremely sensitive, the floating supplies of paper were reported to be small and its price had been comparatively steady. The situation was, however, entirely changed by the announcement, on the 21st June last, of the flotation of a British war loan for an unlimited amount carrying interest at 4½ per cent, with valuable privileges to subscribers in respect to the conversion of holdings in the previous 3½ per cent war loan, consols and annuities, into stock of the new war loan. This produced an immediate drop in the price of our 3½ per cent paper, and it became clear that more favourable terms than we had previously contemplated would have to be offered if a loan of the amount announced in the Budget were to be successfully floated, while the increasing difficulties in raising further loans in London on behalf of India rendered it impossible to reduce the Indian borrowing.

The line of action to be followed in these conditions formed the subject of anxious deliberation on our part and, after discussion of the question at an informal conference which I held with the representatives of the three Presidency Banks, it was decided to fix the rate of interest at 4 per cent and to offer at par a short-term issue which would be redeemed after eight years in any case, while the Government reserved the right of redeeming it at any time after five. Political and financial circumstances rendered it most undesirable to take any risk of the loan proving a failure, and accordingly it was arranged that the Presidency Banks should underwrite the entire loan, and should in any case subscribe for a minimum sum of R1½ crores, in return for a commission of 1 per cent on the amount of the loan. The loan as thus settled was notified on the 28th July last and subscriptions were invited between the 2nd and 17th August, these being receivable at the head offices of the Presidency Banks and their branches, and at all places at which we have account offices, instead of as formerly at the presidency towns only. Considering the moderate amount of interest offered and the conditions prevalent, the loan was wholly successful, being oversubscribed by more than two crores.

63. We also initiated an important new departure in the direction of trying to bring the Goverment into more direct touch with small investors by issuing a supplementary section of the loan to be subscribed for through Post Offices. The loan proper was to be subscribed by the 17th August, but the Post Office section, into which subscriptions of any amount (in even hundreds of rupees) from R100 to R5,000 were receivable, remained open till the end of October, and all the amounts tendered through it were taken in full. Special arrangements were made for wide publication of the terms on which applications would be received through the Post Office, by notices and brief posters exhibited in post offices, treasuries, and district offices, and by advertisements inserted in newspapers, English and vernacular.

The total amount thus realised was about R50 lakhs, or £333,000, and of this amount only about 18 lakhs represented withdrawals from existing savings banks accounts (which so far gave us the advantage, in present circumstances, of transfer of liability from a call account to one which we need not liquidate for some years), while the remaining 32 lakhs was new money lodged with Government. Of the total, 21 lakhs was obtained from Europeans, 26 lakhs from Indians, and 3 lakhs from banks and public bodies. R6 lakhs represented individual applications not exceeding R500, while out of a total of some 4,250 applications, over 500 were for the minimum amount possible, *viz.*, R100. It is also interesting to note that in all nearly three lakhs of rupees, representing some 300 applications, came from Indian ladies. As further evidence of the extent to which this section of the loan tapped sources which would otherwise not have been available, it may

be mentioned that about 40 per cent of the total was applied for through sub and branch post offices in the mofussil.

The total amount obtained may seem small, but I would remind the Council that 50 lakhs is a quarter of the total rupee loan issued so recently as 1911-12, and one-third of that which was issued in 1910-11. Considering the novelty of the experiment, the troubled times, and the innate conservatism of the bulk of the Indian people, I hold that this Post Office loan operation has been a marked success, and has justified us in making the procedure a permanent one. We shall also consider, in respect of future issues, the desirability of further simplifying methods so as to avoid some local difficulties and misapprehensions which this year's experiment brought to notice.

64. I now come to our borrowing programme for the next year. That must take place entirely in this country, since, as I have already indicated, we cannot, in the interests of the Empire, set foot on the borrowing market at home. The position of 3½ per cent paper is also a very relevant factor in this connection. I referred last year with legitimate satisfaction to the strength of that paper, but since then it has fallen greatly. At the beginning of the present financial year its selling price was R92½. In December and January, however, it fell rapidly to the neighbourhood of R80; and in spite of some recovery subsequently, it has recently stood about eight points below the opening price of the year. That is, of course, a very serious matter for the holders of Government paper, and various suggestions have been made, in the press and otherwise, that we should assist them by the conversion of the whole of our 3½ per cent debt, which at present stands at about £92 million, into a 4 per cent security. This would involve a very considerable burden to the general taxpayer, which I am certainly not prepared to impose upon him. Nor can I admit that the Government can be held responsible for such unforeseen falls in securities, Government or other, as have taken place by reason of the war and the higher rates of interest which it has brought about. On the other hand, the Government cannot look with indifference on a large depreciation of the price of the premier security of India, or ignore the grave difficulties which such depreciation, if unremedied, will place in the way of their own future borrowings, especially in the coming year.

65. Consequently, after very careful deliberation, and with the approval of the Secretary of State, we have decided to do something for the holders of our existing Government paper which will be in our own, that is in the public, interests as well as theirs. In view of our ways and means requirements, and to strengthen our position generally, we consider that we should raise not less than £4 million in India next year, outside the amount which we may get from the Post Office section of our loan. To facilitate this we propose that subscriptions to our new loan should carry with them the privilege of converting an equivalent amount of 3½ per cent paper on favourable terms, by which I mean terms that will be better than the arithmetical result of a comparison between 3½ per cent interest and the higher rate which we shall have to pay for the new loan: *e.g.*, if our new loan is issued at 4 per cent, the conversion rate for 3½ per cent paper will be higher than R87½. This privilege will also cover the conversion of our remaining 3 per cent paper on terms proportionally equivalent to those fixed in respect of the 3½ per cents. Thus a subscriber of say one lakh of rupees to the new loan will thereby obtain the right, which we shall allow him to transfer, to obtain another lakh by the conversion, on such terms as may be decided on, of 3½ per cent or 3 per cent paper.

66. Further, we propose that this offer of limited conversion in 1916, conditional on subscription to a new loan, shall be repeated in 1917 and 1918 if we borrow in those years at a higher rate than 3½ per cent. Thus supposing the 1917 loan to be of that character, a subscriber thereto, or a purchaser of conversion rights attached to the loan, will be able to convert 3½ per cent paper into debt of that year's issue, whatever its terms may be. I must explain, however, that the conversion rates will be fixed on each occasion with reference to the circumstances of the time and the character of each new loan, and I can hold out no hope that they will under any circumstances be more favourable hereafter—indeed they may quite possibly be less so—than the terms we shall offer in 1916, when money conditions are specially stringent. I may explain also that conversion facilities will not be attached to any short-term borrowing, such as the loan we raised last year with a currency of 5 to 8 years only; and generally that the Government of India reserve full discretion as to the terms to be offered for future loans, and also as regards the conversion rights associated therewith.

67. We believe that these measures will confer a substantial degree of protection on the holders of our existing paper, and will be found well adapted to the particular conditions which this problem presents to us in India. The requirements of the Government of India are not such as to call for a vast scheme of unlimited conversion in a single year as was the case at home. The Indian markets could not find the money; and if they did find it, we could not employ it ourselves in India, or remit it to England without wrecking exchange. We feel too that in view of the comparative narrowness of the Indian money market in ordinary times, and the special stringency which exists at present, we should—if we confined the opportunity of conversion to a single year's issue—deprive many holders of our paper of an effective chance of participating. On the other hand, we are not prepared to admit that the conditions call for the eventual extinction of the whole mass of our 3½ per cent paper, and could not wisely saddle ourselves with the grave liabilities incidental to a conversion scheme extending over a considerable number of years. In the conditions of the present year our next issue must be a repayable loan, and though we in no way pledge ourselves to confine our flotations in the conversion period to repayable debt, we may of course find it necessary to do so. Now, the association of conversion rights with a repayable loan doubles the amount which has to be repaid in the future. It will be readily understood that this is a very serious element in the problem; and when the time for repayment came, we might be seriously hampered as regards our productive capital expenditure and our finances generally if the amount of debt falling due for discharge were of excessive amount. These reasons have weighed with us in limiting the conversion period to three years. We have also had to bear in mind that one main justification for a conversion scheme is the inducement which it offers to the public to subscribe to the loans issued at a time of difficulty and crisis, and we cannot afford to have this inducement weakened by an undue prolongation of the opportunities for conversion.

68. It would be premature as yet to decide what the exact terms of the 1916 loan shall be in respect of interest and currency, though I may say now that the loan will on this occasion be repayable at the end of some specific, though probably somewhat distant, date. Nor can I yet state the conversion rate which will be offered for 3½ per cent and 3 per cent paper. These are matters which will still require very careful consideration; but I may say at once that the effective amount of our new loan, that is excluding the new debt created by conversion of previous issues, will, as I have already indicated, be not less than £4 million outside the Post Office section (to which, I may observe, the same conversion facilities will apply) and that we shall be prepared to accept subscriptions up to £8 million. We are willing to take that large amount this year partly to make the remedy of conversion more immediate and efficacious, and partly to strengthen our financial position generally in view of the war. But we in no way contemplate, or pledge ourselves to, similarly large flotations in 1917 and 1918; and investors who stand aside from this year's issue in the expectation of being as readily able to obtain conversion rights in the two following years will run the risk of disappointment in that respect.

69. I may mention here that we have decided, with the approval of the Secretary of State, to introduce a new form of Government securities in the shape of bearer-bonds, to meet the convenience of persons in large business centres who wish to dispose of, or raise money upon, Government paper with greater ease and rapidity than are afforded by our existing promissory notes with the formalities attendant upon the transfer of these from one holder to another. We have no desire, however, to alter or abandon the present form of promissory note, which is much valued for purposes of safety by those who wish to hold Government paper permanently or for considerable periods. Accordingly the bearer-bond form will be purely optional and the fullest facilities will be given for the conversion of promissory notes of the existing form into bearer-bonds and *vice versa*. This reform will be introduced as soon as certain legal points which are under consideration have been settled, and when the best form of the new bearer-bond has been determined on.

Ways and Means Estimate for 1916-17.

70. Before setting out the figures in the manner adopted in paragraph 20 above, I would emphasise that they are very materially affected by the facts that, as I have already said, we cannot count on any home borrowing next year; that, on the contrary, we ought to give some little help to the Home

Government in maintaining a grip over the London money market by repaying a portion of the Secretary of State's outstanding India Bills; and that, in view of the limitations of the Indian money market, we must take a cautious view as to the immediate response to our offer of conversion facilities. Consequently, even though it is proposed to meet the Imperial deficit entirely by taxation, and convert it into a surplus, we have had to cut down the capital expenditure programme to the lowest possible limits, allowing only £3 million for Railways and £1·2 for Irrigation and Delhi.

The figures we have to deal with are then as follows:

Outlay.	£ million.	*Resources.*	£ million.
Provincial deficit . . .	0·4	From balances . . .	0·3
Capital Expenditure—		Imperial surplus . .	1·1
Railway	3·0	Rupee borrowing . .	4·3
Irrigation . . .	0·9	Unfunded debt . . .	0·3
Delhi	0·3	Famine insurance and miscellaneous items	0·2
Discharge of debt . . .	2·0		
	6·6	Special war receipts . .	0·4
			6·6

71. I have already explained the amount of the Provincial deficit and the Imperial surplus as arrived at by the new taxation, and now add the following elucidatory remarks in respect of other items.

Railway Programme.—As I have said, the financial position requires us to cut this down to a very low figure. We are advised, indeed, that it is very questionable whether a larger allotment could be profitably spent in view of the great difficulty, in present circumstances, in obtaining railway material from home and its extremely high cost. The present price of rails, for instance, landed in India, is nearly double the pre-war price, while the Tata Works, on which we could normally rely for local supplies, are now mainly occupied in the manufacture of steel for munitions. Our own railway workshops too are largely engaged in the same work.

The £3 million programme has been fixed so as to continue progress, but generally at a reduced rate, on works already in hand which could not without loss or great inconvenience be interrupted. Provision has also been made for the restoration of the hill section of the Assam-Bengal Railway, but only such new works are included—for example, water-supply schemes where the existing supply seems likely to fail—as could not with safety be postponed. The bulk of the expenditure proposed is consequently on open lines.

Irrigation.—Here too the financial position has to be taken into account, and prevents our doing more than repeat the revised estimate provision of £900,000.

Expenditure on Delhi.—This, as in the current year, is confined to what is absolutely necessary to keep things going without deterioration of material and disbanding of necessary establishments.

Discharge of debt.—We provide here £500,000 for the discharge of India bonds issued in connection with the purchase of the Indian Midland Railway, which fall due in the coming year. We also provide £1½ million for the discharge of some of the short-term sterling India Bills issued by the Secretary of State in 1914-15, a measure which, as I have indicated, will be a contribution on our part to the retention of the Home market for borrowings by His Majesty's Government in connection with the war. We shall also, incidentally, save a certain amount in interest charges. The temporary loans we raised in 1914-15, which still stood at £14 million at the commencement of the current year, will thus have been reduced to £9½ million, *i.e.*, to £4 million from the Gold Standard Reserve (*vide* paragraph 21) and £5½ million in sterling India Bills.

72. I have already said as much as I can at present in respect of the *rupee loan.* We take the amount of this for the purpose of the present calculations at £4·3 million, of which £300,000 is estimated as accruing from the Post Office section. But, as I have already indicated, we are prepared to accept subscriptions up to a further sum not exceeding £4 million. To the extent that we obtain these we shall employ them in paying off our remaining debt to the Gold Standard Reserve.

It is very necessary, in present conditions, to conserve the Indian money market for the requirements of Government to a greater extent than is normally necessary. We do not propose to go at all as far in this direction as His Majesty's Government have had to do at home, but we are fully justified in issuing instructions, as we have done, that local bodies shall, as far as possible, keep down their development expenditure which is financed from borrowing; and that all loan flotations by such bodies, as well as branch line companies' loans, shall be held absolutely in abeyance from the present date until our coming loan has been floated.

For *unfunded debt* we take a net incoming of £300,000 only, as we must be cautious in regard to the Post Office deposits, and we are for the present anticipating that there will be a reduction in these by direct withdrawals, or by transfer to the Post Office section of the loan, to the extent of £700,000 in the coming year.

Under *special war receipts* we assume a receipt of £400,000 from the continued employment of enemy vessels.

73. These and other transactions bring us to an estimated closing balance of £17·4 million on the 31st March 1917, exclusive of holdings for the Gold Standard Reserve temporarily included in the balances of the Home Treasury. This is about £1 million more than the normal minimum balance required in India and England together; but it will be readily understood that in present conditions, which in several directions expose our balances to exceptional strain, it is necessary to have some margin. This is the more desirable in that, as I have already said (paragraph 32), we shall eventually have to make good the large sums—of which we are making temporary use—that we are deriving from the employment of captured enemy vessels and the liquidation of hostile firms.

Remarks on certain special heads.

I now furnish some supplementary information in regard to certain special and important heads.

A.—Opium.

74. In paragraph 36 of my speech introducing the Financial Statement for 1914-15, I referred to the question of the disposal of the stocks of Indian opium which had accumulated in the China ports as the one problem of our past opium trade with China still remaining for solution. At the commencement of this year the amount of stocks still unsold was considerable and the rate at which they were passing into consumption was slow, while all the consuming provinces in China except three had been declared free of cultivation and were consequently closed to Indian opium in accordance with the terms of the Opium agreement of 1911. Arrangements had also been made in accordance with that agreement for the inspection, early last summer, of Kiangsu with the object of applying the closure to this province also. These arrangements were however cancelled at the request of the Chinese Government, on the ground that investigations had shown that certain districts were not free from poppy cultivation; and shortly afterwards it became known that an arrangement had been arrived at between the Chinese authorities and the opium merchants which would have the effect of removing restrictions which had previously hampered the latter's trade. This was followed by the announcement, a few months later, that the whole of the stocks lying in Hongkong and a portion of those remaining in Shanghai had been purchased by representatives of the Chinese Government. It may fairly be assumed that the small remaining balance of the stocks is not likely to cause any embarrassment to the Government of India, and so a further, and apparently final, stage has been reached in the connection of this country with China in the matter of the opium trade.

75. Shortly after the outbreak of war we found it desirable to raise—from ₹1,200 to ₹1,600 per chest—the upset price fixed in respect of the opium which is auctioned monthly for export to the non-China markets. During 1915 the full amount of the opium offered at this price was sold and, in view of the active conditions of the trade towards the close of the year, it was decided, as I have previously mentioned, to make a further enhancement of the upset price to ₹1,800 with effect from January 1916. The price obtained at our auction sales rose at once on the announcement of this decision in September and has recently been above the new minimum.

76. I mentioned last year that we had arranged to sell direct to the Government of the Straits Settlements the amount of opium required by that Government for its opium monopoly. A similar arrangement has since been concluded with the Government of Hongkong, and the amount of opium which has been announced for auction is exclusive of the requirements of these two Governments.

77. Incidentally the war has led to an increased demand for medicinal preparations made from opium and, supplies from Turkey being interrupted, it has been arranged with the Secretary of State to test the suitability of Indian opium for this purpose by placing a quantity at the disposal of the London market. The permanent success of the experiment cannot, of course, be established till the return of peace conditions, but we have been able so far to sell 1,400 chests at a substantial profit and anticipate a larger sale in the coming year. It is a matter of satisfaction to us that in this way the production of Indian opium has relieved a want which must otherwise have been acutely felt.

B.—Military Services.

78. The table below shows the gross and net expenditure on Military Services for the coming year and the four years preceding :—

	Gross.					Net, *i.e.*, deducting receipts.
	Army.	Marine.	Military Works.	Special Defences.	Total.	All Military heads.
	£	£	£	£	£	£
1912-13 . . .	19,576,526	479,928	887,379	9,267	20,953,100	19,565,466
1913-14 . . .	19,789,239	512,845	947,297	16,384	21,265,765	19,896,113
1914-15 . . .	20,336,559	463,370	996,071	13,603	21,809,603	20,434,915
1915-16 (Budget) .	19,973,700	650,400	744,300	21,100	21,389,500	20,169,200
1915-16 (Revised) .	21,650,200	519,100	830,200	16,300	23,015,800	21,842,700
1916-17 (Budget) .	21,579,100	707,600	858,300	20,900	23,165,900	22,000,000

79. The total net expenditure in 1915-16 is now expected to reach the figure of £21·8 million or about £1⅔ million more than the Budget. I have already referred (in paragraph 14) to the main causes contributing to this large excess and need only add the following supplementary remarks. The developments of military science have rendered it necessary to increase the efficiency of the army in India in various directions while the war proceeds, *e.g.*, by the provision of mechanical transport, at a cost of £78,000, and of an aviation squadron, at a cost of £74,000. The expenditure on Military Works is now estimated to exceed the Budget figure by £86,000, chiefly on account of urgent improvements to frontier roads, the provision of accommodation for the Indian sick and wounded returned from the front, and improvements to the Cordite factory and to the Ordnance factory at Ishapore. A fall in receipts of £17,000, which is chiefly due to war conditions, also contributes to the increase in net expenditure.

In certain respects the programme of expenditure has not been fulfilled; for instance, the Admiralty were unable to make progress with the construction of the Royal Indian Marine vessels referred to in my speech of last year, and this has involved a lapse of £149,000. On the other hand, the outlay on home stores for marine requirements is higher by £23,000. Other minor variations combine to account for the balance of the estimated excess.

80. For the year 1916-17 a sum of £22 million has been allotted as the net Military expenditure, again on the assumption, which governs all our calculations, that the war will continue throughout the next financial year.

In view of the general financial situation, only absolutely necessary and urgent measures are being provided for. The causes which affected Military expenditure during 1915-16 will remain for the most part operative in 1916-17. There will, it is true, be considerably less expenditure on sea transport charges, since the contribution during the current year included arrear payments on account of 1914-15. We also anticipate reduced expenditure on certain other measures connected with internal defence: and there will be a saving in connection with the mechanical transport

companies, due to the initial expenditure being met for the most part during the current year. On the other hand, we anticipate increased expenditure of £189,000 in connection with the vessels the construction of which at home had to be postponed during the current year, and on replacement of stores and coal, and a somewhat higher provision has to be made for measures in connection with military arrangements on the North-West frontier. Broadly speaking, however, the anticipated expenditure in 1916-17 would be a little lower than in 1915-16 but for the fact that, as I have already explained, we have thought it wise to provide a margin (of rather over half a million pounds) to meet unforeseen demands.

81. The Indian Army still continues to play a conspicuous part, side by side with representatives of every portion of the Empire, in the great war which the King-Emperor and his Allies are waging for the cause of liberty and right. Nor, as I indicated in my speech in the closing budget debate last March, is this the only respect in which India has borne her share of the Empire's burdens. She has rendered invaluable aid by recruiting and training large numbers of soldiers; by furnishing supplies of all sorts—foodstuffs, clothing, ordnance, equipment and munitions; by training and despatching horses; by lending to the Admiralty a great part of her Royal Indian Marine fleet; and by fitting out transports. The total value of the supplies and services of all sorts which she has thus undertaken on behalf of the War Office amounted, including some similar expenditure brought to account at home, to about £10 million in 1914-15 and is estimated at about £18 million in 1915-16 and £20¾ million in 1916-17. These figures include also the outlay in civil departments on the manufacture of munitions which is now in full progress. They do not, however, include the services, representing a recoverable outlay of £850,000 in 1915-16 and about £1 million in 1916-17, which we are able to render to the Australian Government.

82. I mentioned in paragraph 65 of my speech introducing the last Financial Statement the assistance given by the Indian princes in respect of their Imperial Service Corps and in special gifts towards the cost of the war. The latter now total about £900,000. Further, considerable sums have been placed at the disposal of the Commander-in-Chief to be spent in the purchase of horses, motor cars, motor ambulances, etc., or in any way which His Excellency may think advisable for the good of the army. It is of course impossible to mention all these individual gifts, which find no place in the Budget; but I would refer particularly to a recent personal gift of one lakh from His Excellency Maharaja Sir Chandra Shumshere Jung Bahadur Rana, Prime Minister and Marshal of Nepal, as well as of 2 lakhs from the Nepal Durbar, who also are bearing all the ordinary pay charges of a Nepalese contingent now serving in India.

83. The Council will readily understand that the task of deciding the many complex questions relating to the incidence of expenditure as between the Government of India and His Majesty's Government, and of devising a simple and efficient system of accounting, has been a most difficult one. It was found necessary, early in the current year, to create a special appointment of Central War Controller to deal with these matters, and Mr. B. N. Mitra, C.I.E., was appointed to the post. I gladly take this opportunity of acknowledging the conspicuous ability and untiring energy with which he has discharged his duties, and the appreciation they have met with at home as well as here.

C.—Famine Relief.

84. I have already mentioned that the faulty distribution of the monsoon has led to distress in certain areas. This, however, has fortunately, so far, been on a comparatively small scale. Some direct expenditure on relief in the tracts affected by floods in Assam and the United Provinces was necessary. Distress due to drought exists at present in the Bankura district of Bengal; in the Manbhum and Singhbhum districts of Bihar and Orissa; in Ajmer-Merwara, and in the Karauli State in Rajputana; whilst that in the Tipperah district of Bengal is due to floods. Test works have been opened in these tracts and gratuitous relief is also being distributed. The maximum number, so far, on test works in all the affected tracts has been 21,000 and on gratuitous relief 23,000. The Kolhan Government estate in Singhbhum, with an area of 1,200 square miles and a population of 80,000, is however the only area which passed beyond the stage of observation and test, scarcity having been formally declared in October last. Distress there, however, is practically over for the present, though some recrudescence is anticipated when

the harvesting of winter rice is finished. Assistance in the shape of agricultural loans has been necessary in these tracts, as well as in Assam; whilst owing to the scarcity of fodder in Ajmer-Merwara, Rajputana and the Punjab the usual concessions for the carriage of fodder at reduced rates have been introduced in large areas. Special railway concessions have also been granted in order to encourage the emigration of cattle from Ajmer-Merwara.

The actual expenditure incurred in relief is fortunately, however, on a very small scale. It may be taken at £93,000 in the current year, of which £40,000 is debited to the head 33—Famine Relief and mainly represents the cost of fodder concessions. The total outlay at present anticipated in the coming year is £73,000, of which £46,000 is intended for fodder concessions and outlay on direct relief and appears under the Famine Relief head.

85. In the current year we provided £500,000 out of the Famine Insurance Grant of £1 million for protective works. The Famine Relief outlay of £40,000 is a first charge on the remaining moiety, and £460,000 is left for the reduction or avoidance of debt, of which £295,000 comes under the Imperial and £165,000 under the Provincial section.

In the coming year we are slightly reducing the provision for protective works, which is taken at £433,000. Of the remainder, famine relief accounts for £46,000, while £424,000 under Imperial and £97,000 under Provincial are allotted to the reduction or avoidance of debt, the Provincial allotment in the coming year being somewhat reduced as one more of the provinces has now obtained its maximum famine credit. I may add that I have not forgotten the promise, to which I referred in paragraph 69 of my speech last year, to consider the possibility of improving the system of Provincial famine credits. We have not yet had a final reply from one of the provinces mainly interested, but we shall hope to put the matter before the Secretary of State in the course of the coming year.

D.—Expenditure from Special Grants, Educational, Medical, etc.

86. I give below a table similar to that exhibited in paragraphs 46 and 70 of my speech introducing the last two Financial Statements :—

[In thousands of pounds.]

	Total grants given (1911-12 to 1916-17).		Total expenditure incurred* (1911-12 to 1916-17).	Balance expected to be available on 1st April 1917.
	Recurring.	Non-recurring.	Non-recurring.	
(1) Education	763	3,253	2,213	1,040
(2) Sanitation	245	1,738	1,172	566
(3) Medical Relief, etc.	...	58	54	4
(4) Agriculture, etc.	...	177	169	8
(5) Grants for other special purposes	...	1,545	1,415	130
(6) Grants for general purposes (Discretionary grants)	...	667	381	286
Total	1,008	7,438	5,404	2,034
Add—Savings on recurring grants during foregoing period (about)				697
Total amount expected to be available from special grants on the 1st April 1917				2,731

*Non-recurring figures only are given as the recurring grants are treated as having been fully worked up to, any savings obtained from those grants in particular years being added at the foot of the statement.

In view of continued financial stringency, we have, naturally, had again to ask Local Governments to restrict their drawings on the portion of their balances which represents the unspent remainder of these special grants, and we have also had to limit outlay from the portion of previous recurring grants which have remained at our own disposal Any short expenditure by the Government of India from these recurring grants in the current and coming years will, however, be made good when financial prosperity is restored.

E.—Financial position of the Provinces.

87. The financial history of the provinces in the current year, as I have already shown, has been one of severe restriction of expenditure, and this must inevitably be continued in the coming year also. The only important change in the financial arrangements with Local Governments which I have to mention now is the final decision on the question of improving the terms of the Burma provincial settlement, in connection with which I mentioned in paragraph 72 of my last year's speech that we had decided to increase the permanent resources of the Local Government to the extent of £100,000 a year. We had also under consideration at the time a further concession, which has since received the approval of the Secretary of State, namely, the guarantee to this province of a minimum aggregate of revenue advancing progressively every year. The annual increment of revenue thus assured to the province is £53,000, and the guarantee extends until 1923-24. It does not actually become operative until the conclusion of the war; but the total minimum guaranteed revenue on which the province will then begin will be fixed as if its revenues had started at the full amount anticipated in the calculations on which the provincial settlement of April 1911 was based, *plus* the additional £100,000 mentioned above, and had subsequently increased every year at the guaranteed rate. The arrangement is a new feature of our provincial settlement system, and one which we are not likely to extend, as it originates from two factors special to Burma, namely, *first*, the unusually fluctuating character of her revenues as a whole, and, *secondly*, the special necessity in her case, for making an assured provision for a steady scheme of development of communications. Such a scheme cannot be taken up and carried on in the absence of some assurance of a growth of minimum revenue sufficient to provide for an adequate working programme without constant set-backs when an indifferent year happens to succeed one of special prosperity. We ourselves believe fully in the elasticity of the Burma revenues; and we felt that, if this confidence in the future growth of provincial revenues could be turned into a certainty, so far as the Local Government is concerned, by the procedure proposed, a great difficulty in attacking this problem of road development could be met.

88. We have also during this year made good progress with the problem of attempting to define and enlarge the financial powers of Local Governments and of authorities subordinate to them on the one hand, and of the various Imperial authorities on the other. Our hope is to evolve a systematic and liberal scheme of delegation which will help to solve, with greater simplicity and generality than has hitherto been attempted, many questions of decentralisation which have been under consideration for a number of years past, as well as certain parallel questions of audit control to which, as Hon'ble Members are aware, much attention has recently been paid. In this Your Excellency has taken a special personal interest, and I should have been glad if it had been possible to make a more definite announcement on the subject on the present occasion. But the matter is one in which we cannot act alone, for no definite scheme can be introduced without the concurrence of the Secretary of State.

F.—Railways. (Capital Outlay.)

89. The following statement gives the figures of Railway capital expenditure on State-owned lines included within the Railway programme for the coming year and the four years preceding:—

—	1912-13.	1913-14.	1914-15.	1915-16, Revised.	1916-17, Budget.
	£	£	£	£	£
Open lines including rolling stock .	7,134,200	10,303,100	10,534,300	4,250,100	2,730,000
Lines under construction—					
(*a*) started in previous years . .	2,658,700	1,871,500	898,800	660,700	270,000
(*b*) started in current year . .	103,200	131,700	...	35,900	...
Total .	9,896,100	12,306,300	11,433,100	4,946,700	3,000,000

90. As I have already stated, the financial position has necessitated a large reduction in our Budget programme for 1915-16, and also requires us to cut down expenditure in the coming year to a very low figure. The greater part of the reduced outlay for 1916-17 will, as usual, be devoted to the improvement of open line equipment, including provision for the repair of damage done to the hill section of the Assam Bengal Railway by the abnormal floods of last July.

The difficulty of obtaining imported material without interference with more important work and at reasonable cost has limited the proposals for the purchase of new rolling stock to extremely modest dimensions, though, in order to provide work for the railway shops which build coaches and wagons, some material has to be bought from abroad. Works will absorb the greater part of the allotment, and what cannot be made in the country will be found from the stores already collected whenever possible.

91. The small amount which remains over for construction expenditure we propose to utilise in continuing, as far as possible, progress on lines already in hand which cannot well be interrupted without loss or considerable inconvenience. Very nearly half of it goes to the Burdwan-Howrah Chord which, as explained last year, may be regarded as a work of open line improvement designed to relieve the congestion of traffic on existing lines between Calcutta and the coal-fields. Work has here reached an advanced stage, and in order to render the outlay already incurred remunerative it is necessary to provide for its early completion.

Another work of this description is the overhead connection with the Victoria terminus in Bombay, the provision for which will enable moderate progress to be made. The only other important line requiring notice is the Itarsi-Nagpur, on which considerable progress has been made in the current year. The northern section from Itarsi to Parassia, a length of 134 miles, has already been opened to traffic, and it is expected that the southern section from Nagpur to Katol will be ready for opening within the next 3 or 4 months. We have provided a small sum for the completion of this section, but funds will not permit of work being proceeded with on the remaining section Katol to Amla. Circumstanced as we are it is out of the question to make provision from programme funds for any new line of railway.

92. It is all the more gratifying, therefore, to find that the activity of Branch Line companies has been in no way abated. Last year I informed the Council that the total mileage of railways sanctioned for construction by such companies was 234, and that several District Board projects were about to mature. Since then we have sanctioned the construction of four new lines, of a total length of 72 miles, to be financed by certain District Boards in Madras, and have also authorised the flotation of Branch Line companies for the construction of five new railways comprising a total mileage of 258. One of these, the Mymensingh-Bhairab Bazar Railway, is a project of importance which has been under consideration for years past; and the company undertaking its construction is the largest railway concern recently floated in India. These facts bear evidence to the popularity of the terms which we now offer to investors in such undertakings.

93. The following figures show the capital outlay on all State lines up to the end of each year from 1912-13 and the net return obtained, after deducting working expenses and interest charges:—

[In thousands of pounds.]

	1912-13.	1913-14.	1914-15.	1915-16, Revised.	1916-17, Budget.
Capital at charge at end of each year .	340,103	351,302	361,556	365,097	366,827
Net working profit from railways excluding interest charges . .	17,272	17,616	15,614	17,123	16,461
Percentage of net working profit to capital outlay	5·08	5·01	4·32	4·69	4·49
Net working profit from railways after meeting interest charges . .	4,803	4,790	2,158	3,348	2,505
Percentage to capital outlay of net profits after meeting interest charges.	1·41	1·36	·60	·92	·68

94. The return on Railway capital (excluding interest charges) was estimated in the current year's budget at 4·01 per cent. We now estimate it at 4·69 per cent, in consequence of the large increase in net railway earnings which I have already dealt with in my review of the Revenue estimates. For next year we put it at 4·49 per cent consequent on the smaller estimate of net earnings provided for in the Budget.

The charges for interest in the current and ensuing years work out to 3·77 and 3·81 per cent respectively on the capital outlay, so that the final net profit on railways in each of these years is 0·92 per cent and 0·68 per cent. But as I said last year, the interest charges include certain annuity and sinking fund payments which really go to the discharge of debt.

G.—Irrigation. (Capital outlay.)

95. The financial position of our great Irrigation undertakings may be gathered from the following table, which brings up to date the information given in previous Financial Statements. The figures are in thousands of pounds:—

Particu .	1912-13.	1913-14.	1914-15.	1915-16 (Revised).	1916-17 (Budget).
1	2	3	4	5	6
Productive Works.					
Capital outlay to end of each year .	33,347	34,645	35,777	36,696	37,601
Total receipts, including land revenue due to irrigation	4,065	4,338	4,325	4,379	4,417
Total expenses, including interest on debt	2,263	2,306	2,452	2,561	2,587
Net profit	1,802	2,032	1,873	1,818	1,830
Percentage of net profit to capital outlay	5·40	5·87	5·24	4·95	4·87
Protective Works.					
Capital outlay to end of each year .	4,205	4,796	5,345	5,860	6,274
Total receipts, including land revenue due to irrigation	81	112	101	113	119
Total expenses, including interest on debt	188	213	247	275	290
Net loss	107	101	146	162	171
Percentage of net loss to capital outlay	2·55	2·10	2·73	2·76	2·73
Minor Works and Navigation.					
Direct Receipts	266	263	254	268	280
Expenditure	842	914	986	898	889
Net loss	576	651	732	630	609

96. On the 31st March 1915 the total length of main and branch canals and distributaries which had been constructed on irrigation works of all classes amounted to 62,758 miles, a figure which, it is expected, will have increased by some 500 miles during the current financial year. These channels command an area of approximately 50 million acres of culturable land, and in 1914-15 actually irrigated almost

25½ million acres. The area of irrigation of 1915-16 is, however, expected to show a decline to about 24 million acres as the deficient rainfall in parts of Northern India diminished the available water-supply.

97. In addition to the canals in use there are 39 major projects which are either under construction, awaiting sanction, or being examined by the professional advisers of Government. Of these 14 are productive and 25 protective; they are designed to irrigate 7½ million acres and to cost £30 million.

During the current year only one new work of any magnitude was sanctioned, namely, the Gokak canal, a work of the protective class estimated to cost £1·3 million. It will extend the benefits of irrigation to portions of the Belgaum and Bijapur districts in the Bombay Presidency, and to tracts in Kolhapur and certain other adjacent Native States. Work on this project has not however yet been started, and it is unlikely that a beginning can be made while the present financial stringency endures.

98. In paragraph 84 of my speech of last year I referred to five projects of the first importance which had been engaging the attention of the Government of India for some considerable time. The investigation of the Sukkur, Kistna, and Sutlej projects is still proceeding, while the Cauvery reservoir scheme continues to be held up pending the settlement of certain questions respecting the division of the waters of the Cauvery river as between Madras and the Mysore State. An alternative scheme for the utilisation of the waters of the Sarda river in the United Provinces has been advanced by the local Government and is now being examined. The Koch Dam project in the Punjab has been abandoned as financially impracticable.

99. The opening of the Upper Jhelum Canal by Your Excellency in December last marked the practical completion of the Punjab Triple Canals project, for upon this canal the two other linked systems—the Upper Chenab and Lower Bari Doab Canals—depend for their supplies in the *rabi* season. During the first eight months of the current financial year the two last-named works had irrrigated an area exceeding half a million acres, while, on full development, the triple system as a whole will serve an area of 1,870,000 acres annually. Colonisation on the Lower Bari Doab made good progress during the year.

In the United Provinces good progress was made with the erection of a permanent weir and regulator at Hardwar, the site of the headworks of the Upper Ganges Canal. This work, it is hoped, will be finished in the course of the present calendar year, and will greatly improve the efficiency of the canal.

In the Central Provinces the Weinganga and Tandula Canals are approaching completion : it is hoped that irrigation from the former will begin in 1916 and from the latter in 1917.

Satisfactory progress continues to be made with the important protective works in the Bombay Deccan, *viz.*, the Pravara, Godavari, and Nira Right Bank Canals.

In Burma the Twante Canal is nearly finished. This is a purely navigation work and is intended to improve communications between Rangoon and the rich rice-producing lands of the Irrawaddy delta. It will, it is hoped, be ready for use by the end of 1916.

H.—Delhi Expenditure. (Capital Outlay.)

100. We provided £267,000 in this year's Budget for expenditure under the head 51—Initial expenditure on the new Capital. This has been somewhat exceeded, owing largely to existing commitments resulting from the higher scale on which the programme for 1914-15 had been based, and the actual expenditure is now estimated at £333,000. For the coming year we repeat this year's Budget provision.

The Delhi Committee have been engaged during the present year in carrying on preliminary operations, such as levelling the site, collecting materials, manufacturing bricks and similar miscellaneous work. The Indian clerks' quarters and the menials' quarters, which were commenced in 1914, have been completed; bungalows have been provided for the occupation of the works staff; and progress has been made with the detailed schemes and estimates. But the only important buildings on which a beginning has yet been made are Government House and the Secretariat, on

which a moderate rate of progress will be maintained. The programme of work in 1916-17 will be on similar lines; and the staff employed will be kept down to the minimum necessary to supervise the work in hand and to ensure the completion of the estimates at a reasonably early date, while the larger schemes, such as those relating to sanitation, electric lighting and irrigation, must await an improvement in financial conditions.

The *pro forma* account of expenditure on the Delhi Province which was first given last year has been brought up to date and is produced as an appendix to the Financial Secretary's Explanatory Memorandum.

Council drawings, Exchange and Paper Currency Reserve.

101. As I explained in paragraph 10 of my speech last year, a considerable portion of the aggregate remittance which we have to make to the Secretary of State to finance his home expenditure is now being carried out indirectly, owing to the fact that we are incurring a large amount of military expenditure in India on behalf of the Home Government which the Secretary of State recovers from the War Office. The result from our point of view is of course the same as if he had drawn Council Bills on us to that extent and had correspondingly reduced our capacity to meet his further drawings. We estimated in the Budget that we should thus incur £7·5 million of recoverable military expenditure in India, but this has risen, with the development of the operations which we assist in financing, including the manufacture of munitions, to £14·6 million. In addition, the system adopted, at the instance of His Majesty's Government, of financing the purchase of wheat by direct payments on this side to the firms employed as our purchasing agents has involved a further expenditure of £2·9 million, which the Secretary of State recovered by the sale of the wheat at home. We also placed £2 million at the disposal of the Bank of England in India, against which the Bank made a similar payment to the Secretary of State. Finally, as previously mentioned (paragraph 81), we incurred some recoverable outlay—about £0·9 million—on behalf of the Australian Government.

Altogether, then, our recoverable disbursements here have amounted to £20·4 million. The effect of the wheat purchases and sales in depleting our balances here and inflating those of the Secretary of State was, however, corrected, when exchange fell in June—September and reverse bills were sold, by crediting the proceeds (£4·7 million) to our treasury funds in India, while the Secretary of State met the bills at home from his own balances.

102. Thus the net demand on our treasury balances as a result of these forms of indirect remittance amounted to £15·7 million, or about £8 million more than the Budget had contemplated. We were thus unable to meet the Secretary of State's Council drawings (from those balances) to the full extent anticipated, and yet these were on an unexpectedly large scale. The depression of exchange to which I have just referred was of comparatively short duration. It was doubtless connected in part with the system adopted for financing the wheat purchases, as well as with the demand for remittance in connection with the home war loan; and when these transactions had been adjusted, and the period of renewed activity which normally sets in towards the beginning of the cold weather had started, the situation was reversed, and eventually an exceedingly strong demand set in for trade remittances, which, in accordance with our accepted policy, has been fully met. The Secretary of State's Council drawings are now estimated to amount this year to £16⅛ million. Of this sum, £3·7 million has been met from our treasury balances, as against £7·1 anticipated in the Budget; and £7·5 million through the Gold Standard Reserve. The London portion of that Reserve had been weakened by having to meet heavy demands for reverse remittances after the outbreak of war, and we have been glad to take the opportunity afforded by a period of strong exchange to re-transfer to it the free portion of the balance which was thus accumulated in India, as well as the £3 million which we have repaid out of the temporary loan of £7 million which we took from the Reserve in the early part of the war. We still retain in India (in our treasury balances) the remaining portion of that loan.

103. The remaining drawings of the current year (£5·3 million) are being taken against the Paper Currency Reserve. As Hon'ble Members are aware, this is the normal practice when the trade demand for remittance exceeds the amounts

which can conveniently be met from our treasury balances. But while in ordinary conditions the proceeds of bills thus drawn against the Paper Currency Reserve are 'earmarked' at home in gold, the Secretary of State has felt obliged, in the financial situation at home created by war conditions, to make a very sparing use of this procedure. To meet this difficulty without detracting from the "availability" of the Reserve, if I may coin a word, we took power by our recent Currency Ordinance to enable him to invest up to a limited extent in short term securities, such as Treasury bills, the sums which he would normally have earmarked in actual gold, and he is utilizing this power up to the extent of £3 million. At the same time we took the opportunity of making it clear that additional investments from the Currency Reserve, when made in India under the powers taken by the Currency Act of last year (V of 1915), can be effected by creating fresh Government paper *ad hoc* and placing it in the Reserve, thus enabling us to carry out the intention, previously announced, of obtaining, when necessary, additional resources for the assistance of trade or for our own possible requirements. The Currency Act just mentioned remains in force up to six months after the close of the war, and we shall ask the Council in the course of the present session to give the same duration to the useful supplementary legislation contained in the recent Ordinance.

104. In 1916-17 we again expect that the bulk of the funds required by the Secretary of State will be met, as in the present year, by the recovery from the Home Government of expenditure—estimated to amount to £17·1 million—which we shall incur on its behalf in India, besides which there will again be expenditure, amounting to about £1 million, on behalf of the Australian Government. The Secretary of State will therefore require to draw on us in the ordinary way to the extent of £5·1 million only. As usual, however, these announcements are merely provisional, and full discretion is retained to vary the amounts in such manner as may be found advisable.

105. The average rate of exchange in the current year, calculated on the Secretary of State's drawings, is taken at 16·068 pence per rupee.

Gold Standard Reserve.

106. The following statement shows the holdings in the Gold Standard Reserve on the 1st April last and at the date of the last published statement. I have also added figures showing how we expect the Reserve to stand on the 31st March in order to bring out important changes in its constitution to which some allusion has already been made.

[In thousands of pounds.]

—	Book credit in India.	Gold set aside in the Bank of England.	Cash placed by the Secretary of State for India in Council at short notice.	Gold held in India.	Temporary loan to Treasury balances in India.	Invested in London.	TOTAL.
1st April 1915 .	70	1,250	8	5,238	7,000	12,149*	25,715
31st January 1916 .	...	1,000	6,038	...	7,000	11,850†	25,888
As estimated on 31st March 1916.	...	1,000	6,166	245	4,000	14,866‡	26,277

* This represents the value of the securities at the minimum prices fixed for them as on the 31st March 1915.

† This represents the value of the securities as on the 31st October 1915.

‡ This represents the value as on the 31st October 1915 (the date of the last valuation) of the securities then held and the cost price of securities purchased since that date.

107. It will be seen that there will still be a 'loose' balance in India of £245,000. This represents interest which we have to pay for our temporary loan from the Reserve, and as it will not be credited till the 31st March next, there will not be time in the current year for its withdrawal, like the remainder of the balance, by the sale of council bills. The balance with which the year opened, and the repaid portion of the loan we had taken in 1914-15, were withdrawn—to the extent of £7·5 million in all—by the sale of council bills as already described; and the

remainder was remitted to England by adjustments through the Paper Currency Reserve* in connection with a very interesting and expedient transaction.

At the time when the 4½ per cent British war loan of 1915 was floated, the Gold Standard Reserve held consols to the nominal value of about £3¼ million. It was decided to take advantage of the conversion scheme attached to the war loan to exchange these holdings into the new and more easily realisable security. This was effected partly by a direct subscription to the loan on behalf of the Reserve, the remittance above mentioned from our balance in India being made for this purpose, and partly by the purchase of conversion rights. The result of the transaction is that consols yielding a total interest of £81,660 a year have been replaced by much superior war loan securities yielding £97,992. Including the further war loan stock which we obtained by direct subscription, our total war loan holding in the Gold Standard Reserve now amount to £3½ million.

Currency notes.

108. In paragraph 94 of my speech introducing the last Financial Statement, I alluded to the fact that during the period of emergency which followed immediately upon the outbreak of war we made special arrangements to secure the unimpeded encashment of our currency notes, and I announced that it would be our object to maintain, and if possible to develop, the facilities then granted. Definite steps have now been taken towards this end. The Royal Commission on Indian Finance and Currency recommended that Government should increase, whenever and wherever possible, the number of places at which notes can be encashed as of right, as well as the extra-legal facilities for encashment. Definite consideration of the Royal Commission's report having been postponed on account of the war, a decision on their recommendation in favour of additional statutory facilities has necessarily to stand over for the time being. We have not, however, thought it advisable to let the matter rest entirely, and we have accordingly revised the rules and practice relating to the issue and encashment of notes at Government treasuries. In our revised rules it is expressly laid down that all possible endeavour shall be made to meet the requirements of a payee as to the form of currency which he desires to take, and that all applications for the exchange of coin for notes, or of notes for coin, shall ordinarily be met; while we have undertaken to make these facilities real and effective by suitable arrangements for the supply of the coin required.

109. This arrangement relates primarily to those cases in which the treasuries are under Government management. We had, however, already recognised that the most favourable opportunities for developing the note circulation on these lines would probably occur at the larger trade centres, at most of which the Presidency Banks have branches and transact treasury business on behalf of Government, and accordingly the policy of enlisting the co-operation of the Presidency Banks has been steadily pursued. Substantial results have now been achieved in this direction. Thus arrangements have been made with the Banks for the issue and free encashment of notes at a considerable number of their existing branches, while new branches have been opened by the Bank of Madras at four places all of which are of considerable importance from the point of view of trade.

The main features of the new arrangements are that the Government have undertaken, for currency purposes, to keep the Presidency Banks in funds at each branch, and to supply them with any form of currency asked for as far as this may be required to permit of the free issue and exchange of universal currency notes, *i.e.*, those up to Rl00. In consideration of the Banks carrying out these duties on behalf of Government, we have in one instance, in which the arrangements are for the present on a temporary and experimental footing, agreed to reimburse the out-of-pocket expenses incurred by the Bank in connection with the establishment of an exchange department. In other cases we have given a guarantee in respect of the amount of Government funds which, under existing arrangements, are held at the Banks' branches for the transaction of treasury business. This takes the shape either of a guaranteed minimum balance, or of a guaranteed average balance of a specified sum during the busy period of each year. In fixing the remuneration of the Banks in this form the Government have had in view the policy alluded to in another connection in paragraph 11 of my speech introducing the last Financial Statement, by which the balances in the Presidency Banks are kept at as high a level as is compatible with other public interests with the object of enabling a reasonable amount

* We transferred the money to that Reserve here, while the Secretary of State was thus enabled to take a corresponding sum out of his Paper Currency holdings to credit of the Gold Standard Reserve in London.

of assistance to be given to trade. The arrangements above described have thus been made to serve a double purpose.

110. There are certain other matters connected with our paper currency system which deserve mention. The most important of these is the reform effected during the past year by which the practice of re-issuing currency notes has been discontinued. In future all notes presented at a currency office will be at once cancelled however short a time they may have been in circulation. This change of procedure follows the practice of the Bank of England, and has a special advantage as a measure of protection against forgery and fraud, as it is a common device for counterfeit notes to be deliberately soiled or stained in order to obscure the defects of the imitation. When, as is likely to result from the change of procedure, clean notes form the bulk of the circulation, such counterfeit notes will stand a smaller chance of passing current. The change is also likely, on other grounds, to increase the popularity of our notes, as we have found that the public are averse from receiving re-issued notes and not infrequently present them at once at the counter to be changed. I may mention, as a practical example of the way in which this reform has been appreciated, that the Controller of Currency has informed me that the Royal Calcutta Turf Club now issue clean notes only from their totalisators!

We hope in due course to be able to extend the new procedure to currency notes tendered at district treasuries, but there are certain practical difficulties in the way of the immediate extension of the prohibition to so wide a range of offices.

111. We have also had under consideration a proposal to prohibit the cutting of currency notes, which is at present very largely resorted to when these are sent by post. This proposal has, however, been dropped in view of the unfavourable criticism it elicited, the chief ground of objection being that, in view of existing Indian conditions in regard to banking facilities, the use of notes for remittance purposes is indispensable to a large section of the public, and that the prohibition or penalising of the remittance of notes in separate halves would injuriously affect the popularity of the paper currency as a whole. There was, however, one step which Government could safely take to diminish the undoubted inconvenience that results from our offices having to handle notes which have been cut, namely, by prohibiting the practice by which, in certain cases, notes were cut in our currency offices before being remitted to treasuries. It has recently been arranged to discontinue this and to check a similar practice in district treasuries.

112. As I indicated in the beginning of my speech, our currency circulation—partly, I may claim, as a result of the reforms above indicated—is now in a very satisfactory condition, as will be seen from the following statement which gives the active note circulation, *i.e.*, excluding notes held in reserve treasuries and the headquarter offices of the Presidency Banks, on the 1st February in each of the last five years :—

1912	46·75 crores.
1913	51·29 „
1914	51·91 „
1915	45·09 „
1916	54·11 „

The figure for the 1st February last is in fact a record in the statistics of our active circulation—a very notable circumstance, I think, considering the critical times through which we are passing.

The Wheat Scheme.

113. I have already had to make some reference to the Government wheat scheme in connection with the course of exchange and the Secretary of State's Council drawings. I may now say something as to the leading features of the scheme itself. It will be remembered that towards the end of 1914 Indian wheat prices began to rise to an alarmingly high level, and that this rise was practically continuous during the first three months of 1915, in spite of the action taken by Government to limit exports during that period. Prices were being forced up by the effect of the external demand on stocks which were unusually short; and the prospects of the approaching harvest did not, as is ordinarily the case, succeed in easing the situation. So the problem which faced us was to secure that Indian prices should be divorced from world prices, and at the same time to provide an outlet for the surplus crop, which then promised to be large,

alike for the benefit of the Indian cultivator and in order to meet the requirements of the United Kingdom where wheat was in great demand. We therefore resolved, with the approval of His Majesty's Government, to control the export trade by prohibiting all private exports of wheat save some 95,000 tons already covered by existing contracts, and decided that we would ourselves purchase and export all future supplies that might be required for the United Kingdom, to which country our exports were, generally speaking, to be confined. For this purpose we employed the leading export firms as our agents and placed their operations under the control of a Wheat Commissioner. The latter, in consultation with the Government, instructed the purchasing firms month by month in regard to the quantities they might purchase for us and regulated the maximum price at which such purchases could be made. The price was originally fixed at a fairly high level, so as to get into touch with the market, but it was gradually reduced as tenders of wheat increased, and by the middle of June the Government *f. o. b.* price was brought down to R4-10-9 per maund at Karachi. At that time, this figure represented internal prices appreciably above those actually current, but later on the unsatisfactory development of the south-west monsoon brought current prices up to, and finally above, the Government export rate. Consequently, while in the early stage of the scheme the real check on exports was through the maximum allotments to the purchasing firms, since the prices offered would in themselves have attracted much larger quantities, the position has been reversed since the middle of July, export having practically stopped owing to the Government price not being acceptable to dealers in comparison with internal prices, especially in view of the possibility of these rising materially later through poor winter rains. From July onwards, however, the requirements of the United Kingdom became less urgent, so that the stoppage of exports was of no material consequence to it, and was satisfactory to us as decreasing the competition for wheat and thus tending to keep down a rise in prices. Moreover, owing to a fall in prices at home and subsequently, in the autumn, to a great increase in freight charges, further shipment to the United Kingdom of wheat purchased at the price we offered would have resulted in loss. I may mention here that the wheat we shipped home was disposed of under the direction of a Wheat Committee appointed by His Majesty's Government and containing representatives of the India Office, the Treasury and the Board of Agriculture.

114. The scheme speedily provided the check on prices in India which was its main object. In Northern India, just before the scheme came into operation, internal prices at various representative centres ranged between $6\frac{1}{4}$ and $8\frac{3}{4}$ seers per rupee. By the middle of May they had fallen to between 9 and $11\frac{1}{4}$ seers; and in spite of some subsequent rise, caused mainly by the unsatisfactory character of the south-west monsoon in the Punjab, and the delay in the arrival of the winter rains, they are still below the level at which they stood when the scheme came into operation. The scheme has also worked without hardship to the producer. Thus taking the Punjab, the most important portion of India affected, the cultivator there is in normal times well satisfied with a local wholesale price of R3 per maund which corresponds roughly, allowing for transport and other charges, to a price of R4-2-0 *f. o. b.* at Karachi, whereas it will be seen from what I have said already that the prices offered have been considerably higher than this. We have also some information to the effect that the cultivators appreciate the offer of a definite price by Government. The shipment of wheat under the scheme likewise produced an excellent effect in Great Britain, in lowering the prices there at a time when this was much needed: thus the home prices which were at one time 69*s.* a quarter had fallen to 52*s.* in the first half of June. For the success which has attended the scheme we are greatly indebted to the ability, tact and zeal of Mr. M. M. S. Gubbay, C.I.E., who discharged the duties of Wheat Commissioner till he took up, in October last, the post of Deputy Secretary in the Finance Department. The total amount of wheat exported up to date this year amounts to about 650,000 tons.

115. As regards the profits derived from the scheme, these, owing mainly to the enormous cost of freight and the larger supplies that came into the United Kingdom from other quarters, have been much less than might have been anticipated a year ago, and up to date they amount to about £150,000. A definite balance sheet cannot yet be struck, however, as the scheme is to continue in operation, in the interests of the Indian consumer, after the close of the current year, and we shall have to take into account the results of future transactions. In any case there can be no loss to India while the scheme continues in operation on its present lines, and thus still includes the guarantee of His Majesty's Government against such a contingency;

and though we should of course have been glad of a large profit, this was not one of our primary inducements to undertake the scheme. The main object, so far as India is concerned, was, as described in Your Excellency's words in the final Budget debate last year, "to ensure a moderate level of prices, to safeguard the consumer and yet not to disappoint the cultivator of his legitimate profits" ; and, as you also said on that occasion, such profits as may finally ensue will be employed in some special way to the advantage of the people.

116. In regard to food-prices generally, I should like to draw attention to our very fortunate position as compared with some of the principal belligerent countries in Europe. Thus it appears from returns compiled by the Director of Statistics that in January last retail food-prices in Calcutta were only 7 per cent above what they had been at the beginning of the war, whereas, as we have recently learned from the Board of Trade *Labour Gazette*, the rise has been 47 per cent in Great Britain, 83 per cent in Germany, and no less than 112 per cent in Austria.

Conclusion.

117. Now, my Lord, I draw my remarks to a close. It has been a source of great concern to the Government of India that the last Budget to be presented under Your Excellency's auspices should be marked by the necessity of a large increase in taxation. But we should be flinching from our duty, and unmindful of the example which has been set to us in other parts of the Empire, were we to shrink from this, while the increased burdens which we have proposed are small in comparison with those which have to be borne by other countries participating in the war. We may also, I think, derive some satisfaction from the fact that whereas on the last occasion on which additional taxation had to be imposed (in 1910) that necessity arose from the domestic circumstances of India, our present measures arise only through the participation of India in the greatest war which any of us are likely to see and in which the whole future of the Empire is in issue. And when I recall the Resolution unanimously passed in this Council on the 24th February 1915, which affirms 'the unswerving resolution of Indians to support the honour, dignity and prestige of the Empire regardless of the sacrifice it may entail on them,' I am confident that the measures we propose will receive full acquiescence in the Council and in the country.

118. In conclusion I desire once again to express my heartfelt acknowledgments to the officers of the Finance Department for the way in which they have dealt, in their various spheres, with the very difficult conditions through which we have passed during the current year and which are likely to continue throughout the year to come. I can only repeat what I said last year that I am most deeply indebted to their loyal and efficient aid.

W. S. MEYER.

Delhi, March 1st, 1916.

DELHI;

No. 1363-F. E.

GOVERNMENT OF INDIA.

FINANCE DEPARTMENT.

PAY, ALLOWANCES AND FINANCE OFFICERS.

RESOLUTION.

Delhi, the 27th December 1915.

REVISED SCHEDULE FOR EXAMINATION OF CANDIDATES IN INDIA FOR ADMISSION TO GENERAL LIST OF INDIAN FINANCE DEPARTMENT.

In supersession of the schedule of subjects published with Resolution No. 1251-F. E., dated the 30th September 1914, the following revised schedule is prescribed for the examination of candidates in India for admission to the General List of the Indian Finance Department :—

SCHEDULE.

SUBJECTS FOR EXAMINATION.

Compulsory.

	Marks.
Writing and Composition	300

Optional.

Any two of—

(*a*) Political Economy and Economic History . .		
(*b*) Mathematics (pure and mixed)		
(*c*) Physics		
(*d*) Chemistry		
(*e*) History—Questions will be set in— . . .		
(*i*) Indian History from the beginning of Asoka's reign to the close of the 19th century A. D.	400	each
(*ii*) English History from 1485-A. D. to 1880-A. D.		
The examination in History will be of the widest scope and will include questions on social and literary developments. A wide choice of questions will be allowed.		
(*f*) One classical language with its literature, *viz.*, Latin, Greek, Hebrew, Sanskrit, Arabic or Persian.		
Total .	1,100	

In the optional subjects the papers set will be approximately of the standard required for the B. A. Honours degree in any Indian University where these subjects are prescribed.

The curriculum prescribed for the History papers will remain in force for a period of three years from the date of this Resolution.

It is intended to publish the papers set in all subjects from the examination to be held in December 1916 and onwards. The papers will be available, on sale, at the office of the Superintendent, Government Printing, India, Calcutta. The price of each collection will be 8 annas a copy.

Ordered that the Resolution be forwarded to the Departments of the Government of India; to the several Local Governments and Administrations with the request that it may be communicated to Directors of Public Instruction and all heads of colleges and schools in their respective provinces; to the Comptroller and Auditor General; to the Controller of Currency; to all Accountants General and Comptrollers; to all Chief Examiners and Government Examiners of Railway Accounts; to the Examiner of Press Accounts; to the Examiner of Accounts, Lower Ganges Bridge; to the Audit Officer, Delhi Province; to the Examiner of Accounts, Military Works Services; and to the Superintendent, Government Printing, India, Calcutta.

Ordered also that the Resolution be published in the *Gazette of India*.

J. B. BRUNYATE,
Secretary to the Government of India.

(a) From the 14th to the 20th February 1916.
(b) For the week ending 19th February 1916.

E. D. MACLAGAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs. on Thursday, the 2nd March 1916, based on the Indian Daily Weather Reports of the period.

1. A depression entered northwest India at the beginning of the week and caused nearly general precipitation in Baluchistan, the North-West Frontier Province and Kashmir. After the disappearance of this disturbance on the 27th February, dry weather prevailed over the whole Indian region until the end of the week, when a fresh depression from Persia began to affect the weather in northwest India and gave light rain in west Baluchistan.

2. *Burma and northeast India, including Orissa.*—There was no rain.

The United Provinces, Central India and the Central Provinces.—Chakrata had a light fall of rain.

Northwest India.—Precipitation was nearly general in Baluchistan on the 24th and 25th, in the North-West Frontier Province on the 25th, and in Kashmir on the 25th and 26th.

The Peninsula.—Cochin had a light fall of rain.

3. The chief amounts of precipitation were as follows :—

February 24th. Robat, 0·87″.
„ 25th. Murree 0·92″ and Sonamarg 1·53″.
„ 26th. Sonamarg 1·07″.

4. No rain fell during the week except in Baluchistan, the North-West Frontier Province, Kashmir and Malabar. Rainfall was equal to the normal in the last three of these divisions and was in excess by more than 20 per cent in Baluchistan.

The rainfall from the 3rd December to date remains 20 per cent or more in defect over by far the greater part of the country, the deficiency amounting to or exceeding 1½ inches in Kashmir, the Punjab, the United Provinces West, Chota Nagpur, Madras Southeast and the Madras Coast North. Rainfall is 20 per cent or more in excess in the Bay Islands, Burma, Central India West and the Bombay Deccan and is within 20 per cent of the normal in Baluchistan, Berar and Hyderabad North. No rain usually falls during this period in the Konkan.

Division.	Rainfall data for week ending on 2nd March 1916.			Rainfall data from 3rd December 1915 to 2nd March 1916.			Percentage departure from normal.	
	Actual rainfall in inches.	Normal rainfall in inches.	Excess or defect in inches.	Actual rainfall to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	This week.	Last week.

G. C. SIMPSON,
for *Director General of Observatories.*

Dated the 2nd March 1916.

R. A. MANT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 26th February 1916.

Burma.—Light rain fell in four districts in Burma and also in the Shan States and Pakokku hill tracts. Threshing and winnowing of winter rice have been almost completed. Cultivation of spring rice and of other crops and harvesting of miscellaneous crops are progressing. Farm stock is healthy. The price of unhusked rice has risen further to Rs. 101 per hundred baskets and is slightly above normal. The supplies continue to be poor. The market for white rice is firm.

Assam.—The weather is seasonable and favourable to standing crops. Light to moderate rain has fallen in all districts. Harvesting of mustard, pressing of sugarcane and preparation of land for *jhum* cultivation in hill districts continue. Hoeing and pruning of tea and ploughing of land for paddy and jute are in progress. Sowing of autumn rice has commenced in the Garo Hills district. Prospects of tea are good. The price of common rice has fallen slightly. Cattle disease is reported from six districts.

Bengal.—During the week light and scattered showers fell in many parts of eastern Bengal and in a few places of northern Bengal. Elsewhere the fall was practically *nil*. The recent showers have been beneficial to the standing spring crops and have also assisted agricultural operations. More rain, however, is needed. Sowing of jute and autumn paddy on low lands has begun in some districts. Harvesting of sugarcane has been almost finished and that of spring crops continues. Scarcity of fodder is increasing in Bankura. Cattle disease is reported from six districts. The average price of common rice for the Province has slightly fallen as compared with that of the preceding week.

The weekly report on scarcity is as follows :—In the Bankura district the condition of the people and the state of affairs in the affected areas are generally unchanged but the distress is tending to increase. Scarcity of fodder and water is apprehended. Private charitable funds are giving assistance. Loans continue to be freely given. The price of rice is 8½ seers per rupee. The number of persons on relief works was 12,755 and on gratuitous relief 16,753, total 29,508. The number of persons relieved on private works was 3,673. In the Tippera district the condition of the people and the state of affairs in the affected areas are generally unchanged but the distress is tending to increase in restricted areas. The price of rice is 7½ seers per rupee. The number of persons on relief works was 4,157 and on gratuitous relief 4,304 ; total 8,461.

Bihar and Orissa.—There was practically no rain during the week. Harvesting of oilseeds and pressing of sugarcane continue. Preparation of land for the next season's crops has commenced. Standing crops are doing well. The average price of common rice has remained practically stationary as compared with that of the preceding week. The supply of fodder and water is sufficient except in Hazaribagh where the latter is reported to be scarce. Cattle disease is reported from sixteen districts. The attendance of persons on test works in Manbhum was 2,813 and in Singhbhum 2,898. Gratuitous relief was given to 441 persons in Manbhum. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—The week was rainless. North western districts still report need for further rain. Irrigation and weeding of poppy, preparation of land for sugarcane and extra crops and harvesting of peas and mustard are in progress. Standing crops are doing well generally Agricultural stock is in good condition and there is very little cattle disease. Fodder and water are sufficient though the former is still dear in places. Markets are well supplied. Prices are generally stationary.

Punjab.—Except for light showers in parts of the west the weather was generally dry. Rain is urgently wanted everywhere. The condition and prospects of the irrigated wheat and other crops are generally fair and those of unirrigated ones are below average in parts of the south, east and west. Unirrigated crops are withering from want of rain. Pressing of sugarcane and harvesting of *toria* continue in some districts with yield normal. Extra spring crops are being sown. The area sown is generally normal. Cattle are generally healthy but are becoming weak owing to the scarcity of fodder. Water for drinking and

canal irrigation is generally sufficient. Prices are generally stationary but have fallen slightly in some districts and range between warning and above scarcity rates. Price of wheat:—Ambala 8¼, Ferozepore and Lahore 9¼, Rawalpindi 9½ and Lyallpur 10 seers per rupee.

North-West Frontier Province.—The week was cloudy and beneficial rain fell. More rain is required in the Dera Ismail Khan district. Standing crops are average in Peshawar and in irrigated areas of Dera Ismail Khan, above average in Bannu and poor in unirrigated tracts of Dera Ismail Khan. Sowings of sugarcane in the Bannu tahsil and of tobacco, onions, melons, *moth* and vegetables in Peshawar continue Harvesting of sugarcane is proceeding in the Bannu tahsil with outturn below average. The condition of cattle is good except in unirrigated tracts of the Lakki tahsil of the Bannu district where it is bad. Fodder is sufficient but it is scanty in the Nowshera tahsil of the Peshawar district and dear in Dera Ismail Khan. The public health is good. Prices are high and are stationary in Peshawar and falling in Bannu except those of maize and barley which are stationary and of *bajra* which are rising. Prices of gram and *bajra* are falling in Dera Ismail Khan.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 8 to 10 and maize from 11 to 18 seers per rupee. The condition of standing crops is average. There is no cattle disease. Fodder is sufficient except in a few places.

Kashmir.—The rainfall was good. Standing crops are in fair condition. Cattle are generally healthy. Fodder is insufficient in Baramula. Water is inadequate. Prices are high.

Rajputana.—The weather is clear and cool. Rain is needed in Bikaner and in parts of the eastern Rajputana States. Spring crops are being irrigated where possible and are in fair to good condition. Crops on dry lands in Merwara are withering. Damage to crops by cold and frost is reported from Sirohi, Mewar, the southern Rajputana States, Central Rajputana, Tonk and Merwara. Fodder is generally scarce. The condition of cattle is generally deteriorating owing to the deficiency of pasturage in the affected areas. The water supply is generally sufficient except in Kotah, Tonk and Merwara. Cattle disease is reported from Dungarpur, Banswara and Kotah. Prices are falling in Shahpura, Banswara, Jhalawar, Jaipur and Bharatpur, rising in Mewar, Dungarpur, Partabgarh, Kishangarh, Tonk and Karauli and are stationary elsewhere. The number of persons on test works in Merwara was 1,142, in Karawi 1,218 and in Kishengarh 322. Gratuitous relief was given to 825 persons in Merwara.

Central India.—Winter showers fell in parts of Gwalior and Bhopal. No rain was received elsewhere. The rain has been insufficient in Gwalior, some parganas of Mehidpur and Rampura-Bhanpura districts of the Indore State and in parts of Bundelkhand and sufficient elsewhere. Sugarcane is being sown in Gwalior and is being pressed in Bhopal. Spring crops are being irrigated almost everywhere. Standing crops are generally in good condition but damage caused by severe cold is reported from the Indore State. The probable outturn is fair in Indore and in parts of Baghelkhand and good elsewhere. Agricultural stock is generally in good condition except for cattle disease in the Pichhor pargana of the Gwalior State, Rampura pargana of the Indore State, the Rajgarh State of the Bhopal Agency, the Garrauli State of the Bundelkhand Agency and Barwani, Jhabua and Alirajpur of the Southern States. The fodder supply is generally good except in parts of the Narwar, Ujjain, Shajapur and Mandasor districts of the Gwalior State. Prices are high in Baghelkhand, normal in Bhopal and steady elsewhere.

Central Provinces.—The weather has been clear. The days are getting warm but the nights and mornings are cool. But for some damage in parts of six districts from frost and hail spring crops are doing well and their harvesting is in progress. Fodder and wate are adequate everywhere. Cattle are faring well. Variations in prices are unimportant.

Feudatory States:—Prospects of spring crops are favourable. Variations in prices are slight.

Bombay.—Standing crops are generally in good condition except for slight damage by frost in parts of Sind and Baroda and by winds in Sukkur and the Upper Sind Frontier. Cotton picking continues in Gujarat, West Khandesh, Bijapur, Dharwar, Baroda, Kolhapur, Kathiawar and Rewa Kantha. Harvesting of spring crops is progressing generally. The fodder supply is deficient in parts of Karachi, Larkana, Hyderabad, Thar and Parkar, Cutch, Kathiawar and Baroda. Agricultural stock is sufficient. Cattle are in good condition except in Larkana, Hyderabad and Ahmedabad. Drinking water is generally adequate. Water for rrigation is deficient in Thar and Parkar, Kaira, Ahmedabad, Kathiawar and Baroda. Prices if food grains have fallen slightly in Gujarat and are generally steady elsewhere. The number on gratuitous relief in Kathiawar was 179.

Hyderabad.—No rain fell during the week. Spring crops are generally in fair to good condition but they have been damaged by rats in parts of the Usmanabad district. Late rice is being sown and weeded and the crop is in fair to good condition. Cattle disease prevails in four talukas. Prices of grains are almost steady. Coarse rice is selling at 10 and white *juar* at 12 seers per rupee in Hyderabad city. The highest price of *juar* in districts is 10 seers per rupee in Gulbarga and Medak and the lowest 24 seers per rupee in Adilabad.

Mysore.—No rain fell during the week. The price of *ragi* has risen in Kolar and that of rice has fallen in Chitaldrug. Markets are well supplied. Standing crops are in good condition. The outturn of the harvested paddy, sugarcane and *ragi* is fair to good. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

Coorg.—Picking of coffee has been almost completed and threshing of rice continues Prices of food grains are high. The public health is fair. Fodder for cattle is sufficient.

Madras.—The rainfall during the week was light in Malabar and *nil* elsewhere. Standing crops are in fair to good condition generally except in parts of Bellary, Chingleput, South Arcot and Tinnevelly and require more rain in parts of North Arcot and Tanjore. Harvesting of paddy, sugarcane and dry crops is proceeding with outturn fair to normal generally. Sowings of paddy, sugarcane and dry crops are proceeding or are nearing completion normally. The condition of cattle is generally good. The water supply is sufficient except in parts of Bellary, Anantapur, the Carnatic, the central parts except Coimbatore and the southern parts except Tanjore. Pasture is generally sufficient but it is scanty in Kurnool and Malabar and in parts of nine other districts. Fodder is generally available but it is scarce in parts of four districts. Prices have fallen slightly.

R. A. MANT,
Secretary to the Government of India.

REGISTERED No. C. 696

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 11, 1916.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 9th September 1915.

On and after 6th November and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Delhi. Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Delhi and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*.

J. P. HEWETT,
Secretary to the Government of India."

Rates of Subscription.	per annum. Rs.	a.	p.

By order of Government, all subscription must be paid *in advance*.

Applications for the supply of the *Gazette* on the *public service* should be addressed to the Department of the Government of India, Local Government, Head of Department or other officer empowered in this behalf to whom the applicant is subordinate.

Complaints regarding non-receipt of any number of the *Gazette* should be forwarded within a week after the date on which it is due.

J. J. MEIKLE,
Publisher, *Gazette of India*.

THE PATENT OFFICE.

PATENTS and DESIGNS.

Calcutta, the 11th March 1916.

NOTIFICATION.

The following draft of an amendment to the Indian Patents and Designs Rules, 1912, which it is proposed to make in exercise of the powers conferred by Section 48 (2) and 77 (1) of the Indian Patents and Designs Act, 1911 (II of 1911), is published as required by Section 77 (2) of the said Act for the information of all persons likely to be affected thereby, and notice is hereby given that the said draft will be taken into consideration on or after the 1st day of May 1916.

Any objection or suggestion which may be received from any person with respect to the draft before the date specified will be considered by the Governor General in Council.

DRAFT AMENDMENT.

The following proviso shall be added to rule 36 of the said rules, namely :—

"Provided that the requirements of this rule and of sub-clause (*b*) of clause (1) of section 48 of the Act shall be dispensed with as regards printed cotton piece goods except handkerchiefs."

ERRATUM.

In the notification dated 26th February 1916 under "Applications for Patents" against 2479 *read* Overall McCray, Ld., *for* Overall McGay, Ld.

APPLICATIONS FOR PATENTS UNDER SECTION 3.

Class 13. Nos. 3838 to 3889. The Calico Printers' Association Ld., St. James's Buildings, Oxford Street, Manchester, England. February 28.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE, CINCHONA FEBRIFUGE, RESIDUAL ALKALOID AND QUINOIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona alkaloids. Quinine can be purchased by Government officers, District and Local Boards. It can also be purchased by Missionaries for *bonâ fide* public purposes. Otherwise it is not sold to private persons or firms. Cinchonidine is for sale to Government officers and to dealers. Cinchona Febrifuge can be purchased both in powder and 3½ grain tablet forms by Government officers and the general public. It is also sold by the principal Druggists in Calcutta. Quinoidine or *Pure amorphous alkaloid* and Residual Alkaloid or *Amorphous cinchona alkaloid*, which contains about 40 per cent. of *pure amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance, but private purchasers may use the V. P. Post system, and are obtainable from the Superintendent, Juvenile Jail, Alipore.*

The rates for these drugs from 1st April 1915 are as follows:—

SULPHATE OF QUININE.

	₹
For quantities of not less than 6 lbs. in one delivery . . .	14-8 per lb.
For any quantity less than 6 lbs. in one delivery	15-8 ,,

SULPHATE OF CINCHONIDINE.

	₹
For quantities of not less than 6 lbs. in one delivery . . .	11 per lb.
For any quantity less than 6 lbs. in one delivery	12 ,,

CINCHONA FEBRIFUGE.

	₹
For quantities of not less than 6 lbs. in one delivery . . .	5 per lb.
For any quantity less than 6 lbs. in one delivery	6 ,,

RESIDUAL ALKALOID OR *AMORPHOUS CINCHONA ALKALOID* AND QUINOIDINE OR *PURE AMORPHOUS ALKALOID* AND QUINOIDINE TABLETS.

	₹
For any quantity	4 per lb.

Quinine is available in 1-oz., ¼-lb., ½-lb., 1-lb. and 4-lb. tins.
Cinchonidine is available in ¼-lb., ½-lb. and 1-lb. tins.
Cinchona Febrifuge is available in ¼-lb., ½-lb. and 1-lb. tins.
Residual Alkaloid is available in 10-lb., 5-lb. and 1-lb. tins.
Quinoidine is available in 10-lb. and 1-lb. tins.
Quinoidine Tablets are available in 1-lb. tins.

Transit charges are in addition to the above prices in every case.

Drugs are sold strictly cash and in advance. Price of Postage must accompany the price of the drug (when the drug is required by Post). No charges are made when drugs are sent by Rail. The name of the Railway Station, Steamer or Post Office must be written distinctly when the parcels are required by Rail, Steamer or by Post. A scale of Postage is given below :—

For ¼ and ½ lb. 4 As.; 1 lb. 6 As.; 2 lbs. 10 As.; 3 lbs. 12 As.; 4 lbs. 1 Re.; 5 lbs. Re. 1 As. 4; and for 6 lbs. Re. 1 As. 6.

GOVERNMENT OF BENGAL, MUNICIPAL DEPARTMENT.

NOTIFICATION.

Dated the 22nd February 1916.

No. 700-*M*.—In pursuance of section 42 of the Land Acquisition Act, 1894 (Act I of 1894), it is hereby notified that the following agreement has been executed under the provisions of section 41 of the said Act between the Secretary of State for India in Council and the Calcutta Tramways Company, Limited, for the acquisition of land for enlarging the Company's existing car-shed at 298, Upper Circular Road, in the town of Calcutta or for building a new car-shed :—

Calcutta.

MEMORANDUM OF AGREEMENT made this 22nd day of December one thousand nine hundred and fifteen BETWEEN THE CALCUTTA TRAMWAYS COMPANY LIMITED a Company incorporated under the English Companies Act having its registered office at No. 1 Queen Victoria Street in the City of London (hereinafter called "the Company") and carrying on business at No. 1 Corporation Street in the town of Calcutta of the one part and THE SECRETARY OF STATE FOR INDIA IN COUNCIL (hereinafter called "the Secretary of State") of the other part WHEREAS upon the application of the Company the Government of Bengal has consented to take up or acquire on behalf of the Company under the provisions of the Land Acquisition Act (Act No. 1 of 1894) for the purpose of enlarging the existing car-shed erected by the Company on the southern portion of the premises No. 298 Upper Circular Road Calcutta or building a new car-shed required to provide additional accommodation for the cars of the Central Sections of the Company's system the piece or parcel of land with the buildings erected thereon containing seven bighas four cottahs and three chittacks or thereabouts situate and being the northern portion of the said premises No. 298 Upper Circular Road Calcutta and bounded on the north by premises No. 297-1 Upper Circular Road belonging to Rosik and Raj Koomari Bewa on the south by the southern portion of the said premises No. 298 Upper Circular Road belonging to the Company on the east by the burial ground of Moosa Set and Abdul Baree and properties belonging to Jotish Chandra Dutt and Brothers and Raj Koomari Bewa and on the west by Upper Circular Road aforesaid and more particularly described in the plan* hereto annexed and thereon hatched with red it having been shown to the satisfaction of the said Government of Bengal that the proposed acquisition for the purpose aforesaid is likely to prove useful to the public AND WHEREAS the said Government of Bengal have required the Company under the provisions of section 41 of the above mentioned Act to enter into the Agreement with the Secretary of State hereinafter contained NOW THESE PRESENTS WITNESS and it is hereby agreed and declared as follows :—

* Not reproduced.

1. The Company shall and will pay and reimburse to Government within such time as may be fixed and notified to the Company by the Secretary of State or his officer duly authorised in that behalf the entire costs of acquiring the said piece or parcel of land in accordance with the provisions of the Land Acquisition Act including all compensation damages or expenses which may have been or may be paid or incurred in respect or on account of such acquisition and all law costs which have been or may be incurred by Government upon or in respect of or incidental to the said acquisition including the costs of any litigation arising thereout either in the Original or Appellate Courts and including also the cost of the establishment and the salary of the officer of Government employed or to be employed by Government in connection with or for the purposes of such acquisition.

2. Upon payment by the Company of all moneys payable by them under the last preceding clause or as soon thereafter as may be practicable the said piece or parcel of land forming the subject of the said acquisition shall be transferred by the Secretary of State to and vested in the Company.

3. The said piece or parcel of land shall be held by the Company for the purpose of the erection construction and maintenance thereon of such a car-shed or extension loops sidings offices and godowns as are next hereinafter mentioned and for no other purpose and the Company shall not assign transfer or part with the possession of the said piece or parcel of land or any part thereof without the previous consent in writing of the Secretary of State or his officer duly authorised in that behalf first had and obtained.

4. So soon as the said piece or parcel of land shall have been vested in the Company the Company shall forthwith at its own cost and expense erect and construct or cause to be erected and constructed thereon and in accordance with plans and specifications to be approved of on behalf of the Secretary of State a new car-shed or an extension of the existing car-shed of the Company and all loops sidings offices and godowns required to provide additional accommodation for the cars of the central sections of the Company's system. The Company shall also at the like cost and expense execute and carry out to the satisfaction of the Secretary of State such works as it may be required by him to carrry out for the safeguarding or otherwise of the public or owners occupiers or persons using and visiting the premises

adjoining the said piece or parcel of land or any part thereof. The said car-shed loops sidings offices and godowns and other works as aforesaid shall at all times be maintained by and at the expense of the Company in a good and efficient state of repair and the Company shall not make any alterations therein or additions thereto or erect or construct any other buildings or works on the said piece or parcel of land or use the same for any purpose other than as aforesaid without the consent in writing of the Secretary of State or his duly authorised officer as aforesaid first had and obtained.

5. The said car-shed or extension loops sidings offices and godowns shall be completed by the Company fit and ready for use within two years from the date when the said piece or parcel of land shall become vested in the Company.

6. The public shall be entitled to use the said loops sidings offices and godowns only in so far as may be necessary in the usual course of the working of the present and future tramway system of the Company.

7. Should any dispute or difference arise touching or concerning the subject matter of this agreement or any covenant clause or thing herein contained the same shall be referred to the said Government of Bengal and the opinion and decision of the said Government upon such dispute or difference shall be final and conclusive and binding on the parties hereto.

As witness the hands of the parties the day and year first above written.

SENATE HOUSE, *the 4th March 1916.*

P. BRÜHL, *Registrar.*

Abu, the 6th March 1916.

No. 323—1227.—The Honourable the Chief Commissioner is pleased to make the following amendments in the Notifications published under the Excise Regulation (I of 1915) :—

(1) *Notification No. 1751-1227, dated the 10th September 1915.*

Delete the words—

"The above restrictions do not extend to any foreign spirit or foreign fermented liquor."

(2) *Notification No. 1758-1227, dated the 10th September 1915.*

In rule 47 (IV) substitute "Section 62 (2) (*d*) of the Excise Regulation (I of 1915)" in place of "Act XVI of 1863."

(3) *Notification No. 1762-1227, dated the 10th September 1915.*

In condition 8 of the license for possession and use of Methylated spirit by Chemists and others, omit the following words :—

"Or Act XVI of 1863."

(4) *Notification No. 1752-1227, dated the 10th September 1915.*

For the words "14 years" substitute "16 years."

(5) *Notification No. 2040-1098, dated the 21st October 1915.*

Delete bracket and the maker's name against items 17 and 18 of the list.

Read Burroughs Wellcome & Co. "against items 18 (*a*) and Parke Devis & Co." against items 18 (*b*) of the list.

By order,

B. J. GLANCY,

First Assistant to the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

II F 2

CHIEF CLERK'S OFFICE, HIGH COURT, FORT,
Bombay, this 1st day of March 1916.

R. B. PATEL,
Chief Clerk.

IN THE HIGH COURT OF BOMBAY.

In Insolvency.

No. 128 OF 1916.

Bombay, the 3rd March 1916.

Re Vithal Karamchand of Bombay, Jaroda Bania Hindu Inhabitant, residing at Bhoiwada outside the Fort and carrying on business at Tamba Kanta in the name of Vital Karamchand, an adjudged Insolvent.

Whereas the abovenamed Vithal Karamchand

has been this day duly adjudged to have committed acts of Insolvency under Section IX of the Presidency Towns Insolvency Act, 1909 (III of 1909). It is ordered that all the estate and effects of the said Insolvent do vest in the Official Assignee of this Honourable Court, and it is further ordered that the said Insolvent do, immediately after the service of the order of adjudication upon him, attend the Office of the said Official Assignee.

R. B. PATEL,
Chief Clerk.

IN THE COURT OF M. RAHIM BAKHSH, M.A., JUDGE, INSOLVENCY COURT, DELHI.

SUIT No. 20 OF 1916.

Dated the 25th February 1916.

In the matter of insolvency of Choohai Mal, son of Jaggoo Mal Mahajan, Mohalla Choori-walan, Delhi, debtor.

It is hereby notified under section 12 of Act 3 of 1907, that an application filed by Choohai Mal to be adjudicated an Insolvent has been admitted in this court and will be heard on 27th day of March 1916.

RAHIM BAKHSH,
Judge, Insolvency Court, Delhi.

CHIEF COMMISSIONER, DELHI

NOTIFICATION.

Dated Delhi, the 29th February 1916.

No. 1264-*C & I.*—The following draft amendments which it is proposed to make in the rules made under Section 9 of the Indian Petroleum Act, 1899, which were published in Punjab Government Notification No. 90, dated 15th February 1909, are published for criticism. The draft will be taken into consideration on or after the 1st of April 1916, together with any remarks or suggestions received on or before that date :—

DRAFT AMENDMENTS.

(1) In rule 6, Chapter IV, Part II, of the said rules, for the words "forty gallons" the words "sixty-five gallons" shall be substituted.

(2) In condition 3 of license form B, condition 1 of license form H, condition 1 (for dangerous petroleum in the case of the holder of a license in form H) of license form I, and condition 1 of license form K, appended to the said rules :—

(*a*) for the words "forty gallons" after the words "not more than" the words "sixty-five gallons" shall be substituted ; and

(*b*) the following shall be added as sub-clause (7) :—

"(7) When the capacity exceeds forty but does not exceed sixty-five gallons .... 10 B. W. G."

Dated Delhi, the 3rd March 1916.

No. 1337-*Home*.—With reference to notification No. 7761, dated the 30th November 1915, the Chief Commissioner is pleased to declare that Monday the 20th March 1916, shall be observed as a public holiday in the Province of Delhi, within the meaning of section 25 of the Negotiable Instruments Act XXVI of 1881 instead of Saturday the 18th March 1916 shown against the Hindu festival of Holi in column two of the schedule attached to the said notification.

Dated Delhi, the 4th of March 1916.

No. 1362-*R. & A.*—As required by Section 5 of the Destruction of Records Act III of 1879, the Chief Commissioner, Delhi, is pleased to publish the following amendment to the rules for the destruction of records published under his notification No. 3917-R. & A., dated 12th June 1915:—

XX-(b). After No. III add :—

	File.	Period.

Acts of the Indian Legislative Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Indian Legislative Council received the assent of the Governor General on the 8th March, 1916, and is hereby promulgated for general information :—

ACT No. III OF 1916.

An Act to provide for the trial, by court-martial, of foreigners for offences against the Defence of India Rules.

WHEREAS it is expedient to provide for the trial, by court-martial, of foreigners for offences against the Defence of India Rules; It is hereby enacted as follows :—

Short title, extent and duration.

1. (*1*) This Act may be called the "Foreigners' (Trial by Court-martial) Act, 1916."

(*2*) It extends to the whole of British India, including British Baluchistan, the Sonthal Parganas, and the district of Angul.

(*3*) It shall be in force during the continuance of the present war and for a period of six months thereafter :

Provided that the expiration of this Act shall not affect the validity of anything done in pursuance of it, and any person convicted under this Act may be punished as if it had continued in force, and all prosecutions and other legal proceedings pending under this Act at the time of the expiration thereof may be completed and carried into effect and the sentences carried into execution as if this Act had not expired.

Definitions.

2. In this Act—

(*a*) "British subject" has the same meaning as in section 27 of the British Nationality and Status of Aliens Act, 1914 : 4 & 5 Geo., V., c. 17.

Provided that any person who holds a certificate of naturalization as a British subject granted under any Act of the Governor General in Council for the time being in force shall, for the purposes of this Act, be deemed to be a British subject.

(*b*) "Defence of India Rules" means any rules for the time being in force made under section 2 of the Defence of India (Criminal Law Amendment) Act, 1915. IV of 1915.

(*c*) "Foreigner" means any person who is not a British subject.

Trial of foreigners contravening rules under section 2 of the Defence of India Act, 1915.

3. (*1*) The Governor General in Council may, by order in writing, direct that a foreigner accused of anything which is an offence in virtue of the Defence of India Rules shall be tried by court-martial.

(2) An order made under sub-section (1) may be made in respect of all foreigners or any particular foreigner or any class of foreigners, and in respect of all offences against the said rules or any particular offence or any class of offences.

(3) An order made under sub-section (1) may be made in respect of, or include, any foreigner so accused whether such offence was committed before or after the commencement of this Act.

Procedure on making of order under section 3.

4. When an order under section 3 has been made in respect of, or includes, any foreigner, such foreigner, when so accused, may be taken into military custody, and shall, if he is already in other custody, be handed over to military custody, and shall be proceeded against and dealt with as if he was a person subject to military law in accordance with the Army Act, and as if the offence of which he is accused was an offence against military law; and may, on conviction, be sentenced to, and shall be liable to suffer, any punishment assigned by the Defence of India Rules for the offence of which he is found guilty. 44 & Vict.,

Procedure on trial.

5. The trial and all matters precedent thereto and attendant thereon shall be held and carried out in accordance with the provisions of the Army Act and the rules for the time being in force thereunder: 44 & Vict.,

Provided that the Governor General in Council may, by general or special order, modify, in such way as he may direct, any of the said provisions.

Repeal of Ordinance III of 1916.

6. The Foreigners (Trial by Court-martial) Ordinance, 1916, is hereby repealed. III of

STATEMENT OF OBJECTS AND REASONS.

IN time of war the speedy and drastic punishment of acts by alien enemies injurious to the State and especially of offences relating to the collection and communication of information of such a nature as may be directly or indirectly useful to an enemy is a matter of great military importance. Accordingly, the Governor General recently promulgated an Ordinance providing that any person other than a British subject accused of an offence against the Defence of India Rules might be proceeded against and dealt with as if he were a person subject to Military Law in accordance with the Army Act, and as if the offence of which he was accused was an offence against Military Law. The Ordinance further provided that such person on conviction would be liable to suffer any punishment assigned by the Defence of India Rules for the offence of which he might be found guilty, and that the trial and all matters precedent thereto would be carried out in accordance with the provisions of the Army Act subject to any modifications which the Governor General in Council might direct.

This Ordinance will have currency for six months only, and the object of the present Bill is to make the provisions of the Ordinance operative for the period of the war and six months thereafter, as has already been done in the case of other Ordinances passed to deal with emergencies which have arisen out of the present war.

BEAUCHAMP DUFF.

DELHI;
The 3rd March, 1916.

A. P. MUDDIMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Indian Legislative Council received the assent of the Governor General on the 8th March, 1916, and is hereby promulgated for general information :—

ACT No. IV OF 1916.

An Act to amend the Indian Tariff Act, 1894, and for other purposes.

I of 1894. WHEREAS it is expedient to amend the Indian Tariff Act, 1894, and to repeal, so far as it relates to this Act, and re-enact with amendments section I of 1878. 22 of the Sea Customs Act, 1878; It is hereby enacted as follows :—

Short title and retrospective effect.

1. (*1*) This Act may be called the Indian Tariff (Amendment) Act, 1916.

(*2*) It shall be deemed to have come into force on the 1st day of March, 1916, and any sums due on account of new duties leviable thereunder or of any deficiency between the duties which have been paid and the duties which are leviable thereunder shall be deemed to be duties short levied within the meaning of section 39 of the Sea I of 1878. Customs Act, 1878, and that Act shall apply accordingly.

Definition.

2. In this Act the Indian Tariff Act, 1894 (hereinafter referred to as the said Act), means of 1894. the Indian Tariff Act, 1894, as subsequently amended.

Substitution of new section 3 in Act VIII of 1894.

3. For section 3 of the said Act, the following section shall be substituted, namely :—

"3. (*1*) There shall be levied and collected in every port to which this Act applies, the duties specified in the Second and Third Schedules.

(*2*) The Governor General in Council may, by notification in the Gazette of India, fix, for the purpose of levying the said duties, tariff values of any articles enumerated, either specifically or under general headings, in the said Schedules as chargeable with duty *ad valorem*, and may alter any tariff values for the time being in force.

(*3*) Different tariff values may be fixed for different classes or descriptions of the same article."

Substitution of new Schedules for Schedules II, III, IV and V of Act VIII of 1894.

4. For the Second, Third, Fourth and Fifth Schedules of the said Act, the Schedules contained in the First Schedule to this Act shall be substituted.

Repeals.

5. The enactments specified in the Second Schedule to this Act are repealed to the extent specified in the fourth column thereof.

SCHEDULE I.

SCHEDULES TO BE SUBSTITUTED IN THE INDIAN TARIFF ACT, 1894.

(See section 4).

"SCHEDULE II—IMPORT TARIFF.

PART I.

Articles which are free of duty.

No.	Names of Articles.

			Proviso 1.—No duty in excess of 20 per cent. *ad valorem* shall be levied upon any of the articles specified in items Nos. 1 to 10 of this entry when they are imported in reasonable quantity, for his own private use, by any person lawfully entitled to possess the same.	

SCHEDULE II—IMPORT TARIFF.

PART II—*concld.*

Articles which are liable to duty at special rates.

No.	Names of articles.	Unit or method of assessment.	Rate of duty.
			R A.
			Proviso 2.—When any articles which have been otherwise imported, and upon which duty has been levied or is leviable under items Nos. 1 to 10, are purchased retail from the importer by a person lawfully entitled as aforesaid, in reasonable quantity for his own private use, the importer may apply to the Collector of Customs for refund or remission (as the case may be) of so much of the duty thereon as is in excess of 20 per cent. *ad valorem*; and if such Collector is satisfied as to the identity of the articles and that such importer is in other respects entitled to such refund or remission, he shall grant the same accordingly.
46	GUNPOWDER for cannons, rifles, guns, pistols and sporting purposes.	*Ad valorem* . . .	20 per cent.
47	Subject to the exemptions specified in No. 10 all articles other than those specified in entry No. 45 which are ARMS OR PARTS OF ARMS within the meaning of the Indian Arms Act (excluding springs used for air-guns which are dutiable as hardware, under No. 97), all tools used for cleaning or putting together the same, all machines for making, loading, closing or capping cartridges for arms other than rifled arms and all other sorts of ammunition and military stores, and any articles which the Governor General in Council may, by notification in the Gazette of India, declare to be ammunition or military stores for the purposes of this Act.	*Ad valorem* . . .	20 per cent.
	CHEMICALS, DRUGS AND MEDICINES.		
48	OPIUM and its alkaloids . . .	Seer of 80 tolas . .	24 0
	METALS.		
49	SILVER, BULLION OR COIN, not otherwise specified (*see* Nos. 20 and 29).	Ounce . . .	0 4
50	SILVER PLATE, silver thread and wire, and silver manufactures, all sorts.	*Ad valorem* . . .	15 per cent. Provided that, where the silver contained in an article can be ascertained or where an official or recognized certificate of assay in such form as the Government of India may prescribe, is presented showing the amount of silver contained in an article, the Collector of Customs shall levy duty at the rate of 4 annas per ounce on the amount of silver so determined, and at the rate of 7½ per cent. on the difference between the value of such silver calculated at the market value of silver and the real value of the article.
	TEXTILE FABRICS.		
51	COTTON piece goods, hosiery, thread other than sewing or darning thread and all other manufactured cotton goods not otherwise specified.	*Ad valorem* . . .	3½ per cent.

SCHEDULE II—IMPORT TARIFF.

PART III.

Articles which are liable to duty at 2½ per cent. *ad valorem*.

No.	Names of Articles.
	I.—Food, Drink and Tobacco—
	GRAIN, PULSE AND FLOUR.
52	GRAIN AND PULSE, all sorts, including broken grain and pulse, but excluding flour (*see* No. 71).
	PROVISIONS AND OILMAN'S STORES.
53	VINEGAR in casks.
	II.—Raw materials and produce and articles mainly unmanufactured—
	METALLIC ORES AND SCRAP IRON OR STEEL FOR RE-MANUFACTURE.
54	IRON OR STEEL, old.
	WOOD AND TIMBER.
55	FIREWOOD.
	III.—Articles wholly or mainly manufactured—
	CHEMICALS, DRUGS AND MEDICINES.
56	COPPERAS, green.
	HARDWARE, IMPLEMENTS AND INSTRUMENTS.
57	TELEGRAPHIC INSTRUMENTS AND APPARATUS, and parts thereof, imported by or under the orders of a railway company.
	MACHINERY.
58	MACHINERY, namely, prime-movers and component parts thereof, including boilers and component parts thereof; also including locomotive and portable engines, steam-rollers, fire engines, and other machines in which the prime-mover is not separable from the operative parts. MACHINERY (and component parts thereof), meaning machines or sets of machines to be worked by electric, steam, water, fire or other power not being manual or animal labour, or which, before being brought into use, require to be fixed with reference to other moving parts; and including belting of all materials for driving machinery: Provided that the term does not include tools and implements to be worked by manual or animal labour, and provided also that only such articles shall be admitted as component parts of machinery as are indispensable for the working of the machinery and are, owing to their shape or to other special quality, not adapted for any other purpose. *Note.*—This entry includes machinery and component parts thereof made of substances other than metal, but excludes the articles exempted under No. 17, No. 18 and No. 19.
	METALS—IRON AND STEEL.
59	IRON, angle. " bar, rod and channel, including channel for carriages. " pig. " rice bowls.

SCHEDULE II—IMPORT TARIFF.

PART III—*concld.*

Articles which are liable to duty at 2½ per cent. *ad valorem.*

No.	Names of Articles.
60	IRON OR STEEL, anchors and cables.
	„ „ beams, joists, pillars, girders, screw piles, bridge work and other such descriptions of iron or steel, imported exclusively for building purposes; including also ridging, guttering and continuous roofing.
	„ „ bolts and nuts, including hook-bolts and nuts for roofing.
	„ „ hoops and strips.
	„ „ nails, rivets and washers, all sorts.
	„ „ pipes and tubes and fittings therefor, such as bends, boots, elbows, tees, sockets, flanges and the like.
	„ „ rails, chairs, sleepers, bearing and fish-plates, spikes (commonly known as dog-spikes), switches and crossings, other than those described in No. 63, also lever-boxes, clips and tie-bars.
	„ „ sheets and plates, all sorts excluding discs and circles which are dutiable under No. 104.
	„ „ wire, including fencing wire and wire-rope, but excluding wire-netting which is dutiable under No. 104.
61	STEEL, angle.
	„ bar, rod, and channel, including channel for carriages.
	„ cast including spring blistered and tub steel.
	„ ingots, blooms, billets and slabs.
	METALS OTHER THAN IRON AND STEEL.
62	LEAD sheets, for tea-chests.
	RAILWAY PLANT AND ROLLING STOCK.
63	RAILWAY MATERIAL for permanent-way and rolling-stock, namely, cylinders, girders, and other material for bridges, rails, sleepers, bearing and fish-plates, fish-bolts, chairs, spikes, crossings, sleeper fastenings, switches, interlocking apparatus, brake gear, couplings and springs, signals, turn-tables, weigh-bridges, engines, tenders, carriages, wagons, traversers, trollies, trucks, and component parts thereof; also the following articles when imported by or under the orders of a railway company, namely, cranes, water cranes, water tanks, and standards, wire and other materials for fencing: Provided that for the purpose of this entry "railway" means a line of railway subject to the provisions of the Indian Railways Act, 1890, and includes a railway constructed in a Native State under the suzerainty of His Majesty, and also such tramways as the Governor General in Council may by notification in the Gazette of India specifically include therein: Provided also that only such articles shall be admitted as component parts of railway material as are indispensable for the working of railways and are, owing to their shape or to other special quality, not adapted for any other purpose.
	MISCELLANEOUS.
64	PRINTING AND LITHOGRAPHING MATERIAL, namely, presses, type, ink, brass rules, composing sticks, chases, imposing tables, and lithographic stones, stereo-blocks, roller moulds, roller frames and stocks, roller composition, standing screw and hot presses, perforating machines, gold blocking presses, stereotyping apparatus, metal furniture, paper folding machines, and paging and numbering machines, but excluding paper (*see* No. 106).
65	RACKS for the withering of tea leaf.
66	SHIPS AND OTHER VESSELS for inland and harbour navigation, including steamers, launches, boats and barges, imported entire or in sections.
67	TEA-CHESTS of metal or wood, whether imported entire or in sections, provided that the Collector of Customs is satisfied that they are imported for the purpose of the packing of tea for transport in bulk.

SCHEDULE II—IMPORT TARIFF.

PART IV.

Articles which are liable to duty at 7½ per cent. *ad valorem*.

No.	Names of Articles.
	I.—Food, Drink and Tobacco—
	FISH.
68	FISH, excluding salted fish (*see* No. 30).
69	FISHMAWS, including singally and sozille, and sharkfins.
	FRUITS AND VEGETABLES.
70	FRUITS AND VEGETABLES, all sorts, fresh, dried, salted or preserved.
	GRAIN, PULSE AND FLOUR.
71	FLOUR.
	PROVISIONS AND OILMAN'S STORES.
72	PROVISIONS AND OILMAN'S STORES AND GROCERIES, all sorts, excluding vinegar in casks (*see* No. 53).
	SPICES.
73	SPICES, all sorts.
	SUGAR.
74	CONFECTIONERY.
	TEA.
75	TEA.
	OTHER FOOD AND DRINK.
76	COFFEE.
77	All other sorts of Food and Drink not otherwise specified.
	II.—Raw materials and produce and articles mainly unmanufactured—
	GUMS, RESINS AND LAC.
78	GUMS, RESINS AND LAC, all sorts.
	METALLIC ORES.
79	METALLIC ORES, all sorts.
	OILS.
80	All sorts of animal, essential, mineral, and vegetable non-essential OILS, excluding petroleum as defined in No. 44, but including— Petroleum which has its flashing point at or above two hundred degrees of Fahrenheit's thermometer, and is proved to the satisfaction of the Collector of Customs to be intended for use exclusively for the batching of jute or other fibre or for lubricating purposes; and Petroleum which has its flashing point at or above one hundred and fifty degrees of Fahrenheit's thermometer, and is proved to the satisfaction of the Collector of Customs to be intended for use exclusively as fuel or for some sanitary or hygienic purpose.
	SEEDS.
81	SEEDS, all sorts, excluding oil-seeds imported into British India by sea from the territories of any Native Prince or Chief in India (*see* No. 4).

SCHEDULE II—IMPORT TARIFF.

PART IV—*contd.*

Articles which are liable to duty at 7½ per cent. *ad valorem.*

No.	Names of Articles.
	TALLOW, STEARINE AND WAX.
82	TALLOW AND STEARINE, including grease and animal fat, and WAX of all sorts not otherwise specified.
	TEXTILE MATERIALS.
83	TEXTILE MATERIALS, the following :— Silk waste, and raw silk including cocoons, raw flax, hemp, jute and all other unmanufactured textile materials not otherwise specified.
	WOOD AND TIMBER.
84	WOOD AND TIMBER, all sorts, not otherwise specified, including all sorts of ornamental wood.
	MISCELLANEOUS.
85	CANES AND RATTANS.
86	COWRIES and SHELLS.
87	IVORY, unmanufactured.
88	PRECIOUS STONES AND PEARLS, unset.
89	All other raw materials and produce and articles mainly unmanufactured, not otherwise specified.
	III.—Articles wholly or mainly manufactured—
	APPAREL.
90	APPAREL, including drapery, boots and shoes, and military and other uniforms and accoutrements, but excluding uniforms and accoutrements exempted from duty under No. 9, and silver thread (*see* No. 50).
	ARMS, AMMUNITION AND MILITARY STORES.

A. P. MUDDIMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Indian Legislative Council received the assent of the Governor General on the 8th March, 1916, and is hereby promulgated for general information :—

ACT No. V OF 1916.

An Act further to amend the Indian Income-tax Act, 1886.

WHEREAS it is expedient further to amend the I of 1886. Indian Income-tax Act, 1886; It is hereby enacted as follows :—

Short title and commencement.

1. (*1*) This Act may be called the Indian Income-tax (Amendment) Act, 1916.

(*2*) It shall come into force on the first day of April, 1916.

I of 1886.

Amendment of section 4, Act II of 1886.

2. In section 4 of the Indian Income-tax Act, 1886 (hereinafter called the said Act), for the figures "1886" the figures "1916" shall be substituted.

Amendment of section 5, Act II of 1886.

3. In section 5, clause (*j*) of the said Act, after the word "any" the words "company or" shall be inserted.

Amendment of section 31, Act II of 1886.

4. To section 31 of the said Act, the following sub-section shall be added, namely :—

"(*3*) Any agreement made in accordance with the provisions of this section shall be determined, as regards any tax not already due thereunder, by any change, subsequent to the making of such agreement, in the rates at which the tax is assessable under Part II or Part IV, as the case may be, with effect from the date on which such change comes into force."

Amendment of section 33, Act II of 1886.

5. In section 33 of the said Act, the words "during or within three months after the end of the year" are hereby repealed.

Amendment of section 38, Act II of 1886.

6. In sub-section (*1*) of section 38 of the said Act, after the word and numeral "Part IV" the following shall be inserted, namely, "for prescribing the procedure to be followed on applications for refund of the tax chargeable under this Act."

Insertion of new section 39A in Act II of 1886.

7. After section 39 of the said Act, the following section shall be inserted, namely :—

Limitation of claims for refund.

"39A. No claim for refund of tax under this Act shall be allowed, unless it is made within one year from the end of the year to which the claim relates."

8. For the Second Schedule to the said Act, the following Schedule shall be substituted, namely :—

Substitution of new Second Schedule to Act II of 1886.

"THE SECOND SCHEDULE.

SOURCES OF INCOME AND RATES OF TAX.

(See section 4.)

FIRST COLUMN.	SECOND COLUMN.
Sources of income.	Rate of tax.

PART I.

SALARIES AND PENSIONS.

1. Any salary, annuity, pension or gratuity paid in British India to, or on behalf of, any person residing in British India or serving on board a ship plying to or from British Indian ports, whether on account of himself or another person.

2. Any salary, annuity, pension or gratuity paid by the Government, or by a local authority established in the exercise of the powers of the Governor General in Council in that behalf, to or on behalf of a British subject within the dominions of a Prince or State in India in alliance with His Majesty.

(*a*) If the income amounts to Rs. 1,000 per annum, or Rs. 83-5-4 per mensem, but is less than Rs. 2,000 per annum or Rs. 166-10-8 per mensem—four pies in the rupee.

(*b*) If the income amounts to Rs. 2,000 per annum or Rs. 166-10-8 per mensem, but is less than Rs. 5,000 per annum or Rs. 416-10-8 per mensem—five pies in the rupee.

(*c*) If the income amounts to Rs. 5,000 per annum or Rs. 416-10-8 per mensem, but is less than Rs. 10,000 per annum or Rs. 833-5-4 per mensem—six pies in the rupee.

(*d*) If the income amounts to Rs. 10,000 per annum or Rs. 833-5-4 per mensem, but is less than Rs 25,000 per annum on Rs. 2,083-5-4 per mensem—nine pies in the rupee.

(*e*) If the income amounts to Rs. 25,000 per annum or Rs. 2,083-5-4 per mensem or upwards—one anna in the rupee

PART II.

PROFITS OF COMPANIES.

Profits of a company

One anna in the rupee on the whole of the net profits made in British India by the company during the year ending on the day on which the company's accounts have been last made up, or, if the company's accounts have not been made up within the year ending on the thirty-first day of March in the year immediately preceding that for which the assessment is to be made, then on the whole of the net profits so made during the year ending on the said thirty-first day of March:

Provided that a shareholder in the company who satisfies the Collector that his annual income from all sources in the income-tax year last preceding that in which his share of such profits was received, was less than any one, as the case may be, of the amounts tabulated below, shall be entitled to a refund, calculated on any dividend paid him by the company in regard to the profits made during the period mentioned in the first clause at the rates specified against each such amount, namely :—

Amount.	Refund.
1. Less than Rs. 1,000.	One anna in the rupee.
2. Rs. 1,000 or upwards but less than Rs. 2,000.	Eight pies in the rupee.
3. Rs. 2,000 or upwards but less than Rs. 5,000.	Seven pies in the rupee.
4. Rs. 5,000 or upwards but less than Rs. 10,000.	Six pies in the rupee.
5. Rs. 10,000 or upwards but less than Rs. 25,000.	Three pies in the rupee.

THE SECOND SCHEDULE—*concld.*

FIRST COLUMN.	SECOND COLUMN.
Sources of income.	Rate of tax.

PART III.

INTEREST ON SECURITIES.

Interest becoming due on or after the first day of April, 1916, and payable in British India, on—

(*a*) promissory notes, debentures, stock or other securities of the Government of India (including securities of the Government of India whereon interest is payable out of British India by draft on any place in British India), or

(*b*) debentures or other securities for money issued by or on behalf of a local authority or company.

One anna in the rupee on such interest:

Provided that, if the owner of the security satisfies the Collector that his annual income from all sources in the income-tax year last preceding that in which the interest is paid was less than any one, as the case may be, of the amounts tabulated below, he shall be entitled to a refund, calculated on any such interest, at the rates specified against each such amount, namely :—

Amount.	Refund.
1. Less than Rs. 1,000.	One anna in the rupee.
2. Rs. 1,000 or upwards but less than Rs. 2,000.	Eight pies in the rupee.
3. Rs. 2,000 or upwards but less than Rs. 5,000.	Seven pies in the rupee.
4. Rs. 5,000 or upwards but less than Rs 10,000.	Six pies in the rupee.
5. Rs. 10,000 or upwards but less than Rs. 25,000.	Three pies in the rupee.

PART IV.

OTHER SOURCES OF INCOME.

Any source of income not included in Part I, Part II or Part III of this Schedule.

(*a*) If the annual income is assessed at—
not less than Rs. 1,000 but less than Rs. 1,250, the tax shall be Rs. 20;
not less than Rs. 1,250 but less than Rs. 1,500, the tax shall be Rs. 28;
not less than Rs. 1,500 but less than Rs. 1,750, the tax shall be Rs. 35;
not less than Rs. 1,750 but less than Rs. 2,000, the tax shall be Rs. 42.

(*b*) If the annual income is assessed at Rs. 2,000, or upwards but is less than Rs. 5,000—five pies in the rupee.

(*c*) If the annual income is assessed at Rs. 5,000 or upwards but is less than Rs. 10,000—six pies in the rupee.

(*d*) If the annual income is assessed at Rs 10,000 or upwards but is less than Rs. 25,000 —nine pies in the rupee.

(*e*) If the annual income is assessed at Rs. 25,000 or upwards—one anna in the rupee."

9. Sub-sections (*3*) and (*4*) of section 2 of the Indian Income-tax (Amendment) Act, 1903, are hereby repealed.

Repeal of sub-sections (*3*) and (*4*) of section 2 of Act XI of 1903.

PART V.

Bills introduced in the Indian Legislative Council, Reports of Select Committees presented to the Council, and Bills published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Indian Tariff Act, 1894, and for other purposes, was presented to the Indian Legislative Council on the 7th March, 1916 :—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the Indian Tariff Act, 1894, and for other purposes, was referred have considered the Bill and have now the honour to submit this our report, with the Bill as amended by us annexed thereto.

2. The Hon'ble Sir Ibrahim Rahimtoola proposed that the duty payable under item 51, Cotton Piecegoods, in part 2 of the new Schedule II (Import Tariff), inserted by the Bill should be raised from 3½ per cent. to 6 per cent. The Hon'ble the Finance Member expressed his inability to accept this proposal on the ground that he was precluded from doing so by the pronouncement on the subject by His Majesty's Government. After discussion the majority of the Committee expressed themselves as against any change and the existing provision was retained in the Bill.

3. With reference to item 63 of part 3 of the same Schedule, the Hon'ble Mr. Stewart proposed that railway material which had been ordered prior to the date this legislation will come into force should be free. After discussion this proposal was not adopted.

4. In considering Schedule III, in so far as it relates to Jute, we had the advantage of consulting Mr. Birkmyre, who attended the Select Committee as an expert witness. He explained in answer to questions by members of the Committee that the discrimination made in item 1 relating to Raw Jute as regards "rejections" was likely to be a source of difficulty, and after considering the point we decided that this classification should be omitted from the Bill and that "rejections" should be included in sub-head 3—"All other descriptions"—and pay duty at the rate for that class. We have accordingly renumbered the sub-heads of this item.

5. The Hon'ble Mr. Stewart laid before us the view that the present state of the Tea industry was not such as to justify the imposition of the export duty imposed by item 4 of the same schedule. The Hon'ble Sir William Meyer expressed his inability to agree in this view and after discussion we decided to retain the existing provision in the Bill.

6. The Bill was published in the Gazette of India, in English, of the 4th March, 1916.

7. We think that the Bill has not been so altered as to require republication, and we recommend that it be passed as now amended.

DELHI :
The 6th March, 1916.

BILL No. 3 OF 1916.

[AS AMENDED BY THE SELECT COMMITTEE.]

A Bill to amend the Indian Tariff Act, 1894, and for other purposes.

WHEREAS it is expedient to amend the Indian Tariff Act, 1894, and to repeal, so far as it relates to this Act, and re-enact with amendments section 22 of the Sea Customs Act, 1878; It is hereby enacted as follows :—

I of 1894.

I of 1878.

Short title and retrospective effect.

(1) This Act may be called he Indian Tariff (Amendment) Act, 1916.

(2) It shall be deemed to have come into force on the 1st day of March, 1916, and any sums due on account of new duties leviable thereunder or of any deficiency between the duties which have been paid and the duties which are leviable thereunder shall be deemed to be duties short levied within the meaning of section 39 of the Sea Customs Act, 1878, and that Act shall apply accordingly.

I of 1878.

Definition.

2. In this Act the Indian Tariff Act, 1894 (hereinafter referred to as the said Act), means the Indian Tariff Act, 1894, as subsequently amended.

I of 1894.

3. For section 3 of the said Act, the following section shall be substituted, namely :—

Substitution of new section 3 in Act VIII of 1894.

"3. (1) There shall be levied and collected in every port to which this Act applies, the duties specified in the Second and Third Schedules.

(2) The Governor General in Council may, by notification in the Gazette of India, fix, for the purpose of levying the said duties, tariff values of any articles enumerated, either specifically or under general headings, in the said Schedules as chargeable with duty *ad valorem*, and may alter any tariff values for the time being in force.

(3) Different tariff values may be fixed for different classes or descriptions of the same article."

Substitution of new Schedules for Schedules II, III, IV and V of Act VIII of 1894.

4. For the Second, Third, Fourth and Fifth Schedules of the said Act, the Schedules contained in the First Schedule to this Act shall be substituted.

Repeals.

5. The enactments specified in the Second Schedule to this Act are repealed to the extent specified in the fourth column thereof.

SCHEDULE I.

SCHEDULES TO BE SUBSTITUTED IN THE INDIAN TARIFF ACT, 1894.

(See section 4).

A. P. MUDDIMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill further to amend the Indian Income-tax Act, 1886, was presented to the Indian Legislative Council on the 7th March, 1916 :—

WE, the undersigned, Members of the Select Committee to which the Bill further to amend the Indian Income-tax Act, 1886, was referred, have considered the Bill, and have now the honour to submit this our Report, with the Bill as amended by us, annexed thereto.

2. Some of our body raised the question whether it would not be possible to reduce the maximum tax payable from one anna to ten pies in the rupee ; but, after discussion, the proposal was abandoned.

3. The only changes we have made in the Bill, as introduced, are two small alterations in its drafting.

4. The Bill was published in the Gazette of India in English on the 4th March, 1916.

5. We think that the Bill has not been so altered as to require re-publication, and we recommend that it be passed as now amended.

DELHI ;
The 4th March, 1916.

BILL No. 4 OF 1916.

[AS AMENDED BY THE SELECT COMMITTEE]

[Words printed in italics indicate the amendments suggested by the Select Committee.]

A Bill further to amend the Indian Income-tax Act, 1886.

WHEREAS it is expedient further to amend the II of 1886. Indian Income-tax Act, 1886; It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Act may be called the Indian Income-tax (Amendment) Act, 1916.

(*2*) It shall come into force on the first day of April, 1916.

II of 1886.

Amendment of section 4, Act II of 1886.

2. In section 4 of the Indian Income-tax Act, 1886 (hereinafter called the said Act), for the figures "1886" the figures "1916" shall be substituted.

Amendment of section 5, Act II of 1886.

3. In section 5, clause (*j*) of the said Act, after the word "any" the words "company or" shall be inserted.

Amendment of section 31, Act II of 1886.

4. To section 31 of the said Act, the following sub-section shall be added, namely:—

"(*3*) Any agreement made in accordance with the provisions of this section shall be determined, as regards any tax not already due thereunder, by any change, subsequent to the making of such agreement, in the rates at which the tax is assessable under Part II or Part IV, as the case may be, with effect from the date on which such change comes into force."

Amendment of section 33, Act II of 1886.

5. In section 33 of the said Act, the words "during or within three months after the end of the year" are hereby repealed.

Amendment of section 38, Act II of 1886.

6. In sub-section (*1*) of section 38 of the said Act, after the word and numeral "Part IV" the following shall be inserted, namely, "for *prescribing* the procedure to be followed on applications for refund of the tax chargeable under this Act."

Insertion of new section 39A in Act II of 1886.

7. After section 39 of the said Act, the following section shall be inserted, namely:—

Limitation of claims for refund.

"39A. No claim for refund of tax under this Act shall be allowed, unless it is made within one year from the end of the year to which the claim relates."

8. For the Second Schedule to the said Act, the following Schedule shall be substituted, namely :—

Substitution of new Second Schedule to Act II of 1886.

"THE SECOND SCHEDULE.

SOURCES OF INCOME AND RATES OF TAX.

(See section 4.)

FIRST COLUMN.	SECOND COLUMN.
Sources of income.	Rate of tax.
PART I. SALARIES AND PENSIONS.	
1. Any salary, annuity, pension or gratuity paid in British India to, or on behalf of, any person residing in British India or serving on board a ship plying to or from British Indian ports, whether on account of himself or another person.	(*a*) If the income amounts to Rs. 1,000 per annum, or Rs. 83-5-4 per mensem, but is less than Rs. 2,000 per annum or Rs. 166-10-8 per mensem—four pies in the rupee.
	(*b*) If the income amounts to Rs. 2,000 per annum or Rs. 166-10-8 per mensem, but is less than Rs. 5,000 or Rs.416-10-8 per mensem—five pies in the rupee.
2. Any salary, annuity, pension or gratuity paid by the Government, or by a local authority established in the exercise of the powers of the Governor General in Council in that behalf, to or on behalf of a British subject within the dominions of a Prince or State in India in alliance with His Majesty.	(*c*) If the income amount to Rs.5,000 or Rs. 416-10-8 per mensem, but is less than Rs. 10,000 or Rs. 833-5-4 per mensem—six pies in the rupee.
	(*d*) If the income amounts to Rs. 10,000 or Rs. 833-5-4 per mensem, but is less than Rs. 25,000 or Rs. 2,083-5-4 per mensem—nine pies in the rupee.
	(*e*) If the income amounts to Rs. 25,000 or Rs. 2,083-5-4 per mensem or upwards—one anna in the rupee
PART II. PROFITS OF COMPANIES.	
Profits of a company	One anna in the rupee on the whole of the net profits made in British India by the company during the year ending on the day on which the company's accounts have been last made up, or, if the company's accounts have not been made up within the year ending on the thirty-first day of March in the year immediately preceding that for which the assessment is to be made, then on the whole of the net profits so made during the year ending on the said thirty-first day of March : Provided that a shareholder in the company who satisfies the Collector that his annual income from all sources in the income-tax year last preceding that in which his share of such profits was received, was less than any one, as the case may be, of the amounts tabulated below, shall be entitled to a refund, calculated on any dividend paid him by the company in regard to the profits made during the period *mentioned in the first clause* at the rates specified against each such amount, namely :—

Amount.	Refund.
1. Less than Rs. 1,000.	One anna in the rupee.
2. Rs. 1,000 or upwards but less than Rs. 2,000.	Eight pies in the rupee.
3. Rs. 2,000 or upwards but less than Rs. 5,000.	Seven pies in the rupee.
4. Rs. 5,000 or upwards but less than Rs. 10,000.	Six pies in the rupee.
5. Rs. 10,000 or upwards but less than Rs. 25,000.	Three pies in the rupee.

THE SECOND SCHEDULE—*concld.*

FIRST COLUMN.	SECOND COLUMN.
Sources of income.	Rate of tax.
PART III. INTEREST ON SECURITIES.	
Interest becoming due on or after the first day of April, 1916, and payable in British India, on—	One anna in the rupee on such interest :
(*a*) promissory notes, debentures, stock or other securities of the Government of India (including securities of the Government of India whereon interest is payable out of British India by draft on any place in British India), or	Provided that, if the owner of the security satisfies the Collector that his annual income from all sources in the income-tax year last preceding that in which the interest is paid was less than any one, as the case may be, of the amounts tabulated below, he shall be entitled to a refund, calculated on any such interest, at the rates specified against each such amount, namely :—
(*b*) debentures or other securities for money issued by or on behalf of a local authority or company.	

Amount.	Refund.
1. Less than Rs. 1,000.	One anna in the rupee.
2. Rs 1,000 or upwards but less than Rs. 2,000.	Eight pies in the rupee.
3. Rs. 2,000 or upwards but less than Rs. 5,000.	Seven pies in the rupee.
4. Rs. 5,000 or upwards but less than Rs 10,000.	Six pies in the rupee.
5. Rs. 10,000 or upwards but less than Rs. 25,000.	Three pies in the rupee.

PART IV. OTHER SOURCES OF INCOME.	
Any source of income not included in Part I, Part II or Part III of this Schedule.	(*a*) If the annual income is assessed at— not less than Rs. 1,000 but less than Rs. 1,250, the tax shall be Rs. 20 ; not less than Rs. 1,250 but less than Rs. 1,500, the tax shall be Rs. 28 ; not less than Rs. 1,500 but less than Rs. 1,750, the tax shall be Rs. 35 ; not less than Rs. 1,750 but less than Rs. 2,000, the tax shall be Rs. 42.
	(*b*) If the annual income is assessed at Rs. 2,000, or upwards but is less than Rs. 5,000—five pies in the rupee.
	(*c*) If the annual income is assessed at Rs. 5,000 or upwards but is less than Rs. 10,000—six pies in the rupee.
	(*d*) If the annual income is assessed at Rs 10,000 or upwards but is less than Rs. 25,000 —nine pies in the rupee.
	(*e*) If the annual income is assessed at Rs. 25,000 or upwards—one anna in the rupee."

9. Sub-sections (*3*) and (*4*) of section 2 of the Indian Income-tax (Amendment) Act, 1903, are hereby repealed.

Repeal of sub-sections (*3*) and (*4*) of section 2 of Act XI of 1903.

A. P. MUDDIMAN,
Secretary to the Government of India.

PART VI.

Proceedings of the Indian Legislative Council.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61.)

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Wednesday, the 1st March, 1916.

PRESENT:

His Excellency BARON HARDINGE OF PENSHURST, P.C., G.C.B., G.C.M.G., G.C.V.O., G.M.S.I., G.M.I.E., I.S.O., Viceroy and Governor General, *presiding*, and 53 Members, of whom 45 were Additional Members.

OATH OF OFFICE.

The Hon'ble Mr. Charles Herbert Atkins made the prescribed oath or affirmation of allegiance to the Crown.

QUESTIONS AND ANSWERS.

The Hon'ble Mr. M. B. Dadabhoy asked:—

Remission of enfaced rupee paper for sale in India.

1. "(*a*) Is it a fact that British investors have during the current year sent back to India for sale a large amount of enfaced rupee paper?

(*b*) If the answer to (*a*) is in the affirmative, will Government be pleased to state the total face value of the paper so remitted?"

The Hon'ble Sir William Meyer replied:—

"The amount of rupee paper re-transferred to India during the first ten months of the current financial year was Rs. 126 lakhs, against which Rs. 36 lakhs was transferred to London, the net amount transferred to India being

[*Sir William Meyer; Mr. M. B. Dadabhoy; Sir Reginald Craddock; Sir William Clark; Rai Sita Nath Ray Bahadur; Sir R. W. Gillan; Mr. Rama Rayaningar.*] [1ST MARCH, 1916.]

thus about Rs. 90 lakhs. The net amounts so transferred vary considerably from year to year, as will be seen from the statement* showing the net transfers from India during the period from the 1st April to the 31st January in each of the last ten years which I place on the table. It will also be observed from the statement that the amount transferred in the first ten months of the present year has several times been exceeded in the period mentioned."

The Hon'ble Mr. M. B. Dadabhoy asked:—

Indian Civil Service Bill.

2. "(*a*) Were the Government of India consulted by the Secretary of State for India before the preparation of the Bill, which has since been passed as the Indian Civil Service (Temporary Provisions) Act, 1915 (5 & 6 Geo. V, c. 87)?

(*b*) If the answer is in the affirmative, do Government propose to lay on the table the correspondence on the subject?"

The Hon'ble Sir Reginald Craddock replied:—

"(*a*) The Government of India were consulted in the matter.

(*b*) A full Statement of Objects and Reasons of the Bill was given in the Home Department Press Communiqué dated October 26th, 1915, and the Government of India do not propose to lay the correspondence on the table."

The Hon'ble Mr. M. B. Dadabhoy asked:—

Weights and Measures Committee.

3. "(*a*) Have the recommendations of the Weights and Measures Committee been considered by Government?

(*b*) Did the Committee suggest that legislation on certain lines should be undertaken?

(*c*) If so, do Government propose to undertake such legislation at an early date?"

The Hon'ble Sir William Clark replied:—

"The Weights and Measures Committee's Report has been referred to Local Governments and Administrations and to Political Officers in Native States for observations, and it will be considered by the Government of India when the replies from all these authorities have been received. The recommendations made by the Committee involve legislation, but it is not possible to say, until the Report has been fully considered by the local authorities consulted and by the Government of India, whether such legislation will be undertaken."

The Hon'ble Rai Sita Nath Ray Bahadur asked:—

Conversion of Indian workshops into munition factories under Government control.

4. "Will the Government be pleased to state whether, in connection with the present war, any private Indian workshops have been used as munition factories under Government control?"

The Hon'ble Sir R. W. Gillan replied:—

"The reply is in the affirmative."

The Hon'ble Mr. Rama Rayaningar asked:—

Practical School of Agriculture at Loni in the Bombay Presidency.

5. "(*a*) Is it a fact that the Practical School of Agriculture at Loni in the Bombay Presidency has been found to have justified its existence?

(*b*) If so, do Government propose to take the earliest opportunity to have similar schools established in other Provinces?"

* Not included in these Proceedings.

[1ST MARCH, 1916.] [*Mr. C H. A. Hill; Mr. Rama Rayaningar; Sir Sankaran Nair; Sir Reginald Craddock.*]

The Hon'ble Mr. C. H. A. Hill replied :—

"(*a*) It is believed that the Government of Bombay hold the view that the Loni School has justified its existence.

(*b*) The question was discussed by the recent Conference on Agricultural Education at Pusa, and the Government of India are awaiting the report of that Conference."

The Hon'ble Mr. Rama Rayaningar asked :—

6. "(*a*) Have Government received the final report of the Indian Pilgrims Committee ? **Indian Pilgrims Committee.**

(*b*) If the answer to (*a*) is in the affirmative, will Government be pleased—

(*i*) to state whether any action has been taken upon the report ; and

(*ii*) to lay the report on the table ? "

The Hon'ble Sir Sankaran Nair replied :—

"There is no single Pilgrim Committee for the whole of India, but Provincial Committees have made inquiries into arrangements for pilgrims in connection with pilgrimages held in the United Provinces, Bihar and Orissa, Madras and Bombay, and their reports have been, or will shortly be, submitted to the Governments concerned. On receipt of the provincial reports, the Sanitary Commissioner with the Government of India will prepare a general report which will, it is hoped, be submitted this summer."

The Hon'ble Mr. Rama Rayaningar asked :—

7. "(*a*) Is it a fact that the Government of Madras have recommended to the Government of India that a Deputy Director of Agriculture be appointed to supervise cattle breeding in that Province ? **Appointment of a Deputy Director of Agriculture in Madras.**

(*b*) If so, do Government propose to pass early orders sanctioning the appointment ? "

The Hon'ble Mr. C. H. A. Hill replied :—

"(*a*) The answer is in the affirmative.

(*b*) The matter has been referred for the orders of the Secretary of State."

The Hon'ble Mr. Rama Rayaningar asked :—

8. "(*a*) Will Government be pleased to state the number of sanatoria for tuberculosis in India ? **Sanatoria for tuberculosis in India.**

(*b*) How many of these are State, and how many private, institutions ? Are the private sanatoria aided by Government ? If so, what is the aid granted ? "

The Hon'ble Sir Reginald Craddock replied : —

"The information asked for by the Hon'ble Member is contained in the statement * laid on the table."

The Hon'ble Mr. Rama Rayaningar asked :—

9. "(*a*) Has the question of support to the Ayurvedic and Unani systems of medical treatment ever been considered by Government ? **The Ayurvedic and Unani systems of medical treatment.**

(*b*) Do Government propose to consider the desirability of appointing a committee to inquire whether the practice of those systems has been really useful in giving relief to the suffering millions of the Indian people, and, if so, how that practice can be improved and helped by State support ? "

* *Vide* Appendix A.

[*Sir Reginald Craddock; Sir Fazulbhoy Currimbhoy; Maharaja Sir Manindra Chandra Nandy; Sir C. Sankaran Nair; Mr. T. W. Birkett.*] [1ST MARCH, 1916.]

The Hon'ble Sir Reginald Craddock replied:—

"The general question of affording support to the Ayurvedic and Unani systems of medicine has not hitherto been considered by the Government of India. Representations on the subject by those interested in the matter have recently been received, and inquiries as to the existing methods of teaching and practising the indigenous systems of medicines are being made. The matter has also come up in connection with a scheme for a medical school of this character at Delhi. It is not thought that advantage would at present result from the appointment of a committee of inquiry, but the subject will be further examined in the light of the information which is being collected."

The Hon'ble Sir Fazulbhoy Currimbhoy asked:—

Measures for checking usury.

10. "(*a*) In connection with the Government of India's circular letter of the 6th July, 1914, regarding measures for checking usury, will Government be pleased to state whether the opinions of Local Governments and Administrations have been received, and whether Government have decided to undertake preventive legislation?

(*b*) If so, has a Bill been prepared?"

The Hon'ble Sir Reginald Craddock replied:—

"Replies have been received from those consulted, but the consideration of the Bill has been delayed by more urgent work. It is hoped that a decision will be arrived at shortly."

The Hon'ble Maharaja Sir Manindra Chandra Nandy asked:—

Buddhist relics recently discovered at Taxilla.

11. "(*a*) Is it a fact that Buddha relics have recently been discovered at Taxilla?

(*b*) If so, what decision, if any, have Government come to as regards the enshrinement of those relics?"

The Hon'ble Sir C. Sankaran Nair replied:—

"(*a*) Certain Buddhist relics have been recently discovered at Taxilla.

(*b*) No decision has yet been arrived at regarding their ultimate destination."

The Hon'ble Mr. T. W. Birkett asked:—

Hostile trading concerns.

12. "Will the Government of India be pleased to state, with reference to the Hostile Foreigners (Trading) Order of the 14th November, 1914, read with the Hostile Foreigners (Bulgarian Trading) Order of the 11th December, 1915—

(1) the number of hostile trading concerns in Bengal, Bombay (including Sind and Aden), Burma and the rest of India, which were granted individual licenses—

(*a*) to trade for the purposes of liquidation only; and

(*b*) to continue trading under Government control or otherwise;

(2) the number of hostile trading concerns—

(*a*) whose licenses have been revoked or whose applications for licenses have been refused;

(*b*) whose liquidation under license has been completed to the extent necessary to enable the firm to be closed down; and

(*c*) whose liquidation has been so far completed that they are now licensed only to dispose of indent stocks, to collect debts or to conduct suits ;

(3) what are the balances credited to Government by the several Controllers of Hostile Trading firms on account of the assets of such liquidated concerns ;

(4) how much of the assets of such concerns still remain to be collected ?"

The Hon'ble Sir William Clark replied :—

"A statement * containing the information required by the Hon'ble Member is laid on the table."

The Hon'ble Mr. T. W. Birkett asked :—

13. "Will the Government be pleased to state what measures have been adopted by the Government of India— **Exports from India to enemy countries.**

(*a*) to prevent the export, directly or indirectly, to enemy countries of cotton, manganese, jute and other raw materials capable of utilisation in the manufacture of munitions of war;

(*b*) to prevent the importation of goods of enemy manufacture and origin ?"

The Hon'ble Sir William Clark replied :—

(*a*) "Direct export of all raw materials to enemy countries ceased automatically at the outbreak of war. Declarations of destination are required in all cases of shipment to Siam, China, Persia, Morocco, Portuguese East Africa and Liberia and to all countries in Europe and on the Mediterranean other than the United Kingdom, Russia and France. All requests from His Majesty's Government enjoining restriction on exports of raw material of potential military value to neutral countries from which supplies might reach the enemy have been fully complied with. The Government of India have, moreover, in some instances either suggested to the Secretary of State or imposed on their own initiative further restrictions based on information obtained in India.

(*b*) Soon after the outbreak of war, the Government of India prohibited the importation of all goods from neutral European countries bordering on enemy territory unless they had been certified by British Consular officers in those countries not to have been produced or manufactured in enemy territory. In imposing these restrictions, the Government of India have closely followed the instructions of the Secretary of State, and have frequently, on their own motion, had doubtful consignments examined even though they were admissible according to the strict interpretation of those instructions."

The Hon'ble Mr. T. W. Birkett asked :—

14. "Have the Government of India departed in any important respects, so far as is known to them, from the policy of the British Government regarding hostile trading concerns ?" **Policy regarding hostile trading concerns.**

The Hon'ble Sir William Clark replied :—

"The Government of India have no detailed information as to the procedure followed in the United Kingdom, but from such information as is before them, they understand that action has only been taken in respect of concerns wholly or partially owned by persons residing in enemy countries, and that liquidation has only been ordered in a few exceptional instances. In India, on the other hand, all concerns wholly or partially owned or controlled by persons of enemy nationality irrespective of country of residence fall within the scope of the Hostile Foreigners (Trading) Order issued under the Foreigners Ordinance, and as is shown by my reply to the Hon'ble Member's Question No. (12) on the list of Questions for to-day, a considerable proportion of

* *Vide* Appendix B

them have been brought into liquidation. There is now before the House of Commons a Bill enabling the Home Government to adopt in respect of firms of enemy association in the United Kingdom a similar policy to that which has been followed in India since November, 1914."

FINANCIAL STATEMENT FOR 1916-17.

Introductory.

Some general effects of the War on trade and finance.

The Hon'ble Sir William Meyer:—"My Lord, I rise to present the Financial Statement for 1916-17. As usual there will be no debate to-day, and before we get to the stage of discussion with reference to the Financial Statement as such, it will be necessary to proceed with some very urgent legislation which I shall presently have to introduce. We shall, however, begin the discussion stage on the 9th March. The figures in the Financial Statement will subsequently undergo such amendments as may be required by our later information or suggested by the discussions in Council. The Budget in its final form will be presented on the 21st March, the usual closing debate taking place on the 24th.

"2. We are still under the shadow of the great European war, and we must unhappily assume that that colossal conflict will continue throughout 1916-17. I need not repeat what I said at the opening of my last year's speech as to the many ways in which the war affects our financial and economic position, but I may fitly reiterate the difficulties which existing circumstances cause in regard to the preparation of correct financial estimates. These difficulties are not so great as they were at this time last year when we had only the actuals of a few months of war to go upon. But they still remain very considerable, for circumstances may well occur which would materially alter the prognostications we are at present able to make. As I said last year, we must not be too pessimistic, but at the same time, with all that the war and its economic results may yet have in store for us, sanguine estimating is entirely out of place.

"3. I commenced my speech last year by indicating some of the immediate effects of the war on our economic and financial position. Since then, to use a nautical metaphor, while we are still in very heavy waters, our ship has settled down to navigation on a more even keel, and we have been free from the sudden and disturbing shocks which the outbreak of war brought about. We have, for example, had no recurrence of the great rush on postal savings banks deposits which I mentioned in paragraph 7 of my last year's speech and which reduced the aggregate amount held in these banks from 24¼ crores at the beginning of August 1914 to somewhat less than 15 crores on the 31st of March last. In the current year, there was some increase in the deposits during the earlier months, and though latterly this has changed into a decrease, we estimate that on the 31st March the total savings bank balances, including accruals of fresh interest, will still be 17 lakhs in excess of the figure for 1st April 1915. Nor have we had any recurrence of a special demand for the encashment of currency notes. On the contrary, while our active note circulation* stood at about 47 crores at the beginning of the current year, it had mounted up to 54 crores in February.

"4. The Railway returns show satisfactory activity in internal trade, while the exchange position has been satisfactorily maintained. The sale of reverse Councils on London, in the shape of deferred telegraphic transfers, was only necessary during a period commencing in June last and ending in September; thereafter an extraordinarily strong demand for Council drafts on India set in, which has been maintained till the present date. The stability of our exchange, indeed, stands in marked contrast to the exchange troubles that have afflicted the belligerent countries in Europe, including Great Britain herself.

"5. On the other hand, if the difficulties of the opening months of the war have not been specifically repeated, the second year has brought its own perplexities. The very strength of exchange, though a healthy sign in itself, has proved a somewhat inconvenient problem, in view of the very large indirect remittances which, as I

* That is excluding notes in Government Reserve treasuries and at the headquarter offices of the Presidency Banks.

[1ST MARCH, 1916.] [*Sir William Meyer.*]

shall show more fully later, we have had to make by incurring military expenditure in India which is recoverable from the Home Government. Money market conditions, again, have become very stringent, and the situation has been aggravated by the depression of Government paper. We have found it necessary to place far more stringent restrictions upon expenditure, and also to restrict the borrowings of public bodies in India, and we ourselves are now shut off from fresh borrowing in the Home market. Thus, though in some respects we may have less to fear from the element of surprise than a year ago, we have settled down to a fuller realisation of the test of endurance which this prolonged war imposes on us.

"6. We have moreover been badly treated by the monsoon. The last cold weather rains were unusually plentiful, and the outlook at the beginning of the year was promising. The south-west monsoon, however, arrived late, and was weak and unsteady in July and August, particularly in the north-west of India. A line drawn from Bombay to Delhi may be said roughly to have divided the area on the east, in which the rainfall was good or excessive, from that on the west, in which it was deficient. Excessive rain produced serious, and sometimes disastrous, floods in Assam, where the hill section of the Assam-Bengal Railway was so badly damaged that it had to be closed for a time; in the Noakhali and Tipperah districts of Bengal ; and in the Cawnpore and Lucknow tracts of the United Provinces. In the west, on the other hand, a continued shortage of rain threatened at one time to have very serious consequences. Fortunately opportune rainfall in September and October greatly improved the prospects of the important *rabi* crops in the Punjab, and changed the position considerably for the better elsewhere, especially in Gujarat, where there would otherwise have been famine.

"This year's winter rains, again—long delayed and scanty—have proved very inadequate in Northern India, though what fell last month distinctly improved the previous situation.

"The conditions described have of course materially affected the land revenue, and have involved a certain amount of outlay, to which I shall refer later, on the conveyance of fodder, and to some extent on direct relief. On the whole, however, the results, from the financial standpoint, have been much less serious than at one time seemed probable. A splendid wheat crop was harvested at the beginning of the year, and there was a satisfactory outturn of sugarcane and cotton. The jute crop, on the other hand, showed a decrease of some three million bales. As regards the crops at present on the ground, the wheat over a large area has suffered from want of rain ; the cotton area and outturn are estimated at some 30 per cent below those of last year; the prospects of the oil-seed crop and sugarcane are fair; and the season has on the whole been favourable for the rice crop, except where it has suffered from floods.

"7. The depressing effects of the war on the foreign trade of India of course continue, and scarcity and dearness of freight add to the effects produced by the closure of ordinary trade channels and by special restrictions which have been necessary for military and public purposes. As an instance of the way in which freight has risen in the course of the war, and of the diversion of merchant shipping to military and naval purposes, I may mention that recent information shows that jute freights from Calcutta to Dundee are eight times what they were before the war began, while in the case of light seeds from Bombay to Marseilles the increase is ninefold. These specimen figures will give some idea of the extent to which shortage and costliness of freight have hampered trade operations.

"There is no need to go into detail in regard to the various special restrictions which have been placed on exports and imports in the course of the war, but speaking generally such control has become much closer during the current year. The general policy throughout has been (*a*) to restrict the trade in foodstuffs and articles capable of being turned to warlike uses in the case of countries whence they can pass to the enemy; (*b*) to stimulate the export of a few articles to the United Kingdom and allied countries, or countries which are making munitions for the Allies; and (*c*) to restrict the export of a very few articles owing to their being needed in India.

"8. The combined operation of these causes, together with the stoppage of trade from and to enemy countries, has naturally resulted in the contraction of the volume of our sea-borne trade. In the year 1914-15, two-thirds of which was under war conditions, the total trade of India amounted to 354 crores (£236 million) against

491 crores (£327 million) in 1913-14, there having been a decrease, in respect of private merchandise, of 25 per cent under imports and 27 per cent under exports. Taking the first nine months of the current official year, the exports of private merchandise are much the same as in the corresponding period of 1914-15 (142 crores against 141), while imports are about 12 crores less (97 against 109), the advantage that 1914-15 obtains owing to its including 4 months of peace having been largely counterbalanced by the great dislocation in trade in September and October which followed the exploits of the 'Emden.' While our trade is considerably diminished with most countries, and has of course completely stopped with enemy nations and with Belgium, there has been some compensation in the shape of larger exports to the United Kingdom. In the first nine months of the current year these—in the case of the more important articles—exceeded the figure of the corresponding period of 1913-14 by 9 crores.

"9. On the export side the volume of trade has expanded in some directions under the demand for our tea, hides and skins, raw jute and jute and cotton manufactures—shipment of these articles taken together, having increased, as compared with the corresponding nine months of 1914-15, by 15¾ crores. Exports of tea, gunny bags and cloth have in fact reached a record figure. The prices of all these commodities have improved: those of jute in particular have largely recovered from the depression to which I referred in paragraph 14 of my last year's speech; raw jute standing a few days ago at ₹52-8 per bale of 400 lbs. against ₹37-8 on the corresponding date last year. Cotton prices too have risen, the last quotation per candy (784 lbs.) of *oomras* at Bombay being ₹254 against ₹157 on the corresponding date in 1915, and ₹222 before the war broke out. This recovery in price, and the requirements of Japan, which has taken over one million cwt. more than in the corresponding period of 1914-15, have helped to counteract to some extent the loss of the Continental markets to which Indian cotton is in normal times ordinarily shipped: but the contraction in the exports of this staple is nevertheless over 11 crores. Exports of seeds, too, have fallen off considerably. I shall refer to wheat exports and prices towards the end of my speech, in connection with the Wheat Scheme, but I may mention here that the exports of wheat have been about 650,000 tons, which is approximately the same as in the corresponding period of 1914-15, though a great deal less than the exports of the year preceding (about 1,100,000 tons). This year the transactions would of course have been much larger than they were but for the fact that the Government, in the interests of Indian consumers, found it necessary to put special restrictions upon export.

"10. On the import side our trade for the current financial year remains much below the level reached before the war, and so far shows little recovery from the sudden drop which occurred at the outbreak of hostilities; and this of course has had a very prejudicial effect on our customs revenue. I shall refer later on to the particular Tariff heads most affected.

"I now pass on to the task of laying before the Council our estimates for the present and the coming year.

Forecast of financial conditions in 1915-16 and 1916-17.

Revised Estimate of Revenue and Expenditure for 1915-16.

"11. The general position is brought out in the following table*, which compares the current year's Budget and the Revised Estimate now put forward :—

[In millions of pounds.]

	Budget, 1915-16.			Revised, 1915-16.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Revenue . . .	**49·650**	30·750	80·400	**51·868**	30·638	82·506
Expenditure . . .	**52·607**	31·828	84·435	**53·968**	31·296	85·264
Deficit (—) .	**—2·957**	—1·078	—4·035	**—2·100**	—·658	—2·758

*But see adjustment referred to at the close of paragraph 17 and the final table in paragraph 61.

[1ST MARCH, 1916.] [*Sir William Meyer.*]

Revenue—Imperial.

"12. We budgeted this year for a total Imperial revenue of about £49·6 million. The Revised Estimate shows £51·8 million, or an increase of about £2·2 million.

"This is due entirely to an increase of £2·3 million under the net receipts from State Railways, *i.e.*, gross receipts, less working expenses and portion of surplus profits paid to companies. In the current year's Budget we estimated the gross receipts at £35·3 million and the net at £14·9 million—against £35·6 million and £15·2 million the corresponding figures taken in the Revised Estimate for 1914-15, and £37·5 million and £17·5 million the respective figures for 1913-14. We had to estimate with caution in view of the altered state of things brought about by the war, remembering that the first four months of 1914-15 were under peace conditions. Fortunately the railways have done considerably better than we expected : the gross receipts are now taken at £37·7 million, and the net at £17·2 million. The improvement is attributable partly to more active internal trade and partly to coal which would usually have been sea-borne being diverted to railway routes in consequence of the shortage of tonnage.

"13. There is a net decrease of about £100,000 under the remaining heads of revenue, produced mainly by a falling off under Customs and the Imperial share of Land Revenue, counterbalanced by increase under some other heads.

"(1) The Land Revenue deterioration (£220,000) is accounted for by the unsatisfactory character of the south-west monsoon in various parts of the country, to which I have already alluded, especially in the United Provinces, the Punjab, and Bombay *quâ* Gujarat and Sind. The position would, of course, have been much more serious but for the late rains which finally arrived in Gujarat and elsewhere.

"(2) Under Customs the decline of revenue—mainly due to war conditions, including scarcity of shipping and heavy freights—has been larger by £310,000 than was anticipated in the Budget. The most important shortages anticipated are in respect of rice (export duty), cotton manufactures, metals and manufactures of metals, and petroleum, while we get some rise in sugar and manufactured articles.

"(3) On the other hand two Imperial heads—Posts and Telegraphs, and Opium—show a satisfactory improvement, totalling £270,000. Under Salt, too, there is a rise of £150,000; but this is mainly due to speculative clearances made in the last few weeks in the expectation of an enhancement of duty. There is also, turning to heads which are largely Provincial, an improvement aggregating £210,000 in the Imperial share of Stamps and Income Tax, which is to some extent counterbalanced by a falling off of £70,000 under the Imperial share of Excise, the revenue from which is readily depressed by adverse trade and seasonal conditions.

"These, however, are little more than the normal variations between estimates and actuals or semi-actuals to which we are accustomed in an ordinary year.

"(4) The asisgnments of Imperial revenue to Local Governments have increased by £130,000, owing chiefly to the payment to the Government of Bihar and Orissa of a contribution promised to it to meet the initial outlay on the High Court buildings at Bankipur.

"(5) The outstanding feature of the revenue history of the period is thus the excellent return from Railways, in spite of conditions which at the outset appeared adverse. As I shall show shortly, the expenditure side presents as striking a feature in the excess under military expenditure, and these two items may be noted as constituting the only really important departures from the estimates we made in forecasting, twelve months ago, the prospects of an unprecedentedly doubtful year.

Expenditure—Imperial.

"14. We budgeted for a total Imperial expenditure of £52·6 million, which has now to be raised to £53·9 million. This increase is entirely due to larger outlay on Military Services, amounting in all to £1·6 million. In the Budget we took the total outlay under this head at £21·4 million, against £21·8 million in the Revised Estimate for 1914-15, the decrease being due mainly to cutting down of all avoidable expenditure with reference to the financial situation. I may explain that the figures I am now handling include the contribution made by India towards the war by her defrayal of the normal charges in connection with troops she has sent outside her borders, but they do not of course take into account expenditure which we incur out here

merely on behalf of His Majesty's Government—in regard to such matters for instance as the supply of munitions and war material—and which we recover from them.

"The large increase over our Budget anticipation is due mainly to the following causes:—

"(1) Revised arrangements with His Majesty's Government in regard to the practical application of the general formula that India should make no saving by war conditions. The sea transport charges, for instance, which we have to incur on our own account, are at present very small, owing to the cessation of normal drafts and reliefs of British troops, and in the Budget we considered ourselves entitled to take this as a legitimate saving. After further discussion, however, it has been decided that we ought to pay the same charge as if normal conditions had prevailed; and including retrospective application of this principle to the war period of 1914-15, we have had to make an extra payment on this account of about £540,000.

"(2) It has similarly been decided that although the Territorial troops who have been sent out to us in exchange for regular British troops on the Indian establishment were at first less in number than the troops they have replaced, we ought to pay the same amount as if we had had our normal establishment of regulars all along; and adding food charges to pay and allowances, this decision results in an extra cost of about £400,000.

"(3) The military operations we have had to undertake on the North-West Frontier have involved an additional cost of about £260,000, to which must be added another £90,000 in respect of operations at Aden.

"(4) We shall also have had to spend about £260,000 more for various special measures connected with the internal security of the country and possible eventualities on the frontier.

"Taking *net* military outlay, *i.e.*, gross expenditure less receipts, this now stands at £21·8 million against £20·2 million taken in the Budget.

"15. As regards the civil heads, there is an excess of about £150,000 under furlough allowances, due to a partial relaxation of the restrictions on leave which were imposed at the beginning of the war. On the other hand, there is a saving of £120,000 on the interest payable on capital deposited by Railway Companies resulting from a curtailment of their intended borrowings.

"The other items on the expenditure side reflect the results of a stricter policy of retrenchment. The scope for retardation of expenditure is of course much less on the Imperial than the Provincial side, since the latter includes all the main heads of civil administration; and in both cases it had already been restricted by the reduced allotments which we made in the budget of the current year. The total saving on the non-military Imperial heads amounts, however, to as much as £260,000, so that, taking the military services into account, the increase on the expenditure side as a whole is £1·3 million, which falls short of the improvement in revenue by some £900,000.

Revenue and Expenditure—Provincial.

"16. The Provincial revenues were taken in the Budget at £30¾ million, and expenditure at £31·8 million, leaving a deficit of over £1 million to be met by drawings on the Provincial balances. The figures now are—revenue £30·638 million, expenditure £31·296 million, deficit £658,000. Like ourselves, the Provincial Governments have suffered in respect of their Land Revenue and Excise, their total loss under these heads, as compared with Budget anticipation, being about £380,000. There has also been a falling off of £120,000 in the Forest revenue—of which nearly £80,000 occurs in Burma and is due to shortage of freight and reduced demand for timber occasioned by the war. On the other hand, the Provinces share our fortune in having had better returns—to the extent of £215,000—under Stamps and Income Tax.

"The reduction of expenditure, amounting in all to some £500,000, occurs under Civil Works, Education and Land Revenue. I must in this connection convey our appreciative acknowledgment of the loyal and thorough way in which the Local Governments have responded to our call for retrenchment both as regards 1915-16 and 1916-17, with the result, in the case of the present year, that though their original Budget grants were restricted at the outset, and their revenues have not quite come up to expectations, the Provinces are now expected to close the year with an aggregate deficit of some £400,000 less than their Budgets allowed for.

[1ST MARCH, 1916.] [*Sir William Meyer.*]

General Results—Imperial and Provincial.

"17. The aggregate figures of Imperial and Provincial revenue and expenditure are brought out in the statement in paragraph 11, and I need only emphasise the following points:—

"(1) The revenue is £2,100,000 more than we anticipated in the Budget, there being an increase of £2·2 million under Imperial, and a decrease of £100,000 under Provincial.

"(2) The expenditure is £0·8 million more than we anticipated. There has been a saving of some £500,000 under Provincial, but an increase of £1·3 million under Imperial.

"(3) Consequently the Imperial deficit is reduced from £3 million to £2·1 million, the Provincial from £1 million to £0·6 million, and the aggregate from £4 million to £2·7 million.

"But as I shall explain later on (paragraph 60), our Budget proposals for the coming year will react on our revenue of 1915-16 to the extent of an addition thereto of about £110,000, so that the Imperial deficit becomes £2 million, or more exactly £1,986,000.

Revised estimate, 1915-16. Ways and Means position.

"18. I now turn to the ways and means arrangements of the current year. Our Budget programme contemplated the continuance of the temporary loan of £7 million taken from the Gold Standard Reserve in the earlier months of the war and the renewal of the temporary debt, also amounting to £7 million, which had been raised by the Secretary of State in 1914-15 in the form of short-term India bills. Apart from these transactions, our Budget expectations as to the outlay to be financed and the resources by which it was to be covered were as follows:—

(In millions of pounds.)

Outlay.		*Resources.*	
Imperial deficit	3·0	From balances	5·0
Provincial deficit	1·0	Rupee borrowing	3·0
Capital outlay—		Fresh sterling borrowing	6·5
Railways	8·0	Famine insurance and miscellaneous items	0·1
Irrigation	1·1		
Delhi	0·3	Total	14·6
Discharge of debt (India bonds and Indian Midland Railway debentures)	1·0		
Unfunded debt	0·2		
Total	14·6		

"19. The opening balance of the year (in India and England together) was estimated at £21·4 million and the closing balance at £16·4 million.

"The actual opening balance has, however, turned out to be £22·7 million. This is mainly accounted for by the fact that the Imperial deficit for 1914-15, which we had taken at £2·8 million, proved to be £1 million less, owing mainly to unexpectedly better receipts under Railways and heavy clearances of Salt towards the close of the year. There was also some further lapse under capital expenditure.

"20. The figures in paragraph 18 will now stand as follows:—

(In millions of pounds.)

Outlay.		*Resources.*	
Imperial deficit (*vide* end of para. 17)	2·0	From balances	5·0
Provincial deficit	0·6	Rupee borrowing	3·3
Capital outlay—		Sterling borrowing	3·1
Railways	4·9	Unfunded debt	0·7
Irrigation	0·9	Special war receipts	1·7
Delhi	0·3		
Discharge of debt	4·0		
Famine insurance and miscellaneous items.	1·1	Total	13·8
Total	13·8		

"21. As regards outlay, I have already explained the decrease in the Imperial and Provincial deficits. The Railway programme was reduced by some £250,000 almost at the outset in consequence of pressure from the Treasury at home against undertaking new works The remaining falling off under this head as compared with Budget anticipations is due to difficulties in obtaining Railway material, etc., from

home and the economies enjoined with reference to the existing financial situation. There is also a minor saving under the Irrigation programme, and a slight excess, which will be explained later on, in the Delhi expenditure.

"The various items that make up the Famine Insurance and Miscellaneous head, instead of almost counterbalancing one another as was anticipated in the Budget, have, on the whole, involved a substantial net outlay, owing mainly to heavier withdrawals of deposits and advances for our troops in the field, and also transactions connected with Council Bills. This head is thus transferred to the outlay side, while on the other hand the entry 'Unfunded Debt' is now expected to yield us a net receipt, and is transferred to the resources side of the account just given.

"Lastly we have applied £3 million of the savings available under the outlay side of our original programme to the reduction by that amount of the £7 million which we temporarily borrowed from the Gold Standard Reserve in 1914-15; and as the Secretary of State's Council drawings have enabled him to discharge this liability at home, the Reserve is thus in a stronger position, actually as well as potentially, in the event of any future weakening in exchange. It will be noticed that this sum of £3 million corresponds roughly to the amount by which, in the special circumstances of the year, we have had to curtail the sum originally destined for Railway capital expenditure, so that that lapse may be regarded as having been employed in the next best way—that of strengthening our general position for the remainder of the war.

"22. As regards resources, the increase of £300,000 as compared with the Budget estimate under rupee borrowing is due to the 50 lakhs received from the special Post Office section of the loan of 1915 to which I shall refer in greater detail later on. On the other hand the net sterling borrowing has fallen from £6·5 to £3·1 million since, in present circumstances, the Secretary of State has only found it possible to raise £3·4 million out of the £6·5 million of fresh sterling borrowing which the Budget calculations took credit for, while he has had to discharge some £300,000 of Railway debentures which he had originally intended to renew.

"Under Unfunded Debt, in view of the heavy withdrawals from postal savings banks in 1914-15, we assumed in the Budget, as a matter of precaution, that there would be further withdrawals amounting to £1 million in the current year, which would, however, be largely counterbalanced by Provident Fund and other deposits. The anticipation of heavy withdrawals has happily not been realized. These amount to £170,000 only, of which £120,000 has gone into the post office section of the new loan. Thus the Unfunded Debt head has yielded receipts amounting (after including the large subscriptions to Provident Funds managed by Government and the accrual of fresh interest on savings bank accounts) to £700,000, instead of a net outlay of £200,000 as anticipated in the Budget.

"We have also obtained certain special receipts arising from war conditions which we are temporarily carrying in our balances. These include £850,000 from the liquidation of hostile firms, and about £700,000 obtained from the employment of captured enemy vessels, as well as a balance on our wheat operations to which I shall refer later, and which we are holding in suspense until the wheat scheme is finally closed.

"The transactions above described bring us to a closing balance of £17·7 million in India and England, exclusive of the amount held in the balance of the Home Treasury on account of the Gold Standard Reserve.

Budget Estimate of Revenue and Expenditure for 1916-17 on present basis of taxation.

"23. The following table brings out, on the present basis of taxation, our Budget anticipations for 1916-17, as compared with the Revised Estimate for the current year.

[In millions of pounds.]

	Revised, 1915-16.			Budget, 1916-17.		
	Imperial.	Provincial.	TOTAL.	Imperial.	Provincial.	TOTAL.
Revenue . . .	**51·868**	30·638	82·506	**52·004**	30·548	82·552
Expenditure . . .	**53·968**	31·296	85·264	**54·599**	30·913	85·512
Deficit (—) .	**—2·100**	—·658	—2·758	**—2·595**	—·365	—2·960

[1ST MARCH, 1916.] [*Sir William Meyer.*]

Revenue—Imperial.

"24. Assuming a normal south-west monsoon in 1916, we take the Imperial revenue for 1916-17 at £52 million, or about £130,000 more than what we are now expecting in the current year.

"The satisfactory results of the working of the Railways this year justify our assuming a considerably higher return than was considered safe a year ago, and we have put up both the gross receipts and the net revenue by more than £1⅔ million, as compared with the current year's budget. This head, however, is one under which it is specially necessary to take cautious estimates, since a relatively small percentage of error may lead to a difference in the aggregate sufficient to affect the financial position to a material extent. Even apart from the war and possible further trade restrictions connected therewith, the outlook for 1916-17 is not wholly satisfactory in view of the unfavourable south-west monsoon of the current year and the unsatisfactory winter rains, and we think, after very careful examination, that it is not safe to count on a full repetition of the record railway revenue which we count on obtaining this year. Thus our estimates, for gross receipts (£37·2 million) and for net railway revenue (£16·6 million), are from five to six hundred thousand pounds below the Revised Estimate of the current year, or to be more exact, £610,000 in the case of net revenue.

"On the other hand we expect an increase of more than £400,000 under Opium. This is associated with a brisk demand in the Far East, which has led to an increase in the indents from the Straits Settlements and Hong Kong, whose Governments we supply direct, and has enabled us to raise the upset price of the opium which we sell by auction up to R1,800 a chest with effect from January last, so that we obtain the full benefit of the higher prices throughout 1916-17, as against a part only of the current year. Also, on a re-examination of the existing cost of production, we have somewhat enhanced the charge which we recover from Local Governments for opium supplied to them for excise purposes. We expect, too, a large increase in the demand for the export of opium to England for medical purposes, which has come into being from the shutting down of the Turkish market.

"25. The variations under other heads are less important. In the Imperial share of Land Revenue we expect an improvement of £133,000 as compared with this year's yield, which has been reduced in some tracts by remissions and suspensions following the unsatisfactory monsoon. We allow too for a continued growth of revenue under Posts and Telegraphs, and for a reduction in the assignments of Imperial revenue to Local Governments owing to the absence of certain special contributions given in the current year. Interest receipts also show a substantial improvement owing to a larger investment in respect of the Paper Currency Reserve to which I shall refer at a later stage.

"On the other hand, our Salt revenue is not likely to be again disturbed, as it has been for the last two years, by clearances towards the close of the year with a view to the evasion of a threatened increase in the salt duty; so we cannot count in 1916-17 on the additional revenue obtained this year.

"For Customs as a whole we are practically repeating the Revised Estimate of the current year. We allow for a possible fall in the demand for silver and in the imports of piece-goods, but also for the fact that a considerable improvement is expected under sugar in view of the new tariff valuations, which reflect the high prices arising from the war.

Expenditure—Imperial.

"26. On the expenditure side we have to provide for about £600,000 more than in the current year owing largely to increased provision for Postal and Telegraph and Military expenditure, amounting to about £280,000 and £150,000 respectively. In the former case the increase is mainly due to the necessity for replenishment of stores, stocks having been depleted in the current year.

"Under Interest on Debt, there is comparatively little change. As each new rupee loan is raised the interest charges increase; but on the other hand we shall avoid next year a considerable payment of interest to the Gold Standard Reserve through the discharge of £3 million of the temporary loan which we took from it in 1914-15, and there will also be some saving, which I shall explain later on,

in respect of sterling India Bills. There will, however, be some increase in the interest on capital deposited by Railway companies, as a whole year's interest payments will fall due upon their borrowings (through the Secretary of State) in the current year.

"27. We estimate the net expenditure on military services at £22 million, against £21·8 million in the Revised Estimate for the current year. We shall be relieved in 1916-17 of certain arrear charges which we had to meet this year—*vide* paragraph 14 above. But in view of sudden military requirements which are likely to arise in a time of war, such as contributed to the large excess over our Budget Estimate in the current year, we think it only prudent to provide for some moderate reserve to meet such unexpected and minor contingencies.

"I may mention here that, speaking very roughly—for the actual readjustment of charges in respect of the many units involved is an exceedingly complicated matter, and calculations are liable to further disturbance by changes in the strength and composition of the expeditionary forces fighting outside India—our contribution to His Majesty's Government in respect of the cost of the troops we have furnished for fighting the battles of the King-Emperor outside his Indian dominions will amount to about £11 million from the commencement of the war up to the 31st March 1916, and may be provisionally taken at £8 million for 1916-17. The amount is increasing with the additions which have from time to time been made to the contingents originally furnished by India. We have also during this period incurred a considerable outlay in India, which would not have come upon us but for the war.

"28. Taking Imperial revenue and expenditure together, and still adhering to the present basis of taxation, our deficit for next year is likely to be £2·6 million, against £2·1 million estimated in present conditions for 1915-16, and £1·8 million which actually occurred in 1914-15, the first year of the war.

Revenue and Expenditure—Provincial.

"29. The Provincial revenues are taken in the new Budget at £30·5 million, and the expenditure at £30·9 million, the deficit, to be met by drawings on Provincial balances, being thus restricted to about £400,000.

"A small deterioration of £90,000 under revenue, as compared with the Revised Estimate, is due to non-recurrence of the special assignments of Imperial revenue mentioned in paragraph 13, partly counterbalanced by some expected recovery under the Land Revenue head following the depression of the current year. The further curtailment of expenditure amounts to about £400,000, this being effected by retrenchment in public works outlay. With the further prolongation of the war, economy in every direction is imperative, and the Local Governments, as I have already said, have co-operated most cordially and effectively in this policy.

"30. It will, however, be seen from the following statement, which brings together the Provincial outlay under the heads Education, Medical and Civil Works for the last few years, that the retrenchments which have been made under Education and Medical are not in any way of a sweeping character. The Medical head of course includes sanitation outlay.

[In thousands of pounds.]

Year.	Education.	Medical.	Civil Works.
1911-12	1,963	1,088	4,619
1912-13	2,490	1,142	4,936
1913-14	3,056	1,199	5,950
1914-15	3,182	1,362	6,128
1915-16 (Budget).	3,270	1,299	4,892
1915-16 (Revised).	3,064	1,351	4,586
1916-17 (Budget).	3,137	1,318	3,945

"It will thus be observed that the Education and Medical expenditure is still on a somewhat higher level than in the pre-war year, 1913-14, and, as regards Education, much above the outlay in the years 1911-13. There has been a very considerable

retrenchment under Civil Works as is only natural, since this head works as a regulator of Provincial finance, enabling expansion of expenditure when times are good and reduction when they are bad.

General Results—Imperial and Provincial.

"21. Reverting to the table in paragraph 23, we estimate that, on the present basis of taxation, the total revenue, Imperial and Provincial, for 1916-17 will be £82·5 million and the total expenditure £85·5 million, resulting in an Imperial deficit of about £2·6 million, and a Provincial deficit of about £400,000. The latter, as I have said, will be met by drawing on the balances at the credit of Local Governments. We have now to consider how the Imperial deficit is to be faced.

Additional taxation proposals.

"32. In dealing with the Budget for the current year we determined, with the approval of the Secretary of State, not to impose any additional taxation with reference to the large deficit then anticipated for 1915-16 and that of 1914-15. Though assuming continuance of the war during 1915-16, we were not at that time warranted in anticipating its long duration thereafter, and we therefore found our requirements for the time being by temporary and exceptional measures. We renewed temporary borrowings to the extent of £7 million which we had made from the Gold Standard Reserve in 1914-15, and the Secretary of State did the same in regard to short-term India bills to a like amount which he had raised in London. It was also proposed that the Secretary of State should raise about £6½ million by fresh borrowing at home while we were to issue a rupee loan of £3 million in this country. Even so, however, we had to reduce our programme of Railway and other capital expenditure from about £14 million, the sum taken in the Budget for 1914-15, to £9·4 million. Circumstances are now altogether different. We must assume that the war will continue for yet another year, and, it may be, longer. The Secretary of State has been unable, owing to the financial situation at home, to raise the full amount of the fresh borrowing in London contemplated for this year, and it has become our evident duty to provide for our own requirements without outside assistance, while the supplying capacity of the Indian money market is limited. We have also to recollect that the termination of the war, when it comes, will leave us with heavy financial demands upon us. We shall still, in all probability, have a large amount of temporary debt to pay off, and must also prepare for the liquidation of the rupee loan raised this year, which has to be repaid by 1923. We shall likewise have to surrender nearly £2 million which we shall have received in connection with the liquidation of hostile firms and the employment of captured enemy vessels and are using temporarily to meet our own requirements. On the revenue side, again, we must recognise that the experiences and lessons of the war must also add in some directions to our permanent military charges; and, lastly, it is desirable that we should be in a position, when peace returns, or as soon after as may be, to provide further funds for such beneficent purposes as the improvement of education and sanitation.

"In paragraph 54 of my speech introducing the Financial Statement for 1915-16, I said that the Government would not hesitate to resort to increased taxation to meet a deficiency in revenue which promised to be of a more or less abiding character. That contingency has now to be faced. The war continues, and we cannot go on, year after year, with uncovered deficits. We consider it essential in the present uncertain outlook to increase our revenue resources in order to make good the anticipated Imperial deficit of the coming year and also to supply a substantial surplus. I now proceed to indicate the methods by which, with the approval of His Majesty's Government, we propose to effect this.

"33. In the first place we propose to raise a sum of about £2·1 million by new and enhanced customs duties in the manner which I now proceed to explain :—

"Our general import tariff has been at the rate of 5 per cent *ad valorem* since 1894. We now propose, save in the case of sugar, to raise it to 7½ per cent *ad valorem*, and we hope thereby to get an increase of revenue of about £420,000, excluding the duty on metals which I deal with later. In this, as in other cases, I have, in calculating enhanced receipts, made allowance for decrease in consumption following the higher rates.

"In the case of sugar, in view of the large imports of this article and India's facilities for internal supply, we consider that we shall not be inflicting any real

hardship on the consumer by fixing the import duty at 10 per cent, by which w hope to raise an extra £400,000.

"34. Next we propose a material curtailment of the free list. The present list is based partly on the existing tariff law and partly on executive concessions, with the result that revenue is being unnecessarily surrendered, and the increasing range of exemption encourages applications for still further concessions. We propose hereafter to confine the statutory free list to the following items:—

"*First.*—Gold coin and bullion; and current Indian silver, nickel, bronze and copper coin.

"*Second.*—Certain essential materials—raw hides and skins, raw cotton, raw wool and paper-making materials.

"*Third.*—Certain agricultural requisites—machines and implements for husbandry, dairy appliances, and manures, including certain chemical manures.

"*Fourth.*—Certain articles, the exemption of which follows logically from our practice of levying an excise on cotton goods and beer, namely, cotton yarns and cotton thread, cotton spinning and weaving machinery, certain stores and articles used in the manufacture of cotton goods, and hops.

"*Fifth.*—A few specific articles, the exemption of which is either (*a*) supported by the practice of most countries—animals, works of art devoted to public purposes, books, natural science specimens, uniforms of public servants and military officers, and arms forming part of their equipment; or (*b*) justified by their special importance in Indian conditions—quinine and anti-plague serum.

"We have further included in the statutory free list the conditional exemption hitherto granted by executive instructions to salt imported for manufacturing purposes; and also the exemptions in favour of oil-seeds imported by sea from a Native State, and in regard to the professional equipment imported by passengers, trade catalogues and circulars imported by post, and second-hand gunny bags.

"35. The following articles now on the free list will hereafter pay duty at 2½ per cent *ad valorem*, which will still leave them 5 per cent below the general tariff rate:—

"Grain and pulse; tea chests and lead sheets used in their manufacture, and tea racks; firewood; printing and lithographing material; machinery other than the cotton spinning and weaving machinery above indicated; railway material, including telegraphic apparatus imported for railways; and ships. Coal, coke and fuel will be taxed at a quantitative rate of 8 annas per ton, which is roughly equivalent to 2½ per cent *ad valorem*.

"While taxing grain and pulse at 2½ per cent in ordinary circumstances, the Government will be prepared, when necessary, to consider the question of exempting them by executive order in famine years.

"Railway material imported by railways worked by the State is, and will remain, free under section 20 of the Sea Customs Act, as Government stores. Railway material for other railways, including those owned by the State but leased to Companies, will be taxed at 2½ per cent. The taxation of this latter class of railway material follows logically on the proposed equivalent taxation of machinery and ships, these three groups of imports having always been equally treated.

"36. The remaining articles now on the free list, which have got on to it more or less accidentally, and in regard to which there is no reason either for complete exemption or specially favourable terms, will be taxed at 7½ per cent under the general tariff rate. These are fresh fruits and vegetables, fish maws, bamboos, bristles and fibres, horn, raw jute, oil cakes, plants, precious stones and pearls, gum olibanum, motor cars for goods, and earth, common clay and sand.

"37. The above modifications of the existing free list are estimated to give us £160,000.

"38. The duty on iron and steel, which is now one per cent *ad valorem*, will be raised to 2½ per cent; and that on other metals, which is now 5 per cent, will go up to 7½ per cent, following the increase in the general rate on imports. These increases will yield about £80,000.

"39. I now come to articles which are subject to special rates of duty under the existing tariff. We propose, as I shall explain directly, to enhance the existing rates in the case of arms, liquors, tobacco and silver manufactures. I shall then briefly refer

[1ST MARCH, 1916.] [*Sir William Meyer.*]

to some articles on which we propose to leave the existing tariff rates untouched, and finally pass on to two important additions to our list of dutiable exports.

"40. As regards arms and ammunition, the effect of the present tariff is, generally speaking, that these are ultimately taxed at a rate of 10 per cent *ad valorem*. We propose to double this, the additional revenue expected being some £20,000.

"41. The taxation of liquors involves considerable complications, so I will deal with the matter class by class—

"(1) The duty on ale, beer, porter and cider is now 3 annas per gallon against 8*d*. per gallon in England. We propose to raise this to 4½ annas, and, in accordance with the usual practice, to make a similar increase in the excise duty on locally manufactured beer.

"(2) The rates on spirits will be recast as follows, and the rate now prescribed for potable spirit will, again in accordance with previous practice, apply to spirit of the same description manufactured in India and technically known as "foreign spirit."

(*a*) Perfumed spirit, per liquid gallon ₹18-12.

(*b*) Liqueurs, cordials, mixtures and other preparations containing spirit—(1) if entered in such a manner as to indicate that the strength is not to be tested, ₹14-10 per liquid gallon; (2) if tested, ₹11-4 per proof gallon.

(*c*) Spirit which has been rendered effectually and permanently unfit for human consumption, 7½ per cent *ad valorem*.

(*d*) Spirit, other sorts, per proof gallon ₹11-4.

"(3) In explanation of these proposals I may observe that :—

(*a*) The rate on potable spirit, which is of course much the most important item, is to be raised from ₹9-6 to ₹11-4 per proof gallon so as to bring the Indian rate of duty to the level of the English rate, which is approximately 15 shillings per proof gallon.

(*b*) The preferential rate of ₹7-13 per proof gallon which was accorded by the tariff of 1910 to spirit contained in drugs, medicines or chemicals is now to be withdrawn. This preferential rate evoked protests from manufacturing chemists in India, who had to pay for imported spirit required by them for the local manufacture of drugs at the rate applicable to potable spirit, and were therefore placed at a disadvantage compared with manufacturing chemists outside India. To remove this disability administrative arrangements have been in force since 1910 under which Indian manufacturing chemists have been able to obtain spirit at the rate of ₹7-13 per proof gallon. We propose to adjust these difficulties, and at the same time to obtain a larger revenue, by taxing the spirit now in question at the same rate as potable spirit.

(*c*) Similarly, administrative difficulties have arisen in connection with the treatment prescribed in 1910 for the assessment of liqueurs, cordials and perfumed spirit and toilet preparations. The proposals now put forward follow closely the procedure adopted in England in the treatment of these spirituous preparations. A higher liquid gallon rate, *viz.*, ₹18-12, corresponding to the English rate of £1-5, is proposed for perfumed spirit; and a somewhat lower liquid gallon rate is proposed for all spirit not tested, other than perfumed spirit. The present position is that perfumed spirit pays ₹13 per liquid gallon, while liqueurs, etc., pay at the same rate, and without any statutory option of test with reference to proof strength, an omission which weighs unduly on the weaker liqueurs.

"(4) The duty on champagne and sparkling wines now stands at ₹3-12 per gallon, which it is proposed to raise to ₹4-6, while the duty on still wines will be increased from ₹1-8 to ₹1-12 per gallon. The imports of these articles are on the decline, and it is thought that a higher rate would not be fiscally productive. The increase we are now making is, moreover, proportionately nearly the same as that which we propose under spirits.

"(5) We estimate that we shall get about £130,000 from the above proposals, inclusive of £20,000 from the excise on beer and spirits.

[*Sir William Meyer.*] [1ST MARCH, 1916.]

"42. The present rates of duty on tobacco, cigars and cigarettes are as follows :—

	R	A.	P.	
On unmanufactured tobacco	1	0	0	per lb.
On cigars	1	10	0	„
On cigarettes weighing 3 lbs. or more per 1,000	1	4	0	„
On cigarettes of less weight	3	2	0	per 1,000.
On manufactured tobacco, other sorts	1	2	0	per lb.

"43. (1) We leave the rate on unmanufactured tobacco unaltered, as the present duty is approximately 100 per cent *ad valorem*.

"(2) The quantitative rate on cigars and cigarettes is to be replaced by an *ad valorem* rate of 50 per cent. In the case of cigars this rate may be taken as equivalent to an increase of about 30 per cent on the present quantitative rate. As regards cigarettes, the aggregate duty collections now represent approximately 30 per cent of value; but the present quantitative rate presses heavily on the very cheap brands, invoiced at R6-14 a thousand, which form the bulk of the imports. The duty represents, in their case, 45 per cent of value, while in the case of a large number of the better brands of cigarettes, particularly those imported from Egypt, the proportion of duty to value is considerably less, running between 9 and 35 per cent. A certain amount of inconvenience and loss is also caused to importers by the necessity of weighing the cigarettes to ascertain the duty leviable at the quantitative rates. The substitution of an *ad valorem* rate will thus have the double effect of drawing some additional revenue from the better class of cigarettes without adding materially to the burden on the cheaper class, and of removing the practical difficulties in applying the present quantitative rates.

"(3) We propose to raise the rate on manufactured tobacco, other sorts, from R1-2 to R1-8 per lb., which will be roughly proportionate to the increase of duty in the case of cigars.

"(4) We hope to get about £30,000 from these changes in connection with tobacco.

"44. We do not propose any increase in the duty of 4 annas an ounce imposed on imported silver in 1910, which represents an *ad valorem* rate of some 15 or 16 per cent. In the case of silver manufactures, however, which at present come under the general tariff, we propose to make a change, to remove a disability under which Indian silversmiths labour. They have now to pay duty at 4 annas per ounce for the silver required for the manufacture of their goods, while silverware and silver thread imported into India only pay duty at the general rate. We now propose that where the importer can give the Collector of Customs proof as to the silver contents of an article made or partly made of silver, the duty on such silver contents shall be at the rate applicable to silver, namely 4 annas per ounce, the residual value of the article being taxed at 7½ per cent. Where, however, no such proof is forthcoming, the whole duty will be at 15 per cent *ad valorem*. Executive instructions will, however, issue exempting from this special tax articles which only contain an inconsiderable proportion of silver.

"45. We are not modifying the duty of 1½ annas a gallon imposed on imported petroleum in 1910, which is equivalent to some 20 per cent *ad valorem*. We also leave the export duty on rice unaltered. I shall refer presently to the case of salt.

"46. The only other important item in the existing tariff on which I have not yet touched is cotton manufactures. For the last 20 years the position has been that cotton twists and yarns of all kinds are free of duty, while a duty at the rate of 3½ per cent is imposed on woven goods of all kinds, whether imported or manufactured in Indian mills. We propose to leave the position here as it stands.

"The Council will naturally ask why, at a time when fiscal necessities compel us to make a material enhancement of the tariff in nearly every other direction, we should leave cotton alone. Well, the Government of India have not failed to represent their view that there should be a material increase in the cotton import duties, while the cotton excise, which has formed the subject of such widespread criticism in this country, should be left unenhanced, subject to the possibility of its being altogether abolished when financial circumstances are more favourable. But His Majesty's Government, who have to consider the position from a wider standpoint, felt that the raising of this question at the present time would be most unfortunate, as it would

[1ST MARCH, 1916.] [*Sir William Meyer.*]

provoke a revival of old controversies at a time when they specially desired to avoid all contentious questions both here and in England, and might prejudice the ultimate settlement of the larger issues raised by the war. His Majesty's Government feel that the fiscal relationship of all parts of the Empire as between one another and the rest of the world must be reconsidered after the war, and they desire to leave the question raised by the cotton duties to be considered then, in connection with the general fiscal policy which may be thought best for the Empire, and the share, military and financial, that has been taken by India in the present struggle. His Majesty's Government are aware of the great interest taken in this question in India and of the impossibility of avoiding some reference to it when new taxation has to be raised, but they are confident that their decision is in the best interests of India and that premature discussion of this particular issue could only be harmful. We fully realise the force of these arguments at the present juncture, and consequently we are reluctantly compelled not to propose any modification in respect of the cotton duties.

"47. Our final proposal connected with the tariff is the imposition of an export duty on two important staples, namely, tea and jute. Both these industries have been specially prosperous during the war, and in the case of jute I think there is already a considerable consensus of opinion that if the financial situation created by the war should necessitate heavy additional taxation, this is one of the first articles which might legitimately be taxed. The case of tea is hardly less strong, especially in view of the fact that, in spite of its largely industrial character, the tea business has for 30 years been exempted from income tax.

"I may add that in the case of tea, we have a precedent for special taxation in the recent action of the Ceylon Government, which, after the war broke out, imposed an export duty of R1½ per 100 lbs. We propose to follow this example and adopt the same rate, a measure which is estimated to produce some £300,000 of revenue in the coming year. Our proposals contemplate, however, the exemption of forward contracts entered into before the present date. We also propose to exempt tea waste.

"48. Jute is an article which can well bear a special rate of export duty, not only because of the present prosperity of the trade, but in view of the monopoly which India has in this product. The only existing special taxation on jute is a small cess levied in Calcutta and Chittagong, the proceeds of which go to the Improvement Trust in the case of Calcutta, and the local Port Trust in the case of Chittagong. It was accepted, however, when these cesses were imposed, that they were not to prejudice any future claim of Government to tax jute for our Imperial purposes.

"Our present proposal is to tax both the raw and the manufactured article. In the case of raw jute we contemplate a general rate of R2-4 per bale of 400 lbs., which is approximately equivalent, at present prices, to an *ad valorem* duty of 5 per cent. There are, however, certain classes of jute, known technically as "cuttings" and "rejections", which are of much smaller value, and we therefore propose a special rate of 10 annas per bale on cuttings and R1-8 on rejections.

"Manufactured jute falls under two main classes, known to the trade as sacking and hessians, respectively. We propose a duty of R10 per ton on sacking and R16 per ton on hessians—a rate which, in each case, corresponds approximately to the taxation, at 'raw jute' rates, of the material used in the production of the goods.

"49. We propose, however, following the spirit of section 20 of the Sea Customs Act, to exempt from this duty manufactured jute which is exported under specific demand from His Majesty's Government, *i.e.*, in pursuance of War Office contracts.

"Also, as in the case of tea, we propose to exempt forward contracts entered into before the present date, a concession which will appreciably diminish the revenue to be obtained from the new duty in the first year. We estimate this at about £580,000.

"50. The tariff changes above indicated will apply to external trade by land, from which another £30,000 is expected, as well as to that by sea. In the aggregate, they are estimated, as I have already stated, to bring in a total increased revenue of about £2·1 million. I shall, during the present sitting, introduce a Bill embodying the legislation required, and I shall ask Your Excellency's permission to suspend the rules of business so as to admit of the immediate nomination of a Select Committee thereon and an instruction to them to report at a very early date. It will be readily

understood that it is most essential to get the fiscal changes which we propose passed into law as soon as possible, and with effect from the present date, since otherwise there would be large clearances of goods to avoid the higher duties.

"51. The next source from which we propose to derive increased revenue is Salt. Between 1888 and 1902 salt was, generally speaking, taxed at R2½ per maund. Then a cycle of prosperity permitted a gradual reduction of the duty to R2 per maund in 1903, to R1½ in 1905, and to R1 in 1907, at which figure it now stands. The maund on which this duty is calculated is a little more than 82 lbs.; consequently, the existing rate amounts to only about one-fifth of an anna per lb.

"Enhancement of the salt tax has always been looked on as a reserve to be utilised when war or other financial calamities should come upon us, and in making the reductions of the tax which I have noted above our predecessors had in view the increase thus afforded in the potentialities of this reserve. It is only natural, therefore, that in the present situation we should turn to an increase in the salt duty. On the other hand, it has to be remembered that the duty is largely paid by the poorer classes; and that the increases proposed in our customs tariff will to some extent fall upon poor consumers. In the interests of the poor, therefore, we propose to make only a very small increase in the salt tax, *i.e.*, to increase it from R1 to R1¼ per maund. This rate will still be less than that levied only nine years ago, and the taxation will now amount to about ¼ anna per lb. We estimate the extra revenue obtainable from this increase in 1916-17 at £600,000.

"It may interest the Council in this connection to be informed that Italy, too, derives a considerable amount of revenue from salt. This was put down in the Italian budget for 1914-15 at the equivalent of £3·6 million, and the taxation has recently been raised so as to bring in another £800,000. Our salt revenue on the present basis of taxation is estimated at £3·4 million, and with the extra duty at £4 million. Italy, therefore, is raising rather more than we do from salt, and from a population which is about one-seventh of that of British India.

"52. Here, too, it is necessary to apply the increase to imported and, generally speaking, to locally produced salt, with effect from the 1st March. The enhancement of salt duty will not require special legislation. It can be effected under the law by notification by the Governor General in Council.

"Locally produced salt in Burma has hitherto been taxed at less than the general rate of duty, though the tendency has been gradually to work up to this. We shall consider later whether the present enhancement should not also involve a proportionate increase in the special Burma taxation.

"53. I now come to Income Tax, in regard to which I may first note that this term now replaces the old designation 'Assessed Taxes' in Heads VIII and 10 of our Revenue accounts, since there is at present no other tax to reckon with under these heads. The first general income tax for British India was enacted in the year 1860, and it may be noted that all incomes above R500 a year paid 4 per cent, or about 8 pies in the rupee, and that profits on land were assessed, except in the case of cultivators of land whose rent value was less than R600 per annum. This Act had a short life, but it was succeeded by various other income tax and license tax enactments, ending with the present Income Tax Act of 1886.

"54. The main features of this Act are as follows. It exempts—

(*a*) Incomes derived from land assessed to land revenue and from agriculture.

(*b*) Incomes derived from property solely employed for religious or public charitable purposes.

(*c*) Salaries of officers and soldiers employed in a military capacity, when these do not exceed R500 a month, or R6,000 a year.

(*d*) All incomes which would otherwise be taxable if these are less than R1,000 a year.

"The last exemption originally stood at R500, but this limit was raised to R1,000 in 1903. With the exception of that change, the Act of 1886 has remained in force to this day.

"The taxation arrangements which it authorises are as follows :—

"Salaries and pensions are assessed at 4 pies in the rupee if between R1,000 and R1,999 per annum. If above that amount, they pay 5 pies in the rupee.

[1ST MARCH, 1916.] [*Sir William Meyer.*]

"Other incomes, derived from sources outside profits of companies and interest on securities, if they are between R1,000 and R1,999, pay on a scale of fixed rates which varies from R20 to R42, and approximates roughly in its total effect to a 4 pie rate. Incomes of R2,000 or upwards similarly derived pay at the 5 pie rate.

"Profits of companies are uniformly assessed at 5 pies in the rupee. The same rate is levied upon interest on securities; but here the holder may get an exemption or a rebate at the 4 pie rate, as the case may be, if he can prove that his income from all sources is less than R1,000, or falls between R1,000 and R1,999.

"55. Speaking generally, therefore, our normal income tax rate is 5 pies in the rupee, which is about equivalent to 6*d.* in the pound, and it may be noted that, when the Act was introduced, the English income-tax stood at 8*d.* in the pound.

"Since then, as is well known, very great changes have been made in the English income tax: the principle of graduation has been introduced, the rates have been very much raised, and since 1910 there has been a super-tax which is now levied on incomes above £3,000. In 1914, just before the war—the super-tax apart—the rates of income tax ranged from 9*d.* to 1*s.* 3*d.* in the pound. These were doubled after the war, and in 1915 there was a further increase of 40 per cent on the previously doubled rate, while the limit of exemption was reduced and the scale of previous abatements cut down. The English income tax, apart again from the super-tax, may, therefore, now be said to run from 2*s.* 1*d.* to 3*s.* 6*d.* in the pound. The contrast afforded by India is thus very marked.

"Now it is not necessary, or desirable, to propose any such heroic measures as those which have been forced upon Chancellors of the Exchequer in England; but our income-tax here is undoubtedly very low, and there will be general agreement, I think, that, at a time when it has become necessary to increase taxation materially, and to hit the poor in some measure by the raising of the salt tax, more money should be exacted from the incomes of the relatively well-to-do.

"56. Our proposals for obtaining more money from the income-tax are as follows:—

(*a*) We propose to leave all existing exemptions untouched, and also to make no alteration in the taxation of persons whose incomes, official or private, are less than R5,000 per annum.

(*b*) In the case of incomes under Parts I and IV of Schedule II of the Act, *i.e.*, salaries and pensions, and incomes from the "other sources" mentioned above, which exceed the last-mentioned sum, we propose to enhance the tax in the following way:—

(1) Incomes from R5,000 to R9,999 will pay 6 pies in the rupee, or 7½*d.* per pound.

(2) Incomes from R10,000 to R24,999 will pay 9 pies in the rupee, or 11¼*d.* in the pound.

(3) Incomes of R25,000 and upwards will pay 1 anna in the rupee, which is equivalent to 1*s.* 3*d.* in the pound.

(*c*) Profits of companies will be assessed at the 1 anna rate; but this will be subject to abatement, or exemption, to individual shareholders who can show that their total income is such as to warrant a lower rate of taxation or none at all. Thus a shareholder whose income is less than R1,000 per annum from all sources would obtain a refund of the entire tax previously recovered on his dividends; a man whose total income is R5,000 would obtain a refund of the amount recovered in excess of the 6 pie rate; and so on.

"We also propose, following what we are advised to be the correct construction of the law as it stands at present, as well as the actual practice in some provinces, to exempt altogether (as would be the case if it were a matter of an individual) the profits of companies which amount to less than R1,000.

(*d*) Interest on securities will be taxed similarly, *i.e.*, the initial rate will be 1 anna, but the holders can obtain refunds of the whole or of part of the sum recovered with reference to their actual income of all kinds.

"57. The total number of income tax assessees in 1914-15, counting companies as persons, was about 332,000. Of these about 216,000 were assessed on incomes between R1,000 and R1,999, and 79,000 between R2,000 and R4,999. Consequently, no less

than 295,000 of the present assessees will be unaffected by the new rates of taxation we propose, which will fall on the 37,000 who are relatively well-to-do. Of these, again, about 24,000, on incomes between R5,000 and R9,999, will only have their tax increased by 1 pie on the rupee.

"58. We expect in all to get £900,000 from this increased taxation. Here again I shall introduce a Bill to-day making the required amendments in Act II of 1886. But in this case it will not be necessary, as in regard to salt and customs, to make the new taxation applicable before the 1st April 1916. Arrears of income tax not paid by that date, but recovered subsequently, will be assessed at the old rates. The new rates will apply to all income the tax on which has not actually become due till the 1st April.

"I may add that we propose to restrict the amendments of the Income Tax Act to those which are necessary to carry out the new scheme of taxation I have outlined. There are other matters, no doubt, in respect of which the existing Act might suitably be amended or made clearer, but these can wait till a season of greater leisure.

"59. Lastly, I may explain that under the terms of the existing financial settlements with the provinces, income tax is a divided head, and the additional revenue accruing from our proposals will thus be shared between Imperial and Provincial. But as this additional taxation is imposed solely for Imperial purposes, the amount which technically accrues to the provinces will be set-off by a counter-adjustment from Provincial to Imperial under the head 'Transfers between Imperial and Provincial Revenues.' The same procedure was followed in 1910 in respect of the additional taxation then imposed under 'Stamps' and 'Excise.' A like adjustment will also be made on this occasion in respect of that portion of the additional duty on locally produced beer and 'foreign spirit' which will be credited to Provincial revenues under the terms of the settlements.

"60. I now sum up the financial effect of the proposals above explained. We intend to get an additional revenue of—

(*a*) £2,150,000 from Customs and consequential changes in the excise duties on liquors.

(*b*) £600,000 by an enhancement of the duty on Salt.

(*c*) £900,000 by an increase under Income Tax.

Or in all a little over £3·6 million as against an estimated Imperial deficit of £2·6 million. This leaves us with a surplus of £1,052,000 which, though somewhat less than we have aimed at in the years just preceding the war, will supply a useful and much needed source of strength against the contingencies which face us in the future.

"The imposition of a portion of our proposed taxation from 1st March (*vide* paragraph 58) will also yield about £110,000 in the current year, thus diminishing (as I have already noted) the Imperial deficit for 1915-16 indicated in paragraph 17 to about £2 million.

"61. Consequently the statement given in paragraph 23 must be taken as superseded by the revised statement below, which shows our revenue and expenditure position for 1915-16 and 1916-17 as determined by the taxation measures above expounded.

[1 millions of pounds.]

	Revised, 1915-16.			Budget, 1916-17.

[1ST MARCH, 1916.] [*Sir William Meyer.*]

Rupee borrowing.

"62. Before I pass on to the general ways and means arrangements for the coming year, it will be desirable to make a few remarks on the subject of our rupee borrowing.

"In paragraph 56 of my speech introducing the last Financial Statement I announced our intention of raising a loan of £3 million (4½ crores) in India in the current year, the time and the best method of borrowing being reserved for later consideration.

"The internal conditions in India were generally favourable at the period of the year when we usually take into consideration the question of issuing a new loan. Trade was slack and money easy ; the balances of the Presidency Banks stood at a high level; and though there was little demand for rupee securities and the market was extremely sensitive, the floating supplies of paper were reported to be small and its price had been comparatively steady. The situation was, however, entirely changed by the announcement, on the 21st June last, of the flotation of a British war loan for an unlimited amount carrying interest at 4½ per cent, with valuable privileges to subscribers in respect to the conversion of holdings in the previous 3½ per cent war loan, consols and annuities, into stock of the new war loan. This produced an immediate drop in the price of our 3½ per cent paper, and it became clear that more favourable terms than we had previously contemplated would have to be offered if a loan of the amount announced in the Budget were to be successfully floated, while the increasing difficulties in raising further loans in London on behalf of India rendered it impossible to reduce the Indian borrowing.

"The line of action to be followed in these conditions formed the subject of anxious deliberation on our part and, after discussion of the question at an informal conference which I held with the representatives of the three Presidency Banks, it was decided to fix the rate of interest at 4 per cent and to offer at par a short-term issue which would be redeemed after eight years in any case, while the Government reserved the right of redeeming it at any time after five. Political and financial circumstances rendered it most undesirable to take any risk of the loan proving a failure, and accordingly it was arranged that the Presidency Banks should underwrite the entire loan, and should in any case subscribe for a minimum sum of R1½ crores, in return for a commission of 1 per cent on the amount of the loan. The loan as thus settled was notified on the 28th July last and subscriptions were invited between the 2nd and 17th August, these being receivable at the head offices of the Presidency Banks and their branches, and at all places at which we have account offices, instead of as formerly at the presidency towns only. Considering the moderate amount of interest offered and the conditions prevalent, the loan was wholly successful, being oversubscribed by more than two crores.

"63. We also initiated an important new departure in the direction of trying to bring the Goverment into more direct touch with small investors by issuing a supplementary section of the loan to be subscribed for through Post Offices. The loan proper was to be subscribed by the 17th August, but the Post Office section, into which subscriptions of any amount (in even hundreds of rupees) from R100 to R5,000 were receivable, remained open till the end of October, and all the amounts tendered through it were taken in full. Special arrangements were made for wide publication of the terms on which applications would be received through the Post Office, by notices and brief posters exhibited in post offices, treasuries, and district offices, and by advertisements inserted in newspapers, English and vernacular.

"The total amount thus realised was about R50 lakhs, or £333,000, and of this amount only about 18 lakhs represented withdrawals from existing savings banks accounts (which so far gave us the advantage, in present circumstances, of transfer of liability from a call account to one which we need not liquidate for some years), while the remaining 32 lakhs was new money lodged with Government. Of the total, 21 lakhs was obtained from Europeans, 26 lakhs from Indians, and 3 lakhs from banks and public bodies. R6 lakhs represented individual applications not exceeding R500, while out of a total of some 4,250 applications, over 500 were for the minimum amount possible, *viz.*, R100. It is also interesting to note that in all nearly three lakhs of rupees, representing some 300 applications, came from Indian ladies. As further evidence of the extent to which this section of the loan tapped sources which would otherwise not have been available, it may

be mentioned that about 40 per cent of the total was applied for through sub and branch post offices in the mofussil.

"The total amount obtained may seem small, but I would remind the Council that 50 lakhs is a quarter of the total rupee loan issued so recently as 1911-12, and one-third of that which was issued in 1910-11. Considering the novelty of the experiment, the troubled times, and the innate conservatism of the bulk of the Indian people, I hold that this Post Office loan operation has been a marked success, and has justified us in making the procedure a permanent one. We shall also consider, in respect of future issues, the desirability of further simplifying methods so as to avoid some local difficulties and misapprehensions which this year's experiment brought to notice.

"64. I now come to our borrowing programme for the next year. That must take place entirely in this country, since, as I have already indicated, we cannot, in the interests of the Empire, set foot on the borrowing market at home. The position of 3½ per cent paper is also a very relevant factor in this connection. I referred last year with legitimate satisfaction to the strength of that paper, but since then it has fallen greatly. At the beginning of the present financial year its selling price was R92½. In December and January, however, it fell rapidly to the neighbourhood of R80; and in spite of some recovery subsequently, it has recently stood about eight points below the opening price of the year. That is, of course, a very serious matter for the holders of Government paper, and various suggestions have been made, in the press and otherwise, that we should assist them by the conversion of the whole of our 3½ per cent debt, which at present stands at about £92 million, into a 4 per cent security. This would involve a very considerable burden to the general taxpayer, which I am certainly not prepared to impose upon him. Nor can I admit that the Government can be held responsible for such unforeseen falls in securities, Government or other, as have taken place by reason of the war and the higher rates of interest which it has brought about. On the other hand, the Government cannot look with indifference on a large depreciation of the price of the premier security of India, or ignore the grave difficulties which such depreciation, if unremedied, will place in the way of their own future borrowings, especially in the coming year.

"65. Consequently, after very careful deliberation, and with the approval of the Secretary of State, we have decided to do something for the holders of our existing Government paper which will be in our own, that is in the public, interests as well as theirs. In view of our ways and means requirements, and to strengthen our position generally, we consider that we should raise not less than £4 million in India next year, outside the amount which we may get from the Post Office section of our loan. To facilitate this we propose that subscriptions to our new loan should carry with them the privilege of converting an equivalent amount of 3½ per cent paper on favourable terms, by which I mean terms that will be better than the arithmetical result of a comparison between 3½ per cent interest and the higher rate which we shall have to pay for the new loan: *e.g.*, if our new loan is issued at 4 per cent, the conversion rate for 3½ per cent paper will be higher than R87½. This privilege will also cover the conversion of our remaining 3 per cent paper on terms proportionally equivalent to those fixed in respect of the 3½ per cents. Thus a subscriber of say one lakh of rupees to the new loan will thereby obtain the right, which we shall allow him to transfer, to obtain another lakh by the conversion, on such terms as may be decided on, of 3½ per cent or 3 per cent paper.

"66. Further, we propose that this offer of limited conversion in 1916, conditional on subscription to a new loan, shall be repeated in 1917 and 1918 if we borrow in those years at a higher rate than 3½ per cent. Thus supposing the 1917 loan to be of that character, a subscriber thereto, or a purchaser of conversion rights attached to the loan, will be able to convert 3½ per cent paper into debt of that year's issue, whatever its terms may be. I must explain, however, that the conversion rates will be fixed on each occasion with reference to the circumstances of the time and the character of each new loan, and I can hold out no hope that they will under any circumstances be more favourable hereafter—indeed they may quite possibly be less so—than the terms we shall offer in 1916, when money conditions are specially stringent. I may explain also that conversion facilities will not be attached to any short-term borrowing, such as the loan we raised last year with a currency of 5 to 8 years only; and generally that the Government of India reserve full

[1ST MARCH, 1916.] [*Sir William Meyer.*]

discretion as to the terms to be offered for future loans, and also as regards the conversion rights associated therewith.

"67. We believe that these measures will confer a substantial degree of protection on the holders of our existing paper, and will be found well adapted to the particular conditions which this problem presents to us in India. The requirements of the Government of India are not such as to call for a vast scheme of unlimited conversion in a single year as was the case at home. The Indian markets could not find the money; and if they did find it, we could not employ it ourselves in India, or remit it to England without wrecking exchange. We feel too that in view of the comparative narrowness of the Indian money market in ordinary times, and the special stringency which exists at present, we should—if we confined the opportunity of conversion to a single year's issue—deprive many holders of our paper of an effective chance of participating. On the other hand, we are not prepared to admit that the conditions call for the eventual extinction of the whole mass of our 3½ per cent paper, and could not wisely saddle ourselves with the grave liabilities incidental to a conversion scheme extending over a considerable number of years. In the conditions of the present year our next issue must be a repayable loan, and though we in no way pledge ourselves to confine our flotations in the conversion period to repayable debt, we may of course find it necessary to do so. Now, the association of conversion rights with a repayable loan doubles the amount which has to be repaid in the future. It will be readily understood that this is a very serious element in the problem; and when the time for repayment came, we might be seriously hampered as regards our productive capital expenditure and our finances generally if the amount of debt falling due for discharge were of excessive amount. These reasons have weighed with us in limiting the conversion period to three years. We have also had to bear in mind that one main justification for a conversion scheme is the inducement which it offers to the public to subscribe to the loans issued at a time of difficulty and crisis, and we cannot afford to have this inducement weakened by an undue prolongation of the opportunities for conversion.

"68. It would be premature as yet to decide what the exact terms of the 1916 loan shall be in respect of interest and currency, though I may say now that the loan will on this occasion be repayable at the end of some specific, though probably somewhat distant, date. Nor can I yet state the conversion rate which will be offered for 3½ per cent and 3 per cent paper. These are matters which will still require very careful consideration; but I may say at once that the effective amount of our new loan, that is excluding the new debt created by conversion of previous issues, will, as I have already indicated, be not less than £4 million outside the Post Office section (to which, I may observe, the same conversion facilities will apply) and that we shall be prepared to accept subscriptions up to £8 million. We are willing to take that large amount this year partly to make the remedy of conversion more immediate and efficacious, and partly to strengthen our financial position generally in view of the war. But we in no way contemplate, or pledge ourselves to, similarly large flotations in 1917 and 1918; and investors who stand aside from this year's issue in the expectation of being as readily able to obtain conversion rights in the two following years will run the risk of disappointment in that respect.

"69. I may mention here that we have decided, with the approval of the Secretary of State, to introduce a new form of Government securities in the shape of bearer-bonds, to meet the convenience of persons in large business centres who wish to dispose of, or raise money upon, Government paper with greater ease and rapidity than are afforded by our existing promissory notes with the formalities attendant upon the transfer of these from one holder to another. We have no desire, however, to alter or abandon the present form of promissory note, which is much valued for purposes of safety by those who wish to hold Government paper permanently or for considerable periods. Accordingly the bearer-bond form will be purely optional and the fullest facilities will be given for the conversion of promissory notes of the existing form into bearer-bonds and *vice versa*. This reform will be introduced as soon as certain legal points which are under consideration have been settled, and when the best form of the new bearer-bond has been determined on.

Ways and Means Estimate for 1916-17.

"70. Before setting out the figures in the manner adopted in paragraph 20 above, I would emphasise that they are very materially affected by the facts

[*Sir William Meyer.*] [1ST MARCH, 1916.]

that, as I have already said, we cannot count on any home borrowing next year; that, on the contrary, we ought to give some little help to the Home Government in maintaining a grip over the London money market by repaying a portion of the Secretary of State's outstanding India Bills; and that, in view of the limitations of the Indian money market, we must take a cautious view as to the immediate response to our offer of conversion facilities. Consequently, even though it is proposed to meet the Imperial deficit entirely by taxation, and convert it into a surplus, we have had to cut down the capital expenditure programme to the lowest possible limits, allowing only £3 million for Railways and £1½ for Irrigation and Delhi.

"The figures we have to deal with are then as follows:

Outlay.	£ million.	*Resources.*	£ million.
Provincial deficit . . .	0·4	From balances . . .	0·3
Capital Expenditure—		Imperial surplus . .	1·1
Railway	3·0	Rupee borrowing . .	4·3
Irrigation . . .	0·9	Unfunded debt . . .	0·3
Delhi	0·3	Famine insurance and miscellaneous items	0·2
Discharge of debt . . .	2·0	Special war receipts . .	0·4
	6·6		6·6

"71. I have already explained the amount of the Provincial deficit and the Imperial surplus as arrived at by the new taxation, and now add the following elucidatory remarks in respect of other items.

"*Railway Programme.*—As I have said, the financial position requires us to cut this down to a very low figure. We are advised, indeed, that it is very questionable whether a larger allotment could be profitably spent in view of the great difficulty, in present circumstances, in obtaining railway material from home and its extremely high cost. The present price of rails, for instance, landed in India, is nearly double the pre-war price, while the Tata Works, on which we could normally rely for local supplies, are now mainly occupied in the manufacture of steel for munitions. Our own railway workshops too are largely engaged in the same work.

"The £3 million programme has been fixed so as to continue progress, but generally at a reduced rate, on works already in hand which could not without loss or great inconvenience be interrupted. Provision has also been made for the restoration of the hill section of the Assam-Bengal Railway, but only such new works are included—for example, water-supply schemes where the existing supply seems likely to fail—as could not with safety be postponed. The bulk of the expenditure proposed is consequently on open lines.

"*Irrigation.*—Here too the financial position has to be taken into account, and prevents our doing more than repeat the revised estimate provision of £900,000.

"*Expenditure on Delhi.*—This, as in the current year, is confined to what is absolutely necessary to keep things going without deterioration of material and disbanding of necessary establishments.

"*Discharge of debt.*—We provide here £500,000 for the discharge of India bonds issued in connection with the purchase of the Indian Midland Railway, which fall due in the coming year. We also provide £1½ million for the discharge of some of the short-term sterling India Bills issued by the Secretary of State in 1914-15, a measure which, as I have indicated, will be a contribution on our part to the retention of the Home market for borrowings by His Majesty's Government in connection with the war. We shall also, incidentally, save a certain amount in interest charges. The temporary loans we raised in 1914-15, which still stood at £14 million at the commencement of the current year, will thus have been reduced to £9½ million, *i.e.*, to £4 million from the Gold Standard Reserve (*vide* paragraph 21) and £5½ million in sterling India Bills.

"72. I have already said as much as I can at present in respect of the *rupee loan.* We take the amount of this for the purpose of the present calculations at £4·3 million, of which £300,000 is estimated as accruing from the Post Office section. But, as

[1ST MARCH, 1916.] [*Sir William Meyer.*]

I have already indicated, we are prepared to accept subscriptions up to a further sum not exceeding £4 million. To the extent that we obtain these we shall employ them in paying off our remaining debt to the Gold Standard Reserve.

"It is very necessary, in present conditions, to conserve the Indian money market for the requirements of Government to a greater extent than is normally necessary. We do not propose to go at all as far in this direction as His Majesty's Government have had to do at home, but we are fully justified in issuing instructions, as we have done, that local bodies shall, as far as possible, keep down their development expenditure which is financed from borrowing; and that all loan flotations by such bodies, as well as branch line companies' loans, shall be held absolutely in abeyance from the present date until our coming loan has been floated.

"For *unfunded debt* we take a net incoming of £300,000 only, as we must be cautious in regard to the Post Office deposits, and we are for the present anticipating that there will be a reduction in these by direct withdrawals, or by transfer to the Post Office section of the loan, to the extent of £700,000 in the coming year.

"Under *special war receipts* we assume a receipt of £400,000 from the continued employment of enemy vessels.

"73. These and other transactions bring us to an estimated closing balance of £17·4 million on the 31st March 1917, exclusive of holdings for the Gold Standard Reserve temporarily included in the balances of the Home Treasury. This is about £1 million more than the normal minimum balance required in India and England together; but it will be readily understood that in present conditions, which in several directions expose our balances to exceptional strain, it is necessary to have some margin. This is the more desirable in that, as I have already said (paragraph 32), we shall eventually have to make good the large sums—of which we are making temporary use—that we are deriving from the employment of captured enemy vessels and the liquidation of hostile firms.

Remarks on certain special heads.

"I now furnish some supplementary information in regard to certain special and important heads.

A.—Opium.

"74. In paragraph 36 of my speech introducing the Financial Statement for 1914-15, I referred to the question of the disposal of the stocks of Indian opium which had accumulated in the China ports as the one problem of our past opium trade with China still remaining for solution. At the commencement of this year the amount of stocks still unsold was considerable and the rate at which they were passing into consumption was slow, while all the consuming provinces in China except three had been declared free of cultivation and were consequently closed to Indian opium in accordance with the terms of the Opium agreement of 1911. Arrangements had also been made in accordance with that agreement for the inspection, early last summer, of Kiangsu with the object of applying the closure to this province also. These arrangements were however cancelled at the request of the Chinese Government, on the ground that investigations had shown that certain districts were not free from poppy cultivation; and shortly afterwards it became known that an arrangement had been arrived at between the Chinese authorities and the opium merchants which would have the effect of removing restrictions which had previously hampered the latter's trade. This was followed by the announcement, a few months later, that the whole of the stocks lying in Hongkong and a portion of those remaining in Shanghai had been purchased by representatives of the Chinese Government. It may fairly be assumed that the small remaining balance of the stocks is not likely to cause any embarrassment to the Government of India, and so a further, and apparently final, stage has been reached in the connection of this country with China in the matter of the opium trade.

"75. Shortly after the outbreak of war we found it desirable to raise—from R1,200 to R1,600 per chest—the upset price fixed in respect of the opium which is auctioned monthly for export to the non-China markets. During 1915 the full amount of the opium offered at this price was sold and, in view of the active conditions of the trade towards the close of the year, it was decided, as I have previously mentioned, to make a further enhancement of the upset price to R1,800 with effect from January 1916. The price obtained at our auction sales rose at once on the

announcement of this decision in September and has recently been above the new minimum.

"76. I mentioned last year that we had arranged to sell direct to the Government of the Straits Settlements the amount of opium required by that Government for its opium monopoly. A similar arrangement has since been concluded with the Government of Hongkong, and the amount of opium which has been announced for auction is exclusive of the requirements of these two Governments.

"77. Incidentally the war has led to an increased demand for medicinal preparations made from opium and, supplies from Turkey being interrupted, it has been arranged with the Secretary of State to test the suitability of Indian opium for this purpose by placing a quantity at the disposal of the London market. The permanent success of the experiment cannot, of course, be established till the return of peace conditions, but we have been able so far to sell 1,400 chests at a substantial profit and anticipate a larger sale in the coming year. It is a matter of satisfaction to us that in this way the production of Indian opium has relieved a want which must otherwise have been acutely felt.

B.—Military Services.

"78. The table below shows the gross and net expenditure on Military Services for the coming year and the four years preceding :—

	Gross.					Net, *i.e.*, deducting receipts.
	Army.	Marine.	Military Works.	Special Defences.	Total.	All Military heads.
	£	£	£	£	£	£
1912-13 . . .	19,576,526	479,928	887,379	9,267	20,953,100	19,565,466
1913-14 . . .	19,789,239	512,845	947,297	16,384	21,265,765	19,896,113
1914-15 . . .	20,336,559	463,370	996,071	13,603	21,809,603	20,434,915
1915-16 (Budget) .	19,973,700	650,400	744,300	21,100	21,389,500	20,169,200
1915-16 (Revised) .	21,650,200	519,100	830,200	16,300	23,015,800	21,842,700
1916-17 (Budget) .	21,579,100	707,600	858,300	20,900	23,165,900	22,000,000

"79. The total net expenditure in 1915-16 is now expected to reach the figure of £21·8 million or about £1⅔ million more than the Budget. I have already referred (in paragraph 14) to the main causes contributing to this large excess and need only add the following supplementary remarks. The developments of military science have rendered it necessary to increase the efficiency of the army in India in various directions while the war proceeds, *e.g.*, by the provision of mechanical transport, at a cost of £78,000, and of an aviation squadron, at a cost of £74,000. The expenditure on Military Works is now estimated to exceed the Budget figure by £86,000, chiefly on account of urgent improvements to frontier roads, the provision of accommodation for the Indian sick and wounded returned from the front, and improvements to the Cordite factory and to the Ordnance factory at Ishapore. A fall in receipts of £47,000, which is chiefly due to war conditions, also contributes to the increase in net expenditure.

"In certain respects the programme of expenditure has not been fulfilled; for instance, the Admiralty were unable to make progress with the construction of the Royal Indian Marine vessels referred to in my speech of last year, and this has involved a lapse of £149,000. On the other hand, the outlay on home stores for marine requirements is higher by £23,000. Other minor variations combine to account for the balance of the estimated excess.

"80. For the year 1916-17 a sum of £22 million has been allotted as the net Military expenditure, again on the assumption, which governs all our calculations, that the war will continue throughout the next financial year.

"In view of the general financial situation, only absolutely necessary and urgent measures are being provided for. The causes which affected Military expenditure during 1915-16 will remain for the most part operative in 1916-17. There will, it is true, be considerably less expenditure on sea transport charges, since the contribution during the current year included arrear payments on account of 1914-15. We also

[1ST MARCH, 1916.] [*Sir William Meyer.*]

anticipate reduced expenditure on certain other measures connected with internal defence; and there will be a saving in connection with the mechanical transport companies, due to the initial expenditure being met for the most part during the current year. On the other hand, we anticipate increased expenditure of £189,000 in connection with the vessels the construction of which at home had to be postponed during the current year, and on replacement of stores and coal, and a somewhat higher provision has to be made for measures in connection with military arrangements on the North-West frontier. Broadly speaking, however, the anticipated expenditure in 1916-17 would be a little lower than in 1915-16 but for the fact that, as I have already explained, we have thought it wise to provide a margin (of rather over half a million pounds) to meet unforeseen demands.

"81. The Indian Army still continues to play a conspicuous part, side by side with representatives of every portion of the Empire, in the great war which the King-Emperor and his Allies are waging for the cause of liberty and right. Nor, as I indicated in my speech in the closing budget debate last March, is this the only respect in which India has borne her share of the Empire's burdens. She has rendered invaluable aid by recruiting and training large numbers of soldiers; by furnishing supplies of all sorts—foodstuffs, clothing, ordnance, equipment and munitions; by training and despatching horses; by lending to the Admiralty a great part of her Royal Indian Marine fleet; and by fitting out transports. The total value of the supplies and services of all sorts which she has thus undertaken on behalf of the War Office amounted, including some similar expenditure brought to account at home, to about £10 million in 1914-15 and is estimated at about £18 million in 1915-16 and £20$\frac{3}{4}$ million in 1916-17. These figures include also the outlay in civil departments on the manufacture of munitions which is now in full progress. They do not, however, include the services, representing a recoverable outlay of £850,000 in 1915-16 and about £1 million in 1916-17, which we are able to render to the Australian Government.

"82. I mentioned in paragraph 65 of my speech introducing the last Financial Statement the assistance given by the Indian princes in respect of their Imperial Service Corps and in special gifts towards the cost of the war. The latter now total about £900,000. Further, considerable sums have been placed at the disposal of the Commander-in-Chief to be spent in the purchase of horses, motor cars, motor ambulances, etc., or in any way which His Excellency may think advisable for the good of the army. It is of course impossible to mention all these individual gifts, which find no place in the Budget; but I would refer particularly to a recent personal gift of one lakh from His Excellency Maharaja Sir Chandra Shumshere Jung Bahadur Rana, Prime Minister and Marshal of Nepal, as well as of 2 lakhs from the Nepal Durbar, who also are bearing all the ordinary pay charges of a Nepalese contingent now serving in India.

"83. The Council will readily understand that the task of deciding the many complex questions relating to the incidence of expenditure as between the Government of India and His Majesty's Government, and of devising a simple and efficient system of accounting, has been a most difficult one. It was found necessary, early in the current year, to create a special appointment of Central War Controller to deal with these matters, and Mr. B. N. Mitra, C.I.E., was appointed to the post. I gladly take this opportunity of acknowledging the conspicuous ability and untiring energy with which he has discharged his duties, and the appreciation they have met with at home as well as here.

C.—Famine Relief.

"84. I have already mentioned that the faulty distribution of the monsoon has led to distress in certain areas. This, however, has fortunately, so far, been on a comparatively small scale. Some direct expenditure on relief in the tracts affected by floods in Assam and the United Provinces was necessary. Distress due to drought exists at present in the Bankura district of Bengal; in the Manbhum and Singhbhum districts of Bihar and Orissa; in Ajmer-Merwara, and in the Karauli State in Rajputana; whilst that in the Tipperah district of Bengal is due to floods. Test works have been opened in these tracts and gratuitous relief is also being distributed. The maximum number, so far, on test works in all the affected tracts has been 21,000 and on gratuitous relief 23,000. The Kolhan Government estate in Singhbhum, with an area of 1,200 square miles and a population of 80,000, is

[*Sir William Meyer.*] [1ST MARCH, 1916.]

however the only area which passed beyond the stage of observation and test, scarcity having been formally declared in October last. Distress there, however, is practically over for the present, though some recrudescence is anticipated when the harvesting of winter rice is finished. Assistance in the shape of agricultural loans has been necessary in these tracts, as well as in Assam; whilst owing to the scarcity of fodder in Ajmer-Merwara, Rajputana and the Punjab the usual concessions for the carriage of fodder at reduced rates have been introduced in large areas. Special railway concessions have also been granted in order to encourage the emigration of cattle from Ajmer-Merwara.

"The actual expenditure incurred in relief is fortunately, however, on a very small scale. It may be taken at £93,000 in the current year, of which £40,000 is debited to the head 33—Famine Relief and mainly represents the cost of fodder concessions. The total outlay at present anticipated in the coming year is £73,000, of which £46,000 is intended for fodder concessions and outlay on direct relief and appears under the Famine Relief head.

"85. In the current year we provided £500,000 out of the Famine Insurance Grant of £1 million for protective works. The Famine Relief outlay of £40,000 is a first charge on the remaining moiety, and £460,000 is left for the reduction or avoidance of debt, of which £295,000 comes under the Imperial and £165,000 under the Provincial section.

"In the coming year we are slightly reducing the provision for protective works which is taken at £433,000. Of the remainder, famine relief accounts for £46,000, while £424,000 under Imperial and £97,000 under Provincial are allotted to the reduction or avoidance of debt, the Provincial allotment in the coming year being somewhat reduced as one more of the provinces has now obtained its maximum famine credit. I may add that I have not forgotten the promise, to which I referred in paragraph 69 of my speech last year, to consider the possibility of improving the system of Provincial famine credits. We have not yet had a final reply from one of the provinces mainly interested, but we shall hope to put the matter before the Secretary of State in the course of the coming year.

D.—Expenditure from Special Grants, Educational, Medical, etc.

"86. I give below a table similar to that exhibited in paragraphs 46 and 70 of my speech introducing the last two Financial Statements:—

[In thousands of pounds.]

	Total grants given (1911-12 to 1916-17).		Total expenditure incurred* (1911-12 to 1916-17).	Balance expected to be available on 1st April 1917.
	Recurring.	Non-recurring.	Non-recurring.	
(1) Education	763	3,253	2,213	1,040
(2) Sanitation	245	1,738	1,172	566
(3) Medical Relief, etc.	...	58	54	4
(4) Agriculture, etc.	...	177	169	8
(5) Grants for other special purposes	...	1,545	1,415	130
(6) Grants for general purposes (Discretionary grants)	...	667	381	286
Total	1,008	7,438	5,404	2,034
Add—Savings on recurring grants during foregoing period (about)				697
Total amount expected to be available from special grants on the 1st April 1917				2,731

figures only are given as the recurring grants are treated as having been fully worked up to, any m those grants in particular years being added at the foot of the statement.

of continued financial stringency, we have, naturally, had again to ernments to restrict their drawings on the portion of their balances ts the unspent remainder of these special grants, and we have also outlay from the portion of previous recurring grants which have ir own disposal. Any short expenditure by the Government of India

t
dur

[1ST MARCH, 1916.] [*Sir William Meyer.*]

from these recurring grants in the current and coming years will however, be made good when financial prosperity is restored.

E.—Financial position of the Provinces.

"87. The financial history of the provinces in the current year, as I have already shown, has been one of severe restriction of expenditure, and this must inevitably be continued in the coming year also. The only important change in the financial arrangements with Local Governments which I have to mention now is the final decision on the question of improving the terms of the Burma provincial settlement, in connection with which I mentioned in paragraph 72 of my last year's speech that we had decided to increase the permanent resources of the Local Government to the extent of £100,000 a year. We had also under consideration at the time a further concession, which has since received the approval of the Secretary of State, namely, the guarantee to this province of a minimum aggregate of revenue advancing progressively every year. The annual increment of revenue thus assured to the province is £53,000, and the guarantee extends until 1923-24. It does not actually become operative until the conclusion of the war; but the total minimum guaranteed revenue on which the province will then begin will be fixed as if its revenues had started at the full amount anticipated in the calculations on which the provincial settlement of April 1911 was based, *plus* the additional £100,000 mentioned above, and had subsequently increased every year at the guaranteed rate. The arrangement is a new feature of our provincial settlement system, and one which we are not likely to extend, as it originates from two factors special to Burma, namely, *first*, the unusually fluctuating character of her revenues as a whole, and, *secondly*, the special necessity in her case, for making an assured provision for a steady scheme of development of communications. Such a scheme cannot be taken up and carried on in the absence of some assurance of a growth of minimum revenue sufficient to provide for an adequate working programme without constant set-backs when an indifferent year happens to succeed one of special prosperity. We ourselves believe fully in the elasticity of the Burma revenues; and we felt that, if this confidence in the future growth of provincial revenues could be turned into a certainty, so far as the Local Government is concerned, by the procedure proposed, a great difficulty in attacking this problem of road development could be met.

"88. We have also during this year made good progress with the problem of attempting to define and enlarge the financial powers of Local Governments and of authorities subordinate to them on the one hand, and of the various Imperial authorities on the other. Our hope is to evolve a systematic and liberal scheme of delegation which will help to solve, with greater simplicity and generality than has hitherto been attempted, many questions of decentralisation which have been under consideration for a number of years past, as well as certain parallel questions of audit control to which, as Hon'ble Members are aware, much attention has recently been paid. In this Your Excellency has taken a special personal interest, and I should have been glad if it had been possible to make a more definite announcement on the subject on the present occasion. But the matter is one in which we cannot act alone, for no definite scheme can be introduced without the concurrence of the Secretary of State.

F.—Railways. (Capital Outlay.)

"89. The following statement gives the figures of Railway capital expenditure on State-owned lines included within the Railway programme for the coming year and the four years preceding:—

—	1912-13.	1913-14.	1914-15.	1915-16, Revised.	1916-17, Budget.
	£	£	£	£	£
Open lines including rolling stock .	7,134,200	10,303,100	10,534,300	4,250,100	2,730,000
Lines under construction—					
(*a*) started in previous years . .	2,658,700	1,871,500	898,800	660,700	270,000
(*b*) started in current year . .	103,200	131,700	...	35,900	...
Total .	9,896,100	12,306,300	11,433,100	4,946,700	3,000,000

[*Sir William Meyer.*] [1ST MARCH, 1916.]

"90. As I have already stated, the financial position has necessitated a large reduction in our Budget programme for 1915-16, and also requires us to cut down expenditure in the coming year to a very low figure. The greater part of the reduced outlay for 1916-17 will, as usual, be devoted to the improvement of open line equipment, including provision for the repair of damage done to the hill section of the Assam Bengal Railway by the abnormal floods of last July.

"The difficulty of obtaining imported material without interference with more important work and at reasonable cost has limited the proposals for the purchase of new rolling stock to extremely modest dimensions, though, in order to provide work for the railway shops which build coaches and wagons, some material has to be bought from abroad. Works will absorb the greater part of the allotment, and what cannot be made in the country will be found from the stores already collected whenever possible.

"91. The small amount which remains over for construction expenditure we propose to utilise in continuing, as far as possible, progress on lines already in hand which cannot well be interrupted without loss or considerable inconvenience. Very nearly half of it goes to the Burdwan-Howrah Chord which, as explained last year, may be regarded as a work of open line improvement designed to relieve the congestion of traffic on existing lines between Calcutta and the coal-fields. Work has here reached an advanced stage, and in order to render the outlay already incurred remunerative it is necessary to provide for its early completion.

"Another work of this description is the overhead connection with the Victoria terminus in Bombay, the provision for which will enable moderate progress to be made. The only other important line requiring notice is the Itarsi-Nagpur, on which considerable progress has been made in the current year. The northern section from Itarsi to Parassia, a length of 134 miles, has already been opened to traffic, and it is expected that the southern section from Nagpur to Katol will be ready for opening within the next 3 or 4 months. We have provided a small sum for the completion of this section, but funds will not permit of work being proceeded with on the remaining section Katol to Amla. Circumstanced as we are it is out of the question to make provision from programme funds for any new line of railway.

"92. It is all the more gratifying, therefore, to find that the activity of Branch Line companies has been in no way abated. Last year I informed the Council that the total mileage of railways sanctioned for construction by such companies was 234, and that several District Board projects were about to mature. Since then we have sanctioned the construction of four new lines, of a total length of 72 miles, to be financed by certain District Boards in Madras, and have also authorised the flotation of Branch Line companies for the construction of five new railways comprising a total mileage of 258. One of these, the Mymensingh-Bhairab Bazar Railway, is a project of importance which has been under consideration for years past; and the company undertaking its construction is the largest railway concern recently floated in India. These facts bear evidence to the popularity of the terms which we now offer to investors in such undertakings.

"93. The following figures show the capital outlay on all State lines up to the end of each year from 1912-13 and the net return obtained, after deducting working expenses and interest charges:—

[In thousands of pounds.]

	1912-13.	1913-14.	1914-15.	1915-16, Revised.	1916-17, Budget.
Capital at charge at end of each year .	340,103	351,302	361,556	365,097	366,827
Net working profit from railways excluding interest charges . .	17,272	17,616	15,614	17,123	16,461
Percentage of net working profit to capital outlay	5·08	5·01	4·32	4·69	4·49
Net working profit from railways after meeting interest charges . .	4,803	4,790	2,158	3,348	2,505
Percentage to capital outlay of net profits after meeting interest charges.	1·41	1·36	·60	·92	·68

[1ST MARCH, 1916.] [*Sir William Meyer.*]

"94. The return on Railway capital (excluding interest charges) was estimated in the current year's budget at 4·01 per cent. We now estimate it at 4·69 per cent, in consequence of the large increase in net railway earnings which I have already dealt with in my review of the Revenue estimates. For next year we put it at 4·49 per cent consequent on the smaller estimate of net earnings provided for in the Budget.

"The charges for interest in the current and ensuing years work out to 3·77 and 3·81 per cent respectively on the capital outlay, so that the final net profit on railways in each of these years is 0·92 per cent and 0·68 per cent. But as I said last year, the interest charges include certain annuity and sinking fund payments which really go to the discharge of debt.

G.—Irrigation. (Capital outlay.)

"95. The financial position of our great Irrigation undertakings may be gathered from the following table, which brings up to date the information given in previous Financial Statements. The figures are in thousands of pounds:—

Particulars.	1912-13.	1913-14.	1914-15.	1915-16 (Revised).	1916-17 (Budget).
1	2	3	4	5	6
Productive Works.					
Capital outlay to end of each year	33,347	34,645	35,777	36,696	37,601
Total receipts, including land revenue due to irrigation	4,065	4,338	4,325	4,379	4,417
Total expenses, including interest on debt	2,263	2,306	2,452	2,561	2,587
Net profit	1,802	2,032	1,873	1,818	1,830
Percentage of net profit to capital outlay	5·40	5·87	5·24	4·95	4·87
Protective Works.					
Capital outlay to end of each year	4,205	4,796	5,345	5,860	6,274
Total receipts, including land revenue due to irrigation	81	112	101	113	119
Total expenses, including interest on debt	188	213	247	275	290
Net loss	107	101	146	162	171
Percentage of net loss to capital outlay	2·55	2·10	2·73	2·76	2·73
Minor Works and Navigation.					
Direct Receipts	266	263	254	268	280
Expenditure	842	914	986	898	889
Net loss	576	651	732	630	609

"96. On the 31st March 1915 the total length of main and branch canals and distributaries which had been constructed on irrigation works of all classes amounted to 62,758 miles, a figure which, it is expected, will have increased by some 500 miles during the current financial year. These channels command an area of approximately 50 million acres of culturable land, and in 1914-15 actually irrigated almost

25½ million acres. The area of irrigation of 1915-16 is, however, expected to show a decline to about 24 million acres as the deficient rainfall in parts of Northern India diminished the available water-supply.

"97. In addition to the canals in use there are 39 major projects which are either under construction, awaiting sanction, or being examined by the professional advisers of Government. Of these 14 are productive and 25 protective; they are designed to irrigate 7½ million acres and to cost £30 million.

"During the current year only one new work of any magnitude was sanctioned, namely, the Gokak canal, a work of the protective class estimated to cost £1·3 million. It will extend the benefits of irrigation to portions of the Belgaum and Bijapur districts in the Bombay Presidency, and to tracts in Kolhapur and certain other adjacent Native States Work on this project has not however yet been started, and it is unlikely that a beginning can be made while the present financial stringency endures.

"98. In paragraph 84 of my speech of last year I referred to five projects of the first importance which had been engaging the attention of the Government of India for some considerable time. The investigation of the Sukkur, Kistna, and Sutlej projects is still proceeding, while the Cauvery reservoir scheme continues to be held up pending the settlement of certain questions respecting the division of the waters of the Cauvery river as between Madras and the Mysore State. An alternative scheme for the utilisation of the waters of the Sarda river in the United Provinces has been advanced by the local Government and is now being examined. The Koch Dam project in the Punjab has been abandoned as financially impracticable.

"99. The opening of the Upper Jhelum Canal by Your Excellency in December last marked the practical completion of the Punjab Triple Canals project, for upon this canal the two other linked systems—the Upper Chenab and Lower Bari Doab Canals—depend for their supplies in the *rabi* season. During the first eight months of the current financial year the two last-named works had irrigated an area exceeding half a million acres, while, on full development, the triple system as a whole will serve an area of 1,870,000 acres annually. Colonisation on the Lower Bari Doab made good progress during the year.

"In the United Provinces good progress was made with the erection of a permanent weir and regulator at Hardwar, the site of the headworks of the Upper Ganges Canal. This work, it is hoped, will be finished in the course of the present calendar year, and will greatly improve the efficiency of the canal.

"In the Central Provinces the Weinganga and Tandula Canals are approaching completion : it is hoped that irrigation from the former will begin in 1916 and from the latter in 1917.

"Satisfactory progress continues to be made with the important protective works in the Bombay Deccan, *viz.*, the Pravara, Godavari, and Nira Right Bank Canals.

"In Burma the Twante Canal is nearly finished. This is a purely navigation work and is intended to improve communications between Rangoon and the rich rice-producing lands of the Irrawaddy delta. It will, it is hoped, be ready for use by the end of 1916.

H.—Delhi Expenditure. (Capital Outlay.)

"100. We provided £267,000 in this year's Budget for expenditure under the head 51—Initial expenditure on the new Capital. This has been somewhat exceeded, owing largely to existing commitments resulting from the higher scale on which the programme for 1914-15 had been based, and the actual expenditure is now estimated at £333,000. For the coming year we repeat this year's Budget provision.

"The Delhi Committee have been engaged during the present year in carrying on preliminary operations, such as levelling the site, collecting materials, manufacturing bricks and similar miscellaneous work. The Indian clerks' quarters and the menials' quarters, which were commenced in 1914, have been completed; bungalows have been provided for the occupation of the works staff; and progress has been made with the detailed schemes and estimates. But the only important buildings on which a beginning has yet been made are Government House and the Secretariat, on which a moderate rate of progress will be maintained. The programme of work in 1916-17 will be on similar lines; and the staff employed will be kept down to the

[1ST MARCH, 1916.] [*Sir William Meyer.*]

minimum necessary to supervise the work in hand and to ensure the completion of the estimates at a reasonably early date, while the larger schemes, such as those relating to sanitation, electric lighting and irrigation, must await an improvement in financial conditions.

"The *pro forma* account of expenditure on the Delhi Province which was first given last year has been brought up to date and is produced as an appendix to the Financial Secretary's Explanatory Memorandum.

Council drawings, Exchange and Paper Currency Reserve.

"101. As I explained in paragraph 10 of my speech last year, a considerable portion of the aggregate remittance which we have to make to the Secretary of State to finance his home expenditure is now being carried out indirectly, owing to the fact that we are incurring a large amount of military expenditure in India on behalf of the Home Government which the Secretary of State recovers from the War Office. The result from our point of view is of course the same as if he had drawn Council Bills on us to that extent and had correspondingly reduced our capacity to meet his further drawings. We estimated in the Budget that we should thus incur £7·5 million of recoverable military expenditure in India, but this has risen, with the development of the operations which we assist in financing, including the manufacture of munitions, to £14·6 million. In addition, the system adopted, at the instance of His Majesty's Government, of financing the purchase of wheat by direct payments on this side to the firms employed as our purchasing agents has involved a further expenditure of £2·9 million, which the Secretary of State recovered by the sale of the wheat at home. We also placed £2 million at the disposal of the Bank of England in India, against which the Bank made a similar payment to the Secretary of State. Finally, as previously mentioned (paragraph 81), we incurred some recoverable outlay—about £0·9 million—on behalf of the Australian Government.

"Altogether, then, our recoverable disbursements here have amounted to £20·4 million. The effect of the wheat purchases and sales in depleting our balances here and inflating those of the Secretary of State was, however, corrected, when exchange fell in June—September and reverse bills were sold, by crediting the proceeds (£4·7 million) to our treasury funds in India, while the Secretary of State met the bills at home from his own balances.

"102. Thus the net demand on our treasury balances as a result of these forms of indirect remittance amounted to £15·7 million, or about £8 million more than the Budget had contemplated. We were thus unable to meet the Secretary of State's Council drawings (from those balances) to the full extent anticipated, and yet these were on an unexpectedly large scale. The depression of exchange to which I have just referred was of comparatively short duration. It was doubtless connected in part with the system adopted for financing the wheat purchases, as well as with the demand for remittance in connection with the home war loan; and when these transactions had been adjusted, and the period of renewed activity which normally sets in towards the beginning of the cold weather had started, the situation was reversed, and eventually an exceedingly strong demand set in for trade remittances, which, in accordance with our accepted policy, has been fully met. The Secretary of State's Council drawings are now estimated to amount this year to £16½ million. Of this sum, £3·7 million has been met from our treasury balances, as against £7·1 anticipated in the Budget; and £7·5 million through the Gold Standard Reserve. The London portion of that Reserve had been weakened by having to meet heavy demands for reverse remittances after the outbreak of war, and we have been glad to take the opportunity afforded by a period of strong exchange to re-transfer to it the free portion of the balance which was thus accumulated in India, as well as the £3 million which we have repaid out of the temporary loan of £7 million which we took from the Reserve in the early part of the war. We still retain in India (in our treasury balances) the remaining portion of that loan.

"103. The remaining drawings of the current year (£5·3 million) are being taken against the Paper Currency Reserve. As Hon'ble Members are aware, this is the normal practice when the trade demand for remittance exceeds the amounts which can conveniently be met from our treasury balances. But while in ordinary conditions the proceeds of bills thus drawn against the Paper Currency Reserve are

'earmarked' at home in gold, the Secretary of State has felt obliged, in the financial situation at home created by war conditions, to make a very sparing use of this procedure. To meet this difficulty without detracting from the "availability" of the Reserve, if I may coin a word, we took power by our recent Currency Ordinance to enable him to invest up to a limited extent in short term securities, such as Treasury bills, the sums which he would normally have earmarked in actual gold, and he is utilizing this power up to the extent of £3 million. At the same time we took the opportunity of making it clear that additional investments from the Currency Reserve, when made in India under the powers taken by the Currency Act of last year (V of 1915), can be effected by creating fresh Government paper *ad hoc* and placing it in the Reserve, thus enabling us to carry out the intention, previously announced, of obtaining, when necessary, additional resources for the assistance of trade or for our own possible requirements. The Currency Act just mentioned remains in force up to six months after the close of the war, and we shall ask the Council in the course of the present session to give the same duration to the useful supplementary legislation contained in the recent Ordinance.

"104. In 1916-17 we again expect that the bulk of the funds required by the Secretary of State will be met, as in the present year, by the recovery from the Home Government of expenditure—estimated to amount to £17·1 million—which we shall incur on its behalf in India, besides which there will again be expenditure, amounting to about £1 million, on behalf of the Australian Government. The Secretary of State will therefore require to draw on us in the ordinary way to the extent of £5·1 million only. As usual, however, these announcements are merely provisional, and full discretion is retained to vary the amounts in such manner as may be found advisable.

"105. The average rate of exchange in the current year, calculated on the Secretary of State's drawings, is taken at 16 068 pence per rupee.

Gold Standard Reserve.

"106. The following statement shows the holdings in the Gold Standard Reserve on the 1st April last and at the date of the last published statement. I have also added figures showing how we expect the Reserve to stand on the 31st March in order to bring out important changes in its constitution to which some allusion has already been made.

[In thousands of pounds.]

—	Book credit in India.	Gold set aside in the Bank of England.	Cash placed by the Secretary of State for India in Council at short notice.	Gold held in India.	Temporary loan to Treasury balances in India.	Invested in London.	TOTAL.
1st April 1915	70	1,250	8	5,238	7,000	12,149*	25,715
31st January 1916	...	1,000	6,038	...	7,000	11,850†	25,888
As estimated on 31st March 1916.	...	1,000	6,166	245	4,000	14,866‡	26,277

* This represents the value of the securities at the minimum prices fixed for them as on the 31st March 1915.

† This represents the value of the securities as on the 31st October 1915.

‡ This represents the value as on the 31st October 1915 (the date of the last valuation) of the securities then held and the cost price of securities purchased since that date.

"107. It will be seen that there will still be a 'loose' balance in India of £245,000. This represents interest which we have to pay for our temporary loan from the Reserve, and as it will not be credited till the 31st March next, there will not be time in the current year for its withdrawal, like the remainder of the balance, by the sale of council bills. The balance with which the year opened, and the repaid portion of the loan we had taken in 1914-15, were withdrawn—to the extent of £7·5 million in all—by the sale of council bills as already described; and the remainder was remitted to England by adjustments through the Paper Currency Reserve* in connection with a very interesting and expedient transaction.

* We transferred the money to that Reserve here, while the Secretary of State was thus enabled to take a corresponding sum out of his Paper Currency holdings to credit of the Gold Standard Reserve in London.

[1st MARCH, 1916.] [*Sir William Meyer.*]

"At the time when the 4½ per cent British war loan of 1915 was floated, the Gold Standard Reserve held consols to the nominal value of about £3¼ million. It was decided to take advantage of the conversion scheme attached to the war loan to exchange these holdings into the new and more easily realisable security. This was effected partly by a direct subscription to the loan on behalf of the Reserve, the remittance above mentioned from our balance in India being made for this purpose, and partly by the purchase of conversion rights. The result of the transaction is that consols yielding a total interest of £81,660 a year have been replaced by much superior war loan securities yielding £97,992. Including the further war loan stock which we obtained by direct subscription, our total war loan holding in the Gold Standard Reserve now amount to £3½ million.

Currency notes.

"108. In paragraph 94 of my speech introducing the last Financial Statement, I alluded to the fact that during the period of emergency which followed immediately upon the outbreak of war we made special arrangements to secure the unimpeded encashment of our currency notes, and I announced that it would be our object to maintain, and if possible to develop, the facilities then granted. Definite steps have now been taken towards this end. The Royal Commission on Indian Finance and Currency recommended that Government should increase, whenever and wherever possible, the number of places at which notes can be encashed as of right, as well as the extra-legal facilities for encashment. Definite consideration of the Royal Commission's report having been postponed on account of the war, a decision on their recommendation in favour of additional statutory facilities has necessarily to stand over for the time being. We have not, however, thought it advisable to let the matter rest entirely, and we have accordingly revised the rules and practice relating to the issue and encashment of notes at Government treasuries. In our revised rules it is expressly laid down that all possible endeavour shall be made to meet the requirements of a payee as to the form of currency which he desires to take, and that all applications for the exchange of coin for notes, or of notes for coin, shall ordinarily be met; while we have undertaken to make these facilities real and effective by suitable arrangements for the supply of the coin required.

"109. This arrangement relates primarily to those cases in which the treasuries are under Government management. We had, however, already recognised that the most favourable opportunities for developing the note circulation on these lines would probably occur at the larger trade centres, at most of which the Presidency Banks have branches and transact treasury business on behalf of Government, and accordingly the policy of enlisting the co-operation of the Presidency Banks has been steadily pursued. Substantial results have now been achieved in this direction. Thus arrangements have been made with the Banks for the issue and free encashment of notes at a considerable number of their existing branches, while new branches have been opened by the Bank of Madras at four places all of which are of considerable importance from the point of view of trade.

"The main features of the new arrangements are that the Government have undertaken, for currency purposes, to keep the Presidency Banks in funds at each branch, and to supply them with any form of currency asked for as far as this may be required to permit of the free issue and exchange of universal currency notes, *i.e.*, those up to R100. In consideration of the Banks carrying out these duties on behalf of Government, we have in one instance, in which the arrangements are for the present on a temporary and experimental footing, agreed to reimburse the out-of-pocket expenses incurred by the Bank in connection with the establishment of an exchange department. In other cases we have given a guarantee in respect of the amount of Government funds which, under existing arrangements, are held at the Banks' branches for the transaction of treasury business. This takes the shape either of a guaranteed minimum balance, or of a guaranteed average balance of a specified sum during the busy period of each year. In fixing the remuneration of the Banks in this form the Government have had in view the policy alluded to in another connection in paragraph 11 of my speech introducing the last Financial Statement, by which the balances in the Presidency Banks are kept at as high a level as is compatible with other public interests with the object of enabling a reasonable amount of assistance to be given to trade. The arrangements above described have thus been made to serve a double purpose.

"110. There are certain other matters connected with our paper currency system which deserve mention. The most important of these is the reform effected during the past year by which the practice of re-issuing currency notes has been discontinued. In future all notes presented at a currency office will be at once cancelled however short a time they may have been in circulation. This change of procedure follows the practice of the Bank of England, and has a special advantage as a measure of protection against forgery and fraud, as it is a common device for counterfeit notes to be deliberately soiled or stained in order to obscure the defects of the imitation. When, as is likely to result from the change of procedure, clean notes form the bulk of the circulation, such counterfeit notes will stand a smaller chance of passing current. The change is also likely, on other grounds, to increase the popularity of our notes, as we have found that the public are averse from receiving re-issued notes and not infrequently present them at once at the counter to be changed. I may mention, as a practical example of the way in which this reform has been appreciated, that the Controller of Currency has informed me that the Royal Calcutta Turf Club now issue clean notes only from their totalisators!

"We hope in due course to be able to extend the new procedure to currency notes tendered at district treasuries, but there are certain practical difficulties in the way of the immediate extension of the prohibition to so wide a range of offices.

"111. We have also had under consideration a proposal to prohibit the cutting of currency notes, which is at present very largely resorted to when these are sent by post. This proposal has, however, been dropped in view of the unfavourable criticism it elicited, the chief ground of objection being that, in view of existing Indian conditions in regard to banking facilities, the use of notes for remittance purposes is indispensable to a large section of the public, and that the prohibition or penalising of the remittance of notes in separate halves would injuriously affect the popularity of the paper currency as a whole. There was, however, one step which Government could safely take to diminish the undoubted inconvenience that results from our offices having to handle notes which have been cut, namely, by prohibiting the practice by which, in certain cases, notes were cut in our currency offices before being remitted to treasuries. It has recently been arranged to discontinue this and to check a similar practice in district treasuries.

"112. As I indicated in the beginning of my speech, our currency circulation—partly, I may claim, as a result of the reforms above indicated—is now in a very satisfactory condition, as will be seen from the following statement which gives the active note circulation, *i.e.*, excluding notes held in reserve treasuries and the headquarter offices of the Presidency Banks, on the 1st February in each of the last five years:—

1912	46·75	crores.
1913	51·29	„
1914	51 91	„
1915	45·09	„
1916	54·11	„

"The figure for the 1st February last is in fact a record in the statistics of our active circulation—a very notable circumstance, I think, considering the critical times through which we are passing.

The Wheat Scheme.

"113. I have already had to make some reference to the Government wheat scheme in connection with the course of exchange and the Secretary of State's Council drawings. I may now say something as to the leading features of the scheme itself. It will be remembered that towards the end of 1914 Indian wheat prices began to rise to an alarmingly high level, and that this rise was practically continuous during the first three months of 1915, in spite of the action taken by Government to limit exports during that period. Prices were being forced up by the effect of the external demand on stocks which were unusually short; and the prospects of the approaching harvest did not, as is ordinarily the case, succeed in easing the situation. So the problem which faced us was to secure that Indian prices should be divorced from world prices, and at the same time to provide an outlet for the surplus crop, which then promised to be large, alike for the benefit of the Indian cultivator and in order to meet the requirements of

[1st MARCH, 1916.] [*Sir William Meyer.*]

the United Kingdom where wheat was in great demand. We therefore resolved, with the approval of His Majesty's Government, to control the export trade by prohibiting all private exports of wheat save some 95,000 tons already covered by existing contracts, and decided that we would ourselves purchase and export all future supplies that might be required for the United Kingdom, to which country our exports were, generally speaking, to be confined. For this purpose we employed the leading export firms as our agents and placed their operations under the control of a Wheat Commissioner. The latter, in consultation with the Government, instructed the purchasing firms month by month in regard to the quantities they might purchase for us and regulated the maximum price at which such purchases could be made. The price was originally fixed at a fairly high level, so as to get into touch with the market, but it was gradually reduced as tenders of wheat increased, and by the middle of June the Government *f. o. b.* price was brought down to R4-10-9 per maund at Karachi. At that time, this figure represented internal prices appreciably above those actually current, but later on the unsatisfactory development of the south-west monsoon brought current prices up to, and finally above, the Government export rate. Consequently, while in the early stage of the scheme the real check on exports was through the maximum allotments to the purchasing firms, since the prices offered would in themselves have attracted much larger quantities, the position has been reversed since the middle of July, export having practically stopped owing to the Government price not being acceptable to dealers in comparison with internal prices, especially in view of the possibility of these rising materially later through poor winter rains. From July onwards, however, the requirements of the United Kingdom became less urgent, so that the stoppage of exports was of no material consequence to it, and was satisfactory to us as decreasing the competition for wheat and thus tending to keep down a rise in prices. Moreover, owing to a fall in prices at home and subsequently, in the autumn, to a great increase in freight charges, further shipment to the United Kingdom of wheat purchased at the price we offered would have resulted in loss. I may mention here that the wheat we shipped home was disposed of under the direction of a Wheat Committee appointed by His Majesty's Government and containing representatives of the India Office, the Treasury and the Board of Agriculture.

"114. The scheme speedily provided the check on prices in India which was its main object. In Northern India, just before the scheme came into operation, internal prices at various representative centres ranged between 6¼ and 8¾ seers per rupee. By the middle of May they had fallen to between 9 and 11¼ seers; and in spite of some subsequent rise, caused mainly by the unsatisfactory character of the south-west monsoon in the Punjab, and the delay in the arrival of the winter rains, they are still below the level at which they stood when the scheme came into operation. The scheme has also worked without hardship to the producer. Thus taking the Punjab, the most important portion of India affected, the cultivator there is in normal times well satisfied with a local wholesale price of R3 per maund which corresponds roughly, allowing for transport and other charges, to a price of R4-2-0 *f. o. b.* at Karachi, whereas it will be seen from what I have said already that the prices offered have been considerably higher than this. We have also some information to the effect that the cultivators appreciate the offer of a definite price by Government. The shipment of wheat under the scheme likewise produced an excellent effect in Great Britain, in lowering the prices there at a time when this was much needed: thus the home prices which were at one time 69*s* a quarter had fallen to 52*s*. in the first half of June. For the success which has attended the scheme we are greatly indebted to the ability, tact and zeal of Mr. M. M. S. Gubbay, C.I.E., who discharged the duties of Wheat Commissioner till he took up, in October last, the post of Deputy Secretary in the Finance Department. The total amount of wheat exported up to date this year amounts to about 650,000 tons.

"115. As regards the profits derived from the scheme, these, owing mainly to the enormous cost of freight and the larger supplies that came into the United Kingdom from other quarters, have been much less than might have been anticipated a year ago, and up to date they amount to about £150,000. A definite balance sheet cannot yet be struck, however, as the scheme is to continue in operation, in the interests of the Indian consumer, after the close of the current year, and we shall have to take into account the results of future transactions. In any case there can be no loss to India while the scheme continues in operation on its present lines, and thus still includes the guarantee of His Majesty's Government against such a contingency;

and though we should of course have been glad of a large profit, this was not one of our primary inducements to undertake the scheme. The main object, so far as India is concerned, was, as described in Your Excellency's words in the final Budget debate last year, "to ensure a moderate level of prices, to safeguard the consumer and yet not to disappoint the cultivator of his legitimate profits"; and, as you also said on that occasion, such profits as may finally ensue will be employed in some special way to the advantage of the people.

"116. In regard to food-prices generally, I should like to draw attention to our very fortunate position as compared with some of the principal belligerent countries in Europe. Thus it appears from returns compiled by the Director of Statistics that in January last retail food-prices in Calcutta were only 7 per cent above what they had been at the beginning of the war, whereas, as we have recently learned from the Board of Trade *Labour Gazette*, the rise has been 47 per cent in Great Britain, 83 per cent in Germany, and no less than 112 per cent in Austria.

Conclusion.

"117. Now, my Lord, I draw my remarks to a close. It has been a source of great concern to the Government of India that the last Budget to be presented under Your Excellency's auspices should be marked by the necessity of a large increase in taxation. But we should be flinching from our duty, and unmindful of the example which has been set to us in other parts of the Empire, were we to shrink from this, while the increased burdens which we have proposed are small in comparison with those which have to be borne by other countries participating in the war. We may also, I think, derive some satisfaction from the fact that, whereas on the last occasion on which additional taxation had to be imposed (in 1910)—that necessity arose from the domestic circumstances of India—our present measures arise only through the participation of India in the greatest war which any of us are likely to see, and in which the whole future of the Empire is in issue. And when I recall the Resolution unanimously passed in this Council on the 24th February 1915, which affirms 'the unswerving resolution of Indians to support the honour, dignity and prestige of the Empire regardless of the sacrifice it may entail on them,' I am confident that the measures we propose will receive full acquiescence in the Council and in the country.

"118. In conclusion, I desire once again to express my heartfelt acknowledgments to the officers of the Finance Department for the way in which they have dealt, in their various spheres, with the very difficult conditions through which we have passed during the current year and which are likely to continue throughout the year to come. I can only repeat what I said last year that I am most deeply indebted to their loyal and efficient aid."

THE INDIAN MEDICAL (BOGUS DEGREES) BILL.

The Hon'ble Sir Pardey Lukis:—"My Lord, I beg to present the Report of the Select Committee on the Bill to prevent the grant to unqualified persons of titles implying qualifications in western medical science, and the assumption and use by such persons of such titles."

THE INDIAN TARIFF (AMENDMENT) BILL.

The Hon'ble Sir William Meyer:—"My Lord, as I indicated just now in my speech on the Financial Statement, I have to move for leave to introduce a Bill to amend the Indian Tariff Act. It is from this measure, as I have already explained, that we expect to obtain the largest share of the additional revenue which we require. In introducing the Financial Statement, I have stated in some detail our proposals in connection with the import and export duties, and Hon'ble Members will perhaps allow me to refer them to my previous remarks for an explanation of the changes we contemplate and of the considerations underlying these changes.

[1ST MARCH, 1916.] [*Sir William Meyer.*]

I need not, therefore, go over this ground again, and will confine my remarks to a few points arising out of the Bill to which I have not yet had occasion to refer.

"The Import Tariff which we propose to substitute for the existing Tariff is stated in Schedule I of the Bill. Part I specifies the articles which are to remain exempt from duty, and in addition to the remarks which I have already offered in explanation of our reasons for restricting the free list, I have only to observe that, with one exception, all the articles which appear in Part I are now already exempt from duty under the provisions of the existing Schedule, or under notifications issued under section 23 of the Sea Customs Act. The exception is the exemption now proposed in favour of nickel and bronze coin of the Government of India, which will now formally be placed in the same category as other current British Indian coin. The only other point to which I need draw the attention of Hon'ble Members, in connection with this part of the Schedule, is the inclusion in the statutory free list of all the special concessions which have hitherto been conceded to the cotton industry. These are stated in Nos. 18, 19 and 27 of the Import Schedule.

"Part II of the Import Schedule states the special rates to be applied to those articles, which, for one reason or another, are taxed at specific rates varying with each individual case. I have already explained in introducing the Financial Statement the changes which we propose in connection with the taxation of these articles, and the grounds on which we rely for a modification of the existing method and pitch of assessment.

"In Part III are included the articles which are to be liable to duty at 2½ per cent. There are at present only two cases in which such a rate is applied, namely, vinegar and green copperas, this privileged rate, as compared with our general tariff of 5 per cent, being a consequence of special tariff arrangements with France. We now propose to enlarge the list of articles which are to be taxed at this rate; and we include in it firstly, those manufactures of iron and steel which have hitherto been accorded preferential treatment and pay only one per cent, and secondly the more important articles which have hitherto been exempted altogether, but are no longer to be so. While we are unable, in existing financial conditions, and also for the reasons which I have already explained, to continue to these imports the fiscal treatment they have enjoyed in the past, we are still recognising their title to privileged treatment by taxing them at 5 per cent below our proposed general tariff rate. In regard to machinery, it will be observed that we do not propose to apply the rate of 2½ per cent to machinery, as defined in No. 58 of the Schedule, imported by the owner of a cotton spinning and weaving mill. This exemption is a corollary to the policy of placing an excise duty on cloth woven in Indian mills equivalent to the import duty on similar goods, and so long as the excise duty remains in force, we do not desire to modify the concession of total exemption which that industry has enjoyed.

"One small point needs to be mentioned in connection with the proposed taxation of railway material. If Hon'ble Members will refer to item No. 63 of the Schedule, they will see that this item includes a proviso defining component parts of railway material. This definition follows the similar definition, prescribed in No. 58, applicable to component parts of machinery; and this definition has, as a matter of fact, been in force for many years under our executive instructions. We are now merely giving statutory recognition to an existing practice which has the support of a statutory prescription applicable to articles of a character very similar to railway material. As I have already explained in connection with the Financial Statement we have always endeavoured to maintain equivalence of taxation between these two classes of imports.

"Part IV calls for no detailed remarks. The general tariff rate will be raised to 7½ per cent; and this rate will apply also in future to a number of articles, many of no special importance, which have hitherto, for no very valid reason, found their way into the free list.

"The Import Schedule, it will be observed, distinguishes articles according as they are free, or dutiable at special rates, or at 2½ per cent or at 7½ per cent. This form will, it is believed, assist Hon'ble Members in their consideration

[*Sir William Meyer; The President.*] [1ST MARCH, 1916.]

of our proposals. We shall, however, for the convenience of importers, publish, after the Bill has become law, a Schedule in which the items of the statutory Schedule will be arranged, as far as possible, in alphabetical order. In another respect, too,—and here perhaps to a more marked extent—the proposed Import Schedule differs from the existing Schedule No. IV which states the general import duties. In the latter, in the case of a number of articles tariff values have been stated on which the import duty is assessed. Under section 22 of the Sea Customs Act, however, Government have the power to fix and modify such values, and these values are variable from time to time according to fluctuations in the price of the articles. Again, it is found necessary from time to time to fix tariff values for articles previously assessed on their market value. Therefore any values which might to-day be inserted in the Tariff Schedule would almost certainly stand in need of revision at the end of the year when, according to our usual procedure and in consultation with importers, a new set of values would be fixed for the ensuing year. Thus examination of the values which are now given in the Schedule published at the end of last year by the Department of Commerce and Industry will show that these differ greatly from those originally inserted in the Schedule which formed part of the Act of 1894. We therefore think it advisable to show no tariff values in the proposed Schedule. But we do not propose to abandon this method of assessment, which has considerable advantages to the trade and to the Customs authorities. We propose, as soon as possible after the Bill has become law, to publish, under its clause 3 (2), a Schedule in the alphabetical form to which I have just referred showing the tariff valuations as fixed at the last revision in December, 1915, for those articles in respect of which it has been considered necessary to fix such values.

"Schedule II states the rates of duties which we propose for the export duties on jute and tea. The definition of jute in this Schedule excludes Bimlipatam jute which, though commonly described as jute, is not, botanically, of the same family as the *Corchorus capsularis* or *Corchorus olitorius* grown in Bengal, and does not command the same value as the latter.

"Finally, I may explain, with reference to clause 1 of the Bill, that since the Bill, if passed into law, will have retrospective effect from the 1st of March, it is necessary to provide for the recovery of any duties which may be short levied on the 1st of March and subsequent days until the enactment of the Bill. We have instructed Collectors of Customs to inform the trade that the new duties will be applied on and from the 1st of March so as to give importers and exporters the opportunity of paying duty at the enhanced or new rates immediately, on the understanding that should any change be made during the passage of the Bill in the rate of duty applicable to any particular article, an adjustment will subsequently be made in respect of any sums paid as duty at the rates shown in the Bill. To provide, however, for the case of an importer or exporter declining to make payment at the new rates pending the enactment of the Bill, power has been taken in its clause 1 to recover duty at the rates as they will be when the Bill becomes law under the procedure which already applies in the case of short levies of duty by accident, or negligence, or collusion.

"My Lord, I now move for leave to introduce the Bill to amend the Indian Tariff Act, 1894, and for other purposes."

The motion was put and agreed to.

The Hon'ble Sir William Meyer :—"My Lord, I beg to introduce the Bill, and in view of the urgency which I explained in my speech introducing the Financial Statement, I beg that Your Excellency will be pleased to suspend the Rules of Business to admit of the Bill being at once referred to a Select Committee."

His Excellency the President :—"I suspend the Rules of Business."

The Hon'ble Sir William Meyer :—"My Lord, I beg to move that the Bill be referred to a Select Committee, consisting of the Hon'ble Sir

[1ST MARCH, 1916.] [*Sir William Meyer; Sir Ibrahim Rahimtoola; The President.*]

William Clark, the Hon'ble Mr. G. R. Lowndes, the Hon'ble Sir Ibrahim Rahimtoola, the Hon'ble Mr. Ravaningar, the Hon'ble Rai Sita Nath Ray Bahadur, the Hon'ble Mr. J. B. Brunyate, the Hon'ble Lieutenant-Colonel F. R. T. Gurdon, the Hon'ble Mr. C. E. Low, the Hon'ble Mr. F. H. Stewart, the Hon'ble Mr T. W. Birkett and myself, with instructions to report by the 7th March, 1916."

The Hon'ble Sir Ibrahim Rahimtoola :—" My Lord, may I be permitted to say something ?"

His Excellency the President :—" There is no discussion to-day. Will you please sit down."

The motion was then put and agreed to.

THE INDIAN INCOME TAX (AMENDMENT) BILL.

The Hon'ble Sir William Meyer :—" My Lord, I move for leave to introduce a Bill to amend the Indian Income-tax Act of 1886. The object of the proposed legislation is to enhance the revenue obtained from the income-tax. The system of taxation proposed, and the fiscal results anticipated, have been stated in considerable detail in my speech of this morning introducing the Financial Statement for 1916-17, and I explained also that it is proposed to restrict the amendments of the Income-tax Act to those which are necessary to carry out the new scheme of taxation. Any other amendment of the Income-tax Act must wait for a period of greater leisure. I need not go over this ground again now. The new graduated scale contemplated represents, however, a considerable departure from previous practice, and necessarily involves certain changes of procedure, which I now proceed to mention.

" Under the existing Act interest on securities is taxed by deduction at the source. This is the method of assessment ordinarily followed in such cases in other countries. Further, where the system of deduction at the source exists side by side with a graduated scale of income-tax, it is necessary, in order to ensure a full yield, that the claim of the State should be made at the maximum rate in the first instance. This arrangement too is already in force under the existing Act and, as my Hon'ble friends are aware, will be continued. I may mention incidentally that the system of deducting tax at the source is specially necessary in India, as otherwise assessees under Part I, namely, those taxed on salaries and pensions, would escape paying income-tax on the interest on any securities they may hold, inasmuch as they are not at present required to submit a return of their income from all sources, this being required of assessees under Part IV only.

" Individual holders of securities are, however, allowed an abatement of the tax paid on interest, or complete exemption, with reference to their position on the graduated scale as determined by their total personal income. Under the existing Act this relief may be obtained before the tax is actually paid, by producing a certificate signed by the Collector to the effect either that the assessee's income is not taxable at all, or is taxable at 4 pies in the rupee instead of 5 pies.

" With the extension of the principle of graduation contemplated in the present Bill, it is felt that this latter arrangement would result in inconvenience. The number of persons—hitherto negligible—who are entitled to claim abatement in respect of income-tax paid on interest on securities will now be considerable, and the retention of the existing procedure for obtaining relief would, amongst other things, involve the risk of delay in the payment of interest. The assessee, we think, would much prefer to have his interest on Government paper, company's debentures and the like paid in regularly and automatically

as it falls due, and be left to urge his claim for abatement at his convenience and for all his securities together. It is therefore thought desirable, in the interests both of the taxpayer and of the Administration, that for the future a system of refunds should be prescribed, in lieu of the present system of anticipatory application, as the means of remedying any excess payments of the tax made at the source through the imposition of the maximum rate.

"A similar question of procedure arises as a result of the concession, allowed by the rule of assessment laid down in Part II of the amended Schedule in clause 8 of the Bill, by which individual shareholders in companies are to be granted abatement or exemption calculated with reference to their total personal income. Hitherto this has not been allowed. We feel that the recovery of the enhanced maximum rate now proposed without any provision for remissions would not be equitable or expedient. Following therefore the case of securities, we again propose that, while the tax should be taken at the maximum rate in the first instance, excess payments shall be subsequently refunded on application being made in due course.

"In order to facilitate the working of the refund system in these cases, it is proposed that, in regard to assessments under both Part II and Part III of the Second Schedule prescribed in clause 8 of the Bill, the total annual income of an individual applying for relief shall be taken for this purpose to be the income of the preceding income-tax year. This provides a convenient and equitable criterion which will, amongst other things, enable refund claims to be dealt with more expeditiously than would be possible if it were necessary to wait until the income of the year in which the tax is paid could be ascertained.

"Finally, it is proposed to prescribe a new period of limitation for the presentation of refund claims generally, this period to be one year instead of the three months at present prescribed in regard to cases falling under section 33 of the Act. This seems desirable, in order to smooth still further the application of the new graduated scale and to reduce the risk of hardship to a minimum, and explains the provisions of clauses 5 and 7 of the Bill, while clause 6 makes it clear that the rule-making power given by section 38 of the present Act is to extend also to the procedure to be followed on applications for refund.

"One other matter may be mentioned, namely, the provision in clause 4 of the Bill, which will have the effect of determining compositions effected under section 31 of the existing Act when the new rates of taxation come into operation. The amendment proposed takes the form of a general and permanent provision, as it is desirable, in view of the possibility of future modifications of the income-tax rates, that the law should be so framed as not to permit of any arrangement being made, special to individual taxpayers, which will prevent a new rate of income-tax—be this in the shape of enhancement or reduction—from becoming fully operative immediately on its introduction.

"With these remarks, My Lord, I beg leave to introduce the Bill."

The motion was put and agreed to.

The Hon'ble Sir William Meyer:—"My Lord, I now introduce the Bill. I have already explained its main provisions, and in view of the urgency of the case, which I have also explained, I beg that Your Excellency will be pleased to suspend the Rules of Business to admit of the Bill being referred at once to Select Committee."

His Excellency the President:—"I suspend the Rules of Business."

The Hon'ble Sir William Meyer:—"My Lord, I move now that the Bill, be referred to a Select Committee, consisting of the Hon'ble Mr. G. R. Lowndes the Hon'ble Sir G. M. Chitnavis, the Hon'ble Sir Fazulbhoy Currimbhoy, the Hon'ble Rai Sita Nath Ray Bahadur, the Hon'ble

[1ST MARCH, 1916.] [*Sir William Meyer; Pandit Madan Mohan alaviya; The President.*]

Mr. J. B. Brunyate, the Hon'ble Mr. W. H. Cobb, the Hon'ble Mr. R. E. V. Arbuthnot, the Hon'ble Khan Bahadur Mian Muhammad Shafi, the Hon'ble Mr. T. W. Birkett, the Hon'ble Mr. L. Davidson and myself, with instructions to report by the 7th March, 1916."

The Hon'ble Pandit Madan Mohan Malaviya :—" May I have Your Lordship's permission to say a few words ? "

His Excellency the President :—" There is no discussion on the Financial Statement, and this, I consider, is a portion of that Statement."

The Hon'ble Pandit Madan Mohan Malaviya :—" May I submit for Your Excellency's consideration—."

His Excellency the President :—" You can submit afterwards. Not now."

The motion was then put and agreed to.

The Council adjourned to Tuesday, the 7th March, 1916.

A. P. MUDDIMAN,

Secretary to the Government of India,
Legislative Department.

DELHI;
The 8th March, 1916.

APPENDIX A.

(Referred to in Answer to Question No. 8).

Statement showing details of sanatoria for tuberculosis in India.

Province.	Total number of sanatoria for tuberculosis in province.	Number of institutions under		Extent and kind of Government assistance.
		Government management.	Private management.	
Madras	1	*Nil.*	1	One half of the cost of maintenance subject to a maximum of ₹10,000 a year.
Bombay	3	*Nil.*	3	*Nil.*
Bengal	*Nil.*	Grants varying from ₹1,800 to ₹10,000 (total ₹67,550) made for construction of phthisical wards at 18 local fund hospitals, local funds bearing cost of upkeep. One phthisical ward is maintained by Government. Contribution of ₹10,000 made to a ward at Presidency General Hospital, Calcutta, which will shortly be ready. There is also a ward at Lowis Jubilee Sanitarium at Darjeeling to which Government have not specifically contributed.		
United Provinces . .	2	*Nil.*	2	Yearly grant of ₹3,000 in one case and yearly grant of ₹17,000 in the other.
Punjab	1 (With a hospital for advanced cases.)	*Nil.* (With a hospital for advanced cases.)	1	Building grant of ₹30,000 during current year. (The hospital belongs to Patiala State.)
Burma	*Nil.*	*Nil.*	*Nil.*	*Nil.*
Bihar and Orissa . .	„	A ward for special treatment of tuberculosis is nearing completion in Ranchi, and it is proposed to build others near selected sadr hospitals. Initial cost will be borne by Government and maintenance charges by local bodies administering the hospitals concerned.		
Central Provinces . .	*Nil.*	*Nil.*	*Nil.*	*Nil.*

(a) Out of these the number of firms shown in column 8 have been granted the special licences described in that column.
*About R10 lakhs more is likely to be shortly credited to Government in Bengal.
†About R0·78 lakh is likely to be shortly credited to Government in Madras.
‡This excludes the value of mills and real property owned by rice milling firms.

REGISTERED No. L. 848.

SUPPLEMENT TO

The Gazette of India.

No. 11.] DELHI, SATURDAY, MARCH 11, 1916.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such official papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five rupees per annum if delivered in Calcutta, or eight rupees if sent by post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of rupees six per annum if delivered in Calcutta, or rupees nine if sent by post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs. on Thursday, the 9th March 1916, based on the Indian Daily Weather Reports of the period.

1. A disturbance affected the northwest frontier at the beginning of the week and caused light falls of rain and snow in north Baluchistan, Kashmir and the hills of the North-West Frontier Province. Weather was slightly unsettled in the southwest of the Bay on the 7th and 8th and this resulted in a few thunderstorms on the south Madras coast.

2. *Burma.*—Mergui had a light fall of rain.

Northeast India, including Orissa, and the United Provinces, Central India and the Central Provinces.—Weather was dry.

Northwest India.—Rain or snow fell at a few stations in Kashmir and rain at Robat, Chaman and Drosh.

The Peninsula.—Thunderstorms occurred at Pamban, Tinnevelly and Cochin.

3. The amounts of precipitation exceeding half an inch were 0·91″ at Sonamarg on th 4th and 0·80″ at Pamban on the 6th.

4. The only divisions where appreciable precipitation occurred during the week were Kashmir, Malabar and Madras Southeast. In Malabar rainfall was in excess by more than 20 per cent, in Madras Southeast it was normal, and in Kashmir it was more than 20 per cent in defect. The absence of rainfall is a normal feature at this time of the year in Rajputana West, Gujarat, Central India West, the Konkan, the Bombay Deccan, Mysore and the Madras Deccan.

The rainfall from 3rd December to date is 20 per cent or more in defect over by far the greater part of the country, the deficiency amounting to about two inches or more in the case of the Punjab, Kashmir, Chota Nagpur, Madras Southeast and the Madras Coast North. There has been no rain whatever in Sind, Rajputana, Gujarat, Hyderabad South, the Madras Deccan and the Konkan, but no rain usually falls during this period in the Konkan. The deficiency is also large in the United Provinces, Bihar, Orissa and Bengal. The rainfall of the period is 20 per cent or more in excess in the Bay Islands, Burma, Central India West and the Bombay Deccan and differs from the normal by less than 20 per cent in Berar.

Division.	Rainfall data for week ending on 9th March 1916.			Rainfall data from 3rd December 1915 to 9th March 1916			Percentage departure from normal.	
	Actual rainfall in inches.	Normal rainfall in inches.	Excess or defect in inches.	Actual rainfall to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	This week.	Last week.

Dated the 9th March 1916.

R. A. MANT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 4th March 1916.

Burma.—The week was practically rainless. Threshing and winnowing of winter rice have been almost completed in Upper Burma. Cultivation of spring rice and harvesting of miscellaneous crops are proceeding satisfactorily. Standing crops are in good condition. Cattle are generally healthy. The price of unhusked rice at Rangoon shows a further rise to Rs. 109 per hundred baskets and is still above normal.

Assam.—The weather is seasonable. Slight rain fell in places but more rain is generally wanted for agricultural operations. Harvesting of mustard has been almost finished. Pressing of sugarcane, preparation of land for *jhum* cultivation and hoeing and pruning of tea still continue. Ploughing of land for paddy and jute is in progress and sowing has commenced. Prospects of tea are good. The price of common rice is almost stationary. Cattle disease is reported from six districts.

Bengal.—No rain fell during the week. Preparation of land for autumn crops is in progress but rain is wanted to facilitate the operation. Sowing of jute and autumn paddy has commenced in low lands in certain districts. Harvesting of spring crops continues and that of sugarcane is approaching completion. Prospects of standing crops are generally reported to be fair. Scarcity of fodder is increasing in Bankura. Cattle disease is reported from eight districts. The average price of common rice for the Province has fallen slightly as compared with that of the preceding week.

The weekly report on scarcity is as follows:—In the Bankura district the condition of the people and the state of affairs in the affected areas are generally unchanged but the distress is tending to increase. There is some scarcity of fodder and water. Private charitable funds are giving assistance. Loans continue to be given freely. The price of rice is 8½ seers per rupee. The number of persons on relief works was 13,219 and on gratuitous relief 17,333 total 30,552. The number of persons relieved on private works was 4,174. In the Tippera district the distress is disappearing in the affected areas in the south of the Brahmanbaria subdivision, relief operations in parts of which have been closed, but considerable distress prevails in other parts of the subdivision. There is no marked change in the condition of the people and in the state of affairs in the affected areas except in the south of the Brahmanbaria subdivision. Distribution of loans continues. The Sarail Wards Estate is giving relief. But for sporadic cholera cases the public health is good. The price of rice is 7¼ seers per rupee. The number of persons on relief works was 4,773 and on gratuitous relief 5,579, total 10,352.

Bihar and Orissa.—There was no rain during the week. Harvesting of oilseeds and pressing of sugarcane continue. Preparation of land for the next season's crops is in progress. Standing crops are doing well. The average price of common rice has remained almost stationary as compared with that of the preceding week. The supply of fodder and water is sufficient except in Hazaribagh where the latter is reported to be scarce. Cattle disease is reported from several districts. The attendance of persons on test works in Manbhum was 2,088 and in Singbhum 3,271. Gratuitous relief was given to 403 persons in Manbhum. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—The week was practically rainless. Demand for rain is still reported from the north-western districts. Harvesting and threshing of spring crops, pressing of and preparation of land for sugarcane, sowing of extra crops and irrigation of poppy continue. Ploughing of fields for autumn corps and extraction of opium have commenced in places. Standing crops are doing well though high winds have caused some slight damage in the western districts. The condition of agricultural stock is good and little cattle disease is reported. Fodder and water are sufficient everywhere but the former continues to be dear in parts. The market supply is adequate. Prices are practically stationary with a slight downward tendency in many districts.

Punjab.—The weather is dry and rain is urgently wanted everywhere. The condition and prospects of irrigated wheat and other crops are generally fair and of unirrigated crops are below average in parts of the south, east a west. Unirrigated crops are withering for

want of rain. Sowings of extra spring crops continue and are generally normal. Pressing of sugarcane has been completed with yield normal. Cattle are generally healthy but are becoming weak owing to scarcity of fodder. Water for drinking and canal irrigation is generally sufficient. Prices are falling slightly and range between warning and above scarcity rates. Price of wheat :—Ambala 9, Lahore 9½, Ferozepore and Rawalpindi 10 and Lyallpur 10½ seers per rupee.

North-West Frontier Province.—The week was rainless. The weather is clear and temperate. Standing crops are average in Peshawar and in irrigated areas of Dera Ismail Khan, above average in Bannu and poor in unirrigated areas of Dera Ismail Khan. Sowings of sugarcane in the Bannu tahsil and of sugarcane, chillies, tobacco, onions, melons, *moth*, vegetables, maize and *chari* in Peshawar continue. Harvesting of sugarcane is still proceeding in the Bannu tahsil with outturn below average. The condition of cattle is good except in unirrigated tracts of the Lakki tahsil of the Bannu district where it is bad. Fodder is sufficient except in the Nowshera tahsil of the Peshawar district and dear in Dera Ismail Khan. The public health is good. Prices are high but are falling everywhere except in the case of maize which is stationary in Bannu.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 8 to 10 and maize from 11 to 18 seers per rupee. The condition of standing crops is average. There is no cattle disease. Fodder is sufficient except in a few places.

Kashmir. The rainfall during the week was fair. The condition of crops is fair. Cattle are generally healthy. Fodder is insufficient in Baramula and sufficient elsewhere. Water is inadequate. Prices are high.

Rajputana.—The weather is clear and cool. Spring crops are being irrigated where possible and are in fair to good condition. Crops on dry lands in Merwara are withering. Considerable damage to crops is reported from Kotah and Tonk owing to frost. Fodder is generally scarce. Cattle are generally in a weak condition owing to the deficiency of fodder in affected areas and are becoming more emaciated in Merwara. The water supply is generally sufficient except in Kotah and Tonk. Cattle disease is reported from Dungarpur, Banswara and Kotah. Prices are falling in Partabgarh, Jhalawar, Kishengarh and Bharatpur, rising in Tonk and Karauli and stationary elsewhere The number of persons on test works in Merwara was 1,691 and in Kishengarh 990. The number on relief works in Karauli was 687. Gratuitous relief was given to 1,735 persons in Merwara.

Central India.—During the week 43 cents of rain fell in Basoda, 1 inch in Gird and 16 cents in the Malwa prant of the Gwalior State. No rain was received elsewhere. Rain has been insufficient in the northern districts of Gwalior, some parganas of the Mehidpur and Rampura-Bhanpura districts of the Indore State and in the Orchha, Baoni, Jigni, Beri and Nagawan Ribai States of the Bundelkhand Agency and sufficient elsewhere. Sugarcane is being sown in Gwalior and pressed in Bhopal. Harvesting of spring crops is in progress almost everywhere. Standing crops are generally in good condition. The probable outturn is fair in Bundelkhand, normal in parts of Baghelkhand and good elsewhere. Gram has been damaged by severe cold in the Indore State. Agricultural stock is generally in good condition except for cattle disease in parts of Gwalior, Indore and the Southern States. The fodder supply is generally good except in parts of Gwalior. Prices are high in Baghelkhand, normal in Bhopal and steady elsewhere.

Central Provinces.—The weather has been generally clear. The days are hot but the nights and the mornings still continue cool. But for the damage already reported from frost and hail in a few districts all spring crops are in good condition and their harvesting is in progress. Preparation of land for the next season is in hand in several districts. Cattle are in good condition and fodder and water are ample everywhere. Price fluctuations indicate a downward tendency. Gram and *juar* are cheaper by 2½ and 2 seers per rupee respectively in Buldana and Narsingpur.

Feudatory States.—Prospects of the spring crops are good and their harvesting continues. Fluctuations in prices are very slight.

Bombay.—Standing crops are generally in good condition except for slight damage by frost in the Upper Sind Frontier, two talukas of Karachi, Thar and Parkar and parts of Baroda and by winds in the Upper Sind Frontier. Cotton picking continues in Gujarat, West Khandesh, Bijapur, Dharwar, Baroda, Cutch, Kolhapur and Kathiawar. Harvesting of spring crops is generally progressing. The fodder supply is deficient in parts of five districts of Sind, Cutch, Kathiawar, and Baroda. Agricultural stock is sufficient. Cattle are in good condition except in Larkhana, Hyderabad and Ahmedabad. Drinking water is generally adequate. Water for irrigation is deficient in Thar and Parkar, Kaira, Ahmedabad, Kathiawar and Baroda. Prices of food grains have fallen slightly in Sind and the Deccan and are generally steady elsewhere. The number of persons on gratuitous relief in Kathiawar was 140.

Hyderabad.—No rain fell during the week. Spring crops are in fair to good condition but they have been damaged somewhat by rats in parts of the Usmanabad district. Late rice crop is in good condition and is being weeded and sown Cattle disease prevails in four talukas. Prices of food grains are constant. Coarse rice is selling at 10 and white *juar* at 13 seers per rupee in Hyderabad city The highest price of *juar* in districts is 10 seers per rupee in Gulbarga, Medak and Karimnagar and the lowest 24 seers per rupee in Adilabad.

Mysore.—No rain fell during the week. Prices of food grains are steady throughout the State. Markets are well supplied. Standing crops are in good condition. The outturn of the harvested paddy and *ragi* is fair to good. Sugarcane has been planted in parts. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

Coorg.—Picking of coffee has been almost completed and threshing of rice continues. Prices of food grains are high. The public health is fair. Fodder for cattle is sufficient.

Madras.—The rainfall during the week was light in Cochin and *nil* elsewhere. Standing crops are in fair to good condition generally except in parts of Bellary, Chingleput, South Arcot and Tinnevelly and require more rain in parts of North Arcot and Tanjore. Harvesting of paddy, sugarcane and dry crops is proceeding with outturn fair to normal generally Sowings of paddy sugarcane and dry crops are proceeding or are nearing completion normally. The condition of cattle is generally good. The water supply is sufficient except in parts of Bellary, Anantapur, the Carnatic, Tanjore, Tinnevelly and the central parts except Coimbatore. Pasture is generally sufficient but it is scanty in Kurnool and Malabar and in parts of eight other districts. Fodder is generally available but it is scarce in parts of three districts. Prices have risen slightly.

R. A. MANT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF EDUCATION.

SANITARY.

PLAGUE.

Delhi, the 10th March 1916.

The following preliminary statement of plague seizures and deaths reported in India during the week ending the 4th March 1916 is published for general information :—

[a] The figures under "Rice, husked" represent the prices of common rice

NOTE.—These statistics are compiled from the fortnightly returns furnished by District Officers to Local Governments and Administrations. They relate to the wholesale prices in the principal markets (not necessarily district head-quarters) in each province on the last (or nearest mart) day of e fortnight

(The figures state prices in rupees per ten maunds)

NOTE.—These statistics are compiled from the fortnightly returns furnished by District Officers to Local Governments and Administrations, etc. They relate to the retail prices in the district headquarters on the last (or nearest mart) day of each fortnight

The figures state the number of seers (of 80 tolas) and chittacks sold for one rupee]

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA, FEBRUARY 24, 1916.

Final General Memorandum on the COTTON crop of 1915-16.

This memorandum is based on reports furnished by provinces, which comprise the entire cotton area of India. It deals with the final reports on both the early and the late crops of the season 1915-16.

The total area reported is 17,967,000 acres, which is 6,628,000 acres, or nearly 27 per cent, short of the revised figure of last year. The total estimated yield is 3,819,000 bales of 400 lbs each, which is also 27 per cent less than the revised figure of last year.

The detailed figures for each of the provinces are stated below (in *thousands*):—

Provinces	Acres (thousands)		Bales (thousands)	
	1915-16	1914-15	1915-16	1914-15
Bombay (*a*)	4,249	6,953	893	1,544
Central Provinces and Berar	4,061	4,708	1,196	1,097
Madras (*a*)	2,188	2,115	357	245
Punjab (*a*)	918	1,857	196	486
United Provinces (*a*)	834	1,551	263	486
Sind (*a*)	169	336	51	116
Burma	190	270	27	42
Bihar and Orissa (*b*)	68	70	16	16
Bengal (*a*)	88	90	30	34
North-West Frontier Province	26	60	6	14
Ajmer-Merwara	23	54	2	15
Assam	32	34	10	12
Hyderabad	3,220	3,605	450	400
Central India	999	1,519	216	293
Baroda	566	843	117	229
Rajputana	244	421	66	166
Mysore	92	109	14	14
Total	17,967	24,595	3,819	5,209

On the basis of these figures, the average outturn per acre of the present crop for all India is 85 lbs, which is the same as last year's average yield.

A statement showing the present estimates of area and yield classified according to the recognised trade descriptions of cotton is given below. Of the total yield Oomras represent 56 per cent, Bengal-Sind 16 per cent, Broach 6 per cent, Coompta-Dharwars, and Westerns and Northerns 5 per cent each, and Dholleras and Tinnevellys 4 per cent each.

TRADE DESCRIPTIONS

Description of Cotton	Area (acres)	Yield (bales of 400 lbs.)
Oomras—		
Khandesh	1,215,000	338,000
Central India	999,000	216,000
Barsi and Nagar(*c*)	3,429,000	483,000
Berar	2,869,000	830,000
Central Provinces	1,192,000	276,000
Total	9,704,000	2,143,000
Dholleras	1,180,000	150,000
Bengal-Sind—		
United Provinces	834,000	262,000
Rajputana	267,000	68,000
Sind-Punjab	1,112,000	253,000
Others	72,000	18,000
Total	2,285,000	601,000
Broach	1,036,000	229,000
Coompta-Dharwars	858,000	198,000
Westerns and Northerns	1,263,000	177,000
Cocanadas	275,000	46,000
Tinnevellys	671,000	146,000
Salems including Cambodias	280,000	48,000
Comillas, Burmas, and other sorts (*d*)	415,000	81,000
GRAND TOTAL	17,967,000	3,819,000

The provincial reports are summarised below:—

Bombay (26·9 per cent of the total area under cotton in India).—The latest reports show the total area under both early and late cotton to be 4,249,000 acres (1,242,000 acres being in Native States excluding Baroda), which is 39 per cent below the area of last year. The total yield is estimated at 893,000 bales (including 193,000 bales in Native States), showing a decrease of 42 per cent as compared with last year. Since the publication of the December report the crop in North Gujarat and Kathiawar has further deteriorated from want of moisture and in places has withered. Elsewhere it has progressed fairly well except in places where recent cloudy weather caused some shedding of flowers and bolls. In the Deccan some improvement in outturn is reported from East Khandesh. In the Karnatak the rain in December and continuous unfavourable winds later on have injuriously affected the crop in most places, particularly the exotic varieties, which have further suffered from cloudy weather inducing disease in places. The indigenous crop is somewhat better.

(*a*) Including Native States.
(*b*) Excluding Native States for which the yield is roughly estimated at about 1,000 bales.
(*c*) Includes Hyderabad.
(*d*) Includes 92,000 acres and 14,000 bales for Mysore, the trade descriptions of which have not been reported.

The area and outturn of cotton by trade descriptions in the Bombay Presidency (including Baroda but excluding Sind) are :—

		Acres.	Bales.
Oomras	Khandesh	1,215,407	338,020
	Barsi and Nagar	208,582	33,155
Dholleras		1,179,710	150,168
Bengal-Sind (Rajputana)		565	177
Broach		1,035,910	228,787
Coompta-Dharwars		857,733	197,905
Westerns		317,567	62,626

Central Provinces and Berar (20·1 per cent of the total area under cotton in India).—The total area sown is reported to be 4,061,000 acres, (1,192,000 acres in the Central Provinces and 2,869,000 acres in Berar), which is 14 per cent below that of last year. The decrease is attributed to the comparatively low prices of last year. The yield is estimated at 1,106,000 bales (276,000 bales in the Central Provinces and 830,000 bales in Berar), being 1 per cent above last year's yield. The trade description of cotton grown in these provinces is Oomras.

Madras (10·2 per cent of the total area under cotton in India).—The total area is estimated at 2,188,000 acres (23,000 acres being in the Banganapalle State), which is 4 per cent above last year's area. The total yield is estimated at 357,000 bales (2,000 bales being in the Native State), which is 46 per cent in excess of the revised figure according to the final accounts of last year. The season is reported to be generally favourable except in North Arcot, South Arcot, and Chitoor. This is especially the case in the tracts growing "Northerns and Westerns" variety, where practically full normal crops are expected. In the "Tinnevellys" area the crop has not so far shown any serious effects from late sowings. That crop is always late, and there is time still for a check in growth, but the present reports are good. The area and outturn of cotton according to trade descriptions are as follows :—

	Acres	Bales
Tinnevellys	671,500	145,960
Salems including Cambodias	279,900	47,700
Northerns and Westerns	944,600	114,700
Cocanadas	275,100	46,400
Others	17,300	1,800

Punjab (7·2 per cent of the total area under cotton in India).—The total area is now reported to be 918,000 acres (76,000 acres being in Native States), which shows a fall of about 51 per cent as compared with last year. The total yield is estimated at 196,000 bales (27,000 bales being in Native States), showing a decrease of 60 per cent below last year's yield. As reported in the December forecast, the monsoon rainfall was entirely insufficient, the west of the province suffering most from drought, which caused flowers to fall off and encouraged insect pests.

United Provinces (5·6 per cent of the total area under cotton in India).—The total area sown is reported to be 834,000 acres (including 13,000 acres in the Rampur State), being 46 per cent below last year's area. The total yield is estimated at 262,000 bales (3,000 bales being in the Rampur State), which is also 46 per cent short of last year's yield. As stated in the December forecast, the season has not been a favourable one for the cotton crop.

Sind (1·3 per cent of the total area under cotton in India).—The total area sown is reported to be 169,000 acres (3,000 acres being in the Khairpur State), which is about half the area of last year. The yield is estimated at 51,000 bales (including 1,000 bales in the Khairpur State), showing a fall of 56 per cent as compared with last year. The crop is reported to have been good in Khairpur, but only fair elsewhere through deficiency of water supply.

Burma (0·9 per cent of the total area under cotton in India).—The total area is now reported to be 190,000 acres, being 30 per cent less than last year. The yield is estimated at 27,000 bales, which is 36 per cent below last year's yield. The decrease is partly due to low prices obtained last year and partly to unfavourable season. The early rains were untimely for sowing and the capricious late rains did not improve prospects, with the result that the outturn in all districts is below normal.

Bihar and Orissa (0·4 per cent of the total area under cotton in India).—The total area under both the early and the late crops (68,000 acres) is 3 per cent less than that of last year. The yield is estimated at 16,000 bales, which is the same as last year. The crop in the Native States, for which no statistics are available, is roughly estimated at some 1,000 bales. The weather conditions were favourable for the early crop. For the late crop the conditions were unfavourable in the beginning, owing to floods in North Bihar. The prospects, however, improved later on and the condition of the crop is reported to be fair to good.

Bengal (0·3 per cent of the total area under cotton in India).—The total area sown with both early and late crops is estimated at 88,000 acres, which is 2 per cent short of last year's area. The yield is estimated at 30,000 bales, being 12 per cent below last year. The weather was favourable for the early crop in the Chittagong Hill Tracts, Bankura, and Maimensingh, but unfavourable in Midnapore and in the Hill Tippera State on account of drought in the former and excessive rain in the latter. A fair crop has been harvested for the province. The condition of the late crop is generally reported to be favourable. The area and outturn of cotton according to trade descriptions are :—

	Acres	Bales
Bengal-Sind	4,000	2,000
Comillas	84,000	28,000

North-West Frontier Province (0·2 per cent of the total area under cotton in India).—The total area is reported to be 26,000 acres, being 57 per cent below that of last year. The yield is estimated at 6,000 bales, which is also 57 per cent short as compared with last year.

Ajmer-Merwara (0·2 per cent of the total area under cotton in India) reports 23,000 acres and 2,000 bales as compared with 54,000 acres and 15,000 bales last year.

Assam (0·2 per cent of the total area under cotton in India).—The estimates of area and yield now stand at 32,000 acres and 10,000 bales as compared with 34,000 acres and 12,000 bales reported last year. The crop has been poor in all the cotton-growing districts except Sibsagar and the Lushai Hills, the main causes being excessive rain at the time of sowing and shortage of rain in October and November.

Hyderabad (14·9 per cent of the total area under cotton in India).—The total area is reported to be 3,220,000 acres, which is 11 per cent shorter than last year's area. According to the estimates of the district authorities, the outturn this year amounts to 1,020,000 bales as against their estimate of 611,000 bales last year. The Director-General of Revenue to the Nizam's Government is of opinion that some of the district estimates are incorrect and that the estimate for the present year may be taken at about 450,000 bales approximately as compared with 400,000 bales estimated by him

last year, or an increase of 12 per cent. Some rain fell in the month of December, which did not very much change the condition of things.

Central India (5·9 per cent of the total area under cotton in India).—The total yield is estimated at 216,000 bales on an area of 999,000 acres. These figures indicate a decrease of 26 per cent in yield and 34 per cent in area as compared with last year. The detailed figures are as follows :—

	1915-16		1914-15	
	Acres.	Bales.	Acres.	Bales.
Gwalior	360,953	50,021	524,293	91,485
Indore	303,185	61,578	515,238	82,448
Bhopal	132,786	54,216	160,805	53,742
Baghelkhand	22,596	4,212	24,486	4,015
Bundelkhand	27,175	10,097	27,489	9,133
Malwa	67,561	10,362	123,931	21,189
Southern States	84,383	25,244	143,098	30,510
Total	998,639	215,730	1,519,390	292,522

Baroda (3·3 per cent of the total area under cotton in India) reports 566,000 acres compared with 843,000 acres last year or a decrease of 33 per cent. The yield is estimated at 117,000 bales, which is 49 per cent less than last year.

Rajputana (1·8 per cent of the total area under cotton in India).—The total area and yield are estimated at 244,000 acres and 66,000 bales as against 421,000 acres and 166,000 bales last year. There is thus a decrease of 42 per cent in area and of 60 per cent in yield. The late and deficient rains affected the crop and the outturn was low. The detailed figures for the States are as follows :—

	1915-16		1914-15	
	Acres	Bales	Acres	Bales
Bikaner	21	1	116	45
Marwar	25,827	1,643	54,158	8,689

Bharatpur	30,905	8,546	67,076	43,778
Dholpur	15,377	3,960	26,910	9,855
TOTAL	244,258	65,998	420,716	165,930

Mysore (0·5 per cent of the total area under cotton in India) reports 92,000 acres compared with 109,000 acres last year, showing a decrease of 16 per cent. The yield is estimated at 14,000 bales, which is about the same as last year's.

The following statement compares the estimates of the total outturn for the last three years with the sum of net exports and internal consumption, this latter being computed on a basis arrived at in agreement with the Bombay Cotton Trade Association, (the figures are in *thousands*) :—

	Year ending 31st August		
	1915	1914	1913
	Bales	Bales	Bales
Net exports	2,118	3,647	2,228
Mill consumption	1,771	1,816	1,805
Consumption outside mills (conjectural)	1,000	450	450
	4,889	5,913	4,483
Estimated yield	5,209	5,066	4,610
Excess (+) or deficit (—)	+320	—847	+127

The **exports** of raw cotton by sea to foreign countries in the last five cotton years (September to August) have been as follows (in *thousand* bales) :—

	1910-11	1911-12	1912-13	1913-14	1914-15
	Bales	Bales	Bales	Bales	Bales
Japan	739	1,076	1,169	1,392	1,351
Germany	354	238	298	647	...
Belgium	323	193	237	421	1
Other countries.	937	497	566	1,182	787
Total	2,353	2,004	2,270	3,642	2,139

The following statement shows **imports** of raw cotton into the ports by rail and river and by sea during the last three cotton years (September to August) in *thousand* bales :—

Imports into	1912-13	1913-14	1914-15
	Bales	Bales	Bales
Calcutta	187	272	365
City of Bombay	2,628	3,722	2,598
Karachi	475	641	277
Madras ports	306	351	191
Total	3,596	4,986	3,431

The course of **prices** is indicated by the following figures, which represent the price of Broach cotton at Bombay in rupees per candy of 784 lbs :—

	1911	1912	1913	1914	1915
	Rs.	Rs.	Rs.	Rs.	Rs.
September	304	296	305	169	279
October	285	270	324	150	307
November	250	296	309	160	283
December	252	313	311	175	286

The **chart** below shows the present figures of area and yield for all India as compared with the finally revised figures of the preceding nine years.

Cotton crop in foreign countries.—The latest information published by the International Institute of Agriculture, Rome, regarding the cotton crop of

1915 in foreign countries is :—United States of America—30,900,000 acres and 13,300,000 bales of 400 lbs. each (or 10,640,000 bales of 500 lbs. each) against 36,700,000 acres and 20,100,000 bales of 400 lbs. each (or 16,080,000 bales of 500 lbs. each) in the preceding year. Egypt—1,200,000 bales against 1,700,000 bales last year. It appears from unofficial sources that the area under cotton in Egypt in 1915-16 is 1,200,000 acres. The news of the Russian crop is said to be good.

AREA AND YIELD OF COTTON

G. FINDLAY SHIRRAS,
Director of Statistics.

Final Estimate of Cotton Crop of India.

Provinces and States	1915-16 (Provisional estimates)		1914-15 (Final figures) *		1913-14 (Final figures) *

* These are revised estimates as finally adjusted by the provincial authorities.
(a) Including Native States.
(b) Excluding Native States, for which the yield is roughly estimated at about 1,000 bales.
NOTE.—A bale contains 400 lbs of cleaned cotton.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, FEBRUARY 25, 1916.

Final General Memorandum on the SUGARCANE Crop of 1915-16.

This memorandum is based upon reports furnished by provinces, which contain 99 per cent of the total area under sugarcane in British India.

The total area is estimated at 2,375,000 acres as against 2,311,000 acres, the revised figure of last year, showing an increase of 3 per cent. The total yield is estimated at 2,636,000 tons as against 2,462,000 tons, the revised figure of last year, or an increase of 7 per cent. The crop this year has, on the whole, fared better than last year, the average yield per acre being 2,486 lbs against 2,386 lbs in 1914-15.

Detailed figures for each province are given below :—

Provinces	Yield (1,000 tons)		Area (1,000 acres)		Yield per acre (lbs)	
	1915-16	1914-15	1915-16	1914-15	1915-16	1914-15
United Provinces .	1,354	1,153	1,264	1,192	2,399	2,167
Punjab . . .	269	295	346	366	1,742	1,805
Bihar and Orissa .	259	277	262	266	2,214	2,333
Bengal . . .	259	250	233	233	2,490	2,403
Madras . . .	148	158	86	74	3,855	4,783
Bombay and Sind(a)	261	240	96	90	6,000	5,973
Assam . . .	28	31	36	39	1,742	1,781
North-West Frontier	32	36	31	32	2,312	2,520
Central Provinces and Berar . .	26	22	21	19	2,773	2,594
Total .	2,636	2,462	2,375	2,311	2,486	2,386

(a) Including Native States.

In addition to the areas for which particulars are given above, the crop is grown on a very small scale in certain other tracts in British India, and the average area of such tracts for the last five years has been some 23,900 acres. An addition of approximately 1 per cent or 26,000 tons should therefore be made to the total estimated yield on this account.

The provincial reports are summarised below :—

United Provinces (52·3 per cent of the total area under sugarcane in British India).—The total area under sugarcane amounts to 1,264,000 acres as compared with 1,192,000 acres last year, showing an increase of 6 per cent. The increase in area is shared by all the divisions except Meerut and Fyzabad. The total yield is estimated at 1,354,000 tons of raw sugar as against 1,153,000 tons last year, or an increase of 17 per cent. Conditions were favourable for an increase in the area under cane : the prices of *gur* were high, and the heavy rain, which fell in the latter part of the cold weather last year, facilitated preparation of the ground. The outturn has not, however, proved quite so good as was anticipated in the previous forecasts. A certain proportion of the crop was sown on low-lying ground, and has not recovered from heavy flooding. In the Agra division the crop suffered from scanty rain and is estimated at 75 per cent of the normal. Elsewhere it did well and is estimated to yield 90 to 100 per cent of the normal. For the province as a whole, the crop is estimated at 95 per cent of the normal, as against 85 per cent in the preceding year.

Punjab (15·9 per cent of the total area under sugarcane in British India).—The total area is estimated at 346,000 acres as against 366,000 acres last year, or a decrease of 5 per cent. The total yield of *gur* is estimated at 269,000 tons as against 295,000 tons last year, or a decrease of 9 per cent. The decrease in area is attributed to insufficiency of rainfall and shortage of canal water. Of the important cane-growing districts Rohtak, Hoshiarpur, and Gurdaspur report a decrease of over 15 per cent each, while Lyallpur reports an increase of 26 per cent due to high prices of sugar. The failure of the monsoon affected the crop adversely, but the two well-defined periods of rainfall in the middle and at the end of September and the showers received in the first week of October saved the crops, and the yield was generally normal except in some of the south-eastern and central districts where it was below normal. It must be noted, however, that although in more than one district much of the standing crop has this year been utilised for fodder, no deduction has been made for this purpose.

Bihar and Orissa (10·9 per cent of the total area under sugarcane in British India).—The total area is estimated at 262,000 acres, which is 1·5 per cent below the area of last year. The total yield is estimated at 259,000 tons, which is 6·5 per cent short of that of last year. The weather conditions have been generally favourable, except in parts of Angul and Sambalpur where want of irrigation was felt in the early part of the season, and in some districts of Tirhut where the crop was damaged to some extent by floods in August. According to the estimates of the District Officers the average outturn for the province works out to 98 per cent of the normal ; the provincial Director of Agriculture, however, says that continued drought during March, April, May, and part of June severely prejudiced the crop in the most important districts in North Bihar, and that in many places floods supervening on this dry weather further lowered the vitality of the plant and by bringing up *usar* (salts) stunted its growth, with the result that a very poor crop has been reaped in North Bihar, especially in Tirhut. In view of this, the Director is of opinion that the District Officers' estimates are rather over than under the mark, and he accordingly puts the provincial average outturn at 90 per cent of the normal, on which the estimate of total yield stated above is based.

Bengal (9·5 per cent of the total area under sugarcane in British India).—The total area planted with sugarcane is estimated to be 233,000 acres, which is the same as last year's area. The total yield is estimated at 259,000 tons, as against 250,000 tons last year, or an increase of 4 per cent. Since the issue of the preliminary forecast in August last, the weather conditions have been, on the whole, satisfactory. The rainfall in August, September, and October generally had a slight tendency to defect, but there was sufficient moisture in the fields for the growth of the crop. During August some damage was caused here and there by excessive rainfall and floods, especially to the crop on the low-lying tracts of the Eastern Bengal districts. The fall in November was somewhat in excess, but a dry December followed. The average outturn is estimated at 85 per cent of the normal against 82 per cent last year.

The total quantity of raw sugar likely to be obtained from the juice of date and palmyra palm in

Bengal is estimated at 99,000 tons as against 96,000 tons last year. The provincial Director of Agriculture estimates the total quantity of *gur* in the province from all sources (cane, date and palmyra palm) this year to be 358,000 tons as against 346,000 tons last year.

Madras (**4 per cent** of the total area under sugarcane in British India).—The total area is estimated at 86,000 acres, which is 16 per cent in excess of the area of last year. The total yield is estimated at 148,000 tons as against 158,000 tons last year, or a decrease of 6 per cent. In South Vizagapatam the crop has undoubtedly suffered from heavy and continuous rain with the result that the cane was waterlogged and much was diseased. In the central districts and South Arcot, on the other hand, a period of drought had to be faced, but with subsequent rains the crop recovered. The crop has done best in Bellary. High prices for jaggery in Vizagapatam has led to very early crushing. The average outturn for the province is estimated at 84 per cent of the normal against 92 per cent last year.

Bombay and Sind (**2·7 per cent** of the total area under sugarcane in British India).—The total area is reported to be 96,000 acres (37,000 acres being in Native States), which is 7 per cent in excess of last year's area. The total yield is estimated at 261,000 tons (89,000 tons being in Native States), as against 240,000 tons last year, or an increase of 9 per cent. The increase in area is attributed to a plentiful supply of water at the planting season. The crop suffered in North Gujarat and Kathiawar through scanty rains, but the fall at the end of the season was very beneficial. In South Gujarat conditions were somewhat better and the crop was generally fair. Elsewhere in the Presidency the rains were timely and plentiful, and the crop has thriven well. In Sind the crop was only fair, owing to deficient water supply.

Assam (**1·5 per cent** of the total area under sugarcane in British India).—The total area planted this year is estimated at 36,000 acres, which is about 8 per cent below last year's area. The total yield is estimated at 28,000 tons as against 31,000 tons last year, or a decrease of nearly 10 per cent. In the earlier part of the season the crop in Cachar, Goalpara, Kamrup, Darrang, and Nowgong suffered from heavy rainfall and floods, but the effect of the weather on the crop was favourable in other districts. The average outturn is estimated at 91 per cent of the normal against 95 per cent last year.

North-West Frontier Province (**1·3 per cent** of the total area under sugarcane in British India).—The total area is estimated at 31,000 acres, which is 3 per cent below the area of last year. The total yield is estimated at 32,000 tons as against 36,000 tons last year, or a decrease of 11 per cent. The decrease has occurred in Hazara, Bannu, and Peshawar, and is due to insufficient rain and also to damage caused by insects in Bannu.

Central Provinces and Berar (**0·9 per cent** of the total area under sugarcane in British India).—The total area is estimated at 21,000 acres, which is about 11 per cent above the area of last year. The total yield is estimated at 26,000 tons as against 22,000 tons last year, or an increase of 18 per cent. The conditions at sowing time were favourable and the germination was successful. The monsoon broke out in the last week of June. The rainfall was generally well distributed and sufficient for agricultural purposes. Light showers were also received in the last weeks of November and December and these benefited the crop. For the Central Provinces and Berar together the average yield is estimated at 111 per cent of the normal.

Imports.—The following figures show the amount of sugar imported by sea from the different foreign countries in the last two official years (April to March) and in the ten months (April to January) of 1914-15 and 1915-16.

Countries.	1913-14	1914-15	1914-15 (ten months)	1915-16 (ten months)
Refined 16 (D. S. and above)	Tons	Tons	Tons	Tons
Java	578,136	312,390	272,149	368,021
Mauritius	136,556	81,556	68,309	44,207
Austria-Hungary	74,001	21,405	21,404	20
Straits Settlements	2,878	1,752	1,574	1,393
China	1,483	2,786	1,676	10,963
Germany	686	103	103	15
Egypt	77	2,495	...	3,216
Other countries	1,283	1,074	312	9,153
Total	795,100	423,561	365,527	436,988
Unrefined (15 D. S. and below)

1915	15 0	6 2	15 5	7 0	13 12
1916	17 6	7 13	17 0	8 3	15 10

* Average of Java, Mauritius, and Cossipur

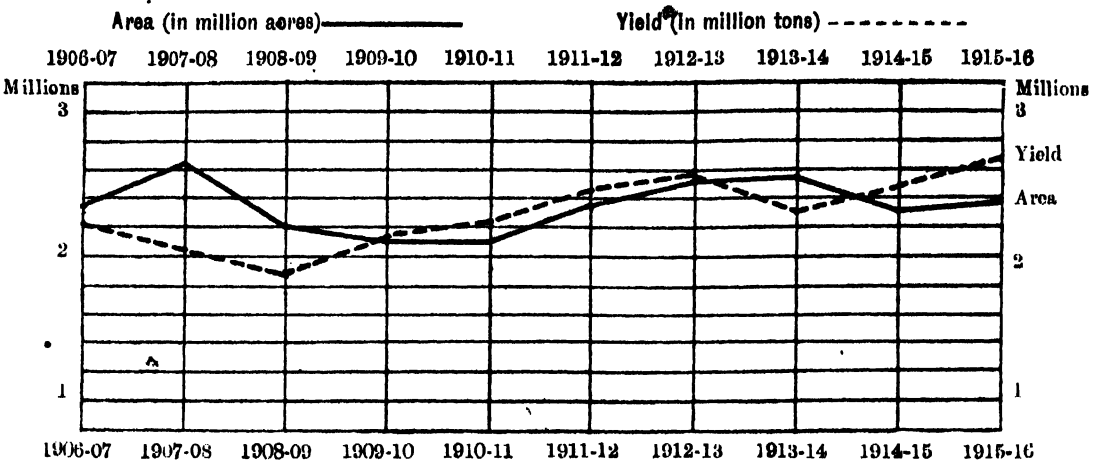

Chart.—The chart below illustrates the present estimates of area and yield with the revised figures for the preceding nine years. The curve for area represents millions of acres and that for yield (the dotted line) millions of tons.

Sugarcane crop in foreign countries.—From the latest information published by the International Institute of Agriculture, Rome, it seems that the area planted with sugarcane in Java is estimated at 384,000 acres as against 372,000 acres last year. In Egypt the weather has been favourable and water-supply sufficient ; canes are now being cut and sent into factories, a striking feature this year being the unusually large area sown under sugarcane in most provinces.

From unofficial sources it appears that in Cuba light rains occurred, accompanied by thunder and lightning, which is unusual for this time of the year As regards the Louisiana crop, it is reported from New Orleans that in no recent years has there been so much cane planted for the next crop by the first of January as there has been this year. The weather is reported to be favourable for the Hawaiian crop The estimates of the cane sugar crop of the season 1915-16 in the principal cane-producing countries appear to be as follows, as compared with the figures of the preceding season :—

Cane sugar.	1915-16 Tons.	1914-15 Tons.
Cuba	3,000,000	2,593,000
Java	1,264,000	1,303,000
Hawaiian Islands	585,000	577,000
Porto Rico	350,000	315,000
Mauritius	210,000	277,000
Australia	150,000	240,000
Argentine	175,000	330,000
Brazil	194,000	240,000
United States (Louisiana and Texas)	151,000	220,000
Formosa and Japan	375,000	262,000
Mexico	75,000	110,000
Natal	95,000	92,000
Egypt	110,000	76,000

Note.—The estimates of yield are based on the total areas sown without any allowance being made for cane used for chewing, fodder, seed, or other purposes.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, FEBRUARY 24, 1916

Final General Memorandum on the RICE crop of 1915-16.

This memorandum is based upon reports received from provinces, which contain 99 per cent of the total area under rice in British India. The statistics of acreage, outturn, etc., refer to all rice crops, both early and late, in the reporting provinces, with the exception of summer rice of the United Provinces, which, however, is insignificant, amounting to about 18,000 acres.

The total area reported is 76,792,000 acres as compared with 76,625,000 acres, the revised final area of last year. The present figure, therefore, shows an increase of 167,000 acres or 0·2 per cent as compared with 1914-15. The total yield is estimated at 32,877,000 tons as against 27,242,000 tons, the revised final estimate of last year, or an increase of 21 per cent. The present estimates for both area and yield are the highest on record.

The season has, especially in regard to the winter or *aman* rice in Bengal and Bihar and Orissa, been favourable. Some damage to the crop was, however, caused through deficient rainfall in the Bombay Presidency and by floods in parts of Assam.

The detailed figures for each of the provinces are given below :—

Final estimates.

Provinces.	Yield.		Area.		Yield per acre.	
	1915-16.	1914-15.	1915-16.	1914-15.	1915-16.	1914-15.
	tons (1,000)	tons (1,000)	acres (1,000)	acres (1,000)	lbs	lbs
Bengal (*a*)	8,276	6,411	20,916	20,450	886	702
Bihar and Orissa (*a*)	8,768	5,947	16,249	16,130	1,209	826

Coorg	53	53	82	81	1,448	1,466
Total	32,877	27,242	76,792	76,625	959	796

(*a*) Includes summer, autumn, and winter rice.
(*b*) Excludes summer rice.
(*c*) Includes Native States.

The total yield now estimated is higher than the heaviest crop of 1911-12 by 2·8 million tons. The average yield per acre, it may be noted, works out to 959 lbs. as against 796 lbs. in 1914-15, 855 lbs. in 1913-14, 891 lbs. in 1912-13, 1,041 lbs. in 1911-12, 1,077 lbs. in 1910-11, and 1,074 lbs. in 1909-10.

In addition to the areas for which particulars are given above, rice is grown in certain other tracts in British India, and the average area so grown for the five years ending 1913-14 has been some 760,000 acres. An addition of approximately 1 per cent should, therefore, be made to the total estimated outturn on this account.

The provincial reports are summarised below :—

Bengal (26·7 per cent of the total area under rice in British India).—The total area under winter rice is reported to be 15,105,000 acres as against 15,084,000 acres last year. The total yield is estimated at 6,459,000 tons as against 4,788,000 tons last year, or an increase of 35 per cent. As reported in the December forecast, the season up till October was, on the whole, fairly satisfactory, for the growth of the crop. Since then, somewhat excessive rainfall in the latter part of November caused slight damage in a few places, but did not affect the condition of the crop as a whole. From the district returns it appears that a bumper crop has been harvested in the 24-Parganas, Khulna, and Bakarganj, the average outturn per acre being 117, 123, and 120 per cent, respectively, of the normal. Five other districts (*viz.*, Howrah, Dinajpur, Jalpaiguri, Rangpur, and Bogra) also report more than a normal crop. In seven districts (*viz.*, Midnapur, Rajshahi, Pabna, Malda, Faridpur, Chittagong and Noakhali) the outturn was normal. Five districts (*viz.*, Jessore, Birbhum, Hooghly, Darjeeling and Mymensingh) report percentages between 82 and 92, and six districts (Nadia, Murshidabad, Burdwan, Dacca, Tippera, and the Chittagong Hill Tracts) report between 60 and 78 per cent. Bankura returns as low a percentage as 42. The provincial outturn works out to 97 per cent of the normal as against 72 per cent last year.

Adding the above figures to those for the summer and autumn crops, given in the second forecast issued in December last, and reproduced in the appended table, the total area and yield of all kinds of rice in Bengal amount to 20,916,000 acres and 8,276,000 tons as against 20,450,000 acres and 6,411,000 tons last year. Thus, while the acreage increased by 466,000 acres or 2 per cent only, the estimated yield rose by 1,865,000 tons or 29 per cent.

Bihar and Orissa (21·9 per cent of the total area under rice in British India).—The total area under winter rice is estimated at 12,429,000 acres, which is 0·6 per cent in excess of last year's area. The total yield is estimated at 7,534,000 tons as compared with 4,767,000 tons last year, or an increase of 58 per cent. As reported in the December forecast, the good rainfall in September and October materially benefited the crops throughout the province. The heavy rainfall received in the coast districts of Orissa in the second week of November, however, did some damage to the crops in that area. Floods occurred in the central portion of the Tirhut division commanded by the Sikrana or Bur Gandek river both in September and October, and in certain places no winter rice crop at all was secured. The districts of Bhagalpur, Purnea, Cuttack, and Sambalpur report crops above normal, varying from 102 to 115 per cent. Shahabad, Champaran Balasore, and Palamau expect a normal crop. Eleven districts report crops of 80 to 98 per cent of the normal, while Monghyr and Singhbhum report crops of 75 and 71 per cent respectively. According to these estimates, the provincial outturn works out to 94 per cent of the normal. But the provincial Director remarks that the percentage outturn has plainly been underestimated in many districts, and in view of the material benefit conferred by the late rain, the average outturn for the province cannot be less, and is probably more, than 110 per cent. The estimate of the total yield given above is based on this estimate (110 per cent) of the Provincial Director.

If to the above figures, those for the summer and autumn crops, given in the second rice forecast issued in December last, and reproduced in the appended table, are added, the total area and yield of all kinds of rice in the province amount to 16,249,000 acres and 8,768,000 tons as against 16,130,000. acres and 5,947,000 tons last year. These figures indicate an increase of 0·1 per cent in area and 47 per cent in yield.

Madras (**13·6 per cent** of the total area under rice in British India).—The total estimated area under rice is 10,668,000 acres, which is about 2 per cent less than the area of last year. The total yield is estimated at 4,764,000 tons as against 4,247,000 tons last year, or an increase of 12 per cent. The year has been, on the whole, good for the crop except in Chingleput, South Arcot, and the adjoining tracts of Nellore and Chittoor, where rains have been deficient and late and yields will be below normal.

Burma (**13 per cent** of the total area under rice in British India).—The total area under rice is reported to be 10,024,000 acres as against 9,993,000 acres last year. The total yield is estimated at 4,275,000 tons, which is 16 per cent in excess of the yield of last year. In Insein, Pyapon, and Toungoo a cyclonic storm in December is reported to have done some damage to the standing crops, in consequence of which the yield of Toungoo has been reduced from 113 per cent to normal. On the whole, the crop has threshed out well, and the average yield for the province is estimated at 93 per cent of the normal as against 80 per cent last year. The probable surplus available for export is estimated at 2,800,000 tons of cargo rice (=2,375,000 tons of cleaned rice).

United Provinces (**7·8 per cent** of the total area under rice in British India).—The area is estimated at 6,498,000 acres (of which 4,375,000 acres were sown with early crop), which is 5 per cent in excess of last year's area. The total estimated yield amounts to 2,334,000 tons compared with 2,032,000 tons last year, showing an increase of 15 per cent. The season has, on the whole, been favourable for the rice crop. Except in the Meerut and Agra divisions where the rainfall was deficient throughout the monsoon period, early rice has been nearly everywhere a good crop. Late rice has been still better as the monsoon continued late. Taking both early and late rice together, the crop for the province as a whole is estimated at 95 per cent of the normal as compared with 85 per cent last year.

Central Provinces and Berar (**6·3 per cent** of the total area under rice in British India).—The total area is estimated at 5,097,000 acres as against 5,083,000 acres last year. The total yield is estimated at 1,693,000 tons as against 1,655,000 tons last year, showing an increase of 2 per cent. Sowings were made under favourable conditions, but a break seriously interrupted transplanting operations, and insects caused a little damage in Chattisgarh. Subsequent heavy rainfall, however, enabled the cultivators to complete transplanting operations, and though the crop was distinctly late, the excellent rain in September and the beginning of October immensely benefited the plants. Seasonal conditions were, on the whole, favourable for rice. Bhandara had a 150 per cent crop, and the outturn in Damoh, Jubbulpur, Seoni, Narsinghpur, Wardha, Chanda, Drug, Raipur, and Yeotmal ranged from 101 to 110 per cent, and in the remaining districts a 120 per cent crop was reaped. The provincial outturn works out to 117 per cent of the normal as against 115 per cent last year.

Assam (**5·9 per cent** of the total area under rice in British India).—The total area under winter rice is estimated at 3,102,000 acres as against 3,104,000 acres last year. The total yield is estimated at 1,089,000 tons, which is 5 per cent below last year's yield. The season opened unfavourably, but conditions improved since the October forecast was issued. The weather was seasonable in November and December, there being little rain. In Darrang a bumper crop is estimated, while the outturn in Lakhimpur, Sibsagar, and Nowgong is either slightly above normal or normal. The district estimates indicate an average outturn of 78 per cent of the normal for the province, as against 86 per cent last year.

If the figures for the summer and autumn rice, given in the December forecast and reproduced in the appended table, were added to the figures of winter rice above, the total area and yield of all kinds of rice in Assam would amount to 4,051,000 acres and 1,334,000 tons as against 4,045,000 acres and 1,420,000 tons last year, showing a decrease of 0·1 per cent in area and 6 per cent in yield.

Bombay (**2·3 per cent** of the total area under rice in British India).—The area and yield of the spring rice in the districts of Kanara, Ratnagiri, and Belgaum are estimated at 15,000 acres and 8,000 tons, which are the same as in the preceding year.

With the figures for the autumn rice given in the December forecast, the total area and yield of both kinds of rice in Bombay come to 2,165,000 acres and 1,000,000 tons as against 2,650,000 acres and 1,396,000 tons last year, or a decrease of 18 per cent in area and 28 per cent in yield.

Sind (**1·4 per cent** of the total area under rice in British India).—As stated in the December forecast, the total area sown is 1,042,000 acres (7,000 acres being in the Khairpur State), which is about 7 per cent below last year's area. The total yield is 380,000 tons as against 406,000 tons last year, showing a decrease of 6 per cent.

Coorg (**0·1 per cent** of the total area under rice in British India).—The total area sown is 82,000 acres, which is 1 per cent above last year's area. The total outturn is reported to be 53,000 tons, which is practically the same as last year.

Exports.—The figures below state the total quantity of rice exported from British India to foreign countries by sea in the last five calendar years :—

Year	From Burma	From Bengal and Bihar and Orissa	From Madras, Bombay and Sind	Total
	tons	tons	tons	tons
1911 . .	1,936,900	448,700	204,900	2,590,500
1912 . .	2,086,300	553,000	171,000	2,810,300
1913 . .	1,955,300	389,300	234,300	2,578,900
1914 . .	1,499,900	262,200	259,500	2,021,600
1915 . .	888,900	83,400	314,100	1,286,400

The coastwise exports from Burma to Indian ports in the same years have been :—

	tons
1911	293,700
1912	188,200
1913	768,900
1914	1,072,400
1915	1,351,100

Chart.—The chart below illustrates the present figures of area and yield as compared with those of the preceding nine years.

Rice Crop in Foreign Countries.—From the latest information published in January by the International Institute of Agriculture, Rome, it appears that in Japan the total area under rice is estimated at 7,559,000 acres and the yield at 9,893,000 tons as against 7,431,000 acres and 10,125,000 tons last year. In the United States of America the total area and yield are estimated at 803,000 acres and 580,000 tons as against 693,000 acres and 474,000 tons last year. In Italy the estimates are 356,000 acres and 551,000 tons as against 361,000 acres and 535,000 tons last year. In Egypt the total area is estimated at 331,000 acres as against 37,000 acres last year.

From unofficial sources it appears that the rice crop in Korea is estimated at 1,572,000 tons as against 1,689,000 tons last year. In Formosa the total crop of the year is estimated at 694,000 tons and the exportable surplus at 208,000 tons. The rice crop in the Philippines promises well. The prospects of the Indo-China crop for 1915 are bright as the harvest is said to have been much above the average.

AREA AND YIELD OF RICE

G. FINDLAY SHIRRAS,
Director of Statistics

Final Estimate of the Rice Crop of 1915-16

Provinces	Area (in acres)			Increase (+) or Decrease (—) in the current year over

PART I.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Delhi, the 9th March, 1916.

No. 15.—With reference to Notification No. 70, dated the 25th October, 1915, the Hon'ble Mr. A. P. Muddiman, C.I.E., of the Indian Civil Service, is confirmed in the appointment of Secretary to the Government of India in the Legislative Department.

H. M. SMITH,
Deputy Secretary to the Government of India.

The 10th March, 1916.

No. 16.—The following Statute is published for general information :—

Army (Suspension of Sentences) Amendment Act, 1916.

(5 and 6 Geo. 5, Ch. 103.)

An Act to amend the Army (Suspension of Sentences) Act, 1915.

[*27th January, 1916.*]

Be it enacted by the King's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :—

ndment of 5 5, c. 23, s. 1.

1.—(1) The Army Council, and any general officer whom the Army Council may appoint for the purpose, shall be a superior military authority within the meaning of the Army (Suspension of Sentences) Act, 1915.

(2) Sub-section (5) of section 1 of that Act shall have effect, and shall be deemed always to have had effect, as if for the words "intervals of not less than three months" there were substituted the words "intervals of not more than three months," and sub-section (8) as if for the words 'superior authority" there were substituted the words "superior military authority."

title.

2. This Act may be cited as the Army (Suspension of Sentences) Amendment Act, 1916, and the Army (Suspension of Sentences) Act, 1915, and this Act may be cited together as the Army (Suspension of Sentences) Acts, 1915 and 1916.

A. P. MUDDIMAN,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATION.

POLITICAL.

Delhi, the 7th March 1916.

No 900.—In exercise of the powers conferred by the Ingress into India Ordinance, 1914 (V of 1914), read with the Foreigners Ordinance, 1914 (III of 1914), and the Emergency Legislation Continuance Act, 1915 (I of 1915), and in modification of the Notification of the Government of India in the Home Department no. 1374, dated the 12th September 1914, the Governor General in Council is pleased to delegate to the Commissioner in Sind in regard to the area administered by him the powers delegated to the local Government of Bombay under the said notification.

H. WHEELER,
Secretary to the Government of India.

DEPARTMENT OF EDUCATION.

NOTIFICATION.

Gordon Ericksen Hansen, attached 52nd Sikhs. Dated 19th November 1915.

Frederick Rutley Walker, attached 31st Punjabis. Dated 18th November 1915.

And whereas by a Proclamation, dated the 28th day of July 1915, and made under section 8 of the Customs and Inland Revenue Act, 1879, and section 1 of the Exportation of Arms Act, 1900, and section 1 of the Customs (Exportation Prohibition) Act, 1914, the exportation from the United Kingdom of certain articles to certain or all destinations was prohibited :

And whereas by subsequent Orders of Council the said Proclamation was amended and added to in certain particulars :

And whereas there was this day read at the Board a recommendation from the Board of Trade to the following effect :—

That the Proclamation, dated the 28th day of July 1915, as amended and added to by subsequent Orders of Council, should be further amended by making the following amendments in and additions to the same :—

(1) That the exportation of the following goods should be prohibited to all destinations :—

Cotton rags ;

Linen rags ;

Waste paper.

(2) That the heading "Railway waggons" in the list of goods the exportation of which is prohibited to all destinations abroad other than British Possessions and Protectorates should be deleted, and there be substituted therefor the heading :—

Railway waggons and their component parts.

(3) That the exportation of the following goods should be prohibited to all foreign countries in Europe and on the Mediterranean and Black Seas, other than France, Russia (except through Baltic ports), Italy, Spain and Portugal :—

Canes and sticks, unmounted, whether for basket making or not ;

Cordage and twine of Manila hemp ;

Europhen ;

Files ;

Pocket lamp cases and cases fitted with bulbs but not containing batteries ;

Rum and imitation rum.

Now, therefore, Their Lordships, having taken the said recommendation into consideration, are pleased to order, and it is hereby ordered, that the same be approved.

Whereof the Commissioners of His Majesty's Customs and Excise, the Director of the War Trade Department, and all other persons whom it may concern, are to take notice and govern themselves accordingly.

ALMERIC FITZROY.

The 11th March 1916.

Penry Gerard Willoughby Bullock, attached 22nd Sam Browne's Cavalry (Frontier Force). Dated 28th November 1915.

ARMY RESERVES.

No. 266.—Second Lieutenant Thomas Griffin, Indian Army Reserve of Officers, is granted the temporary rank of Captain, subject to His Majesty's approval, with effect from the 1st March 1916.

No. 267.—Second Lieutenant Stanley Lewin Nathan, Indian Army Reserve of Officers, is granted the temporary rank of Lieutenant, while holding the appointment of Commandant, Prisoners of War Camp, Indian Expeditionary Force "D," subject to His Majesty's approval, with effect from the 9th January 1916.

No. 268.—The following officers of the Indian Army Reserve of Officers, appointed from the Territorial Force, are granted the temporary rank of Lieutenant, subject to His Majesty's approval, with effect from the dates shewn against their names :—

Second Lieutenant Marcus Hamilton Raikes, from the 7th August 1915, but to rank from the 10th November 1914.

Second Lieutenant Wilfred Harold Swift, from the 6th September 1915, but to rank from the 1st April 1915.

Second Lieutenant William Leonard Pollard Willison, from the 6th September 1915, but to rank from the 1st April 1915.

No. 269.—The following gentlemen are appointed to the Indian Army Reserve of Officers, subject to His Majesty's approval :—

To be Second Lieutenants.

Cavalry Branch.

Robert George Cazalet.	Dated 1st March 1916.
George Howitt Rothera.	Dated 4th March 1916.
Arthur Kirke Smith.	
Lionel Douglas William Hearsey.	Dated 10th March 1916.
George Ingles.	

Infantry Branch.

Herbert George Clark.	Dated 1st January 1916.
James Arthur Dooley.	Dated 21st February 1916.
Reginald Lloyd Herbert.	Dated 28th February 1916.
David James Harrison.	Dated 29th February 1916.
George Weston Clements.	Dated 8th March 1916.

No. 270.—The date of appointment of Hugh Watson as a Lieutenant in the Infantry Branch of the Indian Army Reserve of Officers, is the 6th June 1915, and not as stated in Army Department Notification No. 930, dated the 24th September 1915.

LONDON GAZETTE.

No. 271.—The following extracts are published for general information :—

Second Supplement, dated the 6th January 1916, to the "London Gazette" of the 4th January 1916.

War Office,

6th January 1916.

The following despatch has been received by the Secretary of State for War from General Sir Ian Hamilton, G.C.B.

1, Hyde Park Gardens,
London, W.,
11th December 1915.

MY LORD—

For the understanding of the operations about to be described I must first set forth the situation as it appeared to me early in July.

The three days' battle of the 6th-8th May had shown that neither of my forces, northern or southern, were strong enough to fight their way to the Narrows. On the 10th of May I had cabled asking that two fresh divisions might be sent me to enable me to press on and so prevent my attack degenerating into trench warfare. On the 17th of May I again cabled, saying that if we were going to be left to face Turkey on our own resources we should require two Army Corps additional to my existing forces at the Dardanelles. The 52nd (Lowland) Division had been sent me, but between their dates of despatch and arrival Russia had given up the idea of co-operating from the coast of the Black Sea. Thereby several Turkish divisions were set free for the Dardanelles, and the battle of the 4th June, locally successful as it was, found us just as weak, relatively, as we had been a month earlier.

During June Your Lordship became persuaded of the bearing of these facts and I was promised three regular divisions plus the infantry of two Territorial divisions. The advance guard of these troops was due to reach Mudros by the 10th of July; by the 10th of August their concentration was to be complete.

Eliminating the impracticable, I had already narrowed down the methods of employing these fresh forces to one of the following four :—

(*a*) Every man to be thrown on to the southern sector of the Peninsula to force a way forward to the Narrows.

(*b*) Disembarkation on the Asiatic side of the Straits, followed by a march on Chanak.

(*c*) A landing at Enos or Ebrije for the purpose of seizing the neck of the isthmus at Bulair.

(*d*) Reinforcement of the Australian and New Zealand Army Corps, combined with a landing in Suvla Bay. Then with one strong push to capture Hill 305, and, working from that dominating point, to grip the waist of the Peninsula.

As to (*a*) I rejected that course—

(1) Because there were limits to the numbers which could be landed and deployed in one confined area.

(2) Because the capture of Krithia could no longer be counted upon to give us Achi Baba, an entirely new system of works having lately appeared upon the slopes of that mountain—works so planned that even if the enemy's western flank was turned and driven back from the coast the central and eastern portions of the mountain could still be maintained as a bastion to Kilid Bahr.

(3) Because, if I tried to disengage myself both from Krithia and Achi Baba by landing due west of Kilid Bahr, my troops would be exposed to artillery fire from Achi Baba, the Olive Grove, and Kilid Bahr itself; the enemy's large reserves were too handy; there were not fair chances of success.

As to (*b*), although much of the Asiatic coast had now been wired and entrenched, the project was still attractive. Thereby the Turkish forces on the peninsula would be weakened;

our beaches at Cape Helles would be freed from Asiatic shells; the threat to the enemy's sea communications was obvious. But when I descended into detail I found that the expected reinforcements would not run to a double operation. I mean that, unless I could make a thorough, whole-hearted attack on the enemy in the peninsula I should reap no advantage in that theatre from the transference of the Turkish peninsula troops to reinforce Asia, whereas, if the British forces landed in Asia were not strong enough in themselves seriously to threaten Chanak, the Turks for their part would not seriously relax their grip upon the peninsula.

To cut the land communications of the whole of the Turkish peninsular army, as in (*c*), was a better scheme on paper than on the spot. The naval objections appeared to my co-adjutor, Vice-Admiral de Robeck, well-nigh insurmountable. Already, owing to submarine dangers, all reinforcements, ammunition and supplies had to be brought up from Mudros to Helles or Anzac by night in fleet-sweepers and trawlers. A new landing near Bulair would have added another 50 miles to the course such small craft must cover, thus placing too severe a strain upon the capacities of the flotilla. The landing promised special hazards owing to the difficulty of securing the transports and covering ships from submarine attack. Ibrije has a bad beach, and the distance to Enos, the only point suitable to a disembarkation on a large scale, was so great that the enemy would have had time to organise a formidable opposition from his garrisons in Thrace. Four divisions at least would be required to overcome such opposition. These might now be found; but, even so, and presupposing every other obstacle overcome, it was by no manner of means certain that the Turkish army on the peninsula would thereby be brought to sue for terms, or that the Narrows would thereby be opened to the Fleet. The enemy would still be able to work supplies across the Straits from Chanak. The swiftness of the current, the shallow draft of the Turkish lighters, the guns of the forts, made it too difficult even for our dauntless submarine commanders to paralyse movement across these land locked waters. To achieve that purpose I must bring my artillery fire to bear both on the land— and water communications of the enemy.

This brings me to (*d*), the storming of that dominating height, Hill 305, with the capture of Maidos and Gaba Tepe as its sequel.

From the very first I had hoped that by landing a force under the heights of Sari Bair we should be able to strangle the Turkish communications to the southwards, whether by land or sea, and so clear the Narrows for the Fleet. Owing to the enemy's superiority, both in numbers and in position; owing to underestimates of the strength of the original entrenchments prepared and sited under German direction; owing to the constant dwindling of the units of my force through wastage; owing also to the intricacy and difficulty of the terrain, these hopes had not hitherto borne fruit. But they were well founded. So much at least had clearly enough been demonstrated by the desperate and costly nature of the Turkish attacks. The Australians and New Zealanders had rooted themselves in very near to the vitals of the enemy By their tenacity and courage they still held open the doorway from which one strong thrust forward might give us command of the Narrows.

From the naval point of view the auspices were also favourable. Suvla Bay was but one mile further from Mudros than Anzac, and its possession would ensure us a submarine-proof base and a harbour good against gales, excepting those from the south-west. There were, as might be expected, some special difficulties to be overcome. The broken, intricate country— the lack of water—the consequent anxious supply questions. Of these it can only be said that a bad country is better than an entrenched country, and that supply and water problems may be countered by careful preparation.

Before a man of the reinforcements had arrived my mind was made up as to their employment, and by means of a vigorous offensive from Anzac, combined with a surprise landing to the north of it, I meant to try and win through to Maidos, leaving behind me a well-protected line of communications starting from the bay of Suvla.

Another point which had to be fixed in advance was the date. The new troops would gain in fighting value if they could first be given a turn in the trenches. So much was clear. But the relief of the troops already holding those trenches would have been a long and difficult task for the Navy, and time was everything, seeing that everywhere the enemy was digging in as fast as he possibly could dig. Also, where large numbers of troops were to be smuggled into Anzac and another large force was to land by surprise at Suvla, it was essential to eliminate the moon. Unless the plunge could be taken by the second week in August the whole venture must be postponed for a month. The dangers of such delay were clear. To realise them I had only to consider how notably my prospects would have been bettered had these same reinforcements arrived in time to enable me to anticipate the moon of July.

Place and date having shaped themselves, the intervening period had to be filled in with as much fighting as possible. First, to gain ground; secondly, to maintain the moral ascendancy which my troops had by this time established; thirdly, to keep the enemy's eyes fixed rather upon Helles than Anzac.

Working out my ammunition allowance, I found I could accumulate just enough high explosive shell to enable me to deliver one serious attack per each period of three weeks. I was thus limited to a single effort on the large scale, plus a prescribed unceasing offensive routine, with bombing, sniping and mining as its methods.

The action of the 12th and 13th of July was meant to be a sequel to the action of the 28th June. That advance had driven back the Turkish right on to their second main system of defence just south of Krithia. But, on my centre and right, the enemy still held their

forward system of trenches, and it was my intention on the 12th July to seize the remaining trenches of this foremost system from the sea at the mouth of the Kereves Dere to the main Sedd-el-Bahr-Krithia road, along a front of some 2,000 yards.

On our right the attack was to be entrusted to the French Corps; on the right centre to the 52nd (Lowland) Division. On the 52nd Division's front the operation was planned to take place in two phases: our right was to attack in the morning, our left in the afternoon. Diversions by the 29th Division on the left of the southern section and at Anzac were to take place on the same day, so as to prevent the enemy's reserves from reinforcing the real point of attack.

At 7-35 A.M., after a heavy bombardment, the troops, French and Scottish, dashed out of their trenches and at once captured two lines of enemy trenches. Pushing forward with fine *élan* the 1st Division of the French Corps completed the task assigned to it by carrying the whole of the Turkish forward system of works, namely, the line of trenches skirting the lower part of the Kereves Dere. Further to the left the 2nd French Division and our 155th Brigade maintained the two lines of trenches they had gained. But on the left of the 155th Brigade the 4th Battalion, King's Own Scottish Borderers, pressed on too eagerly. They not only carried the third line of trenches, but charged on up the hill and beyond the third line, then advanced indeed until they came under the "feu de barrage" of the French artillery. Nothing could live under so cruel a cross fire from friend and foe, so the King's Own Scottish Borderers were forced to fall back with heavy losses to the second line of enemy trenches which they had captured in their first rush.

During this fighting telephone wires from forward positions were cut by enemy's shell fire, and here and there in the elaborate network of trenches numbers of Turks were desperately resisting to the last. Thus though the second line of captured trenches continued to be held as a whole, much confused fighting ensued; there were retirements in parts of the line, reserves were rapidly being used up, and generally the situation was anxious and uncertain. But the best way of clearing it up seemed to be to deliver the second phase of the attack by the 157th Brigade just as it had originally been arranged. Accordingly, after a preliminary bombardment, the 157th Brigade rushed forward under heavy machine-gun and rifle fire, and splendidly carried the whole of the enemy trenches allotted as their objective. Here, then, our line had advanced some 400 yards, while the 155th Brigade and the 2nd French Division had advanced between 200 and 300 yards. At 6 P.M., the 52nd Division was ordered to make the line good; it seemed to be fairly in our grasp.

All night long determined counter-attacks, one after another, were repulsed by the French and the 155th Brigade, but about 7-30 A.M., the right of the 157th Brigade gave way before a party of bombers, and our grip upon the enemy began to weaken.

I therefore decided that three battalions of the Royal Naval Division should reinforce a fresh attack to be made that afternoon, 13th July, on such portions of our original objectives as remained in the enemy's hands. This second attack was a success. The 1st French Division pushed their right down to the mouth of the Kereves Dere; the 2nd French Division attacked the trenches they had failed to take on the preceding day; the Nelson Battalion, on the left of the Royal Naval Division attack, valiantly advanced and made good, well supported by the artillery of the French. The Portsmouth Battalion, pressing on too far, fell into precisely the same error at precisely the same spot as did the 4th King's Own Scottish Borderers on the 12th, an over-impetuosity which cost them heavy losses.

The 1/5th Royal Scots Fusiliers, commanded by Lieutenant-Colonel J. B. Pollok-McCall; the 1/7th Royal Scots, commanded by Lieutenant-Colonel W. C. Peebles; the 1/5th King's Own Scottish Borderers, commanded by Lieutenant-Colonel W. J. Millar; and the 1/6th Highland Light Infantry, commanded by Major J. Anderson, are mentioned as having specially distinguished themselves in this engagement.

Generally, the upshot of the attack was this. On our right and on the French left two lines had been captured, but in neither case was the third, or last, line of the system in their hands. Elsewhere a fine feat of arms had been accomplished, and a solid and enduring advance had been achieved giving us far the best sited line for defence with much the best field for machine-gun and rifle fire we had hitherto obtained upon the peninsula.

A machine-gun and 200 prisoners were captured by the French; the British took a machine-gun and 329 prisoners. The casualties in the French Corps were not heavy, though it is with sorrow that I have to report the mortal wound of General Masnou, commanding the 1st Division. Our own casualties were a little over 3,000; those of the enemy about 5,000.

On 17th July Lieutenant-General Hunter Weston, commanding the 8th Corps, left the peninsula for a few days' rest, and, to my very deep regret, was subsequently invalided home. I have already drawn attention to his invincible self-confidence; untiring energy and trained ability.

As I was anxious to give the Commander of the new troops all the local experience possible I appointed Lieutenant-General Hon. Sir Frederick Stopford, whose own Corps were now assembling at Mudros, temporarily to succeed Lieutenant-General Hunter Weston, but on July 24th, when General Stopford had to set to work with his own Corps, Major-General W. Douglas, General Officer Commanding, 42nd Division, took over temporary command of the 8th Corps; while Major-General W. R. Marshall, General Officer Commanding, 87th Brigade, assumed temporary command of the 42nd Division.

Only one other action need be mentioned before coming to the big operations of August. On the extreme right of Anzac the flank of a work called Tasmania Post was threatened by the extension of a Turkish trench. The task of capturing this trench was entrusted to the 3rd Australian Brigade. After an artillery bombardment, mines were to be fired, whereupon four columns of 50 men each were to assault and occupy specified lengths of the trench. The regiment supplying the assaulting columns was the 11th Australian Infantry Battalion.

At 10-15 P.M. on 31st July the bombardment was opened. Ten minutes later and the mines were duly fired. The four assaulting parties dashed forward at once, crossed our own barbed wire on planks, and were into the craters before the whole of the débris had fallen. Total casualties: 11 killed and 74 wounded; Turkish killed, 100.

By the time this action was fought a large proportion of my reinforcements had arrived, and, on the same principle which induced me to put General Stopford in temporary command at Helles, I relieved the war-worn 29th Division at the same place by the 13th Division under Major-General Shaw. The experiences here gained, in looking after themselves, in forgetting the thousand and one details of peace soldiering and in grasping the two or three elementary rules of conduct in war soldiering, were, it turned out, to be of priceless advantage to the 13th Division throughout the heavy fighting of the following month.

And now it was time to determine a date for the great venture. The moon would rise on the morning of the 7th at about 2 A.M. A day or two previously the last reinforcements, the 53rd and 54th Divisions, were due to arrive. The first day of the attack was fixed for the 6th of August.

Once the date was decided a certain amount of ingenuity had to be called into play so as to divert the attention of the enemy from my main strategical conception. This—I repeat for the sake of clearness—was:—

(1) To break out with a rush from Anzac and cut off the bulk of the Turkish Army from land communication with Constantinople.

(2) To gain such a command for my artillery as to cut off the bulk of the Turkish Army from sea traffic whether with Constantinople or with Asia.

(3) Incidentally, to secure Suvla Bay as a winter base for Anzac and all the troops operating in the northern theatre.

My schemes for hoodwinking the Turks fell under two heads: First, strategical diversions meant to draw away enemy reserves not yet committed to the peninsula. Secondly, tactical diversions meant to hold up enemy reserves already on the peninsula. Under the first heading came a surprise landing by a force of 300 men on the northern shore of the Gulf of Xeros; demonstrations by French ships opposite Mitylene along the Syrian coast; concentration at Mitylene; inspections at Mitylene by the Admiral and myself; making to order of a whole set of maps of Asia and Egypt, as well as secret service work, most of which bore fruit. Amongst the tactical diversions were a big containing attack at Helles Soundings, registration of guns, etc., by Monitors between Gaba Tepe and Kum Tepe. An attack to be carried out by Anzac on Lone Pine trenches, which lay in front of their right wing and as far distant as the local terrain would admit from the scene of the real battle. Thanks entirely to the reality and vigour which the Navy and the troops threw into them, each one of these ruses was, it so turned out, entirely successful, with the result that the Turks, despite their excellent spy system, were caught completely off their guard at dawn on the 7th of August.

Having settled upon the manner and time of the diversions, orders had to be issued for the main operation. And here I must pause a moment to draw your Lordship's attention to the extraordinary complexity of the staff work caused by the unique distribution of my forces. Within the narrow confines of the positions I held on the peninsula it was impossible to concentrate even as much as one-third of the fresh troops about to be launched to the attack. Nor could Mudros and Imbros combined absorb the whole of the remainder. The strategic concentration which precedes a normal battle had in my case to be a very wide dispersion. Thus of the forces destined for my offensive, on the day before the battle, part were at Anzac, part at Imbros, part at Mudros, and part at Mitylene. These last three detachments were separated respectively by 14, 60 and 120 miles of sea from the arena into which they were simultaneously to appear. To ensure the punctual arrival of all these masses of inexperienced troops at the right moment and spot, together with their material, munitions, stores, supplies, water, animals and vehicles, was a prodigious undertaking demanding not only competence, but self-confidence; and I will say for my General Staff that I believe the clearness and completeness of their orders for this concentration and landing will hereafter be studied as models in military academies. The need for economy in sea transport, the awkwardness and restriction of open beaches, the impossibility of landing guns, animals or vehicles rapidly—all these made it essential to create a special, separate organisation for every single unit taking part in the adventure. A pack mule corps to supply 80,000 men had also to be organised for that specific purpose until such time as other transport could be landed.

As to water, that element of itself was responsible for a whole chapter of preparations. An enormous quantity had to be collected secretly, and as secretly stowed away at Anzac, where a high-level reservoir had to be built, having a holding capacity of 30,000 gallons, and fitted out with a regular system of pipes and distribution tanks. A stationary engine

was brought over from Egypt to fill that reservoir. Petroleum tins, with a carrying capacity of 80,000 gallons were got together, and fixed up with handles, etc., but the collision of the "Moorgate" with another vessel delayed the arrival of large numbers of these just as a breakdown in the stationary engine upset for a while the well-laid plan of the high-level reservoir. But Anzac was ever resourceful in face of misadventures, and when the inevitable accidents arose it was not with folded hands that they were met.

Turning to Suvla Bay, it was believed that good wells and springs existed both in th Biyuk, Anafarta Valley and in Suvla Plain. But nothing so vital could possibly be left to hearsay, and although, as it turned out, our information was perfectly correct, yet the War Office were asked to despatch with each reinforcing division water receptacles for pack transport at the rate of half a gallon per man.

The sheet-anchor on which hung the whole of these elaborate schemes was the Navy. One tiny flaw in the perfect mutual trust and confidence animating the two services would have wrecked the whole enterprise. Experts at a distance may have guessed as much; it was self-evident to the rawest private on the spot. But with men like Vice-Admiral de Robeck, Commodore Roger Keyes, Rear-Admiral Christian and Captain F. H. Mitchell at our backs, we soldiers were secured against any such risk, and it will be seen how perfect was the precision the sailors put into their job.

The hour was now approaching, and I waited for it with as much confidence as is possible when to the inevitable uncertainties of war are to be added those of the weather. Apart from feints, the first blow was to be dealt in the southern zone

In that theatre I had my own Poste de Commandement. But upon the 6th of August attacks in the south were only to form a subsidiary part of one great concerted attack Anzac was to deliver the knock-down blow; Helles and Suvla were complementary operations. Were I to commit myself at the outset to any one of these three theatres I must lose my sense of proportion Worse, there being no lateral communication between them, as soon as I landed at one I was cut off from present touch with both of the others. At Imbros I was 45 minutes from Helles, 40 minutes from Anzac, and 50 minutes from Suvla. Imbros was the centre of the cable system, and thence I could follow each phase of the triple attack and be ready with my two divisions of reserve to throw in reinforcements where they seemed most to be required. Therefore I decided to follow the opening moves from General Headquarters.

At Helles the attack of the 6th was directed against 1,200 yards of the Turkish front opposite our own right and right centre, and was to be carried out by the 88th Brigade of the 29th Division. Two small Turkish trenches enfilading the main advance had, if possible, to be captured simultaneously, an affair which was entrusted to the 42nd Division.

After bombardment the infantry assaulted at 3-50 P.M. On the left large sections of the enemy's line were carried, but on our centre and right the Turks were encountered in masses, and the attack, pluckily and perseveringly as it was pressed, never had any real success. The 1st Battalion, Essex Regiment, in particular forced their way into the crowded enemy trench opposite them, despite the most determined resistance, but, once in, were subjected to the heaviest musketry fire from both flanks, as well as in reverse, and were shattered by showers of bombs. Two separate resolute attacks were made by the 42nd Division, but both of them recoiled in face of the unexpected volume of fire developed by the Turks.

After dark officer's patrols were sent up to ascertain the exact position of affairs. Heavy Turkish counter-attacks were being pressed against such portions of the line we still retained. Many of our men fought it out where they stood to the last, but by nightfall none of the enemy's line remained in our possession.

Our set-back was in no wise the fault of the troops. That ardour which only dashed itself to pieces against the enemy's strong entrenchments and numerous, stubborn defenders on the 6th of August would, a month earlier, have achieved notable success. Such was the opinion of all. But the *moral*, as well as the strength of the Turks, had had time to rise to great heights since our last serious encounters with them on the 21st and 28th of June and on the 12th of July. On those dates all ranks had felt, as an army feels, instinctively, yet with certitude, that they had fairly got the upper hand of the enemy, and that, given the wherewithal, they could have gone on steadily advancing. Now that self-same, half-beaten enemy were again making as stout a resistance as they had offered us at our original landing!

For this recovery of the Turks there were three reasons: one moral, one material, and one fortuitous.

(1) The news of the enemy's advance on the Eastern front had come to hand and had been advertised to us on posters from the Turkish trenches before we heard about it from home.

(2) Two new divisions had come down south to Helles to replace those we had most severely handled.

(3) The enemy trenches selected for our attack were found to be packed with troops and so were their communication trenches, the reason being, as explained to us by prisoners, that the Turkish Commander had meant to launch from them an attack upon us. We had, in fact, by a coincidence as strange as it was unlucky, anticipated a Turkish offensive by an hour or two at most!

Sure enough, next morning, the enemy in their turn attacked the left of the line from which our own troops had advanced to the assault. A few of them gained a footing in our trenches and were all killed or captured. The remainder were driven back by fire.

As the aim of my action in this southern zone was to advance if I could, but in any case to contain the enemy and prevent him reinforcing to the northwards, I persevered on the 7th with my plans, notwithstanding the counter-attack of the Turks which was actually in progress. My objective this time was a double line of Turkish trenches on a front of about 800 yards between the Mal Tepe Dere and the west branch of the Kanli Dere. After a preliminary bombardment the troops of the 125th Brigade on the right and the 129th on the left made the assault at 9-40 A.M. From the outset it was evident that the enemy were full of fight and in great force, and that success would only be gained after a severe struggle. On the right and on the centre the first enemy line was captured, and small parties pushed on to the second line, where they were unable to maintain themselves for long. On the left but little ground was gained, and by 11 A.M., what little had been taken had been relinquished. But in the centre a stiff battle raged all day up and down a vineyard some 200 yards long by 100 yards broad on the west of the Krithia road. A large portion of the vineyard had been captured in the first dash, and the East Lancashire men in this part of the field gallantly stood their ground here against a succession of vigorous counter-attacks. The enemy suffered very severely in these counter-attacks, which were launched in strength and at short intervals. Both our Brigades had also lost heavily during the advance and in repelling the fierce onslaughts of the enemy, but, owing to the fine endurance of the 6th and 7th Battalions of the Lancashire Fusiliers, it was found possible to hold the vineyard through the night, and a massive column of the enemy which strove to overwhelm their thinned ranks was shattered to pieces in the attempt.

On 8th August Lieutenant-General Sir F. J. Davies took over command of the 8th Army Corps, and Major-General W. Douglas reverted to the command of the 42nd Division. For two more days his troops were called upon to show their qualities of vigilance and power of determined resistance, for the enemy had by no means yet lost hope of wresting from us the ground we had won in the vineyard. This unceasing struggle was a supreme test for battalions already exhausted by 48 hours' desperate fighting and weakened by the loss of so many good leaders and men; but the peculiar grit of the Lancastrians was equal to the strain, and they did not fail. Two specially furious counter-attacks were delivered by the Turks on the 8th August, one at 4-40 A.M., and another at 8-30 P.M., where again our bayonets were too much for them. Throughout the night they made continuous bomb attacks, but the 6th Lancashire Fusiliers and the 4th East Lancashire Regiment stuck gamely to their task at the eastern corner of the vineyard. There was desparate fighting also at the northern corner, where the personal bravery of Lieutenant W. T. Forshaw, 1-9th Manchester Regiment who stuck to his post after his detachment had been relieved (an act for which he has since been awarded the V.C.), was largely instrumental in the repulse of three very determined onslaughts.

By the morning of the 9th August things were quieter, and the sorely tried troops were relieved. On the night of the 12th—13th the enemy made one more sudden, desperate dash for their vineyard—and got it! But, on the 13th, our bombers took the matter in hand. The Turks were finally driven out; the new fire trenches were wired and loopholed, and have since become part of our line.

These two attacks had served their main purpose. If the local successes were not all that had been hoped for, yet a useful advance had been achieved, and not only had they given a fresh, hard fighting enemy more than he had bargained for, but they had actually drawn down Turkish reinforcements to their area. And how can a Commander say enough for the troops who, aware that their task was only a subsidiary one, fought with just as much vim and resolution as if they were storming the battlements of Constantinople.

I will now proceed to tell of the assault on Chunuk Bair by the forces under General Birdwood and of the landing of the 9th Corps in the neighbourhood of Suvla Bay. The entire details of the operations allotted to the troops to be employed in the Anzac area were formulated by Lieutenant-General Birdwood, subject only to my final approval. So excellently was this vital business worked out on the lines of the instructions issued that I had no modifications to suggest, and all these local preparations were completed by August 6th in a way which reflects the greatest credit, not only on the Corps Commander and his staff, but also upon the troops themselves, who had to toil like slaves to accumulate food, drink and munitions of war. Alone the accommodation for the extra troops to be landed necessitated an immense amount of work in preparing new concealed bivouacs, in making interior communications, and in storing water and supplies, for I was determined to put on shore as many fighting men as our modest holding at Anzac could possibly accommodate or provision. All the work was done by Australian and New Zealand soldiers almost entirely by night, and the uncomplaining efforts of these much-tried troops in preparation are in a sense as much to their credit as their heroism in the battles that followed. Above all, the water problem caused anxiety to the Admiral, to Lieutenant-General Birdwood and to myself. The troops to advance from Suvla Bay across the Anafarta valley might reckon on finding some wells—it was certain, at least, that no water was waiting for us on the crests of the ridges of Sari Bair! Therefore, first, several days' supply had to be stocked into tanks along the beach and thence pumped up into other tanks half-way up the mountains; secondly, a system of mule transport had to be worked out, so that in so far as was humanly possible, thirst should not be

allowed to overcome the troops after they had overcome the difficulties of the country and the resistance of the enemy.

On the nights of the 4th, 5th, and 6th August the reinforcing troops were shipped into Anzac very silently at the darkest hours. Then, still silently, they were tucked away from enemy aeroplanes or observatories in their prepared hiding places. The whole sea route lay open to the view of the Turks upon Achi Baba's summit and Battleship Hill. Aeroplanes could count every tent and every ship at Mudros or at Imbros. Within rifle fire of Anzac's open beach hostile riflemen were looking out across the Ægean no more than twenty feet from our opposing lines. Every modern appliance of telescope, telegraph, wireless was at the disposal of the enemy. Yet the instructions worked out at General Headquarters in the minutest detail (the result of conferences with the Royal Navy, which were attended by Brigadier-General Skeen, of General Birdwood's Staff) were such that the scheme was carried through without a hitch. The preparation of the ambush was treated as a simple matter by the services therein engaged, and yet I much doubt whether any more pregnant enterprise than this of landing so large a force under the very eyes of the enemy, and of keeping them concealed there three days, is recorded in the annals of war.

The troops now at the disposal of General Birdwood amounted in round numbers to 37,000 rifles and 72 guns, with naval support from two cruisers, four monitors and two destroyers. Under the scheme these troops were to be divided into two main portions. The task of holding the existing Anzac position, and of making frontal assaults therefrom, was assigned to the Australian Division (plus the 1st and 3rd Light Horse Brigades and two battalions of the 40th Brigade); that of assaulting the Chunuk Bair ridge was entrusted to the New Zealand and Australian Division (less the 1st and 3rd Light Horse Brigades), to the 13th Division (less five battalions), and to the 29th Indian Infantry Brigade and to the Indian Mountain Artillery Brigade. The 29th Brigade of the 10th Division (less one battalion) and the 38th Brigade were held in reserve.

The most simple method of developing this complicated series of operations will be first to take the frontal attacks from the existing Anzac position, and afterwards to go on to the assault on the more distant ridges. During the 4th, 5th and 6th of August the works on the enemy's left and centre were subjected to a slow bombardment, and on the afternoon of the 6th August an assault was made upon the formidable Lone Pine entrenchment. Although, in its essence, a diversion to draw the enemy's attention and reserves from the grand attack impending upon his right, yet, in itself, Lone Pine was a distinct step on the way across to Maidos. It commanded one of the main sources of the Turkish water supply, and was a work, or, rather, a series of works, for the safety of which the enemy had always evinced a certain nervousness. The attack was designed to heighten this impression.

The work consisted of a strong *point d'appui* on the south-western end of a plateau, where it confronted, at distances varying from 60 to 120 yards, the salient in the line of our trenches named by us the Pimple. The entrenchment was evidently very strong; it was entangled with wire, and provided with overhead cover, and it was connected by numerous communication trenches with another *point d'appui* known as Johnston's Jolly on the north as well as with two other works on the east and south. The frontage for attack amounted at most to some 220 yards and the approaches lay open to heavy enfilade fire, both from the north and from the south.

The detailed scheme of attack was worked out with care and forethought by Major-General H. B. Walker, Commanding 1st Australian Division, and his thoroughness contributed, I consider, largely to the success of the enterprise.

The action commenced at 4-30 P.M. with a continuous and heavy bombardment of the Lone Pine and adjacent trenches, H.M.S. "Bacchante" assisting by searching the valleys to the north-east and east, and the Monitors by shelling the enemy's batteries south of Gaba Tepe. The assault had been entrusted to the 1st Australian Brigade (Brigadier-General N. M. Smyth), and punctually at 5-30 P.M. it was carried out by the 2nd, 3rd and 4th Australian Battalions, the 1st Battalion forming the Brigade reserve. Two lines left their trenches simultaneously, and were closely followed up by a third. The rush across the open was a regular race against death, which came in the shape of a hail of shell and rifle bullets from front and from either flank. But the Australians had firmly resolved to reach the enemy's trenches, and in this determination they became for the moment invincible. The barbed wire entanglement was reached and was surmounted. Then came a terrible moment, when it seemed as though it would be physically impossible to penetrate into the trenches. The overhead cover of stout pine beams resisted all individual efforts to move it, and the loopholes continued to spit fire. Groups of our men then bodily lifted up the beams and individual soldiers leaped down into the semi-darkened galleries amongst the Turks. By 5-47 P.M. the 3rd and 4th Battalions were well into the enemy's vitals, and a few minutes later the reserves of the 2nd Battalions advanced over their parados, and driving out, killing or capturing the occupants, made good the whole of the trenches. The reserve companies of the 3rd and 4th Battalions followed, and at 6-20 P.M. the 1st Battalion (in reserve) was launched to consolidate the position.

At once the Turks made it plain, as they have never ceased to do since, that they had no intention of acquiescing in the capture of this capital work. At 7-0 P.M. a determined and violent counter-attack began, both from the north and from the south. Wave upon wave the enemy swept forward with the bayonet. Here and there a well-directed salvo of bombs

emptied a section of a trench, but whenever this occurred the gap was quickly filled by the initiative of the officers and the gallantry of the men.

The enemy allowed small respite. At 1-30 that night the battle broke out afresh. Strong parties of Turks swarmed out of the communication trenches, preceded by showers of bombs. For seven hours these counter-attacks continued. All this time consolidation was being attempted, although the presence of so many Turkish prisoners hampered movement and constituted an actual danger. In beating off these desperate counter-attacks very heavy casualties were suffered by the Australians. Part of the 12th Battalion, the reserve of the 3r Brigade, had therefore to be thrown into the *mêlée*.

Twelve hours later, at 1-30 P.M. on the 7th, another effort was made by the enemy, lasting uninterruptedly at closest quarters till 5 P.M., then being resumed at midnight and proceeding intermittently till dawn. At an early period of this last counter-attack the 4th Battalion were forced by bombs to relinquish portion of a trench, but later on, led by their commanding officer, Lieutenant-Colonel McNaghten, they killed every Turk who had got in.

During the 8th of August advantage was taken of every cessation in the enemy's bombing to consolidate. The 2nd Battalion, which had lost its commanding officer and suffered especially severely, was withdrawn and replaced by the 7th Battalion, the reserve to the 2nd Infantry Brigade.

At 5 A.M. on 9th August the enemy made a sudden attempt to storm from the east and south-east after a feint of fire attack from the north. The 7th Battalion bore the brunt of the shock, and handled the attack so vigorously that by 7-45 A.M. there were clear signs of demoralisation in the enemy's ranks. But, although this marked the end of counter-attacks on the large scale, the bombing and sniping continued, though in less volume, throughout this day and night, and lasted till 12th August, when it at last became manifest that we had gained complete ascendancy. During the final grand assault our losses from artillery fire were large, and ever since the work has passed into our hands it has been a favourite daily and nightly mark for heavy shells and bombs.

Thus was Lone Pine taken and held. The Turks were in great force and very full of fight, yet one weak Australian brigade, numbering at the outset but 2,000 rifles, and supported only by two weak battalions, carried the work under the eyes of a whole enemy division, and maintained their grip upon it like a vice during six days' successive counter-attacks. High praise is due to Brigadier-General N. M. Smyth and to his battalion commanders. The irresistible dash and daring of officers and men in the initial charge were a glory to Australia. The stout-heartedness with which they clung to the captured ground in spite of fatigue, severe losses, and the continual strain of shell fire and bomb attacks may seem less striking to the civilian; it is even more admirable to the soldier. From start to finish the artillery support was untiring and vigilant. Owing to the rapid, accurate fire of the 2nd New Zealand Battery, under Major Sykes, several of the Turkish onslaughts were altogether defeated in their attempts to get to grips with the Australians. Not a chance was lost by these gunners, although time and again the enemy's artillery made direct hits on their shields. The hand-to-hand fighting in the semi-obscurity of the trenches was prolonged and very bitterly contested. In one corner eight Turks and six Australians were found lying as they had bayonetted one another. To make room for the fighting men the dead were ranged in rows on either side of the gangway. After the first violence of the counter-attacks had abated, 1,000 corpses—our own and Turkish—were dragged out from the trenches.

For the severity of our own casualties some partial consolation may be found in the facts, first, that those of the enemy were much heavier, our guns and machine-guns having taken toll of them as they advanced in mass formation along the reverse slopes; secondly, that the Lone Pine attack drew all the local enemy reserves towards it, and may be held, more than any other cause, to have been the reason that the Sulva Bay landing was so lightly opposed, and that comparatively few of the enemy were available at first to reinforce against our attack on Sari Bair. Our captures in this feat of arms amounted to 134 prisoners, seven machine-guns, and a large quantity of ammunition and equipment.

Other frontal attacks from the existing Anzac positions were not so fortunate. They fulfilled their object in so far as they prevented the enemy from reinforcing against the attack upon the high ridges, but they failed to make good any ground. Taken in sequence of time, they included an attack upon the work known as German Officer's Trench, on the extreme right of our line, at midnight on August 6th—7th, also assaults on the Nek and Baby 700 trenches opposite the centre of our line, delivered at 4-30 A.M. on the 7th. The 2nd Australian Brigade did all that men could do; the 8th Light Horse only accepted their repulse after losing three-fourths of that devoted band who so bravely sallied forth from Russell's Top. Some of the works were carried, but in these cases the enemy's concealed machine guns made it impossible to hold on. But all that day, as the result of these most gallant attacks, Turkish reserves on Battleship Hill were being held back to meet any dangerous development along the front of the old Anzac line, and so were not available to meet our main enterprise, which I will now endeavour to describe.

The first step in the real push—the step which above all others was to count—was the night attack on the summits of the Sari Bair ridge. The crest line of this lofty mountain range runs parallel to the sea, dominating the underfeatures contained within the Anzac position, although these fortunately defilade the actual landing-place. From the main ridge a series of spurs run down towards the level beach, and are separated from one another by deep,

jagged gullies choked up with dense jungle. Two of these leading up to Chunuk Bair are called Chailak Dere and Sazli Beit Dere; another deep ravine runs up to Koja Chemen Tepe (Hill 305), the topmost peak of the whole ridge, and is called the Aghyl Dere.

It was our object to effect a lodgment along the crest of the high main ridge with two columns of troops, but, seeing the nature of the ground and the dispositions of the enemy, the effort had to be made by stages. We were bound, in fact, to undertake a double subsidiary operation before we could hope to launch these attacks with any real prospect of success.

(1) The right covering force was to seize Table Top, as well as all other enemy positions commanding the foothills between the Chailak Dere and the Sazli Beit Dere ravines. If this enterprise succeeded it would open up the ravines for the assaulting columns, whilst at the same time interposing between the right flank of the left covering force and the enemy holding the Sari Bair main ridge.

(2) The left covering force was to march northwards along the beach to seize a hill called Damakjelik Bair, some 1,400 yards north of Table Top. If successful it would be able to hold out a hand to the 9th Corps as it landed south of Nibrunesi Point, whilst at the same time protecting the left flank of the left assaulting column against enemy troops from the Anafarta valley during its climb up the Aghyl Dere ravine.

(3) The right assaulting column was to move up the Chailak Dere and Sazli Beit Dere ravines to the storm of the ridge of Chunuk Bair.

(4) The left assaulting column was to work up the Aghyl Dere and prolong the line of the right assaulting column by storming Hill 305 (Koja Chemen Tepe), the summit of the whole range of hills.

To recapitulate, the two assaulting columns, which were to work up three ravines to the storm of the high ridge, were to be preceded by two covering columns. One of these was to capture the enemy's positions commanding the foothills, first to open the mouths of the ravines, secondly to cover the right flank of another covering force whilst it marched along the beach. The other covering column was to strike far out to the north until, from a hill called Damajelik Bair, it could at the same time facilitate the landing of the 9th Corps at Nibrunesi Point, and guard the left flank of the column assaulting Sari Bair from any forces of the enemy which might be assembled in the Anafarta valley.

The whole of this big attack was placed under the command of Major-General Sir A. J. Godley, General Officer Commanding New Zealand and Australian Division. The two covering and the two assaulting columns were organized as follows:—

Right Covering Column, under Brigadier-General A. H. Russell.—New Zealand Mounted Rifles Brigade, the Otago Mounted Rifles Regiment, the Maori Contingent and New Zealand Field Troop.

Right Assaulting Column, under Brigadier-General F. E. Johnston.—New Zealand Infantry Brigade, Indian Mountain Battery (less one section), one Company New Zealand Engineers.

Left Covering Column, under Brigadier-General J. H. Travers.—Headquarters 40th Brigade, half the 72nd Field Company, 4th Battalion, South Wales Borderers, and 5th Battalion, Wiltshire Regiment.

Left Assaulting Column, under Brigadier-General (now Major-General) H. V. Cox.—29th Indian Infantry Brigade, 4th Australian Infantry Brigade, Indian Mountain Battery (less one section), one Company New Zealand Engineers.

Divisional Reserve.—6th Battalion, South Lancashire Regiment, and 8th Battalion, Welsh Regiment (Pioneers) at Chailak Dere, and the 39th Infantry Brigade and half 72nd, Field Company at Aghyl Dere.

The right covering column, it will be remembered, had to gain command of the Sazli Beit Dere and the Aghyl Dere ravines, so as to let the assaulting column arrive intact within striking distance of the Chunuk Bair ridge. To achieve this object it had to clear the Turks off from their right flank positions upon Old No. 3 Post and Table Top.

Old No. 3 Post connected with Table Top by a razor back, formed the apex of a triangular piece of hill sloping gradually down to our No. 2 and No. 3 outposts. Since its recapture from us by the Turks on 30th May working parties had done their best with unstinted material to convert this commanding point into an impregnable redoubt. Two lines of fire trench, very heavily entangled, protected its southern face—the only one accessible to us—and, with its head cover of solid timber baulks and its strongly rivetted outworks, it dominated the approaches of both the Chailak Dere and the Sazli Beit Dere.

Table Top is a steep-sided, flat-topped hill, close on 400 feet above sea level. The sides of the hill are mostly sheer and quite impracticable, but here and there a ravine, choked with scrub, and under fire of enemy trenches, gives precarious foothold up the precipitous cliffs. The small plateau on the summit was honeycombed with trenches, which were connected by a communication alley with that underfeature of Sari Bair, known as Rhododendron Spur.

Amongst other stratagems the Anzac troops, assisted by H.M.S. "Colne," had long and carefully been educating the Turks how they should lose Old No. 3 Post, which could hardly have been rushed by simple force of arms. Every night, exactly at 9 P.M., H.M.S. "Colne" threw the beam of her searchlight on to the redoubt, and opened fire upon it for exactly ten

minutes. Then, after a ten minutes' interval, came a second illumination and bombardment commencing always at 9-20 and ending precisely at 9-30 P.M.

The idea was that, after successive nights of such practice, the enemy would get into the habit of taking the searchlight as a hint to clear out until the shelling was at an end. But on the eventful night of the 6th, the sound of their footsteps drowned by the loud cannonade, unseen as they crept along in that darkest shadow which frings a searchlight's beam—came the right covering column. At 9-30 the light switched off, and instantly our men poured out of the scrub jungle and into the empty redoubt. By 11 P.M., the whole series of surrounding entrenchments were ours!

Once the capture of Old No. 3 Post was fairly under way, the remainder of the right covering column carried on with their attack upon Bauchop's Hill and the Chailak Dere. By 10 P.M., the northernmost point, with its machine-gun, was captured and by 1 o'clock in the morning the whole of Bauchop's Hill, a maze of ridge and ravine, everywhere entrenched, was fairly in our hands.

The attack along the Chailak Dere was not so cleanly carried out—made, indeed just about as ugly a start as any enemy could wish. Pressing eagerly forward through the night, the little column of stormers found themselves held up by a barbed-wire erection of unexampled height, depth and solidity, which completely closed the river bed—that is to say, the only practicable entrance to the ravine. The entanglement was flanked by a strongly-held enemy trench running right across the opening of the Chailak Dere. Here that splendid body of men, the Otago Mounted Rifles, lost some of their bravest and their best, but in the end, when things were beginning to seem desperate, a passage was forced through the stubborn obstacle with most conspicuous and cool courage by Captain Shera and a party of New Zealand Engineers, supported by the Maoris, who showed themselves worthy descendants of the warriors of the Gate Pah. Thus was the mouth of the Chailak Dere opened in time to admit of the unopposed entry of the right assaulting column.

Simultaneously the attack on Table Top had been launched under cover of a heavy bombardment from H.M.S. "Colne." No General on peace manœuvres would ask troops to attempt so break-neck an enterprise. The flanks of Table Top are so steep that the height gives an impression of a mushroom shape—of the summit bulging out over its stem. But just as faith moves mountains, so valour can carry them. The Turks fought bravely. The angle of Table Top's ascent is recognised in our regulations as "impracticable for infantry." But neither Turks nor angles of ascent were destined to stop Russell or his New Zealanders that night. There are moments during battle when life becomes intensified, when men become supermen, when the impossible becomes simple—and this was one of those moments. The scarped heights were scaled, the plateau was carried by midnight. With this brilliant feat the task of the right covering force was at an end. Its attacks had been made with the bayonet and bomb only; magazines were empty by order; hardly a rifle shot had been fired. Some 150 prisoners were captured as well as many rifles and much equipment, ammunition and stores. No words can do justice to the achievement of Brigadier-General Russell and his men. There are exploits which must be seen to be realised.

The right assaulting column had entered the two southerly ravines—Sazli Beit Dere and Chailak Dere—by midnight. At 1-30 A.M., began a hotly contested fight for the trenches on the lower part of Rhododendron Spur, whilst the Chailak Dere column pressed steadily up the valley against the enemy.

The left covering column, under Brigadier-General Travers, after marching along the beach to No. 3 Outpost, resumed its northerly advance as soon as the attack on Bauchop's Hill had developed. Once the Chailak Dere was cleared the column moved by the mouth of the Aghyl Dere, disregarding the enfilade fire from sections of Bauchop's Hill still uncaptured. The rapid success of this movement was largely due to Lieutenant-Colonel Gillespie, a very fine man, who commanded the advance guard consisting of his own regiment, the 4th South Wales Borderers, a corps worthy of such a leader. Every trench encountered was instantly rushed by the Borderers until, having reached the predetermined spot, the whole column was unhesitatingly launched at Damakjelik Bair. Several Turkish trenches were captured at the bayonet's point, and by 1-30 A.M., the whole of the hill was occupied, thus safeguarding the left rear of the whole of the Anzac attack.

Here was an encouraging sample of what the New Army, under good auspices, could accomplish. Nothing more trying to inexperienced troops can be imagined than a long night march exposed to flanking fire, through a strange country, winding up at the end with a bayonet charge against a height formless and still in the starlight, garrisoned by those spectres of the imagination, worst enemies of the soldier.

The left assaulting column crossed the Chailak Dere at 12-30 A.M., and entered the Aghyl Dere at the heels of the left covering column. The surprise, on this side, was complete. Two Turkish officers were caught in their pyjamas; enemy arms and ammunition were scattered in every direction.

The grand attack was now in full swing, but the country gave new sensations in cliff climbing even to officers and men who had graduated over the goat tracks of Anzac. The darkness of the night, the density of the scrub, hands and knees progress up the spurs, sheer physical fatigue, exhaustion of the spirit caused by repeated hairbreadth

escapes from the hail of random bullets—all these combined to take the edge off the energies of our troops. At last, after advancing some distance up the Aghyl Dere, the column split up into two parts. The 4th Australian Brigade struggled, fighting hard as they went, up to the north of the northern fork of the Aghyl Dere, making for Hill 305 (Koja Chemen Tepe). The 29th Indian Infantry Brigade scrambled up the southern fork of the Aghyl Dere and the spurs north of it to the attack of a portion of the Sari Bair ridge known as Hill Q.

Dawn broke and the crest line was not yet in our hands, although, considering all things, the left assaulting column had made a marvellous advance. The 4th Australian Infantry Brigade was on the line of the Asma Dere (the next ravine north of the Aghyl Dere) and the 29th Indian Infantry Brigade held the ridge west of the Farm below Chunuk Bair and along the spurs to the north-east. The enemy had been flung back from ridge to ridge; an excellent line for the renewal of the attack had been secured, and (except for the exhaustion of the troops) the auspices were propitious.

Turning to the right assaulting column, one battalion, the Canterbury Infantry Battalion, clambered slowly up the Sazli Beit Dere. The remainder of the force, led by the Otago Battalion, wound their way amongst the pitfalls and forced their passage through the scrub of the Chailak Dere, where fierce opposition forced them ere long to deploy. Here, too, the hopeless country was the main hindrance, and it was not until 5-45 A.M. that the bulk of the column joined the Canterbury Battalion on the lower slopes of Rhododendron Spur. The whole force then moved up the spur, gaining touch with the left assaulting column by means of the 10th Gurkhas, in face of very heavy fire and frequent bayonet charges. Eventually they entrenched on the top of Rhododendron Spur, a quarter of a mile short of Chunuk Bair—*i.e.*, of victory.

At seven A.M. the 5th and 6th Gurkhas, belonging to the left assaulting column, had approached the main ridge north-east of Chunuk Bair, whilst, on their left, the 14th Sikhs had got into touch with the 4th Australian Brigade on the southern watershed of the Asma Dere. The 4th Australian Brigade now received orders to leave half a battalion to hold the spur, and, with the rest of its strength, plus the 14th Sikhs, to assault Hill 305 (Koja Chemen Tepe). But by this time the enemy's opposition had hardened, and his reserves were moving up from the direction of Battleship Hill. Artillery support was asked for and given, yet by nine A.M. the attack of the right assaulting column on Chunuk Bair was checked, and any idea of a further advance on Koja Chemen Tepe had to be, for the moment, suspended. The most that could be done was to hold fast to the Asmak Dere watershed whilst attacking the ridge north-east of Chunuk Bair, an attack to be supported by a fresh assault launched against Chunuk Bair itself.

At 9-30 A.M. the two assaulting columns pressed forward whilst our guns pounded the enemy moving along the Battleship Hill spurs. But in spite of all their efforts their increasing exhaustion as opposed to the gathering strength of the enemy's fresh troops began to tell—they had shot their bolt. So all day they clung to what they had captured and strove to make ready for the night. At 11 A.M. three battalions of the 39th Infantry Brigade were sent up from the general reserve to be at hand when needed, and, at the same hour one more battalion of the reserve was dispatched to the 1st Australian Division to meet the drain caused by all the desperate Lone Pine fighting.

By the afternoon the position of the two assaulting columns was unchanged. The right covering force were in occupation of Table Top, Old No. 3 Post and Bauchop Hill, which General Russell had been ordered to maintain with two regiments of Mounted Rifles, so that he might have two other regiments and the Maori Contingent available to move as required. The left covering force held Damakjelik Bair. The forces which had attacked along the front of the original Anzac line were back again in their own trenches. The Lone Pine work was being furiously disputed. All had suffered heavily and all were very tired.

So ended the first phase of the fighting for the Chunuk Bair ridge. Our aims had not fully been attained, and the help we had hoped for from Suvla had not been forthcoming. Yet I fully endorse the words of General Birdwood when he says: "The troops had performed a feat which is without parallel."

Great kudos is due to Major-Generals Godley and Shaw for their arrangements; to Generals Russel, Johnston, Cox, and Travers for their leading; but most of all, as every one of these officers will gladly admit, to the rank and file for their fighting. Nor may I omit to add that the true destroyer spirit with which H. M. S. "Colne" (Commander Claude Seymour, R.N.) and H. M. S. "Chelmer" (Commander Hugh T. England, R.N.) backed us up will live in the grateful memories of the Army.

In the course of this afternoon (7th August) reconnaissances of Sari Bair were carried out and the troops were got into shape for a fresh advance in three columns, to take place in the early morning.

The columns were composed as follows:—

Right column, Brigadier-General F. E. Johnston.—26th Indian Mountain Battery (less one section), Auckland Mounted Rifles, New Zealand Infantry Brigade, two battalions, 13th Division, and the Maori Contingent.

Centre and Left Columns.—Major-General H. V. Cox.—21st Indian Mountain Battery (less one section), 4th Australian Brigade, 39th Infantry Brigade (less one battalion),

with 6th Battalion South Lancashire Regiment attached, and the 29th Indian Infantry Brigade.

The right column was to climb up the Chunuk Bair ridge; the left column was to make for the prolongation of the ridge north-east to Koja Chemen Tepe, the topmost peak of the range.

The attack was timed for 4-15 A.M. At the first faint glimmer of dawn observers saw figures moving against the sky-line of Chunuk Bair. Were they our own men, or were they the Turks? Telescopes were anxiously adjusted; the light grew stronger; men were seen climbing up from our side of the ridge; they *were* our own fellows—the topmost summit was ours!

On the right General Johnston's column, headed by the Wellington Battalion and supported by the 7th Battalion, Gloucestershire Regiment, the Auckland Mounted Rifles Regiment, the 8th Welsh Pioneers, and the Maori Contingent, the whole most gallantly led by Lieutenant-Colonel W. G. Malone, had raced one another up the steep. Nothing could check them. On they went, until with a last determined rush, they fixed themselves firmly on the south-western slopes and crest of the main knoll known as the height of Chunuk Bair. With deep regret I have to add that the brave Lieutenant-Colonel Malone fell mortally wounded as he was marking out the line to be held. The 7th Gloucesters suffered terrible losses here.

The fire was so hot that they never got a chance to dig their trenches deeper than some six inches, and there they had to withstand attack after attack. In the course of these fights every single officer, company serjeant-major, or company quartermaster-serjeant, was either killed or wounded, and the battalion by mid-day consisted of small groups of men commanded by junior non-commissioned officers or privates. Chapter and verse may be quoted for the view that the rank-and-file of an army can not long endure the strain of close hand-to-hand fighting unless they are given confidence by the example of good officers Yet here is at least one instance where a battalion of the New Army fought right on, from midday till sunset, without *any* officers.

In the centre the 39th Infantry Brigade and the 29th Indian Brigade moved along the gullies leading up to the Sari Bair ridge—the right moving south of the Farm on Chunuk Bair, the left up the spurs to the north-east of the Farm against a portion of the main ridge north-east of Chunuk Bair, and the col to the north of it. So murderous was the enemy's fire that little progress could be made, though some ground was gained on the spurs to the north-east of the farm.

On the left the 4th Australian Brigade advanced from the Asmak Dere against the lower slopes of Abdul Rahman Bair (a spur running due north from Koja Chemen Tepe) with the intention of wheeling to its right and advancing up the spur. Cunningly placed Turkish machine-guns and a strong entrenched body of infantry were ready for this move, and the Brigade were unable to get on. At last, on the approach of heavy columns of the enemy, the Australians, virtually surrounded, and having already suffered losses of over 1,000, were withdrawn to their original position. Here they stood at bay, and, though the men were by now half dead with thirst and with fatigue, they bloodily repulsed attack after attack delivered by heavy columns of Turks.

So stood matters at noon. Enough had been done for honour and much ground had everywhere been gained. The expected support from Suvla hung fire, but the capture of Chunuk Bair was a presage of victory; even the troops who had been repulsed were quite undefeated—quite full of fight—and so it was decided to hold hard as we were till nightfall, and then to essay one more grand attack, wherein the footing gained on Chunuk Bair would this time be used as a pivot.

In the afternoon the battle slackened, excepting always at Lone Pine, where the enemy were still coming on in mass, and being mown down by our fire. Elsewhere the troops were busy digging and getting up water and food, no child's play, with their wretched lines of communication running within musketry range of the enemy.

That evening the New Zealand Brigade, with two regiments of New Zealand Mounted Rifles and the Maoris, held Rhododendron Spur and the south-western slopes of the main knoll of Chunuk Bair. The front line was prolonged by the columns of General Cox and General Monash (with the 4th Australian Brigade). Behind the New Zealanders were the 38th Brigade in reserve, and in rear of General Monash two battalions of the 40th Brigade. The inner line was held as before, and the 29th Brigade (less two battalions), had been sent up from the general reserve, and remained still further in rear.

The columns for the renewed attack were composed as follows:—

No. 1 Column, Brigadier-General F. E. Johnston.—26th Indian Mountain Battery (less one section), the Auckland and Wellington Mounted Rifles Regiments, the New Zealand Infantry Brigade, and two battalions of the 13th Division.

No. 2 Column, Major-General H. V. Cox.—21st Indian Mountain Battery (less one section), 4th Australian Brigade, 39th Brigade (less the 7th Gloucesters, relieved), with the 6th Battalion South Lancashire Regiment attached, and the Indian Infantry Brigade.

No. 3 Column, Brigadier-General A. H. Baldwin, Commanding 38th Infantry Brigade.—Two battalions each from the 38th and 29th Brigades and one from the 40th Brigade;

No. 1 column was to hold and consolidate the ground gained on the 6th, and, in co-operation with the other columns, to gain the whole of Chunuk Bair, and extend to the south-east. No. 2 column was to attack Hill Q. on the Chunuk Bair ridge, and No. 3 column was to move from the Chailak Dere, also on Hill Q. This last column was to make the main attack, and the others were to co-operate with it.

At 4-30 A.M. on August 9th the Chunuk Bair ridge and Hill Q were heavily shelled. The naval guns, all the guns on the left flank, and as many as possible from the right flank (whence the enemy's advance could be enfiladed), took part in this cannonade, which rose to its climax at 5-15 A.M., when the whole ridge seemed a mass of flame and smoke, whence huge clouds of dust drifted slowly upwards in strange patterns on to the sky. At 5-16 A.M., this tremendous bombardment was to be switched off on to the flanks and reverse slopes of the heights.

General Baldwin's column had assembled in the Chailak Dere, and was moving up towards General Johnstone's headquarters. Our plan contemplated the massing of this column immediately behind the trenches held by the New Zealand Infantry Brigade. Thence it was intended to launch the battalion in successive lines, keeping them as much as possible on the high ground. Infinite trouble had been taken to ensure that the narrow track should be kept clear, guides also were provided; but in spite of all precautions the darkness, the rough scrub-covered country, its sheer steepness, so delayed the column that they were unable to take full advantage of the configuration of the ground, and, inclining to the left, did not reach the line of the Farm—Chunuk Bair till 5-15 A.M. In plain English, Baldwin, owing to the darkness and the awful country, lost his way—through no fault of his own. The mischance was due to the fact that time did not admit of the detailed careful reconnaissance of routes which is so essential where operations are to be carried out by night.

And now, under that fine leader, Major C. G. L. Allanson, the 6th Gurkhas of the 29th Indian Infantry Brigade pressed up the slopes of Sari Bair, crowned the heights of the col between Chunuk Bair and Hill Q, viewed far beneath them the waters of the Hellespont, viewed the Asiatic shores along which motor transport was bringing supplies to the lighters. Not only did this battalion, as well as some of the 6th South Lancashire Regiment, reach the crest, but they began to attack down the far side of it, firing as they went at the fast retreating enemy. But the fortune of war was against us. At this supreme moment Baldwin's column was still a long way from our trenches on the crest of Chunuk Bair, whence they should even now have been sweeping out towards Q along the whole ridge of the mountain. And instead of Baldwin's support came suddenly a salvo of heavy shell. These falling so unexpectedly among the stormers threw them into terrible confusion. The Turkish commander saw his chance; instantly his troops were rallied and brought back in a counter-charge, and the South Lancashires and Gurkhas, who had seen the promised land and had seemed for a moment to have held victory in their grasp, were forced backwards over the crest and on to the lower slopes whence they had first started.

But where was the main attack—where was Baldwin? When that bold but unlucky commander found he could not possibly reach our trenches on the top of Chunuk Bair in time to take effective part in the fight he deployed for attack where he stood, *i.e.*, at the farm to the left of the New Zealand Brigade's trenches on Rhododendron Spur. Now his men were coming on in fine style and, just as the Turks topped the ridge with shouts of elation, two companies of the 6th East Lancashire Regiment, together with the 10th Hampshire Regiment, charged up our side of the slope with the bayonet. They had gained the high ground immediately below the commanding knoll on Chunuk Bair, and a few minutes earlier would have joined hands with the Gurkhas and South Lancashires and combined with them, would have carried all before them. But the Turks by this time were lining the whole of the high crest in overwhelming numbers. The New Army troops attacked with a fine audacity, but they were flung back from the height and then pressed still further down the slope, until General Baldwin had to withdraw his command to the vicinity of the Farm, whilst the enemy, much encouraged, turned their attention to the New Zealand troops and the two New Army battalions of No. 1 Column still holding the south-west half of the main knoll of Chunuk Bair. Constant attacks urged with fanatical persistence, were met here with a sterner resolution, and although, at the end of the day, our troops were greatly exhausted, they still kept their footing on the summit. And if that summit meant much to us, it meant even more to the Turks. For the ridge covered our landing places, it is true, but it covered not only the Turkish beaches at Kilia Leman and Maidos, but also the Narrows themselves and the road leading northward to Bulair and Constantinople.

That evening our line ran along Rhododendron Spur up to the crest of Chunuk Bairs where about 200 yards were occupied and held by some 800 men. Slight trenches had hastily been dug, but the fatigue of the New Zealanders and the fire of the enemy had prevented solid work being done. The trenches in many places were not more than a few inches deep. They were not protected by wire. Also many officers are of opinion that they had not been well sited in the first instance. On the South African system the main line was withdrawn some twenty-five yards from the crest instead of being actually on the crestline itself, and there were not even look-out posts along the summit. Boer skirmishers would thus have had to show themselves against the skyline before they could annoy. But here we were faced by regulars taught to attack in mass with bayonet or bomb. And the power of collecting overwhelming numbers at very close quarters rested with whichever side held the true skyline in force. From Chunuk Bair the line ran down to the Farm and almost due north to the Asam

Dere southern watershed, whence it continued westward to the sea near Asmak Kuyu. On the right the Australian Division was still holding its line and Lone Pine was still being furiously attacked. The 1st Australian Brigade was now reduced from 2,900 to 1,000, and the total casualties up to 8 P.M. on the 9th amounted to about 8,500. But the troops were still in extraordinarily good heart, and nothing could damp their keenness. The only discontent shown was by men who were kept in reserve.

During the night of the 9th-10th, the New Zealand and new Army troops on Chunuk Bair were relieved. For three days and three nights they had been ceaselessly fighting. They were half dead with fatigue. Their lines of communication started from sea level, ran across trackless ridges and ravines to an altitude of 800 ft., and were exposed all the way to snipers' fire and artillery bombardment. It had become imperative, therefore, to get them enough food, water, and rest; and for this purpose it was imperative also to withdraw them. Chunuk Bair, which they had so magnificently held, was now handed over to two battalions of the 13th Division, which were connected by the 10th Hampshire Regiment with the troops at the farm. General Sir William Birdwood is emphatic on the point that the nature of the ground is such that there was no room on the crest for more than this body of 800 to 1,000 rifles.

The two battalions of the New Army chosen to hold Chunuk Bair were the 6th Loyal North Lancashire Regiment and the 5th Wiltshire Regiment. The first of these arrived in good time and occupied the trenches. Even in the darkness their commanding officer, Lieutenant-Colonel Levinge, recognised how dangerously these trenches were sited, and he began at once to dig observation posts on the actual crest and to strengthen the defences where he could. But he had not time given him to do much. The second battalion, the Wiltshires, were delayed by the intricate country. They did not reach the edge of the entrenchment until 4 A.M., and were then told to lie down in what was believed, erroneously, to be a covered position.

At daybreak on Tuesday, 10th August, the Turks delivered a grand attack from the line Chunuk Bair-Hill Q against these two battalions, already weakened in numbers, though not in spirit, by previous fighting. First our men were shelled by every enemy gun, and then, at 5-30 A. M., were assaulted by a huge column, consisting of no less than a full division plus a regiment of three battalions. The North Lancashire men were simply overwhelmed in their shallow trenches by sheer weight of numbers, whilst the Wilts, who were caught out in the open, were literally almost annihilated. The ponderous mass of the enemy swept over the crest, turned the right flank of our line below, swarmed round the Hampshires and General Baldwin's column, which had to give ground, and were only extricated with great difficulty and very heavy losses.

Now it was our turn. The warships and the New Zealand and Australian Artillery, the Indian Mountain Artillery Brigade, and the 69th Brigade Royal Field Artillery were getting the chance of a lifetime. As the successive solid lines of Turks topped the crest of the ridge gaps were torn through their formation, and an iron rain fell on them as they tried to re-form in the gullies.

Not here only did the Turks pay dearly for their recapture of the vital crest. Enemy reinforcements continued to move up Battleship Hill under heavy and accurate fire from our guns, and still they kept topping the ridges and pouring down the western slopes of the Chunuk Bair as if determined to regain every thing they had lost. But once they were over the crest they became exposed not only to the full blast of the guns, naval and military, but also to a battery of ten machine guns belonging to the New Zealand Infantry Brigade, which played upon their serried ranks at close range until the barrels were red hot. Enormous losses were inflicted, specially by these ten machine-guns; and, of the swarms which had once fairly crossed the crest line, only the merest handful ever straggled back to their own side of Chunuk Bair.

At this same time strong forces of the enemy (forces which I had reckoned would have been held back to meet our advance from Suvla Bay) were hurled against the Farm and the spurs to the north-east, where there arose a conflict so deadly that it may be considered as the climax of the four days' fighting for the ridge. Portions of our line were pierced, and the troops driven clean down the hill. At the foot of the hill the men were rallied by Staff Captain Street, who was there supervising the transport of food and water. Without a word, unhesitatingly, they followed him back to the Farm, where they plunged again into the midst of that series of struggles in which generals fought in the ranks and men dropped their scientific weapons and caught one another by the throat. So desperate a battle cannot be described. The Turks came on again and again, fighting magnificently. Our men stood to it, and maintained, by many a deed of daring, the old traditions of their race. There was no flinching. They died in the ranks where they stood. Here Generals Cayley, Baldwin, and Cooper and all their gallant men achieved great glory. On this bloody field fell Brigadier-General Baldwin, who earned his first laurels on Cæsar's Camp at Ladysmith. There, too, fell Brigadier-General Cooper, badly wounded; and there, too, fell Lieutenant-Colonel M. H. Nunn, commanding the 9th Worcestershire Regiment; Lieutenant-Colonel H. G. Levinge, commanding the 6th Loyal North Lancashire Regiment; and Lieutenant-Colonel J. Carden, commanding the 5th Wiltshire Regiment.

Towards this supreme struggle the absolute last two battalions from the General Reserve were now hurried, but by 10 A.M. the effort of the enemy was spent. Soon their shattered remnants began to trickle back, leaving a track of corpses behind them, and by night, except prisoners or wounded, no live Turk was left upon our side of the slope.

That same day, 10th August, two attacks, one in the morning and the other in the afternoon, were delivered on our positions along the Asmak Dere and Damakjelik Bair. Both were repulsed with heavy loss by the 4th Australian Brigade and the 4th South Wales Borderers, the men of the New Army showing all the steadiness of veterans. Sad to say, the Borderers lost their intrepid leader, Lieutenant-Colonel Gillespie, in the course of this affair.

By evening the total casualties of General Birdwood's force had reached 12,000, and included a very large proportion of officers. The 13th Division of the New Army, under Major-General Shaw, had alone lost 6,000 out of a grand total of 10,500. Baldwin was gone, and all his staff. Ten commanding officers out of thirteen had disappeared from the fighting effectives. The Warwicks and the Worcesters had lost literally every single officer. The old German notion that no unit would stand a loss of more than 25 per cent. had been completely falsified. The 13th Division and the 29th Brigade of the 10th (Irish) Division had lost more than twice that proportion, and, in spirit, were game for as much more fighting as might be required. But physically, though Birdwood's forces were prepared to hold all they had got, they were now too exhausted to attack —at least until they had rested and reorganised. So far they *had* held on to all they had gained, excepting only the footholds on the ridge between Chunuk Bair and Hill Q,' momentarily carried by the Gurkhas, and the salient of Chunuk Bair itself, which they had retained for forty-eight hours. Unfortunately, these two pieces of ground, small and worthless as they seemed, were worth, according to the ethics of war, 10,000 lives, for by their loss or retention they just marked the difference between an important success and a signal victory.

At times I had thought of throwing my reserves into this stubborn central battle, where probably they would have turned the scale. But each time the water troubles made me give up the idea, all ranks at Anzac, being reduced to one pint a day. True thirst is a sensation unknown to the dwellers in cool, well-watered England. But at Anzac, when mules with water "pakhals" arrived at the front, the men would rush up to them in swarms just to lick the moisture that had exuded through the canvas bags. It will be understood, then that until wells had been discovered under the freshly-won hills, the reinforcing of Anzac by even so much as a brigade was unthinkable.

The grand coup had not come off. The Narrows were still out of sight and beyond field gun range. But this was not the fault of Lieutenant-General Birdwood or any of the officers and men under his command. No mortal can command success; Lieutenant-General Birdwood had done all that mortal man can do to deserve it. The way in which he worked out his instructions into practical arrangements and dispositions upon the terrain reflect high credit upon his military capacity. I also wish to bring to your Lordship's notice the valuable services of Major-General Godley, commanding the New Zealand and Australian Division. He had under him at one time a force amounting to two divisions, which he handled with conspicuous ability. Major-General F. C. Shaw, commanding 13th Division, also rose superior to all the trials and tests of these trying days. His calm and sound judgment proved to be of the greatest value throughout the arduous fighting I have recorded.

As for the troops, the joyous alacrity with which they faced danger, wounds and death as if they were some new form of exciting recreation, has astonished me—old campaigner as I am. I will say no more, leaving Major-General Godley to speak for what happened under his eyes:—"I cannot close my report," he says, without placing on record my unbounded admiration of the work performed, and the gallantry displayed, by the troops and their leaders during the severe fighting involved in these operations. Though the Australian, New Zealand, and Indian units had been confined to trench duty in a cramped space for some four months, and though the troops of the New Armies had only just landed from a sea voyage, and many of them had not been previously under fire, I do not believe that any troops in the world could have accomplished more. All ranks vied with one another in the performance of gallant deeds and more than worthily upheld the best traditions of the British Army."

Although the Sari Bair ridge was the key to the whole of my tactical conception, and although the temptation to view this vital Anzac battle at closer quarters was very hard to resist, there was nothing in its course or conduct to call for my personal intervention.

The conduct of the operations which were to be based upon Suvla Bay was entrusted to Lieutenant-General The Hon. Sir F. Stopford. At his disposal was placed the 9th Army Corps, less the 13th Division and the 29th Brigade of the 10th Division.

We believed that the Turks were still unsuspicious about Suvla and that their only defences near that part of the coast were a girdle of trenches round Lala Baba and a few unconnected lengths of fire trench on Hill 10 and on the hills forming the northern arm of the bay. There was no wire. Inland a small work had been constructed on Yilghin Burnu (locally known as Chocolate Hills), and a few guns had been placed upon these hills, as well as upon Ismail Oglu Tepe, whence they could be brought into action either against the beaches of Suvla Bay or against any attempt from Anzac to break out northwards and attack Chunuk Bair. The numbers of the enemy allotted for the defence of the Suvla and Ejelmer areas (including the troops in the Anafarta villages, but exclusive of the general reserves in rear of the Sari Bair) were supposed to be under 4,000. Until the Turkish version of these events is in our hands it is not possible to be certain of the accuracy of this estimate. All that can be said at present is that my Intelligence Department were wonderfully exact in their figures as a rule and that, in the case in question, events, the reports made by prisoners, etc., etc., seem to show that the forecast was correct.

Arrangements for the landing of the 9th Corps at Suvla were worked out in minute detail by my General Headquarters Staff in collaboration with the staff of Vice-Admiral de Robeck, and every precaution was taken to ensure that the destination of the troops was kept secret up to the last moment.

Whilst concentrated at the island of Imbros the spirit and physique of the 11th Division had impressed me very favourably. They were to lead off the landing. From Imbros they were to be ferried over to the Peninsula in destroyers and motor-lighters Disembarkation was to begin at 10-30 P.M., half an hour later than the attack on the Turkish outposts on the northern flank at Anzac, and I was sanguine enough to hope that the elaborate plan we had worked out would enable three complete brigades of infantry to be set ashore by daylight. Originally it had been intended that all three brigades should land on the beach immediately south of Nibrunesi Point, but in deference to the representations of the Corps Commander I agreed, unfortunately, as it turned out, to one brigade being landed inside the bay.

The first task of the 9th Corps was to seize and hold the Chocolate and Ismail Oglu Hills together with the high ground on the north and east of Suvla Bay. If the landing went off smoothly, and if my information regarding the strength of the enemy were correct, I hoped that these hills, with their guns, might be well in our possession before daybreak. In that case I hoped, further, that the first division which landed would be strong enough to picket and hold all the important heights within artillery range of the bay, when General Stopford would be able to direct the remainder of his force, as it became available, through the Anafartas to the east of the Sari Bair, where it should soon smash the mainspring of the Turkish opposition to Anzacs.

On the 22nd July I issued secret instruction and tables showing the number of craft available for the 9th Corps Commander, their capacity, and the points whereat the troops could be disembarked; also what numbers of troops, animals, vehicles, and stores could be landed simultaneously. The allocation of troops to the ships and boats was left to General Stopford's own discretion, subject only to naval exigencies, otherwise the order of the disembarkation might not have tallied with the order of his operations.

The factors governing the hour of landing were: First, that no craft could quit Kephalos Bay before dark (about 9 P.M.); secondly, that nothing could be done which would attract the attention of the enemy before 10 P.M., the moment when the outposts on the left flank of the Anzac position were to be rushed.

General Stopford next framed his orders on these secret instructions, and after they had received my complete approval he proceeded to expound them to the general officer commanding 11th Division and general officer commanding 10th Division, who came over from Mudros for the purpose.

As in the original landing, the luck of calm weather favoured us, and all the embarkation arrangements at Kephalos were carried out by the Royal Navy in their usual ship-shape style. The 11th Division was to be landed at three places, designated and shown on the map as A, B, and C. Destroyers were told off for these landing-places, each destroyer towing a steam lighter and picket-boat. Every light was to be dowsed, and as they neared the shore the destroyers were to slip their motor-lighters and picket-boats, which would then take the beach and discharge direct on to it. The motor-lighters were new acquisitions since the first landing, and were to prove the greatest possible assistance. They moved five knots an hour under their own engines, and carried 500 men, as well as stores of ammunition and water. After landing their passengers they were to return to the destroyers, and in one trip would empty them also. Ketches with service launches and transport lifeboats were to follow the destroyers and anchor at the entrance of the bay, so that in case of accidents or delays to any one of the motor-lighters a picket-boat could be sent at once to a ketch to pick up a tow of lifeboats and take the place of a disabled motor-lighter. These ketches and tows were afterwards to be used for evacuating the wounded.

H.M.S. "Endymion" and H.M.S. "Theseus," each carrying a thousand men, were also to sail from Imbros after the destroyers, and, lying off the beach, were to discharge their troops directly the motor-lighters—three to each ship—were ready to convey the men to the shore, *i. e.*, after they had finished disembarking their own loads and those of the destroyers. When this was done—*i.e.*, after three trips—the motor lighters would be free to go on transporting guns, stores, mules, etc.

The following crafts brought up the rear:—

(1) Two ketches, each towing four horse boats carrying four 18-pounder guns and twenty-four horses.

(2) One ketch, towing horse-boats with forty horses.

(3) The sloop "Aster," with 500 men, towing a lighter containing eight mountain guns.

(4) Three ketches, towing horse-boats containing eight 18-pounder guns and seventy-six horses.

Water-lighters, towed by a tank steamer, were also timed to arrive at A beach at daylight. When they had been emptied they were to return at once to Kephalos to refill from the parent water-ship.

A specially fitted-out steamer, the "Prah" with stores (shown by our experience of 25th April to be most necessary)—*i.e.*, water-pumps, hose, tanks, troughs, entrenching tools,

and all ordnance stores requisite for the prompt development of wells or springs—was also sent to Suvla.

So much detail I have felt bound, for the sake of clearness, to give in the body of my despatch. The further detail, showing numbers landed, etc., etc., will be found in the appendix and tables attached.

When originally I conceived the idea of these operations, one of the first points to be weighed was that of the water supply in the Biyuk Anafarta valley and the Suvla plain. Experience at Anzac had shown quite clearly that the whole plan must be given up unless a certain amount of water could be counted upon, and, fortunately, the information I received was reassuring. But, in case of accidents, and to be on the safe side, so long ago as June had I begun to take steps to counter the chance that we might from one cause or another find difficulty in developing the wells. Having got from the War Office all that they could give me, I addressed myself to India and Egypt, and eventually from these three sources I managed to secure portable receptacles for 100,000 gallons, including petrol tins, milk cans, camel tanks, water bags and pakhals.

Supplementing these were lighters and water-ships, all under naval control. Indeed, by arrangement with the Admiral, the responsibility of the Army was confined to the emptying of the lighters and the distribution of the water to the troops, the Navy undertaking to bring the full lighters to the shore to replace the empty ones, thus providing a continuous supply.

Finally 3,700 mules, together with 1,750 water carts, were provided for Anzac and Suvla—this in addition to 950 mules already at Anzac. Representatives of the Director of Supplies and Transport at Suvla and Anzac were sent to allot the transport which was to be used for carrying up whatever was most needed by units ashore, whether water, food or ammunition.

This statement, though necessarily brief, will, I hope, suffice to throw some light upon the complexity of the arrangements thought out beforehand in order, so far as was humanly possible, to combat the disorganisation, the hunger and the thirst which lie in wait for troops landing on a hostile beach.

On the evening of 6th August the 11th Division sailed on its short journey from Imbros (Kephalos) to Suvla Bay and, meeting with no mischance, the landing took place, the brigades of the 11th Division getting ashore practically simultaneously; the 32nd and 33rd Brigades at B and C beaches, the 34th at A beach.

The surprise of the Turks was complete. At B and C the beaches were found to be admirably suited to their purpose, and there was no opposition. The landing at A was more difficult, both because of the shoal water and because there the Turkish pickets and sentries—the normal guardians of the coast—were on the alert and active. Some of the lighters grounded a good way from the shore, and men had to struggle towards the beach in as much as four feet six inches of water. Ropes in several instances were carried from the lighters to the shore to help to sustain the heavily accoutred infantry. To add to the difficulties of the 34th Brigade the lighters came under flanking rifle fire from the Turkish outposts at Lala Baba and Ghazi Baba. The enemy even, knowing every inch of the ground, crept down in the very dark night on to the beach itself, mingling with our troops and getting between our firing line and its supports. Fortunately the number of these enterprising foes was but few, and an end was soon put to their activity on the actual beaches by the sudden storming of Lala Baba from the south. This attack was carried out by the 9th West Yorkshire Regiment and the 6th Yorkshire Regiment, both of the 32nd Brigade which had landed at B beach and marched up along the coast. The assault succeeded at once, and without much loss, but both battalions deserve great credit for the way it was delivered in the inky darkness of the night.

The 32nd Brigade was now pushed on to the support of the 34th Brigade, which was held up by another outpost of the enemy on Hill 10 (117 R and S), and it is feared that some of the losses incurred here were due to misdirected fire. While this fighting was still in progress the 11th Battalion, Manchester Regiment, of the 34th Brigade was advancing northwards in very fine style driving the enemy opposed to them back along the ridge of the Karakol Dagh towards the Kiretch Tepe Sirt. Beyond doubt these Lancashire men earned much distinction, fighting with great pluck and grit against an enemy not very numerous perhaps but having an immense advantage in knowledge of the ground. As they got level with Hill 10 it grew light enough to see, and the enemy began to shell. No one seems to have been present who could take hold of the two brigades, the 32nd and 34th, and launch them in a concerted and cohesive attack. Consequently there was confusion and hesitation, increased by gorse fires lit by hostile shell, but redeemed, I am proud to report, by the conspicuously fine, soldierly conduct of several individual battalions. The whole of the Turks locally available were by now in the field, and they were encouraged to counter-attack by the signs of hesitation, but the 9th Lancashire Fusiliers and the 11th Manchester Regiment took them on with the bayonet, and fairly drove them back in disorder over the flaming Hill 10.

As the infantry were thus making good, the two Highland Mountain batteries and one battery, 69th Brigade, Royal Field Artillery, were landed at B beach. Day was now breaking, and with the dawn sailed into the bay six battalions of the 10th Division, under Brigadier-General Hill, from Mitylene.

Here perhaps I may be allowed to express my gratitude to the Royal Navy for their share in this remarkable achievement, as well as a very natural pride at staff arrangements,

which resulted in the infantry of a whole division and three batteries being landed during a single night on a hostile shore, whilst the arrival of the first troops of the supporting division, from another base distant 120 miles, took place at the very psychological moment when support was most needed, namely, at break of dawn.

The intention of the Corps Commander was to keep the 10th Division on the left, and with it to push on as far forward as possible along the Kiretch Tepe Sirt towards the heights above Ejelmer Bay. He wished, therefore, to land these six battalions of the 10th Division at A beach and, seeing Brigadier-General Hill, he told him that as the left of the 34th Brigade was being hard pressed he should get into touch with General Officer Commanding, 11th Division, and work in support of his left until the arrival of his own Divisional General. But the Naval authorities, so General Stopford reports, were unwilling, for some reason not specified, to land these troops at A beach, so that they had to be sent in lighters to C beach, whence they marched by Lala Baba to Hill 10, under fire. Hence were caused loss, delay and fatigue. Also the angle of direction from which these fresh troops entered the fight was not nearly so effective.

The remainder of the 10th Division, three battalions (from Mudros), and with them the G. O. C Lieutenant-General Sir B. Mahon, began to arrive, and the Naval authorities having discovered a suitable landing place near Ghazi Baba, these battalions were landed there together with one battalion of the 31st Brigade, which had not yet been sent round to "C" beach. By this means it was hoped that both the brigades of the 10th Division would be able to rendezvous about half a mile to the north-west of Hill 10.

After the defeat of the enemy round and about Hill 10, they retreated in an easterly direction towards Sulajik and Kuchuk Anafarta Ova, followed by the 34th and 32nd Brigades of the 11th Division and by the 31st Brigade of the 10th Division, which had entered into the fight, not, as the Corps Commander had intended, on the left of the 11th Division, but between Hill 10 and the Salt Lake. I have failed in my endeavours to get some live human detail about the fighting which followed, but I understand from the Corps Commander that the brunt of it fell upon the 31st Brigade of the 10th (Irish) Division, which consisted of the 6th Royal Inniskilling Fusiliers, the 6th Royal Irish Fusiliers, and the 6th Royal Dublin Fusiliers, the last-named battalion being attached to the 31st Brigade.

By the evening General Hammersley had seized Yilghin Burnu (Chocolate Hills) after fight for which he specially commends the 6th Lincoln Regiment and the 6th Border Regiment. At the same time he reported that he was unable to make any further progress towards the vital point, Ismail Oglu Tepe. At nightfall his brigade and the 31st Brigade were extended from about Hetman Chair through Chocolate Hills, Sulajik, to near Kuchuk Anafarta Ova.

This same day Sir B. Mahon delivered a spirited attack along the Kiretch Tepe Sirt ridge, in support of the 11th Battalion Manchester Regiment, and, taking some small trenches *en route*, secured and established himself on a position extending from the sea about 155 p., through the high ground about the p. of Kiretch Tepe Sirt, to about 135 Z. 8. In front of him, on the ridge, he reported the enemy to be strongly entrenched. The 6th Royal Munster Fusiliers have been named as winning special distinction here. The whole advance was well carried out by the Irishmen over difficult ground against an enemy—500 to 700 Gendarmerie—favoured by the lie of the land.

The weather was very hot, and the new troops suffered much from want of water. Except at the southernmost extremity of the Kiretch Tepe Sirt ridge there was no water in that part of the field, and although it existed in some abundance throughout the area over which the 11th Division was operating, the Corps Commander reports that there was no time to develop its resources. Partly this seems to have been owing to the enemy's fire; partly to a want of that *nous* which stands by as second nature to the old campaigner; partly it was inevitable. Anyway, for as long as such a state of things lasted, the troops became dependent on the lighters and upon the water brought to the beaches in tins, pakhals, etc.

Undoubtedly the distribution of this water to the advancing troops was a matter of great difficulty, and one which required not only well-worked-out schemes from Corps and Divisional Staffs, but also energy and experience on the part of those who had to put them into practice. As it turned out, and judging merely by results, I regret to say that the measures actually taken in regard to the distribution proved to be inadequate, and that suffering and disorganisation ensued. The disembarkation of artillery horses was therefore at once, and rightly, postponed by the Corps Commander, in order that mules might be landed to carry up water.

And now General Stopford, recollecting the vast issues which hung upon his success in forestalling the enemy, urged his Divisional commanders to push on. Otherwise, as he saw, all the advantages of the surprise landing must be nullified. But the Divisional Commanders believed themselves, it seems, to be unable to move. Their men, they said, were exhausted by their efforts of the night of the 6th-7th and by the action of the 7th. The want of water had told on the new troops. The distribution from the beaches had not worked smoothly. In some cases the hose had been pierced by individuals wishing to fill their own bottles; in others lighters had grounded so far from the beach that men swam out to fill batches of water-bottles. All this had added to the disorganisation inevitable after a night landing, followed by fights here and there with an enemy scattered over a

country to us unknown. These pleas for delay were perfectly well founded. But it seems to have been overlooked that the half-defeated Turks in front of us were equally exhausted and disorganised, and that an advance was the simplest and swiftest method of solving the water trouble and every other sort of trouble. Be this as it may, the objections overbore the Corps Commander's resolution. He had now got ashore three batteries (two of them mountain batteries), and the great guns of the ships were ready to speak at his request. But it was lack of artillery support which finally decided him to acquiesce in a policy of going slow which, by the time it reached the troops, became translated into a period of inaction. The Divisional Generals were, in fact, informed that "in view of the inadequate artillery support," General Stopford did not wish them to make frontal attacks on entrenched positions, but desired them, so far as was possible, to try and turn any trenches which were met with. Within the terms of this instruction lies the root of our failure to make use of the priceless daylight hours of the 8th of August.

Normally, it may be correct to say that in modern warfare infantry cannot be expected to advance without artillery preparation. But in a landing on a hostile shore the order has to be inverted. The infantry must advance and seize a suitable position to cover the landing, and to provide artillery positions for the main thrust. The very existence of the force, its water supply, its facilities for munitions and supplies, its power to reinforce, must absolutely depend on the infantry being able instantly to make good sufficient ground without the aid of the artillery other than can be supplied for the purpose by *floating* batteries.

This is not a condition that should take the commander of a covering force by surprise. It is one already foreseen. Driving power was required, and even a certain ruthlessness, to brush aside pleas for a respite for tired troops. The one fatal error was inertia. And inertia prevailed.

Late in the evening of the 7th the enemy had withdrawn the few guns which had been in action during the day. Beyond half a dozen shells dropped from very long range into the bay in the early morning of the 8th, no enemy artillery fired that day in the Suvla area. The guns had evidently been moved back, lest they should be captured when we pushed forward. As for the entrenched positions, these in the ordinary acceptance of the term, were non-existant. The General Staff Officer whom I had sent on to Suvla early in the morning of the 8th reported by telegraph the absence of hostile gun-fire, the small amount of rifle fire, and the enemy's apparent weakness. He also drew attention to the inaction of our own troops, and to the fact that golden opportunities were being missed. Before this message arrived at general headquarters I had made up my mind, from the Corps Commander's own reports, that all was not well at Suvla. There was risk in cutting myself adrift, even temporarily, from touch with the operations at Anzac and Helles; but I did my best to provide against any sudden call by leaving Major-General W. P. Braithwaite, my Chief of the General Staff, in charge, with instructions to keep me closely informed of events at the other two fronts; and, having done this, I took ship and set out for Suvla.

On arrival at about 5 P.M. I boarded H.M.S. "Jonquil," where I found corps headquarters, and where General Stopford informed me that the General Officer Commanding, 11th Division, was confident of success in an attack he was to make at dawn next morning (the 9th). I felt no such confidence. Beyond a small advance by a part of the 11th Division between the Chocolate Hills and Ismail Oglu Tepe, and some further progress along the Kiretch Tepe Sirt ridge by the 10th Division, the day of the 8th had been lost. The commander of the 11th Division had, it seems, ordered strong patrols to be pushed forward so as to make good all the strong positions in advance which could be occupied without serious fighting; but, as he afterwards reported, "little was done in this respect." Thus a priceless twelve hours had already gone to help the chances of the Turkish reinforcements which were, I knew, both from naval and aerial sources, actually on the march for Suvla. But when I urged that even now, at the eleventh hour, the 11th Division should make a concerted attack upon the hills, I was met by a *non possumus*. The objections of the morning were no longer valid; the men were now well rested, watered, and fed. But the divisional commanders disliked the idea of an advance by night, and General Stopford did not care, it seemed, to force their hands.

So it came about that I was driven to see whether I could not, myself, put concentration of effort and purpose into the direction of the large number of men ashore. The Corps Commander made no objection. He declared himself to be as eager as I could be to advance. The representations made by the Divisional Commanders had seemed to him insuperable. If I could see my way to get over them no one would be more pleased than himself.

Accompanied by Commodore Roger Keyes and Lieutenant-Colonel Aspinall, of the Headquarters General Staff, I landed on the beach, where all seemed quiet and peaceful, and saw the Commander of the 11th Division, Major-General Hammersley. I warned him the sands were running out fast, and that by dawn the high ground to his front might very likely be occupied in force by the enemy. He saw the danger, but declared that it was a physical impossibility, at so late an hour (6 P.M.), to get out orders for a night attack, the troops being very much scattered. There was no other difficulty now, but this was insuperable; he could not recast his orders or get them round to his troops in time. But one brigade, the 32nd, was, so General Hammersley admitted, more or less concentrated and ready to move. The General Staff Officer of the division, Colonel Neil Malcolm, a soldier of experience, on whose opinion I set much value, was consulted. He agreed that the 32nd Brigade was now in a position to act. I, therefore, issued a direct order that, even if it were only with

this 32nd Brigade, the advance should begin at the earliest possible moment, so that a portion at least of the 11th Division should anticipate the Turkish reinforcements on the heights and dig themselves in there upon some good tactical point.

In taking upon myself the serious responsibility of thus dealing with a detail of divisional tactics I was careful to limit the scope of the interference. Beyond directing that the one brigade which was reported ready to move at once should try and make good the heights before the enemy got on to them I did nothing, and said not a word calculated to modify or in any way affect the attack already planned for the morning. Out of the thirteen battalions which were to have advanced against the heights at dawn four were now to anticipate that movement by trying to make good the key of the enemy's position at once and under cover of darkness.

I have not been able to get a clear and coherent account of the doings of the 32nd Brigade; but I have established the fact that it did not actually commence its advance till 4 A.M. on the 9th of August. The reason given is that the units of the brigade were scattered. In General Stopford's despatch he says that, "One company of the 6th East Yorks Pioneer Battalion succeeded in getting to the top of the hill north of Anafarta Sagir, but the rest of the battalion and the 32nd Brigade were attacked from both flanks during their advance, and fell back to a line north and south of Sulajik. Very few of the leading company or the Royal Engineers who accompanied it got back, and that evening the strength of the battalion was nine officers and 380 men."

After their retirement from the hill north of Anafarta Sagir (which commanded the whole battlefield) this 32nd Brigade then still marked the high-water level of the advance made at dawn by the rest of the division. When their first retirement was completed they had to fall back further, so as to come into line with the most forward of their comrades. The inference seems clear. Just as the 32nd Brigade in their advance met with markedly less opposition than the troops who attacked an hour and a half later, so, had they themselves started earlier, they would probably have experienced less opposition. Further, it seems reasonable to suppose that had the complete division started at 4 A.M. on the 9th, or, better still, at 10 P.M. on the 8th, they would have made good the whole of the heights in front of them.

That night I stayed at Suvla, preferring to drop direct cable contact with my operations as a whole to losing touch with a corps battle which seemed to be going wrong.

At dawn on the 9th I watched General Hammersley's attack, and very soon realised, by the well-sustained artillery fire of the enemy (so silent the previous day), and by the volume of the musketry, that Turkish reinforcements had arrived; that with the renewed confidence caused by our long delay the guns had been brought back; and that, after all, we were forestalled. This was a bad moment. Our attack failed; our losses were very serious. The enemy's enfilading shrapnel fire seemed to be especially destructive and demoralising, the shell bursting low and all along our line. Time after time it threw back our attack just as it seemed upon the point of making good. The 33rd Brigade at first made most hopeful progress in its attempt to seize Ismail Oglu Tepe. Some of the leading troops gained the summit, and were able to look over on to the other side. Many Turks were killed here. Then the centre seemed to give way. Whether this was the result of the shrapnel fire or whether as some say, an order to retire came up from the rear, the result was equally fatal to success. As the centre fell back the steady, gallant behaviour of the 6th Battalion, Border Regiment, and the 6th Battalion, Lincoln Regiment, on either flank was especially noteworthy. Scrub fires on Hill 70 did much to harass and hamper our troops. When the 32nd Brigade fell back before attacks from the slopes of the hill north of Anafarta Sagir and from the direction of Abrijka they took up the line north and south through Sulajik. Here their left was protected by two battalions of the 34th Brigade, which came up to their support. The line was later on prolonged by the remainder of the 34th Brigade and two battalions of the 159th Brigade of the 53rd Division. Their right was connected with the Chocolate Hills by the 33rd Brigade on the position to which they had returned after their repulse from the upper slopes of Ismail Oglu Tepe.

Some of the units which took part in this engagement acquitted themselves very bravely. I regret I have not had sufficient detail given me to enable me to mention them by name. The Divisional Commander speaks with appreciation of one freshly-landed battalion of the 53rd Division, a Hereford battalion, presumably the 1-1st Herefordshire, which attacked with impetuosity and courage between Hetman Chair and Kaslar Chair, about Azmak Dere, on the extreme right of his line.

During the night of the 8th-9th and early morning of the 9th the whole of the 53rd (Territorial) Division (my general reserve) had arrived and disembarked. I had ordered it up to Suvla, hoping that by adding its strength to the 9th Corps General Stopford might still be enabled to secure the commanding ground round the bay. The infantry brigades of the 53rd Division (no artillery had accompanied it from England) reinforced the 11th Division.

On August 10th the Corps Commander decided to make another attempt to take the Anafarta ridge. The 11th Division were not sufficiently rested to play a prominent part in the operation, but the 53rd Division, under General Lindley, was to attack, supported by General Hammersley. On the 10th there were one brigade of Royal Field Artillery ashore, with two mountain batteries, and all the ships' guns were available to co-operate. But the attack failed though the Corps Commander considers that seasoned troops would have

succeeded, especially as the enemy were showing signs of being shaken by our artillery fire. General Stopford points out, however, and rightly so, that the attack was delivered over very difficult country, and that it was a high trial for troops who had never been in action before, and with no regulars to set a standard. Many of the battalions fought with great gallantry, and were led forward with much devotion by their officers. At a moment when things were looking dangerous two battalions of the 11th Division (not specified by the Corps Commander) rendered very good service on the left of the Territorials. At the end of the day our troops occupied the line Hill east of Chocolate Hill—Sulajik, whilst the enemy—who had been ably commanded throughout—were still receiving reinforcements, and, apart from their artillery, were three times as strong as they had been on the 7th August.

Orders were issued to the General Officer Commanding 9th Corps to take up and entrench a line across the whole front from near the Azmak Dere, through the knoll east of the Chocolate Hill, to the ground held by the 10th Division about Kiretch Tepe Sirt. General Stopford took advantage of this opportunity to reorganise the divisions, and, as there was a gap in the line between the left of the 53rd Division and the right of the 10th Division, gave orders for the preparation of certain strong points to enable it to be held.

The 54th Division (infantry only) arrived, and were disembarked on August 11th and placed in reserve. On the following day—August 12th—I proposed that the 54th Division should make a night march in order to attack, at dawn on the 13th, the heights Kavak Tepe—Teke Tepe. The Corps Commander having reason to believe that the enclosed country about Kuchuk Anafarta Ova and the north of it was held by the enemy, ordered one brigade to move forward in advance, and make good Kuchuk Anafarta Ova, so as to ensure an unopposed march for the remainder of the division as far as that place. So that afternoon the 163rd Brigade moved off, and, in spite of serious opposition, established itself about the A. of Anafarta (J 18m. 4 and 7), in difficult and enclosed country. In the course of the fight, creditable in all respects to the 163rd Brigade, there happened a very mysterious thing. The 1-5th Norfolks were on the right of the line, and found themselves for a moment less strongly opposed than the rest of the brigade. Against the yielding forces of the enemy Colonel Sir H. Beauchamp, a bold, self-confident officer, eagerly pressed forward followed by the best part of the battalion. The fighting grew hotter, and the ground became more wooded and broken. At this stage many men were wounded or grew exhausted with thirst. These found their way back to camp during the night. But the Colonel with 16 officers and 250 men, still kept pushing on, driving the enemy before him. Amongst these ardent souls was part of a fine company enlisted from the King's Sandringham estates. Nothing more was ever seen or heard of any of them They charged into the forest, and were lost to sight or sound. Not one of them ever came back.

The night march and projected attack were now abandoned, owing to the Corps Commander's representations as to the difficulties of keeping the division supplied with food, water, etc., even should they gain the height. General Birdwood had hoped he would soon be able to make a fresh attack on Sari Bair, provided that he might reckon on a corresponding vigorous advance to be made by the 11th and 54th Divisions on Ismail Oglu Tepe. On August 13th I so informed General Stopford. But when it came to business, General Birdwood found he could not yet carry out his new attack on Sari Bair—and, indeed, could only help the 9th Corps with one brigade from Damakjelik Bair. I was obliged, therefore, to abandon this project for the nonce, and directed General Stopford to confine his attention of strengthening his line across his present front. To straighten out the left of this line General Stopford ordered the General Offier Commanding the 10th Division to advance on the following day (15th August), so as to gain possession of the crest of the Kiretch Tepe Sirt, the 54th Division to co-operate.

The 30th and 31st Infantry Brigades of the 10th Irish Division were to attack frontally along the high ridge. The 162nd Infantry Brigade of the 54th Division were to support on the right. The infantry were to be seconded by a machine-gun detachment of the Royal Naval Air Service, by the guns of H.M.S. "Grampus" and H.M.S. "Foxhound" from the Gulf of Saros, by the Argyll Mountain Battery, the 15th Heavy Battery, and the 38th Field Battery. After several hours of indecisive artillery and musketry fighting, the 6th Royal Dublin Fusiliers charged forward with loud cheers, and captured the whole ridge, together with eighteen prisoners. The vigorous support rendered by the naval guns was a feature of this operation. Unfortunately, the point of the ridge was hard to hold, and means for maintaining the forward trenches had not been well thought out. Casualties became very heavy, the 5th Royal Irish Fusiliers having only one officer left, and the 5th Inniskilling Fusiliers also losing heavily in officers. Reinforcements were promised, but before they could arrive the officer left in command decided to evacuate the front trenches. The strength of the Turks opposed to us was steadily rising, and had now reached 20,000.

On the evening of the 15th August General Stopford handed over command of the 9th Corps.

The units of the 10th and 11th Divisions had shown their mettle when they leaped into the water to get more quickly to close quarters, or when they stormed Lala Baba in the darkness. They had shown their resolution later when they tackled the Chocolate Hills and drove the enemy from Hill 10 right back out of rifle range from the beaches.

Then had come hesitation. The advantage had not been pressed. The senior Commanders at Suvla had had no personal experience of the new trench warfare; of the Turkish methods; of the paramount importance of time. Strong, clear leadership had not been promptly

enough applied. These were the reasons which induced me, with your Lordship's approval, to appoint Major-General H. de B. De Lisle to take over temporary command.

I had already seen General De Lisle on his way from Cape Helles, and my formal instructions—full copy in Appendix—were handed to him by my Chief of the General Staff. Under these he was to make it his most pressing business to get the Corps into fighting trim again, so that as big a proportion of it as possible might be told off for a fresh attack upon Ismail Oglu Tepe and the Anafarta spur. At his disposal were placed the 10th Division (less one brigade), the 11th Division, the 53rd and 54th Divisions—a force imposing enough on paper, but totalling, owing to casualties, under 30,000 rifles.

The fighting strength of ourselves and of our adversaries stood at this time at about the following figures:—Lieutenant-General Birdwood commanded 25,000 rifles, at Anzac; Lieutenant-General Davies, in the southern zone, commanded 23,000 rifles; whilst the French corps alongside of him consisted of some 17,000 rifles. The Turks had been very active in the south, doubtless to prevent us reinforcing Anzac or Suvla; but it is doubtful if there were more than 35,000 of them in that region. The bulk of the enemy were engaged against Anzac or were in reserve in the valleys east and north of Sari Bair. Their strength was estimated at 75,000 rifles.

The Turks then, I reckoned, had 110,000 rifles to our 95,000, and held all the advantages of ground; they had plenty of ammunition, also drafts wherewith to refill ranks depleted in action within two or three days. My hopes that these drafts would be of poor quality had been every time disappointed. After weighing all these points, I sent your Lordship a long cable. In it I urged that if the campaign was to be brought to a quick, victorious decision, large reinforcements must at once be sent out. Autumn, I pointed out, was already upon us, and there was not a moment to be lost. At that time (16th August) my British divisions alone were 45,000 under establishment, and some of my fine battalions had dwindled down so far that I had to withdraw them from the fighting line. Our most vital need was the replenishment of these sadly depleted ranks. When that was done I wanted 50,000 fresh rifles. From what I knew of the Turkish situation, both in its local and general aspects, it seemed, humanly speaking, a certainty that if this help could be sent to me *at once* we could still clear a passage for our fleet to Constantinople.

It may be judged, then, how deep was my disappointment when I learnt that the essential drafts, reinforcements and munitions could not be sent to me, the reason given being one which prevented me from any further insistence. So I resolved to do my very best with the means at my disposal, and forthwith reinforced the northern wing with the 2nd Mounted Division (organised as dismounted troops from Egypt and the 29th Division from the southern area. These movements, and the work of getting the 9th Corps and attached divisions into battle array took time, and it was not until the 21st that I was ready to renew the attack—an attack to be carried out under very different conditions from those of the 7th and 8th August.

The enemy's positions were now being rapidly entrenched, and, as I could not depend on receiving reinforcing drafts, I was faced with the danger that if I could not drive the Turks back I might lose so many men that I would find myself unable to hold the very extensive new area of ground which had been gained. I therefore decided to mass every available man against Ismail Oglu Tepe, a *sine quâ non* to my plans whether as a first step towards clearing the valley, or, if this proved impossible, towards securing Suvla Bay and Anzac Cove from shell fire.

The scheme for this attack was well planned by General De Lisle. The 53rd and 54th Divisions were to hold the enemy from Sulajik to Kiretch Tepe Sirt while the 29th Division and 11th Division stormed Ismail Oglu Tepe. Two brigades, 10th Division, and the 2nd Mounted Division were retained in Corps Reserve. I arranged that General Birdwood should co-operate by swinging forward his left flank to Susuk Kuyu and Kaiajik Aghala. Naturally I should have liked still further to extend the scope of my attack by ordering an advance of the 9th Corps all along their line, but many of the battalions had been too highly tried, and I felt it was unwise to call upon them for another effort so soon. The attack would only be partial, but it was an essential attack if any real progress was to be made. Also, once the Anafarta ridge was in my hands the enemy would be unable too reinforce through the gap between the two Anafartas, and then, so I believed, my left would find no difficulty in getting on.

My special objective was the hill which forms the south-west corner of the Anafarta Sagir spur. Ismail Oglu Tepe, as it is called, forms a strong natural barrier against an invader from the Ægean who might wish to march direct against the Anafartas. The hill rises 350 feet from the plain, with steep spurs jutting out to the west and south-west, the whole of it covered with dense holly oak scrub, so nearly impenetrable that it breaks up an attack and forces troops to move in single file along goat tracks between the bushes. The comparatively small number of guns landed up to date was a weakness, seeing we had now to storm trenches, but the battleships were there to back us, and as the bombardment was limited to a narrow front of a mile it was hoped the troops would find themselves able to carry the trenches and that the impetus of the charge would carry them up to the top of the crest. Our chief difficulty lay in the open nature and shallow depth of the ground available for the concentration for attack. The only cover we possessed was the hill Lala Baba, 200 yards from the sea, and Yilghin Burnu, half a mile from the Turkish front, the ground between these two

being an exposed plain. The 29th Division, which was to make the attack on the left, occupied the front trenches during the preceding night; the 11th Division, which was to attack on the right, occupied the front trenches on the right of Yilghin Burnu.

By some freak of nature Suvla Bay and plain were wrapped in a strange mist on the afternoon of the 21st of August. This was sheer bad luck, as we had reckoned on the enemy's gunners being blinded by the declining sun and upon the Turkish trenches being shown up by the evening light with singular clearness, as would have been the case on ninety-nine days out of a hundred. Actually we could hardly see the enemy lines this afternoon, whereas out to the westward targets stood out in strong relief against the luminous mist. I wished to postpone the attack, but for various reasons this was not possible, and so, from 2-30 P.M. to 3 P.M. a heavy but none too accurate artillery bombardment from land and sea was directed against the Turkish first line of trenches, whilst twenty-four machine-guns in position on Yilghin Burnu did what they could to lend a hand.

At 3 P.M., an advance was begun by the infantry on the right of the line. The 34th Brigade of the 11th Division rushed the Turkish trenches between Hetman Chair and Aire Kavak, practically without loss, but the 32nd Brigade, directed against Hetman Chair and the communication trench connecting that point with the south-west corner of the Ismail Oglu Tepe spur, failed to make good its point. The brigade had lost direction in the first instance, moving north-east instead of east, and though it attempted to carry the communication trench from the north-east with great bravery and great disregard of life, it never succeeded in rectifying the original mistake. The 33rd Brigade, sent up in haste with orders to capture this communication trench at all costs, fell into precisely the same error, part of it marching north east and part south-east to Susuk Kuyu.

Meanwhile the 29th Division, whose attack had been planned for 3-30 P.M., had attacked Scimitar Hill (Hill 70) with great dash. The 87th Brigade, on the left, carried the trenches on Scimitar Hill, but the 86th Brigade were checked and upset by a raging forest fire across their front. Eventually pressing on, they found themselves unable to advance up the valley between the two spurs owing to the failure of the 32nd Brigade of the 11th Division on their right. The brigade then tried to attack eastwards, but were decimated by a cross fire of shell and musketry from the north and south-east. The leading troops were simply swept off the top of the spur, and had to fall back to a ledge south-west of Scimitar Hill, where they found a little cover. Whilst this fighting was in progress the 2nd Mounted Division moved out from Lala Baba in open formation to take up a position of readiness behind Yilghin Burnu. During this march they came under a remarkably steady and accurate artillery fire. The advance of these English Yeomen was a sight calculated to send a thrill of pride through anyone with a drop of English blood running in their veins. Such superb martial spectacles are rare in modern war. Ordinarily it should always be possible to bring up reserves under some sort of cover from shrapnel fire. Here, for a mile and a half, there was nothing to conceal a mouse, much less some of the most stalwart soldiers England has ever sent from her shores. Despite the critical events in other parts of the field, I could hardly take my glasses from the Yeomen; they moved like men marching on parade. Here and there a shell would take toll of a cluster; there they lay; there was no straggling; the others moved steadily on; not a man was there who hung back or hurried. But such an ordeal must consume some of the battle-winning fighting energy of those subjected to it, and it is lucky indeed for the Turks that the terrain, as well as the lack of trenches, forbade us from letting the 2nd Mounted Division loose at close quarters to the enemy without undergoing this previous too heavy baptism of fire.

Now that the 11th Division had made their effort, and failed, the 2nd South Midland Brigade (commanded by Brigadier-General Earl of Longford) was sent forward from its position of readiness behind Yilghin Burnu, in the hope that they might yet restore the fortunes of the day. This brigade, in action for the first time, encountered both bush fires and musketry without flinching, but the advance had in places to be almost by inches, and the actual close attack by the Yeomen did not take place until night was fast falling. On the left they reached the foremost line of the 29th Division, and on the right also they got as far as the leading battalions. But, as soon as it was dark, one regiment pushed up the valley between Scimitar Hill and Hill 100 (on Ismail Oglu Tepe), and carried the trenches on a small knoll near the centre of this horseshoe. The regiment imagined it had captured Hill 100, which would have been a very notable success, enabling as it would the whole of our line to hang on and dig in. But when the report came in some doubt was felt as to its accuracy, and a reconnaissance by staff officers showed that the knoll was a good way from Hill 100, and that a strongly-held semi-circle of Turkish trenches (the enemy having been heavily reinforced) still denied us access to the top of the hill. As the men were too done, and had lost too heavily to admit of a second immediate assault, and as the knoll actually held would have been swept by fire at daybreak, there was nothing for it but to fall back under cover of darkness to our original line. The losses in this attack fell most heavily on the 29th Division. They were just under 5,000.

I am sorry not to be able to give more detail as to the conduct of individuals and units during this battle. But the 2nd South Midland Brigade has been brought to my notice, and it consisted of the Bucks Yeomanry, the Berks Yeomanry and the Dorset Yeomanry. The Yeomanry fought very bravely, and on personal, as well as public, grounds I specially deplore the loss of Brigadier-General Earl of Longford, K.P., M.V.O., and Brigadier-General P. A. Kenna, V.C., D.S.O., A.D.C.

The same day, as pre-arranged with General Birdwood, a force consisting of two battalions of New Zealand Mounted Rifles, two battalions of the 29th Irish Brigade, the 4th South Wales Borderers, and 29th Indian Infantry Brigade, the whole under the command of Major-General H. V. Cox, was working independently to support the main attack.

General Cox divided his force into three sections; the left section to press forward and establish a permanent hold on the existing lightly-held outpost line covering the junction of the 11th Division with the Anzac front; the centre section to seize the well at Kabak Kuyu, an asset of utmost value, whether to ourselves or the enemy; the right section to attack and capture the Turkish trenches on the north-east side of the Kaiajik Aghala.

The advance of the left section was a success; after a brisk engagement the well at Kabak Kuyu was seized by the Indian Brigade, and, by 4-30, the right column, under Brigadier-General Russell, under heavy fire, effected a lodgment on the Kaiajik Aghala, where our men entrenched, and began to dig communications across the Kaiajik Dere towards the lines of the 4th Australian Brigade south of the Dere. A pretty stiff bomb fight ensued, in which General Russell's troops held their own through the night against superior force. At 6 A.M. on the morning of the 22nd August, General Russell, reinforced by the newly-arrived 18th Australian Battalion, attacked the summit of the Kaiajik Aghala. The Australians carried 150 yards of the trenches, losing heavily in so doing, and were then forced to fall back again owing to enfilade fire, though in the meantime the New Zealand Mounted Rifles managed, in spite of constant counter-attacks, to make good another 80 yards. A counter-attack in strength launched by the Turks at 10 A.M., was repulsed; the new line from the Kaiajik Aghala to Susuk Kuyu was gradually strengthened, and eventually joined on to the right of the 9th Army Corps, thereby materially improving the whole situation. During this action the 4th Australian Brigade, which remained facing the Turks on the upper part of the Kaiajik Aghala, was able to inflict several hundred casualties on the enemy as they retreated or endeavoured to reinforce.

On the 21st of August we had carried the Turkish entrenchments at several points, but had been unable to hold what we had gained except along the section where Major-General Cox had made a good advance with Anzac and Indian troops. To be repulsed is not to be defeated, as long as the commander and his troops are game to renew the attack. All were eager for such a renewal of the offensive; but clearly we would have for some time to possess our souls in patience, seeing that reinforcements and munitions were short, that we were already outnumbered by the enemy, and that a serious outbreak of sickness showed how it had become imperative to give a spell of rest to the men who had been fighting so magnificently and so continuously. To calculate on rest, it may be suggested, was to calculate without the enemy. Such an idea has no true bearing on the feelings of the garrison of the peninsula. That the Turks should attack had always been the earnest prayer of all of us, just as much after the 21st August as before it. And now that we had to suspend progress for a bit, work was put in hand upon the line from Suvla to Anzac, a minor offensive routine of sniping and bombing was organised, and, in a word, trench warfare set in on both sides.

On 24th August Lieutenant-General the Hon. J. H. G. Byng, K.C.M.G., C.B., M.V.O., assumed command of the 9th Army Corps.

The last days of the month were illumined by a brilliant affair carried through by the troops under General Birdwood's command. Our object was to complete the capture of Hill 60 north of the Kaiajik Aghala, commenced by Major-General Cox on the 21st August. Hill 60 overlooked the Biyuk Anafarta valley, and was therefore tactically a very important feature.

The conduct of the attack was again entrusted to Major-General Cox, at whose disposal were placed detachments from the 4th and 5th Australian Brigades, the New Zealand Mounted Rifles Brigade, and the 5th Connaught Rangers The advance was timed to take place at 5 P.M. on the 27th of August, after the heaviest artillery bombardment we could afford. This bombardment seemed effective; but the moment the assailants broke cover they were greeted by an exceeding hot fire from the enemy field guns, rifles, and machine-guns, followed after a brief interval by a shower of heavy shell, some of which, most happily, pitched into the trenches of the Turks. On the right the detachment from the 4th and 5th Australian Brigades could make no headway against a battery of machine-guns which confronted them. In the centre the New Zealanders made a most determined onslaught, and carried one side of the topmost knoll. Hand-to-hand fighting continued here till 9-30 P.M. when it was reported that nine-tenths of the summit had been gained. On the left the 250 men of the 5th Connaught Rangers excited the admiration of all beholders by the swiftness and cohesion of their charge. In five minutes they had carried their objective, the northern Turkish communications, when they at once set to and began a lively bomb-fight along the trenches against strong parties which came hurrying up from the enemy supports and afterwards from their reserves. At midnight fresh troops were to have strengthened our grip upon the hill, but before that hour the Irishmen had been out-bombed, and the 9th Australian Light Horse, who had made a most plucky attempt to recapture the lost communication trench, had been repulsed. Luckily, the New Zealand Mounted Rifles refused to recognize that they were worsted. Nothing would shift them. All that night and all next day, through bombing, bayonet charges, musketry, shrapnel, and heavy shell, they hung on to their 150 yards of trench. At 1 A.M. on August 29th the 10th Light Horse made another attack on the lost communication trenches to the left, carried them, and finally

held them. This gave us complete command of the underfeature, an outlook over the Anafarta Sagir valley, and safer lateral communications between Anzac and Suvla Bay.

Our casualties in this hotly contested affair amounted to 1,000. The Turks lost out of all proportion more. Their line of retreat was commanded from our Kaiajik Dere trenches, whence our observers were able to direct artillery fire equally upon their fugitives and their reinforcements. The same observers estimated the Turkish casualties as no less than 5,000. Three Turkish machine-guns and forty-six prisoners were taken, as well as three trench mortars, 300 Turkish rifles, 60,000 rounds of ammunition, and 500 bombs. Four hundred acres were added to the territories of Anzac. Major-General Cox showed his usual forethought and wisdom. Brigadier-General Russell fought his men splendidly.

My narrative of battle incidents must end here. From this date onwards up to the date of my departure on October 17th the flow of munitions and drafts fell away. Sickness, the legacy of a desperately trying summer, took heavy toll of the survivors of so many arduous conflicts. No longer was there any question of operations on the grand scale, but with such troops it was difficult to be downhearted. All ranks were cheerful; all remained confident that, so long at they stuck to their guns, their country would stick to them, and see them victoriously through the last and greatest of the crusades.

On the 11th October your Lordship cabled asking me for an estimate of the losses which would be involved in an evacuation of the peninsula. On the 12th October I replied in terms showing that such a step was to me unthinkable. On the 16th October I received a cable recalling me to London for the reason, as I was informed by your Lordship on my arrival, that His Majesty's Government desired a fresh, unbiassed opinion, from a responsible Commander, upon the question of early evacuation.

In bringing this dispatch to a close I wish to refer gratefully to the services rendered by certain formations, whose work has so far only been recognized by a sprinkling of individual rewards.

Much might be written on the exploits of the Royal Naval Air Service, but these bold flyers are laconic, and their feats will mostly pass unrecorded. Yet let me here thank them, with their Commander, Colonel F. H. Sykes, of the Royal Marines, for the nonchalance with which they appear to affront danger and death, when and where they can. So doing, they quicken the hearts of their friends on land and sea—an asset of greater military value even than their bombs or aerial reconnaissances, admirable in all respects as these were.

With them I also couple the *Service de l' Aviation* of the *Corps Expeditionnaire d'Orient*, who daily wing their way in and out of the shrapnel under the distinguished leadership of M. le Capitaine Césari.

The Armoured Car Division (Royal Naval Air Service) have never failed to respond to any call which might be made upon them. Their organisation was broken up; their work had to be carried out under strange conditions—from the bows of the "River Clyde," as independent batteries attached to infantry divisions, etc., etc.—and yet they were always cheerful, always ready to lend a hand in any sort of fighting that might give them a chance of settling old scores with the enemy.

Next I come to the Royal Artillery. By their constant vigilance, by their quick grasp of the key to every emergency, by their thundering good shooting, by hundreds of deeds of daring, they have earned the unstinted admiration of all their comrade services. Where all fought so remarkably the junior officers deserve a little niche of their own in the Dardanelles record of fame. Their audacity in reconnaissance, their insouciance under the hottest of fires, stand as a fine example not only to the Army, but to the nation at large.

A feature of every report, narrative or diary I have read has been a tribute to the stretcher bearers. All ranks, from Generals in command to wounded men in hospital, are unanimous in their praise. I have watched a party from the moment when the telephone summoned them from their dug-out to the time when they returned with their wounded. To see them run lightheartedly across fire-swept slopes is to be privileged to witness a superb example of the hero in man. No braver corps exists, and I believe the reason to be that all thought of self is instinctively flung aside when the saving of others is the motive.

The services rendered by Major-General (temporary Lieutenant-General) E. A. Altham, C.B., C.M.G., Inspector-General of Communications, and all the Departments and Services of the Lines of Communication assured us a life-giving flow of drafts, munitions and supplies. The work was carried out under unprecedented conditions, and is deserving, I submit, of handsome recognition.

With General Altham were associated Brigadier-General (temporary Major-General) C. R. R. McGrigor, C.B., at first Commandant of the Base at Alexandria and later Deputy Inspector-General of Communications, and Colonel T E. O'Leary, Deputy Adjutant-General, 3rd Echelon. Both of these officers carried out their difficult duties to my entire satisfaction.

My Military Secretary, Lieutenant-Colonel S. H. Pollen, has displayed first-class ability in the conduct of his delicate and responsible duties.

Also I take the opportunity of my last dispatch to mention two of my Aides-de-Camp —Major F. L. Magkill-Crichton-Maitland, Gordon Highlanders, Lieutenant Hon. G. St. J. Brodrick, Surrey Yeomanry.

I have many other names to bring to notice for distinguished and gallant service during the operations under review, and these will form the subject of a separate communication.

And now, before affixing to this despatch my final signature as Commander-in-Chief of the Mediterranean Expeditionary Force, let me first pay tribute to the everlasting memory of my dear comrades who will return no more. Next, let me thank each and all, Generals, Staff, Regimental Leaders, and rank and file, for their wonderful loyalty, patience, and self-sacrifice. Our progress was constant, and if it was painfully slow—they know the truth. So I bid them all farewell with a special God-speed to the campaigners who have served with me right through from the terrible yet most glorious earlier days—the incomparable 29th Division; the young veterans of the Naval Division; the ever-victorious Australians and New Zealanders; the stout East Lancs, and my own brave fellow-countrymen of the Lowland Division of Scotland.

I have the honour to be,
Your Lordship's most obedient servant,

IAN HAMILTON,
General, Commander-in-Chief,
Mediterranean Expeditionary Force.

Supplement, dated 28th January 1916, to the "London Gazette" of the 28th January 1916, pages, 1195, 1196, 1197, 1198, 1199, 1202, 1206, 1207, 1210 and 1211.

War Office, London, S. W.,
28th January 1916.

The following despatch has been received from General Sir Ian Hamilton, G.C.B.:—

1, Hyde Park Gardens,
London, W.,
11th December 1915.

My LORD,

I have the honour to submit herewith a list of the names of the officers and men whose services I wish to bring to your Lordship's notice in connection with the operations described in my despatch of 11th December 1915.

I have the honour to be,
Your Lordship's most obedient Servant,
IAN HAMILTON, General.

REGISTERED No. C. 600

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 18, 1916.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 9th September 1915.

On and after 6th November and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Delhi. Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Delhi and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*.

J. P. HEWETT,
Secretary to the Government of India."

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

1905.

253, (Russell & anr.)..

1908.

448, (Grand Rapids Veneer Works).

1909.

271, (Newton). 491, (Harrop). 545, (Monin).

APPLICATION FOR AMENDMENT UNDER SECTION 17.

Notice is hereby given that all persons interested in opposing the following application to amend may at any time within three months of the date of this *Gazette of India* give notice at the Patent Office in the prescribed form No. 5 of such opposition.

2248 of 1915. S. M. Rutnagur, of No. 27, Medows Street, Bombay, seeks leave to amend the specification of his application for a patent numbered as above. The proposed amendments as shown in the printed specification are as follows:—

On page 1.

Line 18. Inserting "while" after "shutter" and substituting "9" for "8".

Line 24. Substituting "or laths" for "of metal."

On page 2.

Line 14. Substituting "manner" for "way."

Line 18. Inserting "or laths" after "strips" and striking out "but in this case they are joined together by stays or wires and being made of flexible metal the whole is easily."

Line 20. Striking out "and removed when desired."

Line 21. Substituting "solid" for "wooden."

Line 38. Substituting "q" for "p."

Line 39. Inserting "solid" after "vertical."

Line 41 to Line 46. Striking out "I am aware of the prior specifications Nos. 1890 of 1914 and 2131 of 1915 in which ventilation is effected through vertical and inclined sashes and controlled by flaps or shutters. The present invention however provides *inter alia* a novel form of screen and shutter which cannot only be used in combination with the ventilating devices herein described but they can also be used with the vertical or inclined sashes described in the two previous specifications."

Line 47. Striking out "also."

Line 54. Substituting "a tortuous passage" for "space."

Line 56. Inserting "hollow" after "A", and substituting "or laths with" for "of metal joined together by stays so as to form."

Line 59. Substituting "a tortuous passage" for "space."

EXTENSION OF COPYRIGHT IN DESIGNS.

Class 13. Nos. 34 to 37. The Calico Printers' Association Ld., St. James's Buildings, Oxford Street, Manchester, England May 25, 1911. (Copyright in designs extended for five years.)

DESIGNS ENTERED ON THE REGISTER.

March 6th to March 11th.

Class 13. Nos. 3890 to 3892. Parbhudas Nagardas Kinariwala Sons & Co., Saiyadpura, Vavsheri, Surat. March 3.

Class 13. Nos. 3893 to 3955. The Calico Printers' Association Ld., St. James's Buildings, Oxford Street, Manchester, England. March 4.

Class 14. Nos. 3956 to 3960. The Calico Printers' Association Ld., St. James's Buildings, Oxford Street, Manchester, England. March 4.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

By order,

G. F. DEMONTMORENCY,

Personal Assistant to Chief Commissioner, Delhi.

ORDERS BY THE HON'BLE THE CHIEF COMMISSIONER, AJMER-MERWARA.

NOTIFICATION.

Mount Abu, the 1st March 1916.

No. 306—1093.—The following draft of a Notification which it is proposed to issue in exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), is published for the information of all persons likely to be affected thereby and notice is hereby given that the said draft will be taken into consideration by the Hon'ble the Chief Commissioner on or after the 25th March 1915.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date aforesaid will be considered by the Hon'ble the Chief Commissioner.

Draft Notification.

In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), and with the previous sanction of the Governor General in Council the Hon'ble the Chief Commissioner is pleased to make the following amendments in the Ajmer-Merwara Petroleum Rules issued in this office Notification No. 1530-1093, dated the 14th October 1909:—

(1) In rule 6, Chapter IV, Part II, of the said rules for the words "forty gallons" the words "sixty-five gallons" shall be substituted.

(2) In condition 3 of license form B, condition 1 of license form H, condition 1 (for dangerous petroleum in the case of the holder of a license in form H) of license form I, condition 1 of license form K and condition 1 of license form M, appended to the said rules—

(*a*) for the words "forty gallons" after the words "not more than" the words "sixty-five gallons" shall be substituted; and

(*b*) the following shall be added as sub-clause 7:—

"(7) When the capacity exceeds forty but does not exceed sixty-five gallons..... 10 B. W. G."

By order,

B. J. GLANCY,

First Assistant to the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

THE HON'BLE THE AGENT TO THE GOVERNOR-GENERAL IN CENTRAL INDIA.

NOTIFICATIONS.

Dated Central India Agency, Indore, the 7th March 1916.

No. 317-*C*.—In pursuance of section 4 (*a*) of the Mhow, Nimach and Nowgong Excise Law, 1898, and in modification of the notification of the Central India Agency No. 1338-C., dated the 3rd August 1915, the Agent to the Governor General in Central India, with the previous sanction of the Governor General in Council, is pleased to fix the duty in respect of denatured spirit removed from the Nowgong distillery at seven and a half per cent. on the value of the spirit as determined by the Excise Commissioner for Central India.

The 13th March 1916.

No. 601-*D*.—The six months combined leave (privilege leave for 3 months combined with furlough on medical certificate for 3 months) granted to the Reverend A. B. Roberts, Junior Chaplain of Mhow, in the Central India Agency Notification No. 1502-D., dated the 22nd June 1915, is hereby extended by 5 days, *i.e.*, to the 15th December 1915.

By order,

A. R. JELF,

First Assistant to the Hon'ble the Agent to the Governor-General in Central India.

THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 11th March 1916.

No. 354.—The next half yearly examination in the Pashtu language by the Higher Standard will be held at Quetta in the Durbar Hall on 3rd April 1916 and the following day commencing at 10-30 A.M., each day.

By order,
C. ACTON,
Second Assistant.

THE HON'BLE THE CHIEF COMMISSIONER OF BRITISH BALUCHISTAN.

NOTIFICATION.

Quetta, the 11th March 1916.

No. 759-*R*.—The following draft amendment which it is proposed to make in the rules made under section 9 of the Indian Petroleum Act, 1899 (VIII of 1899) and published with the Hon'ble the Chief Commissioner's Notification No. 2308, dated the 29th April 1909, is published for criticism.

The draft will be taken into consideration on or after the 15th May 1916 with any remarks or suggestions which are received on or before that date :—

"(1) In rule 6, chapter IV, Part II of the said rules for the words "forty gallons" the words "sixty-five gallons" shall be substituted.

(2) In condition 3 of license form B, condition 1 of license form H, condition 1 (for dangerous petroleum in the case of holder of a license in form H) of license form I and condition 1 of license form K appended to the said rules :—

(*a*) for the words "forty gallons" after the words "not more than" the words "sixty-five gallons" shall be substituted ; and

(*b*) the following shall be added as sub-clause (7) ;—

"(7) When the capacity exceeds forty but does not exceed sixty-five gallons..... .....10 B. W. G."

By order,
A. N. L. CATER,
Secretary.

Whereas the Insolvent has filed a composition scheme under section 27 of Act III of 1907 and the case has been fixed for hearing for 8th April 1916, at 11 A.M.

The creditors are hereby informed that they must appear before the Court on the date fixed.

Given under my hand and seal of the Court this 8th day of April 1916.

S. ABDUL WAHID KHAN,
Judge, Insolvency Court, Ajmer.

IN THE HIGH COURT OF BOMBAY.

In Insolvency.

No. 141 OF 1916.

Dated the 7th day of March 1916.

Re Matilal Khushaldas, doing business in gold and silver threads at Parsi Chali, Bhendy Bazar, outside the Fort: an adjudged Insolvent.

Whereas the abovenamed Motilal Khushaldas

has been this day duly adjudged to have committed acts of Insolvency under Section IX of the Presidency Towns Insolvency Act, 1909 (III of 1909). It is ordered that all the estate and effects of the said Insolvent do vest in the Official Assignee of this Honourable Court, and it is further ordered that the said Insolvent do, immediately after the service of the order of adjudication upon him, attend the Office of the said Official Assignee.

R. B. PATEL,
Chief Clerk.

* The figures under "Rice, husked" represent the prices of common rice

NOTE.—These statistics are compiled from the fortnightly returns furnished by District Officers to Local Governments and Administrations, etc They relate to the wholesale prices in the principal markets (not necessarily district headquarters) in each province on the last (or nearest mart) day of each fortnight.

(The figures state prices in rupees per ten maunds)

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, MARCH 10, 1916

Second WHEAT Forecast, 1915-16.

This forecast is based on reports received from local authorities, and refers to 99·5 per cent of the total wheat acreage of India. The statistics, therefore, cover all the important wheat growing areas. The condition of the crop referred to below generally relates to that prevailing in the latter part of February.

The total area sown amounts to 30,227,000 acres, as against 32,034,000 acres, the revised estimate at the corresponding date of last year, or a decrease of 1,807,000 acres, or nearly 6 per cent. The total area in the final forecast of last year (published in May 1915) was 32,230,000 acres. It may be noted that the increase in acreage now estimated as compared with the area in the first forecast (at the end of December 1915) is 7 per cent. The corresponding increase in the second as against the first forecast in recent years was 11 per cent in 1915, 16 per cent in 1914, 22 per cent in 1913, and 15 per cent in 1912.*

The detailed figures for each province are as follows :—

Second forecast.

Provinces and States	Area		Increase + or Decrease −
	March 1915-16	March 1914-15	
	Acres	Acres	Acres
Punjab (a)	9,857,000	11,197,000	−1,340,000
United Provinces	7,500,000	7,450,000	+50,000
Central Provinces and Berar (a)	3,521,000	(b)3,558,000	−37,000
Bombay and Sind (a)	2,415,000	2,450,000	−35,000
Bihar and Orissa	1,328,000	1,203,000	+125,000
North-West Frontier Province	851,000	1,106,000	−255,000
Bengal	134,000	135,000	−1,000
Ajmer-Merwara	10,000	16,000	−6,000
Central India	2,924,000	3,080,000	−156,000
Rajputana	625,000	908,000	−283,000
Hyderabad	1,058,000	(b) 928,000	+130,000
Mysore	4,000	3,000	+1,000
Total	30,227,000	32,034,000	−1,807,000

It will be seen that the area this year, as against that on the corresponding date of last year, shows a decrease of 37 per cent in Ajmer-Merwara, 31 per cent in Rajputana, 23 per cent in the North-West Frontier Province, 12 per cent in the Punjab, and 5 per cent in Central India. On the other hand, Hyderabad shows an increase of 14 per cent, Bihar and Orissa 10 per cent, and the United Provinces 1 per cent.

The failure of the winter rains in December and January seriously affected the crop, particularly on unirrigated areas, in the Punjab,† the United Provinces, the North-West Frontier Province, Bengal, Ajmer-Merwara, Rajputana, Sind, and the northern parts of the Bombay Presidency. The rain received in February has, however, materially benefited the crop. In the Central Provinces and Berar, Bihar and Orissa, Central India, Hyderabad, Mysore, and in the Bombay Deccan the weather conditions have, on the whole, been favourable, and the crop is reported to be generally good. It will be seen from the table on rainfall appended to this forecast that the winter rains have been below normal in the Punjab, the United Provinces, the Central Provinces and Berar, and in the eastern parts of Central India. In the western parts of Central India they have been slightly above normal.

The condition of the crop in the reporting provinces is summarised below :—

Punjab (32·5 per cent of the total area under wheat in India).—The area sown in the British districts is now estimated at 8,799,000 acres, which is 12 per cent short of the area reported at this time last year. The area in Native States is now estimated at 1,058,000 acres, which is 10 per cent less than the corresponding estimate of last year. The combined area of British and Native territory (9,857,000 acres) shows a decrease of 12 per cent as compared with the estimate made at this time last year. The decrease, as explained in the December forecast, is due to some extent to unfavourable climatic conditions and to shortage of canal water at sowing time. It is also due in some degree to the fact that the estimates made this time last year were perhaps somewhat optimistic. As compared with the first (December) estimate of this year, the present estimate shows an increase of about 4 per cent, which is chiefly due to further sowings on irrigated area, which was also facilitated by the light rain received on the 15th and 16th December. The State of Patiala shows the largest increase over the first forecast, *viz.*, 58 per cent; Lyallpur shows an increase of 30 per cent and Multan 15 per cent; while the Bahawalpur State shows a decrease of 46 per cent.

Light showers received in the middle of December were useful. The rest of the month and the first three weeks of January were dry but light rain fell nearly all through the province on the 31st of January and in the first two weeks of February. This was beneficial for the standing crops both on irrigated and unirrigated areas, although it was quite insufficient for the requirements of the unirrigated areas, which have long been suffering from drought. The condition and prospects of irrigated wheat are generally fair, but the unirrigated crop and the crop on higher lands are below average, and in parts of the south-east and west they are withering. Late sown wheat on irrigated areas is generally doing well.

United Provinces (23·3 per cent of the total area under wheat in India).—In the first forecast, the total area was estimated at 7,500,000 acres, as against 7,450,000 acres at the corresponding date of the previous year. No change has been made by

* The following are the figures in thousand of acres in 1st and 2nd forecasts in the years referred to :—

1916, 1st forecast	(December	1915)	28,244,	2nd forecast	(Mar.	1916)	30,227
1915, 1st ,,	,,	1914)	28,694	2nd ,,	,,	1915)	32,034
1914, 1st ,,	,,	1913)	22,339,	2nd ,,	,,	1914)	25 900
1913, 1st ,,	,,	1912)	24,634,	2nd ,,	,,	1913)	29,946
1912, 1st ,,	,,	1911)	25,570,	2nd ,,	,,	1912)	29,444

† The wheat on *unirrigated* areas in the Punjab is over 50 per cent of the total area under wheat; in the United Provinces about 46 per cent of the total area.

(a) Including Native States (b) Revised figure

the Director of Land Records and Agriculture in regard to this estimate. The months of December and January were practically rainless in the plains districts, and it was not until the third week in February that rain in any appreciable quantity was received. Although somewhat late for the irrigated wheat, it was followed by fine weather and no damage has been reported. It materially benefited the unirrigated crop, which had suffered severely from the prolonged drought. The irrigated crop has, on the whole, done well; in some parts, however, of the canal irrigated tracts, the water supply has been inadequate. The unirrigated crop should now give a moderate yield. In the Meerut, Agra, and Rohilkhand divisions the outturn on the area sown is at present estimated at 80 per cent of the normal. Over the rest of the province the absence of rain has been less severely felt, and the crop is estimated at 85 to 90 per cent of the normal. This relates to the condition of the crop up to the 24th February 1916.

Central Provinces and Berar (**11·6 per cent** of the total area under wheat in India).—The area sown in the British districts is now estimated at 3,404,000 acres as against 3,440,000 acres, the revised area at this time last year. The area in the Native States of Khairagarh and Nandgaon is estimated at 117,000 acres as against 118,000 acres last year. The combined area of British and Native territory (3,521,000 acres) shows a decrease of 1 per cent as compared with the revised estimate at the corresponding date last year. The area under the crop expanded in Jubbulpore, Mandla, the districts of the Nagpur division (except Balaghat), the Chattisgarh division (except Drug), and Berar. The expansion ranged from 3 per cent in Jubbulpore to 20 per cent in Wardha. Elsewhere the area was contracted, the decrease being greatest (15 per cent) in Saugor, Narsinghpur, and Betul. The contraction in the northern districts is generally attributed to the shortage of seed, and to the extension of the jawar crop due to last year's good yield of that crop, while the increase of area in the southern districts is due to the low prices of cotton obtained last year. During the last week of December, there were timely, although light, showers in the Nerbudda Valley, the Satpura and the Berar districts, which improved the prospects of the crop. January was practically rainless. During the second and third weeks of February, light showers were received throughout the provinces, except in Nimar and Wardha, but the accompanying cloudy weather, frost, and hail damaged the crop to some extent in a few districts. On the whole, however, the weather conditions have been favourable to the crop. Akola expects a 120 per cent crop, and Damoh, Drug, Amraoti, Yeotmal, and Mandla a normal (100 per cent) crop. For the remaining districts, except Seoni, Chanda, Bilaspur, and Balaghat, the outturn ranges from 102 per cent in Chindwara to 113 per cent in Buldana. Seoni, Chanda, Bilaspur, and Balaghat estimate a 95 per cent crop. The estimate for the Central Provinces and Berar as a whole is 105 per cent of the normal per acre. On this basis the yield is estimated at 957,410 tons as against 827,840 tons at this time last year. The State of Khairagarh estimates an outturn of 90 per cent, and the Nandgaon State 97 per cent, of the normal.

Bombay and Sind (**7·7 per cent** of the total area under wheat in India).—The total area is estimated at 2,415,000 acres (564,000 acres being in Native States) as against 2,450,000 acres, estimated at this time last year, or a decrease of 1 per cent. In Gujarat the unirrigated crop suffered through want of moisture and, in places, from frost, and is expected to yield between 50 to 65 per cent of the normal, and even between 20 to 35 per cent in some tracts. The irrigated crop is estimated at 65 to 100 per cent. The crop is not yet ready for harvest. In the Deccan the rains in November and December were general and greatly benefited the crop everywhere. In East Khandesh both the irrigated and the unirrigated crops are reported to have yielded between 100 to 150 per cent of the normal. Elsewhere in the Deccan the irrigated crop is estimated at 100 to 125 per cent of the normal, and the unirrigated crop between 90 and 100 per cent, except in parts of Poona and Sholapur, where it is about 20 per cent less. Slight damage by rats, it may be noted, is reported from Sholapur. The harvesting of the unirrigated crop commenced from the beginning of February, but the irrigated crop is not yet ready. In the Karnatak cloudy weather in December and subsequent rain induced rust on the late sown crop, particularly in Dharwar and the crop is estimated to yield between 65 and 100 per cent of the normal. The harvesting of the early crop was begun at the end of January and the late crop is about ready for harvest. In Sind the unirrigated crop suffered from want of rain after sowing and the irrigated crop from deficiency of water supply and in places from frost. The crop is not yet ready for harvest, but is expected to yield between 55 to 75 per cent of the normal.

Bihar and Orissa (**4·3 per cent** of the total area under wheat in India).—The total area sown to date is reported to be 1,328,000 acres, as against 1,203,000 acres estimated at this time last year, or an increase of 10 per cent, attributed to favourable weather at the time of sowing and also to the fact that in parts of Tirhut the crop was largely sown on areas from which paddy and *bhadoi* (autumn) crops had been washed away by floods. The weather conditions were generally favourable. Some damage was, however, done to the crop in parts of Patna, Gaya, and Cuttack by excessive rain in November. Want of moisture is reported to have affected the crop in Manbhum and Singhbhum to some extent. The crop is, however, of very little importance in these districts. The present condition of the crop is reported to be fair to good. According to the estimates of the District Officers it appears that the districts of Shahabad, Saran, and Sambalpur expect a crop above the normal, varying from 108 to 115 per cent. Champaran Muzaffarpur, Bhagalpur, Purnea, and Palamau expect a normal crop. Patna, Gaya, Darbhanga, and the Santal Parganas report a crop of 92 per cent. Five districts expect a crop of 77 to 85 per cent, while Angul and Singhbhum estimate their crops at 67 and 43 per cent respectively. Thus a crop of 95 per cent of the normal is estimated for the province as against 72 per cent estimated at this date last year. The provincial Director of Agriculture is, however, of opinion that this is an underestimate and that there will be a normal wheat crop all over—in places above the normal, or as much as a bumper crop, the rain from 16th to 18th February having done good wherever the crop was late.

North-West Frontier Province (**3·4 per cent** of the total area under wheat in India).—The total area sown up to the end of January is estimated at 851,000 acres (irrigated 270,000 acres and unirrigated 581,000 acres), as against 1,106,000 acres (284,000 acres being irrigated and 822,000 acres unirrigated) at this time last year, or a decrease of 23 per cent. The decrease is practically confined to the unirrigated area and is shared by all the districts except Hazara, which shows an increase of about 16,000 acres, owing to good local rainfall in January. The most noteworthy decreases occur in the Kohat, Bannu, and Dera Ismail Khan districts

(namely, 39,000 acres, 115,500 acres and 80,300 acres, respectively), due to the failure of rain at sowing time, as was stated in the December forecast. Since then 27,000 acres have been sown with wheat. The months of December and January were practically rainless, and the previous defect in the sown area, therefore, was not made good. Generally speaking, the rains received in February have done much to improve the standing crops in all districts, but more rain would be most welcome. The February rainfall was fairly well distributed and gives promise of an average crop.

Bengal (0·5 per cent of the total area under wheat in India).—The total area sown is estimated at 134,000 acres, which is about 1 per cent less than the area estimated at this time last year. There was light but well distributed rainfall in November, which helped the growth of the crop; but December and January were practically rainless. The total absence of rain during these two winter months has to a great extent affected the prospects of the crop. In Malda, the principal wheat growing district in the province, the season was favourable at the beginning, but lack of rain has recently been keenly felt. The weather conditions have also been favourable in Midnapur and Rangpur. The character of the season in the rest of the province may be regarded as fair. The four important wheat growing districts estimate the crop as follows:—Malda 100 per cent of normal, Murshidabad 75 per cent, Pabna 60 per cent, and Nadia 42 per cent. The average outturn for the province works out to 78 per cent of the normal against 63 per cent estimated at this time last year.

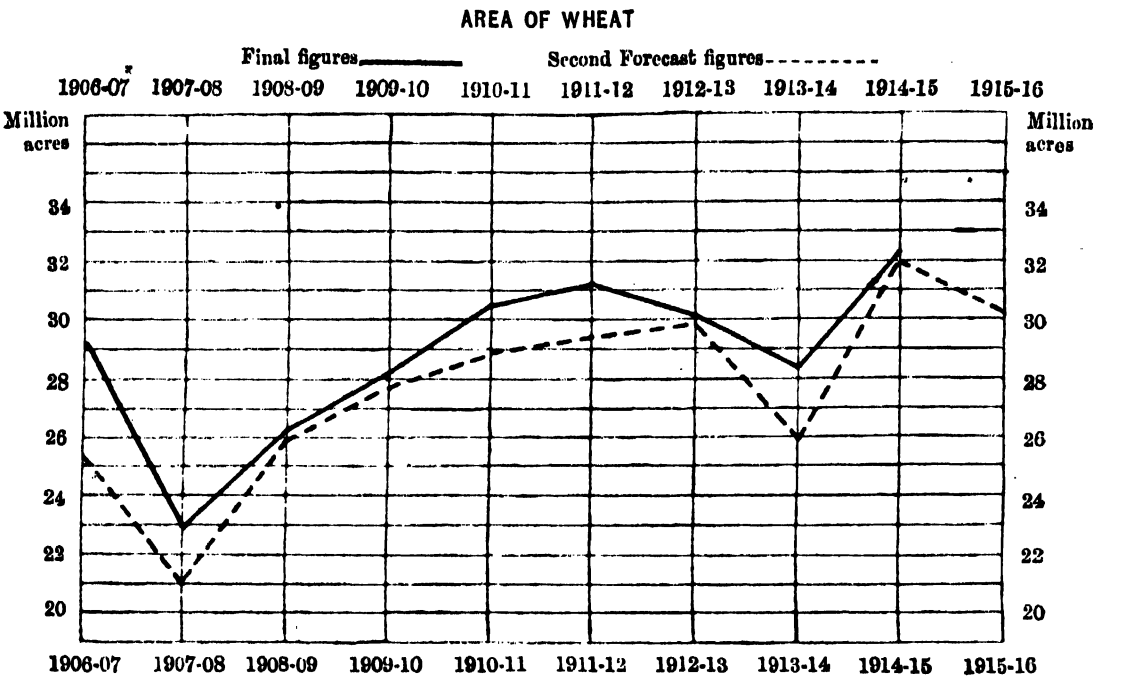
Ajmer-Merwara (0·1 per cent of the total area under wheat in India).—The total area is estimated at 10,000 acres as against 16,000 acres last year, or a decrease of 37 per cent. In Ajmer, the decrease is ascribed to the failure of winter rains and insufficiency of water in wells. Cold winds have greatly affected the outturn. In Merwara and Kekri both the failure of winter rains and the frost in February have damaged the crop.

Central India (8·8 per cent of the total area under wheat in India).—The total area sown is estimated at 2,924,000 acres, as against 3,080,000 acres estimated at this time last year, or a decrease of 5 per cent. The condition of the crop is reported to be good throughout, except in parts of Indore and Baghelkhand where it is fair. The details* are as follows:—

	1915-16	1914-15
	acres.	acres.
Gwalior	1,129,431	1,155,574
Indore	353,704	369,331
Bhopal	715,151	873,554
Bundelkhand	283,974	269,732
Baghelkhand	166,705	124,760
Malwa	124,900	140,729
Southern States	150,360	155,639
Total	2,924,225	3,080,319

Rajputana (3·2 per cent of the total area under wheat in India).—The total area is estimated at 625,000 acres as against 905,000 acres reported at this time last year, or a decrease of 31 per cent. The crop is reported to have done well only in the States of Marwar and Sirohi. Damage by frost is reported from Banswara, Kushalgarh, and Shahpura, by cold winds from Alwar, Bundi, and Mewar, and by the absence or partial failure of winter rains from the remaining States. Detailed* figures for the States are as follows:—

	1915-16	1914-15
	acres	acres
Bundi	35,802	70,825
Tonk	92,648	116,593
Kishangarh	1,181	2,171
Jaipur	46,336	77,702
Dungarpur	6,933	7,903
Partabgarh	22,395	19,731
Banswara	16,102	20,112
Kushalgarh	3,311	3,311
Jaisalmer	83	10,902
Marwar	62,817	87,764
Bikaner	2,254	31,482
Sirohi	8,400	8,600
Karauli	3,971	5,220
Dholpur	11,384	14,020
Bharatpur	28,606	44,205
Alwar	23,370	41,302
Kotah	223,847	286,900
Jhalawar	8,441	16,193
Mewar	25,000	40,000
Shahpura	2,015	2,413
Total	624,896	907,949



Hyderabad (3·1 per cent of the total area under wheat in India).—The total area is estimated at 1,053,000 acres, as against 928,000 acres, the revised figures at this time last year, or an increase of 14 per cent. Wheat grows chiefly in the Mahratwada districts and the increase is shared by all the districts excepting Parbhani, which shows a decrease of 18,000 acres. The increase is, however, most marked in the districts of Aurangabad and Bir, which show an expansion in area of 57,000 acres and 23,000 acres respectively. Weather conditions have been favourable and the estimated outturn works out to 82 per cent of the normal as against 77 per cent at this time last year. Detailed figures for districts are as follows:—

	1915-16	1914-15
	acres	acres
Aurangabad	219,089	162,377
Bir	80,534	57,310
Parbhani	222,660	240,871
Nander	105,640	98,485
Gulbarga	17,381	15,880
Raichur	25,697	25,697
Usmanabad	25,706	23,661
Bidar	37,807	37,807
Meduk	2,596	2,595
Mahbubnagar	836	968
Nizamabad	735	802
Warangal	41	65
Adilabad	8,262	9,501
Karimnagar	472	472
Non-Government areas	310,469	251,161
Total	1,057,925	927,652

* Detailed figures are given for Native States since these details are not otherwise readily available to the Trade.

Mysore (0·01 per cent of the total area under wheat in India).—The total area is estimated at 4,000 acres, which is 33 per cent above the area estimated at this time last year. The condition of the crop is generally reported to be good.

Chart.—The chart below shows the second estimates of acreage and the final estimates for the last ten years for the whole of India.

Wheat crop in Foreign Countries.—The latest available information published in January by the International Institute of Agriculture, Rome, is as follows :—

In the Argentine the area and yield are estimated at 16,413,000 acres and 4,922,000 tons against 15,465,000 acres and 4,503,000 tons in 1914-15. In Australia the estimates of area and yield are 11,495,000 acres and 3,822,000 tons, as against 11,799,000 acres and 664,000 tons last year. In Canada the wheat crop, according to the final results of 1915, is estimated at 10,059,000 tons on an area of 13,039,000 acres against 4,311,000 tons on an area of 10,289,000 acres in 1914. The monthly Crop Report, issued by the Department of Agriculture, United States of America, on December 30, 1915, estimated the area under winter wheat in the United States of America at 37,256,000 acres against 42,012,000 acres sown last year. The condition of crop on 1st December was slightly below the average for that date and the estimated yield is about 14,464,000 tons, as against 17,546,000 tons last season.

From un-official sources it appears that the weather in Russia is fairly seasonable, although rather changeable, and there is no reason to think that the position of the young winter crops is other than satisfactory. In France, if favourable weather prevails for late sowings of winter wheat and for spring sowings, the total wheat acreage this year should be about 15,000,000 acres, while a full area before the war was 16,000,000 acres. In Italy most reports speak favourably of the crop outlook but some southern districts are in need of rain. In northern Italy the crops look particularly well. In the United Kingdom as very little work was possible in the fields during December owing to wet weather and the prevalence of storms, the acreage now under wheat is only about three-fourths of the area intended for the crop, and as compared with the end of 1914, when probably over 80 per cent had been got in, the acreage actually sown is about 6 or 7 per cent less. In Spain the sowings of wheat up to 1st January has been estimated at 9,843,000 acres, showing an increase of 6 per cent. The crop was seeded under satisfactory conditions, and germination has been regular.

The latest estimates of outturn so far received from the different countries are noted below :—

	1915-16 tons	1914-15 tons
United States (winter crop)	14,464,000	17,546,000
Canada	10,059,000	4,311,000
Australia	3,822,000	664,000
Argentine . . .	4,922,000	4,503,000

These increased outturns, however, should be read in the light of the scarcity of tonnage at present prevailing. The following freights from these producing countries to the United Kingdom show that since the outbreak of war freights have risen to very high levels. As compared with this time last year, wheat freights have doubled or more than doubled from the United States, Atlantic ports, and the Argentine, and trebled from India. It may be noted that Indian freight rates are now more than ten times greater than at the outbreak of war.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, MARCH 15, 1916.

Second Forecast WINTER OILSEEDS (Rape, Mustard, and Linseed), 1915-16.

This forecast is based upon reports received from provinces where rape, mustard, and linseed are grown to any considerable extent. These provinces contain 99·2 per cent of the total area under rape and mustard in British India, and 98·9 per cent of the total linseed area in British India. Of the Native States, estimates are furnished by Hyderabad and the Native States in the Bombay Presidency (including Baroda). No report is made by any other Native State. The condition of the crops, referred to below, generally relates to that prevailing in the latter part of February.

The total area under rape and mustard, so far as reported, amounts to 3,629,000 acres (excluding the "mixed" crop of the United Provinces, for which no estimate is at present available). This is 226,000 acres, or 6 per cent, below the revised figure at the corresponding date of last year. The detailed figures for the provinces are :—

Rape and Mustard

Second forecast, March

Provinces and States	1915-16	1914-15	Increase + or Decrease —
	acres	acres	acres
United Provinces (unmixed crop).	188,000	145,000	+43,000
Bengal . . .	1,321,000	1,325,000	—4,000

Total .	2,765,000	2,564,000	+201,000

(a) Revised figure.

The condition of the crops is reported to be from fair to good, except in the western districts of the United Provinces, the south-eastern and the western districts of the Punjab, and in Sind and Assam; in these tracts the crops suffered severely through drought.

The provincial reports are summarised below :—

Rape and Mustard

United Provinces (40·2 per cent of the total area under rape and mustard in British India).—The total area sown with the *unmixed* crop was estimated in the first forecast issued in January last at about 188,000 acres, which is 30 per cent above the area reported at the corresponding date last year. This figure holds good in the present report. No estimate of the area for mixed crop is available at present.* The months of December and January were rainless; but in the third week of February ample rain fell in all parts of the provinces, although it came somewhat late for the oilseeds crops. In the eastern districts (where rapeseed is largely grown unmixed) and also in Bundelkhand, prospects are favourable. An outturn of 85 to 100 per cent of the normal is at present anticipated in these tracts. In the western districts the crop suffered from want of rain and frost and is estimated at 60 to 80 per cent of the normal.

Bengal (21·1 per cent of the total area under rape and mustard in British India).—The area sown is reported to be 1,321,000 acres, as against 1,325,000 acres reported at this date last year. The total absence of rain during the months of December and January interfered with the growth of the crops to a considerable extent. Damage by insects is also reported from some places. On the whole, the season may be regarded as fair. The average outturn per acre is at present estimated at 83 per cent of the normal as against 80 per cent last year.

Punjab (18·1 per cent of the total area under rape and mustard in British India).—The area sown is reported to be 822,000 acres (of which 390,000 acres are irrigated and 432,000 acres unirrigated) as compared with 973,000 acres, the revised area at this date last year, or a decrease of 15 per cent. *Toria* (an early variety of rapeseed), the area under which covers 368,000 acres irrigated, has nearly been reaped and its yield is reported to be average on the whole, except in certain districts in the west, where the September rainfall was particularly deficient and canal water was short, and the yield is consequently below normal. The condition of other oilseeds is fair on irrigated area and poor on unirrigated area. The latter has, however, improved to some extent by the showers that fell on the 31st January, and in the first two weeks of February. These, however, were insufficient, and in parts of the south-east and west the crop is reported to be withering.

Bihar and Orissa (11·4 per cent of the total area under rape and mustard in British India).—The area sown is reported to be 713,000 acres, which is 5 per cent above the area at this date last year. In October and November the rainfall was normal or above normal, the coast districts of Orissa receiving excessive amounts. December and January were practically rainless. The weather conditions have generally been favourable, except in parts of Orissa, where damage was done by the excessive rainfall in November. The present condition of the

* The area under rape and mustard sown interspersed with other crops, such as gram, barley, etc., is given in the final forecast published in June.

crop is generally good in Bihar and Chota Nagpur where these oilseeds are chiefly grown. The average outturn is at present estimated at 91 per cent of the normal as against 67 per cent last year.

Assam (4·8 **per cent** of the total area under rape and mustard in British India).—The total area sown is estimated at 316,000 acres, being 4 per cent larger than the area reported at this date last year. The rainfall and weather were favourable to the crops at the time of sowing, but drought later on retarded growth to a considerable extent. The average outturn per acre is estimated at 70 per cent of the normal as against 85 per cent last year, and the total yield is accordingly estimated at 50,000 tons, which is 14 per cent less than that of last year.

Bombay and Sind (2 **per cent** of the total area under rape and mustard in British India).—The total area reported is 217,000 acres (52,000 acres being in Native States), which is 29 per cent below the area reported at this date last year. The restricted cultivation is attributed to deficiency of water in Gujarat, and to low inundation and deficiency of water supply as also to a less demand for export in Sind. The crop suffered a little from frost in Hyderabad; elsewhere in Sind it is in fair condition. The yield is estimated at two-thirds of the normal in Gujarat and one-half of the normal in Sind. The crop is not yet ready for harvesting.

North-West Frontier Province (1·6 **per cent** of the total area under rape and mustard in British India).—The total area sown up to the end of January is estimated at 46,000 acres (of which only 11,000 acres are irrigated), being 60 per cent less than the area estimated at this date last year. The contraction occurs almost entirely in the unirrigated area and is shared by all the districts. This is due to the scarcity of rain at sowing time. Good rain was, however, received last month, and this should prove beneficial to the standing crops.

Hyderabad reports 6,000 acres under mustard as compared with 7,000 acres last year, or a decrease of 14 per cent. The yield is estimated at 140 tons as against 175 tons last year.

Linseed

Central Provinces and Berar (37·6 **per cent** of the total area under linseed in British India).—The total area sown is reported to be 1,166,000 acres (1,120,000 acres in the Central Provinces and 46,000 acres in Berar), which is practically the same as the revised figure (1,164,000 acres) at this date last year. Sowings were generally successful and germination was good. The winter showers benefited the crop, especially in Betul, Wardha, and Yeotmal. Protracted rain at sowing period, cloudy weather, insects and rust prejudicially affected the crop, though slightly, in a few districts. On the whole the meteorological conditions are reported to have been generally favourable to the crop. Saugor, Betul, and Nagpur anticipate a 120 per cent crop. Bhandara, Drug, Akola, Buldana, and Yeotmal expect a normal outturn (100 per cent). The outturn in Damoh, Jubbulpore, Mandla, Narsingpur, Hoshangabad, Nimar, Wardha, and Raipur ranges between 105 and 116 per cent of the normal. In the remaining districts it is estimated to be slightly below normal. For both the Central Provinces and Berar together the average outturn is estimated at 103 per cent of the normal.

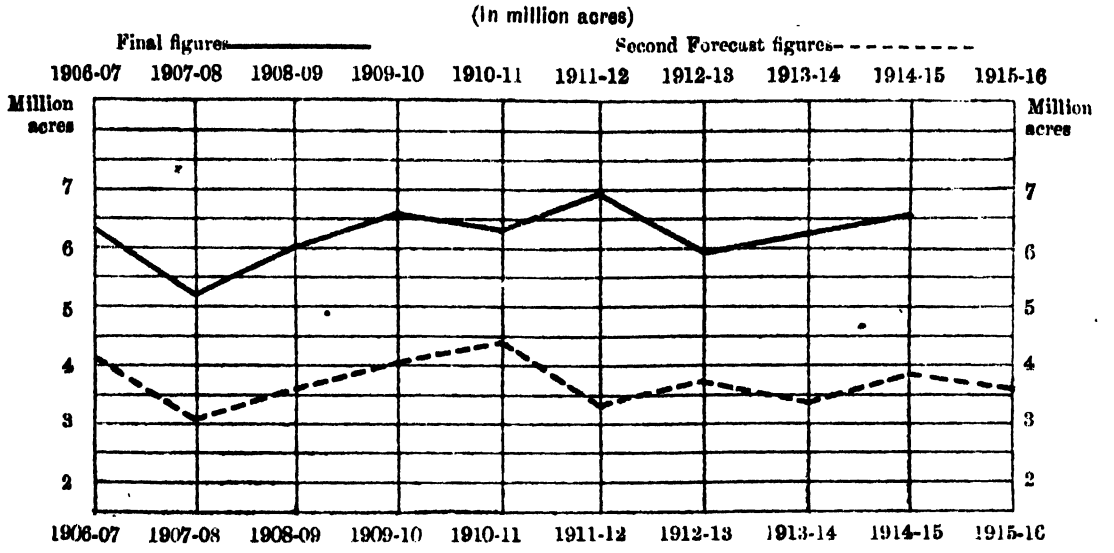
United Provinces (32 **per cent** of the total area under linseed in British India).—The area under the *unmixed* crop was estimated in the first forecast to be 300,000 acres, which is 48 per cent above the area reported at the corresponding date of last year. The figure remains unchanged. No estimate of the area under linseed grown in combination with other crops is available at present.* Reports as to the character of the season are the same as summarised above under "rape and mustard." In Bundelkhand, where linseed is largely grown unmixed, and in the eastern districts the prospects are favourable, and an outturn of 85 to 100 per cent of the normal is at present anticipated. Elsewhere the outturn is estimated at 60 to 80 per cent of the normal.

Bihar and Orissa (17·1 **per cent** of the total area under linseed in British India).—The total area sown is reported to be 661,000 acres, being 7 per cent above the area at this date last year. The character of the season and the prospects are the same as described above under "rape and mustard." The average outturn is estimated at 98 per cent of the normal as against 75 per cent last year.

Bengal (5·9 **per cent** of the total area under linseed in British India).—The total area sown is reported to be 181,000 acres, which falls 4 per cent below the area estimated at this date last year. The condition and prospects are the same as described above under "rape and mustard." The average outturn is estimated at 72 per cent as against 64 per cent of the normal last year.

Bombay (5·1 **per cent** of the total area under linseed in British India).—The total area sown is reported to be 124,000 acres (13,000 acres being in Native States), which is 6 per cent above the area reported at this date last year. The cultivation of linseed expanded principally in Ahmednagar, Bijapur, and Sangli under favourable sowing rains. Elsewhere the area remained stationary or showed a slight decline, due to preference given to wheat or jawar. The crop progressed well and is reported to have yielded between 100 to 125 per cent of the normal in East Khandesh and between 80 to 100 per cent in the rest of the Deccan and Karnatak, except in parts of Poona and Sholapur, where it is estimated at about two-thirds of the normal.

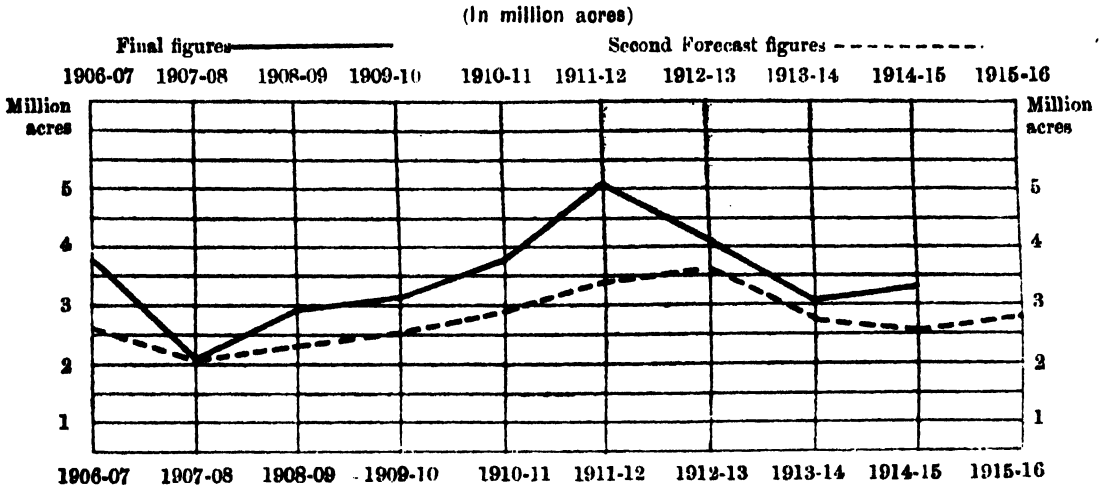
Punjab (1·2 **per cent** of the total area under linseed in British India).—The area sown is reported to be 45,000 acres, being 15 per cent above the area reported at this date last year. The Director of Land Records, Punjab, is of opinion that the increase is due to under-estimates in the second forecast of last year. Reports as to the condition of crop and the character of the season are the same as summarised above under "rape and mustard."



Hyderabad reports 288,000 acres under linseed as compared with 234,000 acres last year, showing an increase of 23 per cent. The total yield is estimated at 12,000 tons as against 9,000 tons last year.

* The area under linseed sown interspersed with other crops, such as, gram, barley, etc., is given in the final forecast published in June.

Charts.—The two charts below show (1) the second estimates of acreage, and (2) the final figures, for all the reporting provinces in respect of each crop.



AREA OF RAPE AND MUSTARD

(In million acres)

AREA OF LINSEED

(In million acres)

Oilseeds crops in foreign countries.—From the latest information published by the International Institute of Agriculture, Rome, it appears that the estimates of the linseed crop of 1915-16 in the Argentine are 3,999,000 acres and 1,005,000 tons as compared with 4,256,000 acres and 1,105,000 tons in 1914-15. The area and yield of linseed in Canada in 1915 are, according to the final results, estimated to be 803,000 acres and 265,000 tons as against 1,162,000 acres and 179,000 tons in the previous year. The estimates of the linseed crop of the United States of America for 1915, as published in the monthly crop report of the United States Department of Agriculture for December 1915, are 1,367,000 acres and 321,000 tons as against 1,645,000 acres and 319,000 tons in the preceding year. His Majesty's Commercial Attaché at Petrograd reported that in Russia the linseed crop was uneven, but in general not below the average.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Delhi, the 17th March, 1916.

No. 17.—With reference to Notification No. 71, dated the 25th October, 1915, Mr. H. Moncrieff Smith of the Indian Civil Service is confirmed in the appointment of Deputy Secretary to the Government of India in the Legislative Department.

A. P. MUDDIMAN,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Delhi, the 15th March 1916.

No. 944-C.—The services of Sir J. H. DuBoulay, K.C.I.E., of the Indian Civil Service, Private Secretary to His Excellency the Viceroy and Governor General, are replaced at the disposal of the Government of Bombay, with effect from the 3rd April 1916, or the subsequent date on which he relinquishes charge of his present duties.

MEDICAL.

The 16th March 1916.

No. 953-C.—In modification of the Home Department Notification No. 213-C., dated the 25th January 1916, Lieutenant-Colonel C. H. James, C.I.E., I.M.S., Civil Surgeon, Simla (West), is granted privilege leave for six weeks with effect from the 4th February 1916.

POLICE.

The 15th March 1916.

No. 940-C.—The services of Captain H. H. McGann, 69th Punjabis, are replaced at the disposal of the Government of Burma for employment in the Burma Military Police with effect from the date on which he assumes charge of his duties.

POLITICAL.

The 17th March 1916.

No. 1010.—In pursuance of the provisions of section 8 of the Foreigners Ordinance, 1914 (III of 1914), as read with the Emergency Legislation Continuance Act, 1915 (I of 1915), the Governor General in Council is pleased to direct that for the words "or able-bodied male subjects of the Kingdom of Bulgaria" in the Home Department notification no. 907, dated the 22nd August 1914, as amended by the Home Department notification no. 4467, dated the 10th November 1915, shall be substituted the words "or male subjects of the Kingdom of Bulgaria who are 17 years of age or over but not more than 55 years of age".

No. 1011.—In pursuance of the provisions of section 8 of the Foreigners Ordinance, 1914 (III of 1914), as read with the Emergency Legislation Continuance Act, 1915 (I of 1915), the Governor General in Council is pleased to direct that for the words "or in respect of able-bodied male subjects of the Kingdom of Bulgaria" in the Home Department notification no. 908, dated the 22nd August 1914, as amended by the Home Department notification no. 4468, dated the 10th November 1915, shall be substituted the words "or in respect of male subjects of the Kingdom of Bulgaria who are not less than 17 or more than 55 years of age".

No. 1012.—In pursuance of the provisions of section 8 of the Foreigners Ordinance, 1914 (III of 1914), as read with the Emergency Legislation Continuance Act, 1915 (I of 1915), the Governor General in Council is pleased to direct that for the words "or who is an able-bodied male subject of the Kingdom of Bulgaria" in the Home Department notification no. 909, dated the 22nd August 1914, as amended by the Home Department notification no. 4469, dated the 10th November 1915, shall be substituted the words "or who is a male subject of the Kingdom of Bulgaria and is 17 years of age or over but not more than 55 years of age".

PUBLIC.

The 13th March 1916.

No. 891-C.—The Right Honourable Sir Frederick John Napier Thesiger, P. C., G.C.M.G., Baron Chelmsford, is expected to arrive at Aden on Thursday the 30th March 1916 and at Bombay on the 4th April to assume the office of Viceroy and Governor General of India.

The Resident at Aden will receive Lord Chelmsford with all the honours and distinctions which are due to the Viceroy of India.

His Excellency the Governor of Bombay will make arrangements, in communication with the Naval and Military authorities, for the landing and reception of Lord Chelmsford at Bombay with all the honours and distinctions which are due to the Viceroy of India.

The 14th March 1916.

BRITISH NATIONALITY AND STATUS OF ALIENS (INDIA).

Supplementary Instructions.

No. 933-C.—The Governor General in Council is pleased to issue the following supplementary instructions with reference to rules 8, 9 and 13 of the Regulations under the British Nationality and Status of Aliens Act, 1914, published with the Home Department notification no. 507-C., dated the 11th February 1916, in the *Gazette of India* of the 12th February 1916:—

A. *Regulation 8.*—The headquarters of the Government of India for the time being shall be the place of registration of certificates of naturalization and oaths of allegiance.

B. *Regulation 9.*—The headquarters of the Government of India for the time being shall be the place of registration of declarations of alienage and of retention or resumption of British nationality.

C. *Regulation 13.*—The fees prescribed by the Regulations may be paid into any Government Treasury in India.

H. WHEELER,
Secretary to the Government of India.

DEPARTMENT OF EDUCATION.

NOTIFICATIONS.

ECCLESIASTICAL.

Delhi, the 11th March 1916.

No. 69.—The Reverend Percy Rowland Hosbons has been appointed to be a chaplain on probation on the Bengal (Lahore) Ecclesiastical Establishment to fill an existing vacancy.

SANITARY.

The 14th March 1916.

No. 141.—In exercise of the powers conferred by section 58 of the Pilgrim Ships Act, 1895 (XIV of 1895), the Governor General in Council is pleased to make the following alteration in rule 54 (1) of the rules under the Act published with the Home Department notification No. 1902, dated the 14th October 1910, namely:—

In the second sentence of rule 54 (1) the words "a permanent hospital shall be provided for not less than 2½ per cent. of the pilgrims on board" shall be substituted for the words "a permanent hospital shall be provided for 5 per cent. of the pilgrims on board."

E. D. MACLAGAN,
Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

A. H. GRANT,
Secretary to the Government of India.

ORDER OF THE INDIAN EMPIRE.

Delhi, the 16th March 1916.

No. 17-I. E.—*Erratum.*—In the notification of the Government of India in the Foreign and Political Department, No. 13-I. E., dated the 16th February 1916, announcing the appointment of General Baber Shumshere Jung Bahadur Rana, of Nepal, to be a Knight Commander of the Most Eminent Order of the Indian Empire, *for* the words "To be a Knight Commander for meritorious service in connection with the war" *read* "To be an Honorary Knight Commander for meritorious service in connection with the war".

J. B. WOOD,
Secretary to the Most Eminent Order of the Indian Empire.

Delhi, the 17th March 1916.

No. 1157-D.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, and of all other powers enabling him in that behalf, the Governor General in Council is pleased to appoint Mr. Leonard Keary Fearon, Special Magistrate, Peermade, being a European British subject, to be a Justice of the Peace within the State of Travancore.

No. 1164-D.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, and of all other powers enabling him in that behalf, and in supersession of the notification of the Government of India in the Foreign and Political Department, No. 424-D, dated the 3rd February 1916, the Governor General in Council is pleased to apply the Foreigners' (Trial by Court-Martial) Act, 1916 (III of 1916), in so far as it may be applicable, to the areas specified in the schedule hereto annexed.

Provided that, for the purpose of facilitating the application of the said Act, any Court exercising jurisdiction in the said areas may construe the provisions of the said Act, with such alterations not affecting the substance as may be necessary or proper to adapt them to the matter before it.

Schedule.

1. The railway lands described in the notification of the Government of India in the Foreign Department, No. 784-I.B., dated the 9th April 1913, as subsequently amended, and in the first and second columns of the schedule annexed thereto.

2. The Baroda Cantonment.

3. The Administered Areas in Central India, as described in the notification of the Government of India in the Foreign Department, No. 2365-I. B., dated the 14th November 1912.

4. The Administered Areas in the Hyderabad State, as described in the notification of the Government of India in the Foreign Department, No. 582-I.B., dated the 22nd March 1913

5. The Civil and Military Station of Bangalore.

6. The Abu area, as described in the notification of the Government of India in the Foreign Department, No. 679-I.B., dated the 2nd April 1913.

7. The British Reserve, Manipur, as defined in the notification of the Government of India in the Foreign Department, No. 533-I.B., dated the 12th March 1909.

8. Berar.

J. B. WOOD,
Secretary to the Government of India.

FINANCE DEPARTMENT.

NOTIFICATIONS.

LEAVE AND APPOINTMENTS.

Delhi, the 15th March 1916.

No. 232-F. E.—Mr. E. R. Seshu Ayyar, a probationer of the Indian Finance Department, has been promoted to class III of the General List with effect from the 26th November 1915, and has been posted as Assistant Accountant General, Madras, with effect from the same date.

Mr. K. M. Abraham, a probationer of the Indian Finance Department, has been promoted to class III of the General List with effect from the 26th November 1915, and has been posted as Assistant Accountant General, Bombay, with effect from the same date.

Srinivasa Rao, a probationer of the Indian Finance Department, has been promoted to class III of the General List with effect from the 26th November 1915, was posted as Assistant Accountant General, Burma, from the same date to the 29th November 1915, and has in supersession of Notification No. 1373-F. E., dated the 21st December 1915, been posted as Assistant Comptroller, Assam, with effect from the 10th December 1915.

No. 233-F. E.—Mr. B. L. A. Laville has been posted as Assistant Accountant General and Currency Officer, Madras, with effect from the 2nd March 1916.

Mr. M. Subrahmanyam has been posted as Assistant Accountant General, Madras, with effect from the same date.

No. 234-F. E.—Mr. H. B. Rau has been posted as Deputy Accountant General, Madras, with effect from the 5th March 1916.

No. 235-F. E.—Mr. A. B. George, Chief Accountant, class II, office of the Chief Examiner of Accounts, Eastern Bengal State Railway, has been granted privilege leave for one month with effect from the 2nd March 1916.

SEPARATE REVENUE.

STAMPS.

NON-JUDICIAL.

The 17th March 1916.

No. 431-F.—In exercise of the powers conferred by section 9, clause (*a*) of the Indian Stamp Act, 1899 (II of 1899), the Governor General in Council is pleased to direct that the words "the Revenue Department (in respect of minor irrigation works contracts in the Madras Presidency only)" shall be inserted after the words "entered into with" in entry No. 53 of the Notification of the Government of India in the Finance Department, No. 3616-Exc., dated the 16th July 1909, as subsequently amended.

J. B. BRUNYATE,
Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

NOTIFICATIONS.

CUSTOMS.

Delhi, the 16th March 1916.

No. 2102-W.—In exercise of the powers conferred by section 23 of the Sea Customs Act, 1878 (VIII of 1878), the Governor General in Council is pleased to exempt pearls unset from the import duty leviable thereon under item No. 88 of Schedule II, Part IV of the Indian Tariff Act, 1894 (VIII of 1894), as amended by the Indian Tariff Amendment Act, IV of 1916.

The 18th March 1916.

No. 2099-W.—The following Royal Proclamation is published for general information :—

BY THE KING.

A PROCLAMATION

FOR PROHIBITING THE IMPORTATION OF PAPER MAKING MATERIALS, PAPER, TOBACCO, FURNITURE WOODS, STONES AND SLATES INTO THE UNITED KINGDOM.

GEORGE R.I.

WHEREAS by section forty-three of the Customs Consolidation Act, 1876, it is provided that the importation of arms, ammunition, gunpowder, or any other goods may be prohibited by Proclamation :

And whereas it is expedient that the importation into the United Kingdom of certain goods of a bulky character should be prohibited as hereinafter provided :

Now, THEREFORE, We, by and with the advice of Our Privy Council, in pursuance of the said Act and of all other powers enabling Us, in that behalf, do hereby proclaim, direct and ordain as follows :—

As from and after the First day of March, 1916, subject as hereinafter provided, the importation into the United Kingdom of the following goods is hereby prohibited, *viz.* :—

All materials for the manufacture of paper including wood pulp, esparto grass, and linen and cotton rags.

Paper and cardboard (including strawboard, pasteboard, millboard and wood pulp board) and manufactures of paper and cardboard.

All periodical publications exceeding 16 pages in length, imported otherwise than in single copies through the post

Tobacco, unmanufactured and manufactured (including cigars and cigarettes).

Furniture woods, hard woods and veneers,

Stones and slates,

Provided always, and it is hereby declared, that nothing in this Proclamation shall apply to any goods of the descriptions specified which are imported under licence given by or on behalf of the Board of Trade, and subject to the provisions and conditions of such licence.

This Proclamation may be cited as the Prohibition of Import (Paper, Tobacco, Furniture Woods, and Stones) Proclamation, 1916.

Given at Our Court at Buckingham Palace, this Fifteenth day of February, in the year of our Lord One thousand nine hundred and sixteen, and in the Sixth year of Our Reign.

GOD SAVE THE KING.

No. 2100-W.—The following extract from the "London Gazette" is republished for information :—

The Secretary of State for Foreign Affairs publishes for general information the following list of persons and firms in Egypt with enemy interests, which have been licensed by the Egyptian Government, to carry on business for the purpose of liquidation only.

No new transactions should be entered into with any person or firm mentioned in the list.

Persons having claims against any person or firm mentioned in the list should make such claims at once to such person or firm or in cases when a Controller has already been appointed [indicated in the list by the letter (*a*) placed against the name of the person or firm] to the Controller thereof.

List of persons and firms in Egypt with enemy interests which have been licensed by the Egyptian Government to carry on business for the purpose of liquidation only :—

No. 2121-W.—The following Order in Council is published for general information:—

AT THE COUNCIL CHAMBER, WHITEHALL,

The 12th day of February 1916.

BY THE LORDS OF HIS MAJESTY'S MOST HONOURABLE PRIVY COUNCIL.

WHEREAS it is provided by section 2 of the Customs (Exportation Prohibition) Act, 1914, that any Proclamation or Order in Council made under section 8 of the Customs and Inland Revenue Act, 1879, as amended by the Act now in recital, may, whilst a state of war exists, be varied or added to by an Order made by the Lords of the Council on the recommendation of the Board of Trade:

And whereas it is provided by section 2 of the Customs (Exportation Restriction) Act, 1914, that any Proclamation made under section 1 of the Exportation of Arms Act, 1900, may, whether the Proclamation was made before or after the passing of the Act now in recital, be varied or added to, whilst a state of war exists, by an Order made by the Lords of the Council on the recommendation of the Board of Trade:

And whereas by a Proclamation, dated the 28th day of July 1915, and made under section 8 of the Customs and Inland Revenue Act, 1879, and section 1 of the Exportation of Arms Act, 1900, and section 1 of the Customs (Exportation Prohibition) Act, 1914, the exportation from the United Kingdom of certain articles to certain or all destinations was prohibited:

And whereas by subsequent Orders of Council the said Proclamation was amended and added to in certain particulars:

And whereas there was this day read at the Board a recommendation from the Board of Trade to the following effect:—

That the Proclamation, dated the 28th day of July 1915, as amended and added to by subsequent Orders of Council, should be further amended by making the following amendments in and additions to the same:—

(1) That the exportation of the following goods should be prohibited to all destinations:—

Carbon electrodes for electric furnaces,

Petroleum coke.

(2) That the heading "Capsicum and oleo-resin of capsicum" in the list of goods the exportation of which is prohibited to all destinations should be deleted, and there be substituted therefor the heading "Oleo-resin of capsicum."

(3) That the heading "Bladders, casings and sausage skins," in the list of goods the exportation of which is prohibited to all destinations abroad other than British Possessions and Protectorates should be deleted, and there be substituted therefor the heading "Bladders, guts, casings and sausage skins."

(4) That the heading "Bones for manure, dissolved bones, bone flour, bone meal and bone ash" in the list of goods the exportation of which is prohibited to all destinations abroad other than British Possessions and Protectorates should be deleted and there be substituted therefor the heading, "Bones, in any form, whole or crushed (including dissolved bones, bone flour and bone meal), and bone ash."

(5) That the heading "Capsicum and peppers" should be included in the list of goods the exportation of which is prohibited to all destinations abroad other than British Possessions and Protectorates.

(6) That the heading "Lead, pig, sheet or pipe (including solder containing lead)" in the list of goods the exportation of which is prohibited to all destinations abroad other than British Possessions and Protectorates should be deleted, and there be substituted therefor the heading "Lead, pig, sheet, pipe or scrap (including solder containing lead)."

(7) That the heading "Pepper" in the list of goods the exportation of which is prohibited to all foreign countries in Europe and on the Mediterranean and Black Seas, other than France, Russia (except through Baltic ports), Italy, Spain and Portugal should be deleted.

(8) That the exportation of the following goods should be prohibited to all foreign countries in Europe and on the Mediterranean and Black Seas, other than France, Russia (except through Baltic ports), Italy, Spain and Portugal:—

Arrack;

Casein;

Cork and cork dust not including floor coverings manufactured partly of cork dust.

Now, therefore, Their Lordships, having taken the said recommendation into consideration, are pleased to order, and it is hereby ordered, that the same be approved.

Whereof the Commissioners of His Majesty's Customs and Excise, the Director of the War Trade Department, and all other persons whom it may concern, are to take notice and govern themselves accordingly.

ALMERIC FITZROY.

GENERAL.

The 18th March 1916.

No. 945-35.—Mr. S. H. Slater, I.C.S., Under Secretary to the Government of India in the Department of Commerce and Industry, is granted privilege leave for three months, with effect from the 14th April 1916, or the subsequent date on which he may avail himself of it.

Mr. Slater's services are replaced at the disposal of the Government of Madras with effect from the date succeeding that on which his privilege leave expires.

MERCHANT SHIPPING.

The 18th March 1916.

No. 2152-W.—With reference to the Notification in this Department No. 857-W., dated the 11th December 1915, the following order of His Majesty the King in Council is published for general information:—

AT THE COURT AT BUCKINGHAM PALACE,

The 15th day of February 1916.

PRESENT:

THE KING'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS a state of war exists between His Majesty and the German Emperor, the Emperor of Austria King of Hungary, the Sultan of Turkey and the King of the Bulgarians:

And whereas His Majesty holds it to be His Prerogative Duty as well as His Prerogative Right to take all steps necessary for the Defence and Protection of the Realm :

And whereas His Majesty did by Order in Council dated November 10th, 1915, prohibit the carriage of cargo by any British steamship exceeding 500 tons gross tonnage registered in the United Kingdom from one foreign port to another, unless exempted by licence :

And whereas it has been made to appear to His Majesty that it is essential to the Defence and Protection of the Realm that, in the exercise of His Prerogatives as aforesaid, He should prohibit as from and after the First day of March 1916, any British steamship registered in the United Kingdom exceeding 500 tons gross tonnage, except steamships engaged in the coasting trade of the United Kingdom, from proceeding on any voyage, unless the owner or charterer of such steamship has been granted a licence as hereinafter provided :

Now, THEREFORE, His Majesty is pleased, by and with the advice of His Privy Council, and in exercise of His Prerogatives as aforesaid and of all other powers Him thereunto enabling, to order and it is hereby ordered that, from and after the First day of March 1916, no British steamship registered in the United Kingdom exceeding 500 tons gross tonnage, except steamships engaged in the coasting trade of the United Kingdom, shall proceed on any voyage, unless a licence to do so has been granted to or in favour of the owner or charterer of such steamship by the Licensing Committee appointed by the President of the Board of Trade under the provisions of the aforesaid Order in Council of November 10th, 1915, which licence may be general in reference to classes of ships or their voyages or special.

And the President of the Board of Trade is to act and give instructions and directions accordingly.

ALMERIC FITZROY.

The 18th March 1916.

No. 2169-W.—In pursuance of section 2 of the Defence of India (Criminal Law Amendment) Act, 1915 (IV of 1915), as amended by Act II of 1916, the Governor General in Council is pleased to direct that the following amendment shall be made in the Defence of India (Wolfram) Rules, 1915, namely :—

After rule 6 of the said rules the following rules shall be added, namely :—

Prohibition of removal of tungsten from certain areas except under a pass.

7. (*1*) When a license to prospect for, or a mining lease in respect of, tungsten has been granted by, or on behalf of, the Secretary of State, no person other than the holder of such license or lease or the agent of such holder shall remove tungsten from the area covered by such license or lease except under a pass specially issued for each consignment by such holder or agent.

(*2*) Every such pass shall specify therein the destination to which the tungsten shall be removed, and shall be issued in such form and subject to such conditions as the Financial Commissioner may prescribe.

(*3*) Every person issuing a pass shall, at the time of such issue, record such particulars thereof, and shall furnish to the Collector such returns of passes issued, as the Financial Commissioner may prescribe.

Prohibition of the possession, etc., of tungsten except under a permit.

8. (*1*) No person shall be in possession of, for any purpose, or shall deal in any way with, tungsten in any area not covered by a prospecting license or a mining lease except under a permit granted by the Collector in such form and subject to such conditions as the Financial Commissioner may prescribe : provided that nothing in this sub-rule shall apply—

(*a*) to the holder of a license to prospect for, or a mining lease in respect of, tungsten, or to the agent of such holder, in respect of tungsten won from the area covered by such license or lease, or

(*b*) to the holder of a pass issued under rule 7 in respect of the removal of tungsten in accordance with the conditions of such pass.

(*2*) A person, to whom a permit has been granted under sub-rule (1), shall keep such accounts, and furnish such returns to the Collector as the Financial Commissioner may prescribe, of all tungsten possessed, or dealt with by him under such permit.

Penalty for permitting removal of tungsten.

9. Whoever, being authorised to issue a pass under rule 7, knowingly permits tungsten to be removed from the area in respect of which he is so authorised, except in accordance with the conditions of a pass issued under the said rule, shall be punishable with fine which may extend to Rs. 500.

Penalty for contravention of rules 7 (*1*) and 8 (*1*).

10. (*1*) Whoever removes tungsten in contravention of rule 7, or possesses, or deals with tungsten in contravention of rule 8, shall be punishable with imprisonment of either description for a term which may extend to one month, or with fine which may extend to Rs. 1,000 or with both.

(2) Whoever attempts to commit, or abets or attempts to abet the commission of, any act punishable under this rule shall be punished as if he had himself committed the act.

Penalty for failure to keep records or accounts, and to furnish returns.

11. Whoever—

(a) issues a pass in contravention of the provisions of rule 7 (2) ; or

(b) fails to make the record or furnish the returns prescribed by rule 7 (3) ; or

(c) fails to keep the accounts or furnish the returns prescribed by rule 8 (2),

shall be punishable with fine which may extend to Rs. 100.

Power of arrest.

12. (1) Any officer of the police, revenue, excise or customs departments in receipt of a monthly salary of not less than Rs. 20, may arrest any person against whom a reasonable suspicion exists of his being concerned in an offence punishable under rule 10.

(2) Every officer making an arrest under this rule shall, without unnecessary delay, take or send the person arrested before a magistrate having jurisdiction in the case, or to the officer in charge of the nearest police-station.

C. E. LOW,
Secretary to the Government of India.

PART IV.

Acts of the Indian Legislative Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Indian Legislative Council received the assent of the Governor General on the 16th March, 1916, and is hereby promulgated for general information :—

ACT No. VI OF 1916.

An Act further to amend the Indian Ports Act, 1908.

WHEREAS it is expedient further to amend the
1908. Indian Ports Act, 1908; It is hereby enacted as follows :—

1. This Act may be called the Indian Ports (Amendment) Act, 1916.

Short title.

2. In section 4, sub-section (*1*) of the Indian
1908. Amendment of section 4, Act XV of 1908. Ports Act, 1908 (hereinafter called the said Act), the words "with the previous sanction of the Governor General in Council" shall be omitted.

3. In section 5, sub-section (*1*) of the said Act,
Amendment of section 5, Act XV of 1908. the words "with the previous sanction of the Governor General in Council and" shall be omitted.

4. In section 6, sub-section (*1*) of the said Act,
Amendment of section 6, Act XV of 1908. the following amendments shall be made,—

(*1*) After clause (*j*) the following clause shall be inserted, namely :—

"(*jj*) for regulating the use of piers, jetties, landing places, wharves, quays, warehouses and sheds when belonging to the Government, and for fixing the rates to be paid for the use of the same;"

(*2*) In clause (*k*) after the word "port" the words "and for licensing and regulating the crews of any such vessels," and after the word "passengers" the words "or of the crew" shall be inserted; and at the end of the same clause, the following shall be added, namely :—"and may by such rules provide for the fees payable in respect of any such license, and in the case of passenger vessels plying for hire, for the rates of hire to be charged and the conditions under which such vessels shall be compelled to ply for hire, and further for the conditions under which any license may be revoked;"

5. In section 31 of the said Act, the following
Amendment of section 31, Act XV of 1908. amendments shall be made, namely :—

(*i*) After sub-section (*1*) the following sub-section (*2*) shall be inserted, namely :—

"(*2*) Notwithstanding anything in sub-section (*1*), the owner or master of a vessel which is by that sub-section required to have a pilot, harbour-master or assistant of the port officer or harbour-master on board, shall be answerable for any loss

or damage caused by the vessel or by any fault of the navigation of the vessel, in the same manner as he would have been if he had not been so required by that sub-section :

Provided that the provisions of this sub-section shall not take effect till the first day of January, 1918, or such earlier date as the Governor General in Council may notify in that behalf in the Gazette of India."

(*ii*) The existing sub-sections (*2*), (*3*) and (*4*) shall be re-numbered (*3*), (*4*) and (*5*), respectively.

(*iii*) In the existing sub-section (*3*) for the word and figures "(*1*) and (*2*)" the word and figures "(*1*), (*2*) and (*3*)" shall be substituted.

Amendment of section 33, Act XV of 1908.

6. In section 33 of the said Act, the following amendments shall be made, namely :—

(*i*) In sub-section (*1*) after the figure (*1*), the following shall be inserted, namely :—

"Subject to the provisions of sub-section (*2*),"

(*ii*) After sub-section (*1*), the following sub-section (*2*) shall be inserted, namely :—

"(*2*) The Local Government may, by notification in the local official gazette, alter or add to any entry in the First Schedule relating to ports within its own province, and this power shall include the power to regroup any such ports :

Provided that, if any such alteration or addition has the effect of increasing the port-dues in any such port, such alteration or addition shall require the sanction of the Governor General in Council."

(*iii*) In the existing sub-section (*2*) the words "with the previous sanction of the Governor General in Council" and the words "with the like sanction" shall be omitted, and to the same sub-section, the following proviso shall be added, namely :—

"Provided that, except with the sanction of the Governor General in Council, the rates and the times so declared shall not be respectively higher or shorter than the maximum rate and the shortest time specified and fixed in the First Schedule for any port in the province."

(*iv*) The existing sub-sections (*2*), (*3*) and (*4*) shall be re-numbered (*3*), (*4*) and (*5*), respectively.

Amendment of section 34, Act XV of 1908.

7. In section 34 of the said Act, after the words "The Local Government may" the words "after consulting the authority appointed under section 36" shall be inserted ; and for the words "the vessels" the following shall be substituted, namely :—"subject to such conditions, if any, as it thinks fit to impose, any vessel or class of vessels"; and after the word "them" the words "or may extend the periods for which any vessel or class of vessels entering a port shall be exempt from liability to pay port-dues" shall be added.

Amendment of section 35, Act XV of 1908.

8. In section 35, sub-section (*1*) of the said Act, the proviso shall be omitted.

Amendment of section 36, Act XV of 1908.

9. In section 36 of the said Act, sub-section (*3*) shall be omitted.

Amendment of section 37, Act XV of 1908.

10. In section 37, sub-section (*2*) (*a*) of the said Act, for the words "with the previous sanction" the words "subject to the control" shall be substituted.

Insertion of new sections 68A and 68B in Act XV of 1908.

11. After section 68 of the said Act, the following sections shall be inserted, namely :—

Authorities exercising jurisdiction in ports to co-operate in manœuvres for defence of port.

"68A. Every authority exercising any powers or jurisdiction in, or relating to, any port to which this Act for the time being applies shall, if so required by an officer authorised by general or special order of the Governor General in Council in this behalf, co-operate in such manner, as such officer may direct, in carrying out any manœuvres in connection with any scheme or preparations for the defence of the said port in time of war, and for this purpose shall, if so required, temporarily place at the disposal of such officer the services of any of its staff and the use of any of its vessels, property, equipment or other material :

Provided, firstly, that if any vessels are placed at the disposal of such officer in accordance with this section, the Government of India shall, in respect of the period during which they are so at his disposal, bear the running expenses of such vessels, and be responsible for any damage thereto.

Explanation.—The expression 'running expenses' in this proviso, includes all outlay incurred in connection with the use of the vessels other than any charges for their hire, or for the wages of the officers and crews of such vessels :

Provided, secondly, that any officer making a requisition under this section shall exercise his powers in such a way as to cause as little disturbance to the ordinary business of the port as is compatible with the exigencies of the efficient carrying out of the manœuvres :

Provided, thirdly, that no suit or other legal proceeding shall lie against any authority for any default occurring by reason only of compliance with a requisition under this section.

Duties of the said authorities in an emergency.

68B. Whenever the Governor General in Council is of opinion that an emergency has arisen which renders it necessary that the duties imposed for the purposes specified in section 68A on the authorities therein mentioned, or other duties of a like nature should be imposed on such authorities continuously during the existence of the emergency, he may, by general or special order, authorise any officer to require the said authorities to perform such duties until the Governor General in Council is of opinion that the emergency has passed, and the said authority shall comply accordingly, and the provisions of the said section shall apply subject to the following modification, namely :—

The Government of India shall pay any authority, on whom a requisition has been made, such compensation for any loss or damage attributable to such requisition, and for any services rendered or expenditure incurred in complying therewith as, in default of agreement, shall be decided to be just and reasonable, having regard to the circumstances of the case, by the arbitration of a person to be nominated in this behalf by the Governor General in Council, and the decision of such person shall be final."

A. P. MUDDIMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Indian Legislative Council received the assent of the Governor General on the 16th March, 1916, and is hereby promulgated for general information :—

ACT No. VII OF 1916.

An Act to regulate the grant of titles implying qualifications in western medical science, and the assumption and use by unqualified persons of such titles.

WHEREAS it is expedient to regulate the grant of titles implying qualifications in western medical science, and the assumption and use by unqualified persons of such titles; It is hereby enacted as follows :—

1. This Act may be called the Indian Medical Degrees Act, 1916.

Short title.

2. In this Act "western medical science" means the western methods of Allopathic medicine, Obstetrics and Surgery, but does not include the Homœopathic or Ayurvedic or Unani system of medicine.

Definition.

3. The right of conferring, granting, or issuing in British India degrees, diplomas, licenses, certificates or other documents stating or implying that the holder, grantee or recipient thereof is qualified to practise western medical science, shall be exercisable only by the authorities specified in the Schedule and by such other authority as the Governor General in Council may, by notification in the Gazette of India, and subject to such conditions and restrictions as he thinks fit to impose, authorize in this behalf.

Right to confer degrees, etc.

4. Save as provided by section 3, no person in British India shall confer, grant, or issue, or hold himself out as entitled to confer, grant, or issue any degree, diploma, license, certificate or other document stating or implying that the holder, grantee or recipient is qualified to practise western medical science.

Prohibition of unauthorised conferment of degrees, etc.

5. Whoever contravenes the provisions of section 4 shall be punishable with fine which may extend to one thousand rupees; and if the person so contravening is an association, every member of such association, who knowingly and wilfully authorises or permits the contravention, shall be punishable with fine which may extend to five hundred rupees.

Contravention of section 4.

6. Whoever voluntarily and falsely assumes, or uses any title or description or any addition to his name implying that he holds a degree, diploma, license or certificate conferred, granted or issued by any authority referred to in section 3, or recognized by the General Council of Medical Education of the United Kingdom, or that he is qualified to practise western medical science shall be punishable with fine which may extend to two hundred and fifty rupees, or, if he subsequently commits, and is convicted of, an offence punishable under this section, with fine which may extend to five hundred rupees:

Penalty for falsely assuming or using medical titles.

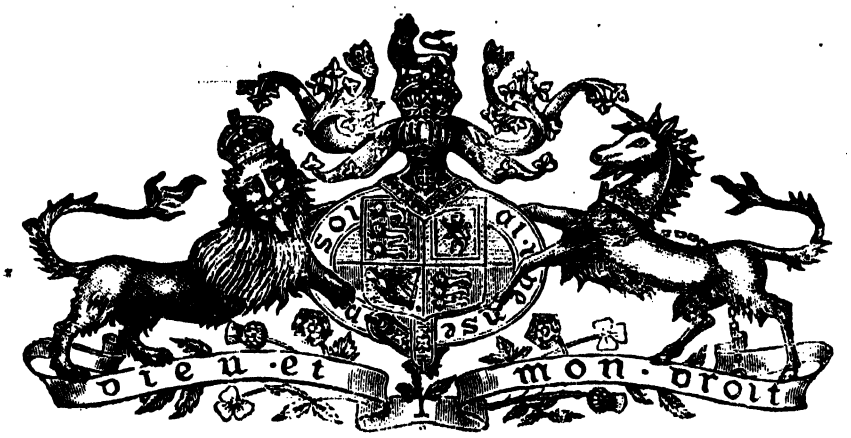
Provided that nothing in this section shall apply to the use by any person of any title, description, or addition which, prior to the commencement of this Act, he used in virtue of any degree, diploma, license or certificate conferred upon, or granted or issued to him.

7. No Court shall take cognizance of an offence punishable under this Act, except upon complaint made by order of the Local Government, or upon complaint made, with the previous sanction of the Local Government, by a Council of Medical Registration established by any enactment for the time being in force in the province.

Cognizance of offences.

8. No Court inferior to that of a Presidency Magistrate or a Magistrate of the first class shall try any offence punishable under this Act.

Jurisdiction of Magistrates.



SCHEDULE.

(*See section 3.*)

1. Every University established by an Act of the Governor General in Council.
2. The State Medical Faculty in Bengal.
3. The College of Physicians and Surgeons of Bombay.
4. The Board of Examiners, Medical College, Madras.

PART V.

Bills introduced in the Indian Legislative Council, Reports of Select Committees presented to the Council, and Bills published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Indian Tariff Act, 1894, and for other purposes, was presented to the Indian Legislative Council on the 7th March, 1916 :—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the Indian Tariff Act, 1894, and for other purposes, was referred have considered the Bill and have now the honour to submit this our report, with the Bill as amended by us annexed thereto.

2. The Hon'ble Sir Ibrahim Rahimtoola proposed that the duty payable under item 51, Cotton Piecegoods, in part 2 of the new Schedule II (Import Tariff), inserted by the Bill should be raised from 3½ per cent. to 6 per cent. The Hon'ble the Finance Member expressed his inability to accept this proposal on the ground that he was precluded from doing so by the pronouncement on the subject by His Majesty's Government. After discussion the majority of the Committee expressed themselves as against any change and the existing provision was retained in the Bill.

3. With reference to item 63 of part 3 of the same Schedule, the Hon'ble Mr. Stewart proposed that railway material which had been ordered prior to the date this legislation will come into force should be free. After discussion this proposal was not adopted.

4. In considering Schedule III, in so far as it relates to Jute, we had the advantage of consulting Mr. Birkmyre, who attended the Select Committee as an expert witness. He explained in answer to questions by members of the Committee that the discrimination made in item 1 relating to Raw Jute as regards "rejections" was likely to be a source of difficulty, and after considering the point we decided that this classification should be omitted from the Bill and that "rejections" should be included in sub-head 3—"All other descriptions"—and pay duty at the rate for that class. We have accordingly renumbered the sub-heads of this item.

5. The Hon'ble Mr. Stewart laid before us the view that the present state of the Tea industry was not such as to justify the imposition of the export duty imposed by item 4 of the same schedule. The Hon'ble Sir William Meyer expressed his inability to agree in this view and after discussion we decided to retain the existing provision in the Bill.

6. The Bill was published in the Gazette of India, in English, of the 4th March, 1916.

7. We think that the Bill has not been so altered as to require republication, and we recommend that it be passed as now amended.

*In view of paragraph 2 of the Report, I cannot join in the recommendation contained in paragraph 7.

IBRAHIM RAHIMTOOLA.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill further to amend the Indian Income-tax Act, 1886, was presented to the Indian Legislative Council on the 7th March, 1916 :—

WE, the undersigned, Members of the Select Committee to which the Bill further to amend the Indian Income tax Act, 1886, was referred, have considered the Bill, and have now the honour to submit this our Report, with the Bill as amended by us, annexed thereto.

2. Some of our body raised the question whether it would not be possible to reduce the maximum tax payable from one anna to ten pies in the rupee ; but, after discussion, the proposal was abandoned.

3. The only changes we have made in the Bill, as introduced, are two small alterations in its drafting.

4. The Bill was published in the Gazette of India in English on the 4th March, 1916.

5. We think that the Bill has not been so altered as to require re-publication, and we recommend that it be passed as now amended.

*NOTE.

I sign the report subject to the note that one other point was raised in Select Committee, suggesting that the minimum assessable income should be raised from Rs. 1 000 to Rs. 1,200, but it was not thought prudent to press it in view of the financial difficulties of Government which have necessitated this legislation.

G. M. CHITNAVIS.

BILL No. 4 OF 1916.

[AS AMENDED BY THE SELECT COMMITTEE.]

[Words printed in italics indicate the amendments suggested by the Select Committee.]

A Bill further to amend the Indian Income-tax Act, 1886.

WHEREAS it is expedient further to amend the
1886. Indian Income-tax Act, 1886; It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Act may be called the Indian Income-tax (Amendment) Act, 1916.

(*2*) It shall come into force on the first day of April, 1916.

1886.

Amendment of section 4, Act II of 1886.

2. In section 4 of the Indian Income-tax Act, 1886 (hereinafter called the said Act), for the figures "1886" the figures "1916" shall be substituted.

Amendment of section 5, Act II of 1886.

3. In section 5, clause (*j*) of the said Act, after the word "any" the words "company or" shall be inserted.

Amendment of section 31, Act II of 1886.

4. To section 31 of the said Act, the following sub-section shall be added, namely:—

"(*3*) Any agreement made in accordance with the provisions of this section shall be determined, as regards any tax not already due thereunder, by any change, subsequent to the making of such agreement, in the rates at which the tax is assessable under Part II or Part IV, as the case may be, with effect from the date on which such change comes into force."

Amendment of section 33, Act II of 1886.

5. In section 33 of the said Act, the words "during or within three months after the end of the year" are hereby repealed.

Amendment of section 38, Act II of 1886.

6. In sub-section (*1*) of section 38 of the said Act, after the word and numeral "Part IV" the following shall be inserted, namely, "for *prescribing* the procedure to be followed on applications for refund of the tax chargeable under this Act."

Insertion of new section 39A in Act II of 1886.

7. After section 39 of the said Act, the following section shall be inserted, namely:—

"39A. No claim for refund of tax under this Act shall be allowed, unless it is made within one year from the end of the year to which the claim relates."

Limitation of claims for refund.

PART VI.

Proceedings of the Indian Legislative Council.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Tuesday, the 7th March, 1916.

PRESENT :

The Hon'ble SIR WILLIAM CLARK, K.C.S.I., C.M.G., Vice-President, *presiding*, and 53 Members, of whom 46 were Additional Members.

OATH OF OFFICE.

The Hon'ble Mr. Charles Evelyn Arbuthnot William Oldham made the prescribed oath or affirmation of allegiance to the Crown.

QUESTIONS AND ANSWERS.

The Hon'ble Mr. Rama Rayaningar asked :—

Adoption of the vernaculars as the media of instruction in Indian schools.

1. "(*a*) Is it a fact that in some Provinces in schools for Indian girls, English is used as the medium of instruction in the third and lower forms, while, generally, vernaculars form the media of instruction in those forms in schools for boys?

(*b*) Do Government propose to instruct Provincial Governments and Administrations to issue orders to educational departments for the adoption, generally, of the vernaculars as the media of instruction in schools for girls in cases where the parents so desire?"

The Hon'ble Sir C. Sankaran Nair replied :—

"It is understood that the Hon'ble Member refers to a girls' school which recently formed the subject of a Resolution in the Madras Legislative Council,

[*Sir C. Sankaran Nair; Mr. Rama Rayaningar; Sir Reginald Craddock.*] [7TH MARCH, 1916.]

and in which the medium of instruction in most subjects from the third standard upwards is English. The Government of India have no information as to whether a similar arrangement is adopted in any girls' schools in other Provinces, but can make inquiries if the Hon'ble Member so desires. As regards boys, the medium of instruction in forms in other Provinces below those corresponding with the fourth form in Madras is not necessarily the vernacular. A description of the present state of affairs is to be found in the diagram facing page 71 of 'The Progress of Education in India, 1907-12,' being the sixth quinquennial review.

It is not the intention of Government to issue any such general instructions as are suggested, but as explained in this Council on the 17th March, 1915, it is proposed, after the war, to make a reference on the subject of vernacular as the medium of instruction—a course to which the Hon'ble questioner agreed. In the meantime, Local Governments are being addressed on the subject of female education generally."

The Hon'ble Mr. Rama Rayaningar asked:—

Separate representation on the Imperial Legislative Council of the Zemindars and Giroyty landholders of the Madras Presidency.

2. "(*a*) Is it a fact—

(*i*) that there is only one representative on this Council for both Zemindars and Giroyty landholders of the Madras Presidency; and

(*ii*) that the Zemindars owning permanently settled estates and the Giroyty landholders holding temporarily settled lands have separate and often conflicting interests?

(*b*) If so, has the attention of the Government of India been drawn to the existence of such separate and conflicting interests?

(*c*) If the answer to (*b*) is in the affirmative, do the Government of India propose to consider the question of securing the separate representation on this Council of these two different interests either—

(*i*) by the creation of an additional Membership for a representative from the Madras Presidency, or

(*ii*) by providing that one of the two Members of this Council representing the non-official Additional Members of the Madras Legislative Council shall be a person having substantial interest in temporarily settled lands?

(*d*) If the answer to (*b*) is in the negative, do the Government of India propose to address the Madras Government on the subject?"

The Hon'ble Sir Reginald Craddock replied:—

"It is the case that only one Member of the Imperial Legislative Council is elected by the landholders in the Presidency of Madras, the same being true of landholders, as such, in Bombay, Bengal, the United Provinces, Bihar and Orissa and the Central Provinces. It is also the case that for the election of Members to the Provincial Legislative Council by the landlord class, there are two electorates, namely those of Zemindars, and landholders other than Zemindars, respectively. When the Council Regulations were under discussion in 1909, the Madras Landholders Association, among others, represented that the interests of landholders as a class in Madras were not identical, and hence the two electorates for the Provincial Council. At that time, however, it was the opinion of the Local Government that for the Imperial Council one electorate would suffice. The Hon'ble Member apparently desires in one way or another to secure two representatives in the Imperial Council for the landholding classes in Madras, presumably with two electorates, but constituted as the Council now is, neither of his suggested expedients is consistent with its general scheme, and, as at present advised, the Government of India do not propose to move in the matter."

[7TH MARCH, 1916.] [*Mr. Rama Rayaningar; Sir Reginald Craddock; Maharaja Sir Manindra Chandra Nandy; Sir C. Sankaran Nair; Mr. C. H. A. Hill.*]

The Hon'ble Mr. Rama Rayaningar asked :—

3. "(*a*) Do the Government of India propose to consider the desirability of introducing an increased scale of salaries for Sub-Judges, District Munsiffs and clerks of the Registration Department in the Madras Presidency ? Salaries of the Provincial Judicial Service and the Registration Department, Madras.

(*b*) Have the Government of India received any communication on the subject from the Madras Government ? If so, do the Government of India propose to pass early orders in the matter ?"

The Hon'ble Sir Reginald Craddock replied :—

"The Secretary of State last year sanctioned a scheme including a substantial enhancement of the rates of pay of the clerical establishment in Registration offices in the Madras Presidency. The introduction of the scheme depends, however, on the ability of the Local Government to finance it.

The Government of India have not received any proposals from the Government of Madras for raising the emoluments of Subordinate Judges or District Munsiffs in the Presidency."

The Hon'ble Maharaja Sir Manindra Chandra Nandy asked :—

4. "Will the Government be pleased to lay on the table the report of the Simla Improvement Committee which sat under the presidency of Mr. L. Porter, C S I., C.I E., late Secretary to the Government of India in the Education Department ?" Simla Improvement Committee.

The Hon'ble Sir C. Sankaran Nair replied :—

"The report of the Simla Improvement Committee, 1914, is still under consideration, and cannot therefore be published at present."

The Hon'ble Maharaja Sir Manindra Chandra Nandy asked :—

5. "Will the Government be pleased to state the total number of officers recruited for the Imperial Archæological Department since the creation of the Department by Lord Curzon ?" Recruitment of officers for the Imperial Archæological Department.

The Hon'ble Sir C. Sankaran Nair replied :—

"The total number of officers recruited for the Imperial Archæological Department in India and in England since the beginning of the year 1902 is 20, of whom, 13 are at present in the Department. A list* of the officers recruited is placed on the table."

The Hon'ble Maharaja Sir Manindra Chandra Nandy asked :—

6. "Will the Government be pleased to state the amount of the total annual recurring charges for the establishment of officers of the Imperial Agricultural Department, including the appointment of Agricultural Adviser to the Government of India ?" Annual recurring charges for the establishment of officers of the Imperial Agricultural Department.

The Hon'ble Mr. C. H. A. Hill replied :—

"I lay on the table a statement† which will, if his question has been correctly understood, give the information desired by the Hon'ble Member."

---

* *Vide* Appendix A.

† *Vide* Appendix B.

[*Sir Fazulbhoy Currimbhoy; Mr. C. E. Low; Sir Reginald Craddock; His Excellency the Commander-in-Chief.*] [7TH MARCH, 1916.]

The Hon'ble Sir Fazulbhoy Currimbhoy asked :—

Development of Indian trade.

7. "(*a*) Is it a fact that Trade Commissioners from the British Colonies visit the different countries of the world from time to time for the ascertainment of the possible lines of development of the Colonial export trade?

(*b*) Is such a Commission now in India examining the strength of the market in the interests of Canada?

(*c*) Have Government considered the advisability of sending round similar missions for the purpose of studying the foreign market for Indian commodities?

(*d*) If the answer to (*c*) is in the negative, do Government propose to make an attempt now in the abnormal conditions consequent upon the war?"

The Hon'ble Mr. C. E. Low replied :—

"(*a*) Several British Colonies possess Trade Commissioners or Trade Correspondents in various countries, and the Government of India believe it to be a fact that Trade Representatives are also occasionally sent on special missions of the kind indicated in the question.

(*b*) The Government of India understand that this is so.

With regard to (*c*) and (*d*), the Government of India appointed an Indian Trade Commissioner in London temporarily for a few months last year, and the question of making a permanent appointment is under consideration. They have also had under consideration, from time to time, the question of establishing Trade Agents abroad, but it is not possible to indicate at present whether any action in this direction can suitably be taken."

The Hon'ble Siar Fzulbhoy Currimbhoy asked :—

Advisory Committees of Hindus and Mohammadans for the prevention of Hindu-Moslem riots.

8. "(*a*) Were Advisory Committees of Hindus and Mohammadans formed during 1914 in the Punjab, the United Provinces and other Provinces for the prevention of Hindu-Moslem riots?

(*b*) If so, have the Government of India received any reports about their working?

(*c*) If the answer to (*b*) is in the negative, do the Government of India propose to ask the Provincial Governments concerned to submit detailed reports on the working of the Committees?"

The Hon'ble Sir Reginald Craddock replied :—

"I would refer the Hon'ble Member to the Home Department Communiqué of the 10th December, 1915, which described the action taken and the conclusions arrived at as the result of his Resolution on the subject of Conciliation Boards. The correspondence with Local Governments gave instances of a few Advisory Committees appointed in 1914, and briefly indicated the results achieved. These were not so encouraging as to make it expedient to call for further detailed reports upon the subject, and it is therefore not proposed to take any further action in the matter."

THE FOREIGNERS (TRIAL BY COURT-MARTIAL) BILL.

His Excellency the Commander-in-Chief:—"Sir, I beg to move for leave to introduce a Bill to provide for the trial, by court-martial, of foreigners for offences against the Defence of India Rules. In doing so, it is hardly necessary for me to point out that it is essential, in time of war, to deal speedily and summarily with offences committed by foreigners against the

[7TH MARCH, 1916.] [*His Excellency the Commander-in-Chief; The Vice-President; Sir William Meyer.*]

State, more especially with acts of espionage, and the collection and communication of intelligence likely to be of use to the enemy. It was with this object that an Ordinance was recently made providing for the trial by court-martial of any person other than a subject of His Majesty accused of offences against the Defence of India Rules This Ordinance, like other Ordinances, is limited in duration to a period of six months, but the provisions contained in it will obviously be required until the end of the war. It is accordingly proposed to convert the Ordinance into an Act, and the present Bill is designed to give effect to this proposal."

The motion was put and agreed to.

His Excellency the Commander-in-Chief :—" Sir, I beg to introduce the Bill, and to move you to suspend the Rules of Business to admit of the Bill being taken into consideration."

The Hon'ble the Vice-President :—" I suspend the Rules of Business."

His Excellency the Commander-in-Chief:—" Sir, I move that the Bill be taken into consideration."

The motion was put and agreed to.

His Excellency the Commander-in-Chief :—" Sir, I move that the Bill be passed."

The motion was put and agreed to.

THE INDIAN TARIFF (AMENDMENT) BILL.

The Hon'ble Sir William Meyer:—" Sir, I beg to present the Report of the Select Committee on the Bill to amend the Indian Tariff Act, 1894, and for other purposes. The Report is now in the hands of Members, and I need only emphasize one little point, and that is, a slight amendment we have made in Schedule III.—Export Tariff.

" As I explained in my speech introducing the Financial Statement, we proposed to provide for a special rate on jute 'rejections' lower than the ordinary rate. After conferring with representatives of the Jute Trade, and having had the benefit of the attendance of Mr. Birkmyre as an expert witness before the Select Committee, we are led to the conclusion that the 'rejections' form really a very small portion of the raw jute articles that will pass through the customs ; that it would be difficult to distinguish in regard to them in many cases ; and that, on the whole, it would be better not to put rejections in a separate category. Fiscally, this will be somewhat to the good, since 'rejections' will now be taxed at the rate for jute of other descriptions, *i.e*, other descriptions than cuttings.

" There were other points on which there was some discussion in the Select Committee. The Hon'ble Sir Ibrahim Rahimtoola proposed that there should be a 5 per cent duty on piece-goods ; that suggestion did not commend itself to the Committee as a whole, for the reasons stated in paragraph 2 of the Committee's Report. Similarly, a proposal made by the Hon'ble Mr. Stewart in respect of free railway material which had been ordered prior to the date from which this legislation is to come into force, and some suggestions he put to us that the Tea trade was not in a condition to justify the imposition of an export duty, were not accepted by the Committee as a whole. They are referred to in paragraphs 3 and 5 of the Report.

[*Sir William Meyer.*] [7TH MARCH, 1916.]

"I should like here to take the opportunity of emphasizing a matter which I thought I had made clear previously in my speech introducing the Bill, but which I see is still a subject of misapprehension, judging, for instance, from a telegraphic communication I have received from the South Indian Chamber of Commerce Well, to take existing conditions, our general tariff is 5 per cent. and this is 5 per cent. *ad valorem*. Obviously, in the case of a great number of articles which are subject to fluctuations of price, it is alike to the convenience of Government and of trade to have a *valor*, the amount on which duty would be paid, definitely fixed from time to time. Otherwise, you would have constant 'value' examinations in the customs, and probably the anomaly, every now and then, of different valuations at different ports. So when the Import Tariff Schedule of 1894 was framed, in the case of a great many articles, our predecessors put down a specific tariff valuation on which the customs officers were to act. It is perfectly clear, however, that such a tariff valuation must, from time to time, be revised with the course of prices. If prices were to rise materially, the existing tariff valuations would be unfair to the Government as representing the community as a whole; if they were to fall, the tariff valuations would be unfair to those who have to pay the tax. Consequently, these tariff valuations come under reconsideration every year and fresh valuations are issued, the Government of India having power to do this under section 22 of the Sea Customs Act, which runs as follows:—

'The Governor General in Council may, from time to time, by notification in the Gazette of India, fix, for the purpose of levying duties, tariff values of any goods exported or imported by sea on which customs duties are by law imposed, and alter any such values fixed by any Tariff Act for the time being in force.'

"The result is that all these tariff valuations that were inserted in the existing Act are now ancient history; they are of no practical value whatever, and have been superseded by other more recent valuations. When we framed the present Bill, it seemed to us that there was no use in stultifying the Government and the Legislature by putting down these ephemeral tariff valuations in the Schedule of the Bill. We shall leave them to be fixed as before, year by year, under the authority of the Governor General in Council, but subject of course to the general enactment of the law that the duty levied must represent 7½ per cent. *ad valorem*, or 2½ per cent. *ad valorem*, or whatever the *ad valorem* rate may be. It is merely a procedure by which, for the benefit alike of the trade and of the Customs authorities, the Government translates, from time to time, into actual terms what the value is on which the duty shall be levied. The clause in the Bill—sub-clause (*2*) of clause 3—which governs the procedure is as follows:—

'The Governor General in Council may, by notification in the Gazette of India, fix, for the purpose of levying the said duties, tariff values of any articles enumerated, either specifically or under general headings, in the said Schedules as chargeable with duty *ad valorem*, and may alter any tariff values for the time being in force.'

And sub-clause (*3*) says:—

'Different tariff values may be fixed for different classes or descriptions of the same article.'

"As I explained in my speech introducing the Bill, we propose, as soon as possible after the Bill has become law, to publish under clause 3 (*2*) a Schedule in an alphabetical form for the convenience of the trade and of the Customs authorities, showing the tariff valuations as they were fixed at the last revision in December, 1915, for those articles in respect of which it has been considered necessary to fix such values, and these will remain in force till the next revision. I trust I have now made it quite clear that the South Indian Chamber of Commerce are under a misapprehension when they talk of 'the abolition of tariff values and of the introduction of an *ad valorem* duty all round.' The duty has always been an *ad valorem* duty in these cases, and remains an *ad valorem* duty. But for the sake of convenience the *valor*, the value, is fixed for specified periods and then revised, and this will remain the case still.

[7TH MARCH, 1916.] [*Sir William Meyer; The Vice-President; Sir Gangadhar Chitnavis.*]

"There is one more point I may notice here because it has not been the subject of any amendment, and that is our 7½ per cent. duty on pearls We have received representations from Bombay stating that this will be a great hardship, in view of the fact that the bulk of the pearls are imported into India from the Persian Gulf and are then re-exported, India is thus a sort of middle-man in this business, and those who object to the duty say that, by putting such a large import duty on pearls, we shall kill the trade, which will go elsewhere. Well, the Sea Customs Act provides, ordinarily, that where an article is imported and then re-exported within a definite period, 7-8ths of the import duty will be refunded as a drawback. The article has, however, to be identifiable. Some of the authorities we have consulted say that the pearls will, generally speaking, be identifiable; others are rather doubtful on the subject. We are not therefore in a position to come to a definite decision in this matter. We propose, consequently, to keep the provision of the Schedule relating to pearls, but to prosecute our inquiries further. If we find that there would be difficulty in identifying the pearls, or that for any other reason the duty we propose will have a really prejudicial effect on the pearl trade, an effect which we have no desire whatever to bring about, why then, we shall act under section 23 of the Sea Customs Act and exempt them from duty or give them certain concessions. Sir, I now beg to move you to suspend the Rules of Business to admit of the Report of the Select Committee being taken into consideration."

The Hon'ble the Vice-President:—"I suspend the Rules of Business."

The Hon'ble Sir William Meyer:—"I now move that the Report of the Select Commiteee be taken into consideration."

The Hon'ble Sir Gangadhar Chitnavis:—"Sir, the Bill before us will command general approval, although the reason why it has been undertaken is regrettable. The deficit in our finances must be disquieting, especially because the Hon'ble the Finance Member thinks it is not likely to disappear for some time. Let us hope this fear is unfounded. The elasticity of the Indian revenue has always been a matter of surprise and satisfaction both here and in England, and there is much to be said for the view that its normal expansion in times of peace will be sufficient to cover all our liabilities. This optimism is further justified by the fact that a close scrutiny of our public expenditure would reveal items about the paramount urgency of which opinion might well be divided. In difficult times like these, large expenditure on unproductive construction work would appear questionable The exp anation does not appeal to me as conclusive. But a debate on the subject might embarrass Government, and there is no disposition in any quarter to do this. We therefore loyally accept the assurance that additional taxation has become necessary, and support the present scheme of such taxation with the greater alacrity in that it is based upon an equitable principle of distribution. And more than that: it is to some extent a sign that Government is more in touch with popular opinion. The revision of the tariff has all along been demanded by us, Indians, irrespective of the question whether or not such revision is necessary in the exigencies of our public finance. The fact that it has now become necessary is an additional point in its favour. But the exclusion of imported cotton piece-goods from the revised tariff must be viewed with keen disappointment. It is some comfort to be assured that this Government has tried to do us justice in this matter; it is likewise a hopeful sign that, on conclusion of peace, the whole question of the cotton duties and the countervailing excise duty will be carefully considered, along with the adumbrated scheme of an Imperial Federation founded upon inter-Imperial preference We look to the Government of India to show itself as the watchful and earnest guardian of our interests in the framing of this scheme. When

I moved, in 1913, my Resolution about Preferential Tariffs, I had hardly expected that the suggestion would materialise so soon; but this war has proved a powerful solvent of old ideas, and new economic theories have forced themselves into public attention. It is natural that a Customs Union among the different units of the British Empire is already in view. Let us earnestly hope its inauguration will be marked at least by the repeal of the unjust cotton excise duty and a reasonable advance in our import duties upon cotton manufactures. From what we know of the present Viceroy and his Government, we have every confidence that they are doing their duty in imposing the new taxation under inevitable circumstances. I, therefore, beg to support the Bill, subject to such remarks as I may perhaps make in support of the amendments proposed by some of my friends."

The Hon'ble Sir Fazulbhoy Currimbhoy:—"Sir, the uncertainties of the situation both military and financial, if nothing else, force our assent to the Bill. In the crisis before us one cannot be sure of the future, and the accuracy of the Budget estimates is more or less a matter of chance. If the military necessities of the Indian Empire do not call for sudden extraordinary expenditure in the course of the next year, the actual expenditure will not probably exceed the estimated expenditure. But if extraordinary expenditure becomes necessary, the actual may far exceed the estimate. On the revenue side also the same element of uncertainty exists So much depends upon the monsoon and the free and unrestricted movements of trade and commerce. Even the revenue from the customs duties and the export duties depend upon an adequate supply of tonnage, a factor always uncertain in war times, has become especially so in consequence of the new methods of warfare adopted by the enemy and the gradual extension of military operations over whole Continents. Precision in calculation of our future expenditure in these circumstances cannot be counted upon. Our reserves, both here and in England, must be maintained in their entirety, and any temporary depletion must be made good at the earliest opportunity. With all the prudent management of our finances, for which the Hon'ble Sir William Meyer deserves all credit, we have still temporary sterling liabilities on account of the Secretary of State's borrowings. And the sterling exchange may have for us surprises in the future; no one can be sure when, how long, and to what extent the expedient of the sale of reverse bills may have to be resorted to. These operations, as can well be realised, however sufficient as provisional arrangements, help to add to our financial liabilities after the war. A careful survey of the whole position will thus reveal the fact that the ordinary resources of this Government may prove inadequate for our needs. However loath, therefore, I may be ordinarily to support additions to our taxes, especially when they are expected to result in a fairly big surplus, I fully believe they have become necessary, even though I hold that our commercial prosperity at the end of the war will substantially increase our revenue in more directions than one. There may not after all be a surplus; the yield from the proposed taxes may fall short of the estimate; at the close of the next year, instead of having a large surplus to dispose of, we may have to face a deficit. With restricted scope for loan operations in India, and the London market practically cut off for sometime to come, it would not therefore be just to fret at fresh taxation.

"Now the necessity of additional taxation premised, Government arrangements must appear well devised to every dispassionate critic. It is clear Government have done their best under His Excellency's noble initiative. The taxation proceeds upon the most enlightened principles of distribution, and the Tariff Bill must appeal to all as reasonable. It is, in the first place, welcome as a concession to public opinion. There has been for some time past a growing desire in the country for a heavy tariff Indian public opinion is now, to all intents and purposes, unanimous about its urgency. But a scrutiny into its merits is unnecessary. It is obvious that, when additional taxation has been forced upon us, considerations of policy at least would justify its adoption. I do not, however, think the tariff proposed is after all so heavy. But be that as it

[7TH MARCH, 1916.] [*Sir Fazulbhoy Currimbhoy.*]

may, the Bill means a welcome departure in our fiscal policy. The next agreeable feature of the Bill is that the taxes have been so adjusted as to secure the largest portion of the revenue from the rich, just the classes of men who are able to bear the strain, and who owe all their wealth to the security, both inland and oversea, ensured by the British Government and to the facilities of international commerce provided by our connection with that Government. It is certainly not my contention, neither is it the Hon'ble Finance Minister's contention, that improvements as regards details are are not conceivable. The Hon'ble Sir William Meyer himself admits that an enhancement in the import duties upon cotton goods simultaneously with the abolition of the countervailing excise duty would have been just and would have been acceptable to Government. But in view of his explanation on the point, criticism would not further our cause. On the contrary, it might do us harm, as pointed out by His Majesty's Government. Hon'ble Members will note that the abolition of the excise duty is by far the more important of the two questions, and so long as that is not secured, we cannot gain our point. So far as the principle and the special needs of the Indian cotton industry are concerned, it is a comparatively minor matter whether the import duties upon cotton goods are raised by a few points or not. It has been felt now for decades, both by officials and the Indian public, that duties upon imported cotton goods are required for purposes of revenue, and quite naturally. The value of our annual cotton imports is enormous. These should therefore be one of the most productive sources of our revenue. But this source, so far, has not been, and could not be, utilised on account of this countervailing excise duty. Already the excise duty is a clog to the industry, and even a slight increase in it would prove positively injurious As matters stand at present, however, the two duties go together, an enhancement in the customs duty being countervailed by a similar enhancement in the excise duty. The great point accordingly is, the excise duty must go on principle. And once we succeed in getting this abolished, we shall have made a substantial advance in the matter of fiscal freedom which we all so desire. We feel encouraged that the Government of India is with us in this matter, and is fighting our cause with all the weight of its position and authority. I would not embarrass such a powerful and earnest champion with ill-timed controversy over this question. Government has the moral support of the whole country. Our Congresses and Industrial Conferences have repeatedly demanded the abolition of this excise duty. Non-official Members of this Council have before now echoed the feeling of the country. When the war ceases there will be no lack of opportunity to express once again our united opinion on the subject, should such an expression of opinion be found necessary. I accordingly hold that no good purpose will be served by agitating the point now.

"Sir, it would have been well, it would certainly have been more consonant with public feeling, if in the Schedule to the Bill the duty upon salt had not been increased, and the estimated revenue from the additional duty had been raised from some other source, say jute. But, on a careful consideration of all the circumstances, I do not press for a readjustment. I cannot ignore the fact that Government themselves do not favour an increase in the salt tax. Their policy has been to reduce it on every accession of prosperity. There is a consensus of official opinion that the salt tax should be held back as a sort of reserve to be used only when other resources fail. The traditions of this Government are against an increase in this tax because, as the Hon'ble Sir William Meyer puts it, it hits the poor consumer. It is only fair, therefore, to assume that Government in this matter have yielded to pressure But as it is, the additional 4 annas per maund may not prove very oppressive. I would, however, appeal to Government to repeal it at the earliest opportunity, and, until that consummation takes place, to see that even in the case of future necessity there is no further loading, and the necessary additional income is got by increasing the export duty upon raw jute and jute manufactures. The Hon'ble Sir William Meyer has referred to the expert opinion that jute exports can very well bear heavy export duties. A heavier export duty on jute would thus have been justifiable even in this Bill, but the cautious advance made by

Government in this direction is perhaps the most advisable. This is an altogether new tax in India, and a stiffer tariff in the beginning might have been productive of unnecessary clamour. It is prudent to watch developments.

"Sir, I must here point out that this Tariff Bill will operate harshly upon the Indian pearl trade unless supplemented by a Government notification, under section 23 of the existing Indian Tariff Act, exempting from duty the pearls imported into Bombay from the Persian Gulf. The imports mostly come for assortment and expert treatment by the Indian traders and artisans, and fully 75 per cent of the pearls are re-exported oversea. Bombay has so far been the distributing centre of the pearl trade of the world. The volume of business done is something enormous. About two crores worth of pearls are imported annually into India, while the exports are valued at three and a half crores, the difference in value being due to increase in value of the re-exports after being cleaned, refined, subjected to difficult chemical processes, drilled, sorted and strung, as also to some extent to outgoings from old stock. The business gives employment to hundreds of skilled workmen and traders; but the whole trade will be diverted from India if the pearls are not exempted from the new duty. Continental firms, it is well to bear in mind, are watchful, but up to now have failed to wrest the trade from us. If, however, this 7½ per cent duty is maintained, it will have the sure effect of discouraging imports into India. This contingency will spell disaster to the Indian industry and ruin to a numerous body of traders and skilled workmen. The danger is so great, that the Indian Merchants' Chamber and Bureau has wired earnest representations to you, Sir, and to me. It may be urged that a drawback could be claimed under section 43 of the Indian Tariff Act, upon pearls re-exported from Bombay. Section 43 no doubt provides for the grant of a drawback upon re-exports, but that only in the case of goods 'capable of being identified.' Now, pearls are notoriously incapable of easy identification, especially because they are imported in mixed bulks. And it was because of this difficulty that Government have all along exempted them from duty. Unless similar exemption is allowed on the present occasion also, and a notification under section 23 issued by His Excellency in Council exempting pearls from customs duty under the Bill, the greatest injustice will be done to a large body of useful and law-abiding citizens who bring prosperity to the country by their industry and skill. I am glad that the Hon'ble the Finance Minister has given his assurance that he is going to inquire into the matter, and if it is found that it will ruin the trade, he will exempt it.

"In conclusion, I beg to accord my warm support to the Bill under discussion, and, in doing so, I must especially thank the Hon'ble Finance Minister for accepting the suggestion of the Indian Merchants' Chamber and Bureau, submitted through you, Sir, and increasing the customs duty upon gold and silver thread and other silver manufactures imported into India from foreign countries. The conditions of competition have now been equalised for the Indian silversmiths."

The Hon'ble Mr. Dadabhoy:—"Sir, I welcome this Bill, not so much for the revenue the alterations in rates provided in it will yield, but for the evidence it contains of a decided and, I hope and trust, a permanent change in the fiscal policy of this Government. The present scheme of taxation, thanks to the sympathetic initiative of the Hon'ble Finance Minister, is in agreement with the oft repeated suggestions of the people. Public opinion in India has all along demanded that Government should have a heavy tariff, not only for purposes of revenue, but also for the protection it is likely to afford to our industries. With years the feeling has gained in strength and persistency until we have reached a stage when opinion has become practically unanimous. But so long this Government could not accede to our request, however anxious they may have been to take the suggested departure. This war, however, has facilitated the adoption of the desired policy, and now that Government has launched this new scheme, it is only to be expected that the action should meet with general and cordial approval. The Indian public will only look

forward with hope to the maintenance of the increased scale of import duties for a sufficiently long time. Should the Hon'ble Sir William Meyer's estimate of our future liabilities prove correct, all the additional revenue required may be easily had by judicious handling of the tariff. We should be ready to support Government if after a few years the duties now imposed have to be further enhanced.

"Sir, it may be argued that even a protective tariff has its disadvantages, and under prolonged strain its utility might become obscured and the general public might become restive; but, thanks again to the judgment the Hon'ble Sir William Meyer has brought to bear upon it, the whole arrangement is so carefully planned, that the masses will not feel the weight of the imposts so much as the rich. Barring two items, salt and sugar, the articles heavily taxed are exactly those which are used most by the better classes,—people whose patriotism and broader outlook will prove a powerful corrective of any feeling of impatience at the duties. About salt, I shall have to speak more fully later on in connection with the amendment relating to the additional tax upon it standing in my name. Sugar is undoubtedly one of the principal articles of food in India, and the increased duty upon it might at first sight appear onerous to the masses. But, in addition to the reasons given by the Hon'ble Sir William Meyer in support of the tax, Hon'ble Members will be pleased to consider that locally produced raw sugar or *gur* forms the chief article of consumption among the common people. These do not ordinarily use the imported refined sugar, and, except for use in moderate quantity on ceremonial occasions, that is seldom purchased by the simple villager. Indeed, whole villages would be found without a stock of it even in pre-war days when cheap beet-sugar ruled the market. It is true, inflation in the price of the imported article in consequence of the customs duty will have its effect upon the local stuff, but the rise in the price of this last article is bound to be small. This slight rise the people should not object to pay, especially at this juncture. This is a war towards the cost of which the rich and the poor alike must contribute, and when the rich cheerfully accept the higher taxes, the poor have no just cause for complaint for the slightly increased demand upon his purse. Besides, the country has all through the past quarter of a century and more demanded that some sort of protection should be ensured to the local manufacture, the development of which will contribute to rural prosperity in many parts; and when the much-needed protection is afforded by Government in the shape of heavy duties upon imported sugar, it is not for us to turn round and grumble at a slight rise in prices.

"In the debate on this Bill the main points which call for serious comment are (1) the retention of the countervailing excise duty upon Indian cotton, (2) the omission to levy the higher scale of customs duties upon our cotton imports, and (3) the exclusion of raw cotton from the new scheme of export duties. With regard to the first two points, the Hon'ble Finance Member has offered an explanation about the sufficiency of which difference of opinion is permissible. Clearly Government is in no doubt about the iniquity of the excise duty. Even five years ago when I moved in Council a Resolution for its abolition, indications were not wanting that Government was sympathetic, and now official opinion appears to coincide with the popular view that this duty must be abolished on principle, apart from any consideration of its economic effect upon the local cotton industry. In a general revision of the tariff it was to be expected that this would be done. It would have been well if the duty had been abolished. The action of His Majesty's Government in preventing the abolition must be viewed with keen disappointment throughout the country. The inclusion of imported cotton piece-goods among the articles liable to pay the enhanced duties, again, would have secured to Government universal support from the people, and this at a crisis when popular good-will is of the last importance. Here, too, the policy pursued by the Imperial Government must be characterised as narrow and shortsighted. But agitation on these points would embarrass Government, and that would not be right. It might also, to some extent, injure our cause.

We must live in hopes that a decision in conformity with Indian opinion and Indian sentiment will be come to after the war. It is something to know that this Government is doing its best to secure justice to India. With such powerful support the wishes of 300 millions of people cannot be disregarded by His Majesty's Government.

"With regard to raw cotton, the case is slightly more complicated. The Hon'ble Finance Member has drawn our attention to the fact that the market for Indian cotton has steadied in the current year in consequence principally of heavy purchases by Japan, one of His Majesty's Allies. Over and above the consideration of the possible economic effects of an export duty upon cotton, diplomatic considerations must have induced Government to forego that duty for the present. It would be unjust to criticise Government action without knowing all the facts. In this matter, too, let us hope some satisfactory arrangement will be made on the termination of war.

"It may therefore be broadly stated that this Bill deserves the cordial support of this Council, barring the slight modification suggested in the amendments I propose to move. The whole scheme is fair, equitable and well thought out. In principle it is right. The details also have generally been settled with care and judgment. I accordingly cordially support the Bill, with the exception of two particulars in regard to which I shall move amendments."

The Hon'ble Khan Bahadur Mian Muhammad Shafi:—"Sir, I have great pleasure in giving my support to the Indian Tariff Bill, not only because, in the existing abnormal conditions, the Government is perfectly justified in proposing the additional taxation embodied therein, but also because, while opening up fresh and perfectly legitimate sources of income to the Indian Exchequer, it is calculated to afford protection to some of our indigenous industries, and to promote the cause of temperance. Sir, to my mind one of the most pleasing features of the Bill is to be found in the list of import duties it is proposed to levy on articles, which hitherto have found a place in the free list, and in the enhancement of the import duties proposed in connection with other articles. The hard logic of resultant facts is bringing home even to confirmed advocates of free trade in Manchester that an indiscriminate application of the doctrine of free trade, irrespective of circumstances, to all commodities and to all countries, is calculated to result not only in material injury in certain respects, but also to mischief in others. It seems to me that the proposed enactment, in curtailing the free list and in proposing an enhancement of duty on others, is taking a step in the right direction. Coming as I do from an agricultural Province, and being myself a member of an agricultural tribe, I welcome the enhanced tax proposed to be levied on sugar and on tobacco as calculated to protect our indigenous sugar and tobacco industries. So far as the list of other articles is concerned, I entirely agree with my Hon'ble friend Mr. Dadabhoy, that the Government of India have framed this list with a great deal of discrimination, and that no serious objection can be taken to any part of it, except to one important omission. That omission has been referred to by almost every speaker who has preceded me, and I entirely endorse the remarks made by them regarding the unfortunate omission of cotton goods from the list of articles upon which import duty is proposed to be levied. At the same time, I recognise that the Government of India are in entire sympathy, as was apparent from the speech of the Hon'ble the Finance Member when introducing the Financial Statement, with the wishes and feelings of the people of this country in regard to this important matter. I am authorised by the Council of the Punjab Provincial Moslem League to offer their thanks to the Government of India for their advocacy of the claims of India for greater fiscal freedom in connection with this particular question. It is unfortunate that His Majesty's Government have decided to negative the proposal put forward by our Government. Let us hope that, when after the termination of the war, this question comes under review, the Government of India will obtain greater liberty, greater freedom

[7TH MARCH, 1916.] [*Khan Bahadur Mian Muhammad Shafi; Maharaja Sir Manindra Chandra Nandy; Mr. Rama Rayaningar.*]

in this particular respect, if not with reference to cotton goods produced within the Empire, most certainly with reference to cotton goods which are imported into India from countries lying outside the limits of the British Empire. Sir, I regard the increase in the salt tax, unfortunate and unwelcome though it is to a very large number of the people of this country, as a war tax pure and simple, and as such I am sure that the people of this country will give it their willing acquiescence. At the same time, I cannot help expressing the wish that, while so far as the proposed enhancement in the salt tax is concerned, the time may come, soon after the termination of the war, when the *status quo ante* will be reverted to; I trust that the rest of the Indian Tariff Bill, which it is now proposed to pass into law, will find a prominent place in the Statute-book of this country. With these few words, I cordially support the Bill."

The Hon'ble Maharaja Sir Manindra Chandra Nandy of Kasimbazar :—"Sir, I cordially support this Bill to amend the Indian Tariff Act. We all fully recognise that an enhancement of taxation has become inevitable on account of the enormous expenditure which is being incurred from day to day on account of the war, which is severely taxing the resources of the Empire. The only observation I should like to make is, as regards the raising of the salt duty from Re. 1 to Re. 1-4 per maund. As the Hon'ble the Finance Member pointed out in his statement made in this Council on the 1st instant, the 'enhancement of the salt tax has always been looked on as a reserve to be utilised when war or other financial calamities should come upon us.' We are in the midst of such a calamity, and, though we may not be quite justified in opposing the raising of the salt tax, I think the Council and the country are entitled to an assurance that there will be no further enhancement of the salt tax in future years, and that, at the earliest opportunity possible, the duty on salt will again be reduced to Re. 1 per maund."

The Hon'ble Mr. Rama Rayaningar :—"Sir, the Tariff Bill demonstrates forcibly the anxiety of Government to find money, not only for war deficiency, but also for employment on the improvement of the people. The Bill is welcome in that the duties proposed have the general approval of the people. If we have to faithfully represent popular views, we cannot but accord our support to the Bill. There are, however, a few particulars in which improvement is both desirable and possible. As the Hon'ble Finance Member himself suggests, the exclusion of the imported cotton piece-goods from the revised tariff is a patent injustice to India. But the official explanation, for which we must thank Sir William Meyer, will have made it clear to the public that the course has been adopted by Government with the sole object of preventing a greater injustice to the country. Evidently sanction to an enhanced import duty could only be secured on condition that a corresponding excise duty should be imposed upon cotton goods manufactured in the country. This last contingency would certainly have proved a greater evil. We wish the efforts of Government had been successful; but now that they have not been, we can only support Government in renewed efforts after the war is over; and we hope that in any fiscal re-adjustment on that occasion, the unjust excise duty should be abolished, apart from the question whether the import duties are altered or not. We attach great importance to the abolition of the excise duty.

"Sir, the exclusion from the Tariff Schedule of the machinery imported for agricultural and industrial development of the country is desirable on principle. I raised this question in Select Committee, but when the Hon'ble Member in charge of the Bill reminded me of the special needs of Government during the war, and pointed out the inconvenience which the exclusion would involve, I did not press the point. I hope, however, that when Government reconsiders this question after the war, this exclusion will receive sympathetic consideration.

"With these observations, I support the Bill."

[*Mr. Madhu Sudan Dass.*] [7TH MARCH, 1916.]

The Hon'ble Mr. Madhu Sudan Dass :—" The Tariff Bill is intimately associated with the Budget which was presented to this Council the other day. It no doubt shows a change in the fiscal policy of Government. The Hon'ble Members who have spoken and preceded me have referred to the excise duty on cotton and the import duty on piece-goods. When the Hon'ble Finance Member introduced the Budget, he delivered a message to this Council from His Majesty's Government, and that message was, that a controversial question like this should be avoided at this time. It was a message of peace, and at the same time this message of peace was accompanied by an assurance that when the time comes there will be a re-adjustment of the relations between India and England, a re-adjustment when India will have her proper status in the British Empire determined and defined. With that assurance, Sir, I feel it my duty to avoid making any remarks, either with regard to the provisions in the Budget, or the Tariff Bill which may be misunderstood in other parts of the British Empire. This is not the time to say anything which may be construed as proceeding from a spirit of retaliation and retribution His Majesty's Government promise and give an assurance that the day of reckoning will come when peace returns to the Empire. It is not the time to talk of retaliation or retribution when the house is on fire ; that is not the time to discuss as to who contributed most towards the construction of the house, and what amount of labour should be undertaken by this person and that person, all of whom are inmates of the house. It is our duty to do all that we can do to show that we are loyal subjects of the Empire, that we are interested in upholding the dignity, the prestige and the honour of the Empire and of our King-Emperor.

" The Hon'ble Finance Member was pleased, in the concluding paragraph of his budget speech, to refer to some words in a Resolution which was passed unanimously in this Council. Though I was originally responsible for those words, those words represent the feeling of the whole country to-day as they did when I moved that Resolution.

" Sir, our duty as Indians, as to what we have been able to do, is not to be discussed now. All that we can say is, that the Hon'ble Finance Member speaks of the salt tax as a reserve to be drawn upon in times of need and necessity. I should go further, and say that the life-blood of the whole nation is a reserve upon which the King-Emperor has a right to draw when the interests of the Empire are in peril. And what can the poor man in India, who has no control over the Military Department and who does not control the war at the present day raging over the whole world do? next to giving his life blood in the battle-field, what can he do better than gladly accept a taxation on one of the necessary articles of daily life ?

" I am glad that the salt tax has been introduced. I do not say that the salt tax is ever a desirable tax; I do not for a moment maintain that there is any justification for the salt tax. On the contrary, the salt tax in India has always been considered as a blot on the fiscal policy of the Government of India. But the salt tax has one redeeming feature viewed from the war standpoint; it has a feature which certainly is not to be found in any other tax. The salt tax will affect every Indian, so that by accepting the tax the poorest Indian, the youngest child, the oldest man contributes to the exchequer of India to make up the deficit that has been created by the emergencies of the war, and we have the satisfaction of saying—India will have the satisfaction of proclaiming—that she is not wanting in her duty to her King-Emperor. Once more I refer to the words of the Hon'ble Finance Member that the salt tax is a reserve. Yes, let this be considered as a precedent, let the present occasion be a precedent for the future, that only when the interests of the Empire are in peril let this reserve be drawn upon, but not for other purposes. Salt is not a luxury. There is a craving for it in human nature, I should say in nature. Even wild animals lick saline dust. It is not like other luxuries, for instance tobacco or wine. There is no danger of a man indulging to excess in salt, or getting drunk ; it does not lead to any vicious habits ; a Maharaja with his huge income does not eat one maund of salt and the poor beggar two pice worth of salt. The enormity of the taxation lies in this fact, that nature has implanted a craving for salt in man. In India, where saline earth is to be found, the Indian is

[7TH MARCH, 1916.] [*Mr. Madhu Sudan Dass; Rai Sitanath Ray Bahadur; Sir William Meyer.*]

tempted by the very soil of the country where he was born. The country which he worships as his motherland tempts him. And what is the result? Being a poor man unable to buy salt, if he takes a little saline dust, he is sent to prison for three months or six months, and the man who sends him to prison gets a reward; whereas if a cow were impelled by hunger to trespass on a farm the cow is only taken into the pound and not sent to jail. Here is the enormity of the tax. I do sincerely hope that, when peace returns, this blot on the fiscal policy of the British Government of India will be removed.

"For a small man like me to compliment the Finance Member on the carefulness with which he has prepared the Budget would perhaps be impertinent, but I do feel it all the same because in amending the Tariff Act there was danger of putting too much taxation in the shape of export duty If that were so after the war people might have said the contributions that India made towards the war fund came from foreigners who paid the export duty. There has been a very reasonable, cautious and careful adjustment which at least secures to India the judgment of the world that, poor country as she is, poor as Indians are, they have not been lacking in their duty to support the honour and prestige and dignity of the Empire. We have done all that we could do. We have proved in the battlefields of Europe that the blood of a British subject, whether he comes from Canada or from India, has the same colour. We have proved that the heart which responds to the tune of the National Anthem is the same whether it is in the breast of an Indian or an Englishman. Let us wait for the day when peace is restored to the Empire, when the day of re-adjustment comes, and let it not be said then, let not any opportunity be given to any man to say then that in the days of trouble India was weighed in the balance and found wanting.

"With these remarks, I support the Bill."

The Hon'ble Rai Sitanath Ray Bahadur:—"Sir, considering the exigencies of the situation and the tremendous sacrifices the present war has entailed upon the British nation, I must say that the several schemes of taxation, formulated for meeting the deficit, are wise, modest and equitable, and that the burdens of taxation have been equally distributed among all classes of people, and as such, coming here as the representative of the Indian mercantile community, I beg to give my humble support to the Tariff Bill, and to add that we, one and all, cheerfully submit to the additional taxes that are going to be imposed. But I must say that, though the Income-tax has been more than doubled in the case of higher incomes, this is hardly the time to murmur and grumble against it, more especially when we see that, even in the case of salt, a prime necessity of life, a slight increase has been made. But I do assure the Council that the increase is so slight that it will not have any effect in raising the price of salt, at least to an appreciable degree.

"With these few words, I beg to give my humble support to the Tariff Bill."

The Hon'ble Sir William Meyer:—"On behalf of Government I greatly appreciate the way in which our tariff proposals, which I need not say caused us great trouble and anxiety, have been received by this Council. Here is a Bill of an elaborate character involving, so far as its Schedules are concerned, material alterations in the taxation of the country, which has been received with general approbation. I need not therefore detain the Council with a further speech. There are certain points in connection with which I might have spoken, but they will come in on subsequent amendments.

"I will only say this that I fully agree with what has been said by my friend the Hon'ble Sir Fazulbhoy Currimbhoy and other members, on the question of the cotton import duties. These members, some of them of long experience in the Council, have recognised what the Government of India would have liked to do had they had a free hand. They have also recognised

that His Majesty's Government having had to take, as I said in my Budget speech, a wider view, having taken the interests of the whole Empire into consideration, have come to a different decision. His Majesty's Government have, on this subject, sent to us what my friend the Hon'ble Mr. Das aptly called a message of peace; and also, as regards the future, a message of hope. I would earnestly appeal to the Hon'ble Member who proposes to move an amendment on this subject to consider whether, by moving that amendment, by entering into a discussion which may provoke criticisms of His Majesty's Government, which later on those who utter them might regret, he will not be doing more harm than good, whether such a course may not be against the interests of India as affecting the future settlement which will have to be entered into not in any spirit of abstract principle or ruthless bargaining on the one side or the other, but rather as a question which deals, as His Majesty's Government have put it, with the fiscal relationships of all parts of the Empire as between one another and the rest of the world—a question which must therefore, if it is to come to a successful issue, be dealt with by all sides in a spirit of conciliation and of practical give and take. Therefore, Sir, I would ask my Hon'ble friend, who has a certain amendment on the Agenda on the subject of the cotton duties, to consider carefully whether it is expedient at present to press it.

"I conclude, Sir, by once more moving that the Report of the Select Committee be now taken into formal consideration."

The motion was put and agreed to.

The Hon'ble Mr. Dadabhoy:—"Sir, the amendment which stands in my name and which I now beg to move suggests that Government should dispense with the proposed addition of 4 annas per maund to the existing tax upon salt of Re. 1 per maund. I have been anticipated to some extent by some of the previous speakers, but I propose to put my case before the Council in a different shape. I do not agree with some of the remarks which fell from the Hon'ble Mr. Dass on the subject. It will at once be seen that this recommendation forms part of a scheme of re-adjustment of the tariff duties which has for its central object the relief of the poor masses at the expense, not of individuals, but of big companies and merchants in the first instance, and ultimately of the foreign purchasers of jute, raw and manufactured. Had the present amendment stood alone, without any practical suggestion as to how the loss in prospective revenue consequent upon the elimination of the additional salt tax could be made up, it might perhaps be contended that I could not claim a sympathetic hearing either at the hands of Government or of this Council in the difficult and anxious times through which we are passing. But fully alive as I am to the needs of the situation, I supplement the present recommendation by another which ought to dispel all fear of loss of revenue. Of that, however, later on.

"Now, about the form of the amendment. It will be noticed that the addition to the tax is proposed to be made by executive order, as it is open to Government to do. Under the rules, the excise duty upon salt manufactured in India can be altered by an Order in Council, and that procedure has been followed on the present occasion. The proposal about the abandonment of the additional tax, therefore, to be effective must be discussed in the course of the debate on the Tariff Bill. I have accordingly taken advantage of the fact that imported salt forms a dutiable article in that Bill to raise the whole issue by suggesting that duty at the rate of Re. 1 be levied upon that salt, *i.e.*, at the same rate at which salt manufactured in India is taxed. If this amendment is carried, the excise duty upon indigenous salt will perforce remain unchanged at Re. 1 per maund.

"Sir, from the observations I have made in lending my support to the Bill, it will have become abundantly clear that the proposed financial arrangements of the Government generally have my wholehearted approval. I may also say at once that, even in this matter of the additional salt tax, Government have evinced great moderation. But one of the points I beg to emphasise

[7TH MARCH, 1916.] [*Mr. Dadabhoy.*]

before the Council is, that the salt tax should be a sort of reserve with us to be drawn upon only in case of extreme necessity, after all the other productive sources of revenue have been fully utilised and exhausted. Mr. Baker, Finance Minister in 1905, justified his action in reducing the salt duty, *inter alia*, thus :—

'The feature which specially commends itself to me in the reduction of the duty is the large and valuable financial reserve which it lays by for a lean year.'

"Then there is the consideration that the salt tax weighs upon the poor. All classes have to pay this tax, it is true, but the major portion of the revenue from it is contributed by the poorest sections of the community by reason of their numerical preponderance. That is a proposition which does not require elaborate elucidation. I will only cite the authority of Lord Curzon in my support. In 1905, in justification of the partial remission of the duty upon salt, he observed—

'What is the tax that touches all classes down to the humblest? It is the salt tax.'

"Again, after referring to the principle that surpluses should be utilised to afford relief to the people, he remarked—

'And who are the people of whom I speak? They are the patient, humble millions, toiling at the well and at the plough, knowing little of budgets, but very painfully aware of the narrow margin between sufficiency and indigence. It is to them that my heart goes out. They are the real backbone of our economic prosperity. They give us nearly 20 millions sterling per annum in Land-revenue alone, or about one-fourth of our entire receipts.'

"Now putting the two extracts together, we get to the fact that, in Lord Curzon's authoritative opinion, the remission of the salt tax meant relief to the masses. The converse is likewise true, and the fact should be frankly acknowledged that any addition to the salt tax *pro tanto* presses upon the masses. This is a matter of arithmetical proof. As Finance Minister Mr. Baker pointed out in 1905, every reduction in duty up to that year had been followed by increased consumption, and every enhancement in duty had checked the rate of increase in consumption. The movements of trade in the subsequent period confirm the truth of the assertion. Unless an additional duty of eight annas was felt by the people, it would not have had in the past a restrictive effect upon the annual normal advance in consumption. In 1889, the salt tax was enhanced by 8 annas a maund. The rate of increase in consumption during the following quinquennium immediately fell from 668,000 maunds a year in the previous period to 272,000 maunds a year. On the other hand, the salt duty was reduced once in 1903 and again in 1905, and in the Financial Statement of 1907 the effects of the successive reductions were described in the following luminous language :—

'Under salt, we had made what seemed to be a liberal allowance for the probable increase of consumption due to the reduction of the duty last March. The results have, however, surpassed our anticipations. By the end of February the issues of salt had exceeded those of the corresponding period of the previous year by 14,38,000 maunds, and we now expect that this figure will have risen to 16 lakhs of maunds by the end of the year. This advance follows on a very large increase of 17,86,000 maunds which occurred in 1904-1905, by which time the first reduction of duty made in 1903 had come into full effect.'

"If past experience and the history of the several changes in the salt tax be any guide to the future, it may be asserted that an additional duty of 4 annas a maund will in the same way proportionately affect consumption. And that contingency would react upon the revenue, and it may be that the actual realisation will fall short of the Budget estimate. But that is the third point which demands the attention of this Council. And all the three points together warrant the conclusion that it will be more politic to leave salt untouched for the present. When I come to deal with the second amendment, I shall be able to satisfy Hon'ble Members that we have not exhausted the other sources of revenue. The estimated revenue of £600,000 can be raised in other ways which, while sparing the masses, will not cripple the economic resources of the country. But I cannot dilate upon this aspect of the question now.

"Sir, it is only fair that I should mention two other points which must be considered by the Council in this connection, and they follow opposite lines of thought. The one is founded upon sympathy with the masses, and the other derives its force from an impatience at the immunity enjoyed by them from the general scheme of contribution towards the cost of the war. It is argued that the pressure of the abnormal financial conditions due to the war may compel us to impose upon salt even a higher duty. When that contingency comes the rise in price will be so sharp as to be distressing to the poor. It is far better therefore that the enhancement should be gradual, and in this view of the case the additional duty of 4 annas is right. Sir, I concede there is apparently something to be said for this contention. I will not say that the contingency is hypothetical. But, assuming for argument's sake that it is imminent, I submit that, in the interest of the ignorant millions, frequent or even successive alterations in salt duty must be discouraged. Such changes only introduce some uncertainty in the market, render a stable basis of calculation difficult, and help the middleman to fill his pocket at the expense of the poor customer. The theory of gradual enhancement does not hold good in salt duty. There is always considerable speculation in the market, and the real effect of taxation upon prices is, for some time at least, obscured by the operations of bulls. The Hon'ble Finance Member has himself referred to the speculative clearances of salt in expectation of this enhancement in duty. It is a matter of common knowledge that, for every slight rise in duty, the price of salt goes up out of all proportion to the additional tax. Only a few weeks ago, at important centres the price of salt became double of what it was before. The imports have doubtless been less for some time; but making allowance for all factors, it is difficult to believe that the inflation in prices was right. Far better, therefore, that the duty which is found absolutely necessary should be levied all at once than that successive additions should be made to the existing duty. This last course will only lead to large accumulations in the hands of the speculators which can never be advantageous to the poor. When stocks are held up prices naturally rise.

"But however divided opinion may be on the question of the relative merits of gradual enhancement and sharp enhancements, I would claim earnest consideration of the question of the suitability of the salt tax in the light of the principle I have submitted to the Council, that this tax should be treated as a reserve to be utilised *in the last resort*. Judged in that way the time for enhancement has not come. We have certainly not exhausted our other sources of revenue. I would therefore ask Hon'ble Members to decide that the proposed enhanced duty should be abandoned, let it be on the understanding that I undertake to show in connection with the second amendment that the revenue can be raised in other ways.

"The other points, namely, that the poor must contribute to the State Fund along with the rich at this time, hardly needs elaboration. Were it a fact that the agriculturists do not pay towards the cost of administration, including defence, anything except the Land-revenue, even then they would be entitled to consideration, because the Land-revenue alone accounts for one quarter of our revenue. But it is not a fact that other taxes besides the salt tax do not touch them. These people at least contribute to the revenue from the customs duties. The bulk of the excise revenue and of the revenue from stamps is realised from them, and they contribute a substantial portion of the railway revenue.

"Sir, I have one other submission to make before I place this amendment formally before the Council. With all the additional taxation provided in the Income-tax Bill, and the Indian Tariff Bill as also by executive order, the Hon'ble Finance Member expects to close next year with a surplus of £1 million. And this figure greatly exceeds the expected revenue from this tax of 0-4-0 annas a maund upon salt. What is the difficulty then of dispensing with this tax? Without it there will still be a surplus of £400,000. The additional salt tax is wanted only to swell the surplus, and that is a principle of taxation to which few will be found to subscribe Taxation with a view to provide a surplus is in itself a policy of doubtful wisdom, and when

[7TH MARCH, 1916.] [*Mr. Dadabhoy; Sir Gangadhar Chitnavis; Sir Ibrahim Rahimtoola; Pandit Madan Mohan Malaviya.*]

the article selected for such taxation is a commodity of prime necessity like salt, it becomes indefensible. I accordingly move :—

'That in column 4 headed 'Rate of duty' against item 39, Part II, new Schedule II, for the existing entry against that item, the figures '1-0' shall be substituted.'

The Hon'ble Sir Gangadhar Chitnavis:—"Sir, the amendment has my support. The Hon'ble Mover represents, to a large extent, the popular view, and there is much to be said in its favour. I do not think the extra 4 annas a maund will force up prices abnormally high. The Hon'ble Mr. Dadabhoy, too, does not justify the proposed change on that ground. He has said in the speech he made this morning that where the rich have cheerfully accepted their responsibilities, the poor should not grumble if there is a slight increase in the poor man's burden. But sufficiency of salt being one of the principal conditions of healthy existence both for men and cattle, too great care cannot be taken to see that the duty upon it is not raised without the gravest necessity; in other words, salt should be taxed in the last resort. This contingency, in the opinion of some people, has not arisen. There are still other sources of revenue not fully used up. I would, therefore, request Government to consider if this tax could be withheld, and the loss of revenue that may be caused by accepting this amendment might be made good by raising the tax on some other commodities."

The Hon'ble Sir Ibrahim Rahimtoola:—"Sir, I am entirely in favour of retaining the salt tax at the present figure of Re. 1 per maund, and I have given notice of a Budget Resolution to that effect. I did not anticipate that the question of the salt tax would be raised in connection with the Tariff Bill.

"The increase in the rate of the salt tax is made under the Salt Act, which gives Government discretionary powers to regulate it up to a maximum of, I think, three-and-a-half rupees. I therefore thought that, as no legislation was necessary for the increase of that tax, the proper procedure would be to move a Budget Resolution on the subject. And, Sir, that would have facilitated matters We would have known by that time whether the Tariff Act was passed in its entirety with or without any modifications, and whether the Income-tax Act also was passed. We would have then known what the state of the Budget Estimates for the ensuing year would have been, and it would have helped us to consider the question of salt taxation on its own merits after fixing up all other items. However, as the subject has been, raised on the present occasion, I do not wish to dilate upon these matters, as the whole scheme of increased taxation will have to be considered I will confine myself on the present occasion by saying that I am in favour of retaining the salt tax at Re. 1 per maund, and I beg to submit that there are very strong reasons in favour of it. But, with your permission, Sir, I will raise that question when dealing with my amendment, and when speaking on the Income-tax Bill. At present all I wish to say is, that I am in favour of retaining the salt tax at Re. 1."

The Hon'ble Pandit Madan Mohan Malaviya:—"Mr. Vice-President, I give my hearty support to the amendment which is before the Council. It seems such a pity that a Budget which is marked with so much sanity and considerateness, as the present Budget is, should have one feature in it which is exposed to serious attack. I do not know that there have been many Budgets which have been received with so much general satisfaction as the Budget which Sir William Meyer has presented to this Council. That seems to me an extra reason why the amendment should be pressed on the attention of the Government. I do not wish to cover the same ground which has been traversed by my friend Mr. Dadabhoy. I think two points are clear. In the first instance, there are other articles upon which a duty can be imposed more justifiably than upon salt. In the second place, as it is after all a surplus which is being provided for, the surplus might be a little less than

what is provided for in the Budget. On both these grounds, I beg Government to take the matter seriously into consideration. There can be no dispute that the amount by which it is proposed to increase the salt duty is moderate. It has been fixed very considerately, and for that the Finance Member and the Government of India are entitled to our gratitude But what I submit, and several other members have submitted, is that there is not such a clear need for putting this extra burden upon the poor, and that therefore the matter might well be reconsidered. This is hardly the time, speaking on an amendment to this Bill, to go into the general question of whether the amount that has been budgetted for was actually necessary, whether by further curtailment, by a further general retrenchment of expenditure, the amount could not have been reduced; but taking it as settled that this amount must be found, we are entitled to say that, as there are other articles upon which the duty might more reasonably be increased, and other ways in which the amount needed may be found, the duty on salt should not be increased. I hope the Government will take this matter into serious consideration, and not throw out the amendments as they are generally thrown out merely because the thing has once been settled."

The Hon'ble Sir William Meyer :—"Sir, I have greatly admired the ingenuity by which Mr. Dadabhoy has succeeded in getting the salt duty within the scope of the present discussion. There is, however, one little development which, with all my friend's ingenuity, he has not perhaps quite appreciated, or the Council either. The Schedule, as it stands, says that imported salt shall be subject to the same rate of duty as is imposed by executive order of the Governor General in Council on salt which is produced in India. Well, we have already issued a notification that salt produced in India is to be taxed at Re. 1-4 per maund. Mr. Dadabhoy now proposes that, in this Schedule to the Tariff Bill, we should limit the rate of duty on imported salt to Re. 1 a maund, and therefore he is giving a preference, I am sure not deliberately, to the imported article. That of course is a debating rather than a practical point, for I have no doubt Mr. Dadabhoy would argue that, if his proposal were carried, the Government would be necessarily led to amend the excise rate also : but I mention it as an instance of what may happen if you do not very carefully consider amendments which you have to suggest, and if you do not consider their eventual as well as their immediate effects.

"I have shown in my speech on the Financial Statement that the taxation of salt is not a matter which the Government of India have taken up lightly or inadvisedly ; that it was only after careful consideration that we made the small rise which, some Hon'ble Members have admitted, will not in itself affect prices much ; and, even so, that the taxation will be lower now than it was nine years ago in a period of peace, and far lower than it was in the time of Lord Curzon, from whom Mr. Dadabhoy has quoted. I must remind the Council that, at the commencement of Lord Curzon's Viceroyalty, the salt duty stood at Rs. 2½ per maund. It was reduced to Rs 2 in 1903, and to Rs. 1½ in 1905, shortly before Lord Curzon left office The reduction to Re. 1 took place later. It has been admitted by the Mover of the amendment that one object of these successive reductions of salt tax—he quoted one of my predecessors, Sir E. Baker, to that effect—was to provide a financial reserve against lean years. I gather, however, that he thinks that the years are not yet sufficiently lean to justify our drawing upon this reserve. Well, if so, he is very hard to please. We had a big deficit in 1914-15; we have another big deficit this year though, thanks to the exemplary conduct of our railways, it is not so large as was originally anticipated ; and we have a still larger deficit to face in 1916-17. We have got, besides that, a load of temporary debt which we incurred rather than impose taxation before we felt actually obliged to. Well, I say a position like this is emphatically a position in which we are entitled to draw on our salt reserve, and so far from the drawing being unjustifiable, I can claim some credit to the Government in that they have taken so little from salt. The Hon'ble Mover quoted statements by predecessors of mine as

[7TH MARCH, 1916.] [*Sir William Meyer.*]

to the immediate effect of the reduction of salt duty on prices, and he argued therefore that there will be a counter-effect through an enhancement. Certainly, after the reductions from Rs. 2½ to 2 and Rs. 2 to 1½, the Government of India had evidence that these reductions of duty were materially affecting both prices and consumption. But now let me quote what was said by my predecessor in respect of the year 1908-09, shortly after the salt duty had been reduced to its existing pitch of Re. 1. In introducing the Financial Statement for 1909-10, and in dealing with the Revised Estimate for 1908-09, Sir Guy Fleetwood Wilson had to comment on the salt revenue, which was considerably less than had been anticipated in the Budget, and he said :—

'Ever since the recent series of reductions in duty began six years ago, there has been a steady annual increase in consumption. A point, however, seems now to have been reached at which the purchasing power of the people is affected much more by agricultural conditions than by the purely nominal rate of duty.'

I think that this applies still ; that prices and consumption are affected much more by other circumstances than by the small rise which the duty itself brings about. For example, Mr. Dadabhoy talked of the large increase, recently, in the price of imported salt. That is purely due to considerations of freight—that is special conditions caused by the war ; and any increase which is contingent on the rate of duty will be trivial compared with what may be brought about by the dislocation of freight. I am happy to believe, however, that the supply of imported salt will presently resume its normal proportions. I may remind the Council, Sir, that, as 'every cloud has a silver lining,' I believe that the rise in the price of Liverpool salt has materially enhanced the demand for Madras salt, and probably for Northern India salt also. Mr. Dadabhoy, in dealing with the financial aspect, has two strings to his bow. I will refer in general terms, as he has himself done, to the amendment which he is going to move as to jute, and by which he offers to supply the Government with the revenue that they would lose under his present proposal. We shall come to that amendment in due course ; but it is only fair to the Council that I should say now that we have considered the matter, and we think that by imposing export duties, amounting approximately to 5 per cent on the jute trade, we are doing as much as we can reasonably do. That if we were to double the duties, as Mr. Dadabhoy proposes, we should diminish the volume of trade to an extent which would inevitably hurt the producers, the Bengal ryots.

"Then the Hon'ble Member says, 'Oh, but apart from that you have too much money ; you have a surplus of a million pounds, you should have less ; you can do with £100,000.' I can only say, as responsible for the finances of India, that I could not possibly agree to such a proposal at a time like this, when we are subject to all sorts of unforeseen contingencies. We have to grope very much in the dark in some cases as regards our estimates. As the Hon'ble Sir Fazulbhoy Currimbhoy put it very well a little time ago, you cannot have precision in circumstances in which ordinary data do not apply. Take the current year, for instance, we had a large increase in military expenditure which had to be accepted as a matter of necessity. Latterly, railway receipts rose to an extent that no reasonable person could have predicted beforehand ; if anybody had said a year ago that railway receipts would have reached their present figure, he would have been laughed at. We have had then, to provide for an increase in military charges which has been more than counterbalanced by railway receipts. But supposing it had not been so, supposing that against the increase in military charges, railway receipts had only come to very much what we expected in the Budget—well, we should then have had a deficit of about 4 millions this year. In the year for which we are legislating, 1916-17, we don't know what a day may bring forth ; we may have to make further provision for military charges—circumstances may easily occur in which we may have to add to them ; and on the other side, railways may not prove so successful from a financial point of view ; also as the Hon'ble Sir Fazulbhoy Currimbhoy indicated, our Customs revenue may fall to a larger extent than we have anticipated, and there is the question of the monsoon. We have anticipated a normal South-west monsoon : we hope that it may be so—may, that it may be abundant ; but it may be that it will be unsatisfactory.

[*Sir William Meyer; Mr. C. Vijiaraghavachariar; Khan Bahadur Mian Muhammad Shafi.*] [7TH MARCH, 1916.]

With all these contingencies before us, with no possibility of borrowing from home, and with a large load of temporary debt hanging over us, we should not be doing our duty to the country if we were to say that we can sail safely through with an estimated surplus of only £400,000.

"For these reasons, Sir, I am unable to accept the amendment."

The Hon'ble Mr. C. Vijiaraghavachariar :—"Sir, it seems to me that this amendment relating to the duty on imported salt can be separated from the question relating to the increased tax upon salt manufactured in this country. The rate of duty on the former is as follows—'the rate at which excise duty is for the time being leviable on salt manufactured in the place where the import takes place'. Under section 7 of the Act the Governor General in Council is empowered to impose an excise duty not exceeding Rs. 3 per maund Under that section a notification was issued on the 1st of this month increasing the duty by 4 annas per maund, and the Tariff Act says—and the present Bill retains this provision—that there being this automatic relation between excise duty and the duty on imported salt, the latter duty is also increased to the same extent. If the amendment is accepted, it puts an end to this relation. The amendment urges that in column 4 headed 'Rate of duty' against item 39, Part II, new Schedule II, for the existing entry against that item the figures '1·0' shall be substituted. It does not in the least affect the notification issued by the Government of India on the 1st of March this year. If we accept the amendment, we get rid of the entry which establishes a relation between the two kinds of duties. I believe to that extent this is a mischievous fiscal principle, namely, that the duty on imported salt should be the same as the duty on salt manufactured in India. If we get rid of this mischievous principle, I do not see that any serious consequences will follow, that Government revenue will lose or that the amendment will produce the disastrous consequences which the Hon'ble the Finance Member has humorously pointed out. Without going into the question whether Re. 1 or Rs. 1-4 is a fair tax, or into the general question of the expediency of an increased duty on salt manufactured in this country, I feel I am in a position to support this amendment because it virtually and by necessary implication, gets rid of a vicious fiscal principle."

The Hon'ble Khan Bahadur Mian Muhammad Shafi :—"Sir, I would appeal to my Hon'ble Friend Mr. Dadabhoy to withdraw the amendment which is now before the Council. My reason for making that appeal to him is this—that if the figures which he suggests should be substituted for the words which find place in the fourth column as against this particular head, the result will be that, supposing after the termination of the war the Government of India is in a position to reduce the salt tax to a figure below Re 1, then in that case a further amendment to this Indian Tariff Act will have to be introduced in this Council in order to set matters right. Now, whereas such an amendment as regards salt manufactured in this country can be brought about by merely an Order in Council, to give this Council the trouble of introducing an amending Act such a short time as one or two years after the passing of the present Act, would be opposed to all notions of sound legislation.

"So far as the views of the Hon'ble Mr. Achariar are concerned, I do not propose to discuss them at all. The object which my friend Mr. Dadabhoy has in view has my hearty support, but I think it can be achieved in a much better way, as suggested by the Hon'ble Sir Ibrahim Rahimtoola, in the form of a Resolution in connection with the Budget. The method adopted by Mr. Dadabhoy will result in two things: first, it will reduce the duty in imported salt unnecessarily, and, in the second place, it will necessitate a further amendment of the Indian Tariff Act if, after the termination of the war, the Government is in a position to reduce the salt tax by means of an Order in Council. Under these circumstances, I think that the view taken by Sir Ibrahim Rahimtoola is really the better of the two."

[7TH MARCH, 1916.] [*Mr. Dadabhoy.*]

The Hon'ble Mr. Dadabhoy:—"Sir, I am afraid I cannot add very much to what I have already said on this very important subject. The Hon'ble Finance Minister has rightly taken exception to the form of my amendment; but I think that to a certain extent the explanation which I propose to offer has been partly given by my friend the Hon'ble Mr. Achariar. It was my great desire that a full discussion on this very important subject should take place, and that the Government should be in possession of the opinions of the non-official Members of this Council regarding it. There was no other way of forcing this discussion in the debate on the Tariff Bill, except by putting my amendment in the form in which I have presented it. I am of opinion, and the Council will agree with me, that as these Bills were brought up for final discussion, if any practical or useful result was to follow, it was necessary that this discussion should take place before the Bills became the law of the land. The discussion on this subject on the 9th instant would have been only of an academical character, and would not have helped either the non-official Members or the Government in any way. It was for this reason, and in order to get a hearing in time, that I drafted my amendment in this manner, perfectly confident that if Government removed the extra duty on imported salt, they would necessarily have to reduce the duty on Indian salt. It would have been an inconsistent position for Government to take up to continue the duty on Indian salt and to throw up the duty on imported salt. Swayed by this consideration I framed my amendment in its present form, and there was no desire, as suggested by the Hon'ble Finance Minister, to put imported salt on a footing of advantage.

"Now, Sir, as regards the merit of my amendment, I must say that I heard with the greatest interest and with very great respect what has fallen from the Hon'ble Finance Minister, but I must say that I am not able to agree with him in the conclusions he has drawn. His justification, Sir, for the imposition of this tax is this, that he had last year big deficits in the anticipated revenue. It has been further contended that the duty, though increased, now stands lower than it was nine years ago. Is that any answer to the principle of the tax? I have pointed out that, according to the deliberate pronouncements made by this Government from time to time, it is settled that this tax is to be kept as a reserve in case of urgent necessity. I am afraid the Hon'ble Finance Minister has taken a very pessimistic view of our financial position. I believe that at the end of the year there will not be any deficit; but I expect, on account of all these taxes, there will be a large surplus. I am sure the Hon'ble Finance Minister does not want this Council to believe that in having this taxation and in estimating this Budget, the exact revenue that would be yielded by this additional taxation has been counted upon. I have been in this Council for some years, and if my knowledge counts for anything, I have found that in all Budgets, in estimating the revenue, the Government allow a margin of ten per cent., and I have no doubt that if that margin is taken into consideration, the revenue which would be obtained from the general increase of taxation would be very considerable.

"The Hon'ble Finance Member has very rightly referred to one subject on which I am entirely in agreement with him. He has stated that we are unaware to what extent our military expenditure is likely to increase. I quite see the force and the wisdom of this remark. I well believe it is possible that developments on the frontier or other affairs might lead us into extra expenditure; but it would have been better if the Hon'ble Finance Minister had taken the Council into his confidence, and had made it clear in his opening statement, that he required this money for future expenditure in connection with our frontier and other difficulties.

"Sir, at this stage it would not be possible for me to go into the other Resolutions. I have placed a constructive scheme before Government. I do not ask that our revenue should be lost in any way. I freely acknowledge, and I am fully conscious of, the fact that we are at present in a state of crisis. Everything in our power should be done to husband our resources and to collect the available revenue; and we must be prepared for any emergency

that may arise. But, by a little more care we could have readjusted our taxation in such a manner that it would have yielded the revenue which the Government wants without in the least causing any difficulty, oppression or inconvenience to the masses.

"Sir, I know the fate of my amendment: it will be lost. But my chief object in bringing it forward was, that my Hon'ble friend the Finance Minister should not be tempted next year to put a further additional duty on salt; that he should be aware of, and he should know, the opinions of the country and of the Non-official Members of this Council in this matter. I think it our duty to help Government in every possible manner; we are pledged to support the Government. The whole country wants that our enemies should be crushed, and that all possible sacrifices should be made by us. We are prepared for sacrifices; we do not wish to cause any embarrassment to Government by showing to the foreign public that officials and non-officials to-day are divided on any important matter. From these considerations, I withdraw my amendment; but I hope that the Hon'ble Finance Minister will be pleased to bear in mind that behind this amendment there is a large volume of public opinion which considers that this tax is obnoxious and entirely unjustifiable.

"With these few words, I will ask you, Sir, to give me permission to withdraw my amendment."

The amendment was, by permission, withdrawn.

The Hon'ble Sir Ibrahim Rahimtoola:—"Sir, I beg to move—

'That in column 4 headed 'Rate of duty' against item 51, Textile Fabrics, Part II, new Schedule II, for the figures and words '3½ per cent' the figure and words '6 per cent' shall be substituted.'

"In moving this amendment I take due note of the appeal which the Hon'ble Finance Member has made to me not to press it. I would have willingly acceded to that appeal were it not for the fact that I am placing this amendment before the Council with more than one object. The principal object with which I wish to place this amendment before the meeting, is to give expression to the views I hold in regard to the scheme of additional taxation which is under the consideration of this Council, and I cannot very well therefore accept the appeal and not place my amendment before the meeting. The other object with which I wanted to place this amendment before the meeting, was in connection with the pathetic admission of helplessness which is contained in the Finance Minister's lucid and eloquent Financial Statement, and with which I entirely sympathize, particularly so, as the position is that the Government of India have the advantage of representation and hearing before a final decision is reached by the Secretary of State, while we, the Non-official Members, have to submit to the decisions in some cases arrived at by the Government of India on our Resolutions without knowing our reasons. Sir, in view of our own helplessness, you can appreciate that we cordially sympathize with the helplessness of the Government of India in this particular respect.

"I wanted also to add that we gratefully acknowledge the service which the Government of India has done to the people of this country in correctly representing the views of the public before the Secretary of State in this matter, and I hope that in future they will continue to reflect the public opinion in India and press to the notice of the Secretary of State the strong views and convictions held by the people of this country in fiscal and in economic matters. Sir, in view of the appeal made, I will largely modify the remarks I intended to make in connection with this aspect of the question. I recognise the desirability of not raising any acrimonious or contentious discussion on the attitude adopted in regard to the cotton excise duties by the Secretary of State. If I have another opportunity, I will reserve my remarks for that occasion.

[7TH MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

"The reason why I have brought forward this amendment is to provide the necessary additional revenue for the purpose of bringing about an equilibrium in the Budget estimates for the ensuing year. The estimated deficit is £2,600,000. The estimated revenue from the amendment of the Tariff Act will bring in £2,100,000, so that there will still remain a deficiency of £500,000 between the estimated deficit and the additional revenue obtained under the Tariff Act. As I said, my second object in bringing forward this amendment was to provide the necessary additional revenue of over £500,000 which will be secured if my amendment is carried, and in that way our expenditure and our revenue will equibalance. I do so for this reason. I wish to submit that, having secured an equilibrium in our finances, there is no justification for either the amendment of the Income-tax Act or the increase of the salt tax. If you secure, as I want the Government to secure, by my amendment, the additional revenue of £500,000, bringing the total revenue up to the total estimated expenditure, we will have a Budget with practically the same amount of revenue and the same amount of expenditure, and the case for further taxation in regard to income-tax and salt duty would then, in my opinion, not stand. Sir, I do not propose to deal with that question on the present occasion, but I will reserve my remarks in opposing the principle of the Income-tax Bill, and I will then try to explain why I feel that the Budget estimates, where expenditure and income equibalance, or even where, if my amendment is defeated, after I have offered the additional revenue it would be best in the interests of Government as well as the country, to have a deficit Budget of £500,000. The responsibility for the deficit will be theirs if they reject my amendment, because I am providing by this amendment the additional revenue which they require from a source, be it remembered, in regard to which the Government of India are themselves agreed, and in regard to which there is practically a unanimous feeling in the country. So that the position that arises is this. The Government of India come to this Council and announce that their Budget estimates show that during the next year there will be a deficiency of £2,600,000; their revenue proposal in regard to the Tariff Bill will bring in a revenue of £2,100,000, and they therefore want £500,000 more to make up the deficit and a million more for the surplus. It is for that reason that they want an increase in the income-tax and an increase in the salt tax. Sir, I beg to submit that we, the Non-official Members are quite willing to agree to provide the necessary funds by additional taxation to the extent of your estimated deficit, that is £2,600,000, and that the difference between the estimated deficit and the revenue under the Tariff Bill can easily be made up by increasing the duty on textile fabrics imported into India, both from Great Britain and Japan by the same standard of increase to which every other commodity is going to be subjected. If that is conceded, then there is an equilibrium between revenue and expenditure, and no case remains for an income-tax increase or for the salt tax increase except to provide a surplus. As I said, I do not wish to go into that question on the present occasion; I will deal with it in opposing the Income-tax Bill. My present object is to offer to Government in the shape of this duty—a duty which, as I have already stated, is favoured by the Government of India and is acceptable to the country—additional revenue from that source. Sir, it appears to me that it is rather hard that when the Government of India want the revenue, when the country is willing to agree to give them that additional revenue from a source which is agreeable to themselves, that they should be debarred from doing so and in that way necessitate the proposal for the increased salt tax. I should like to point out that the refusal of the Secretary of State to allow us to get £500,000 from this source is really responsible for the increase in the salt tax against which so much feeling has already been expressed in this Council. The revenue from the increase in the salt tax is £600,000, while from this source anything between £500,000 and £550,000 may well be expected: so that this refusal is tantamount to ordering an imposition of an additional 25 per cent on the salt tax, a thing which I do not think, can, in my opinion, be justified. Sir, I am restraining myself considerably in view of the appeal made to me, but if for any reason the standard

of increased taxation is applied to textile fabrics—that is to say, under the present standard of import duties we are levying a 5 per cent *ad valorem* duty on imported goods while textile fabrics pay only 3½ per cent—if the standard is going to be increased and we are to have an all-round increase of 2½ per cent in the standard, raising it from 5 to 7½ per cent, all I want is that the same standard should be applied to textile fabrics. Under a standard of 5 per cent the rate of duty for textile fabrics is 3½ per cent I therefore say that, when the standard is raised to 7½ per cent, the rate of duty on textile fabrics should be raised to 6 per cent, that is a general rise of 2½ per cent all round.

"Then, Sir, be it remembered that this increased taxation is for revenue purposes. Under ordinary conditions there would have been hardly any justification for increased taxation. Under present conditions India, along with other component parts of the British Empire, has suffered and is suffering in consequence of the war, and it is because of war conditions that justification is found for increased taxation for purely revenue purposes, to make up a deficit in our expenditure. Surely, Sir, that was one reason why, under present conditions, with a Coalition Ministry and a Secretary of State, the son of the champion tariff reformer, we might have been allowed to arrange our revenues in accordance with the sentiments of the Government of India and the sentiments of the people of the country. We are asked to await the readjustment that will take place after the war in regard to our fiscal matters. Sir, hope is eternal and we live in hope, but I do trust—I am not dealing in detail with the reasons that have been advanced—that the Government of India will forcibly bring to the notice of the Secretary of State that the feeling in the country is strong and insistent in favour of fiscal freedom, and that they will not be satisfied by any reasons of the kind that have been advanced now and in the past; that they desire that India shall economically rise and be free to levy taxation in directions most suitable to themselves, to their views and to their sentiments.

"Sir, I trust that my amendment will be accepted, and that we will have a Budget in which the revenue will balance the expenditure, and there will be no additional taxation on incomes or salt. For these reasons, Sir, I will put my amendment to the Council, in the hope that the financial re-arrangement that will be ultimately adopted by the Government of India will be such as to be acceptable to the people of this country. I may, in conclusion, say that if for any reason it is impossible for the Government of India to accept the amendment, I should very much like them to consider an export duty on raw cotton in order to give them sufficient to make up the deficit, on condition that there shall be no increase in either the income-tax or in the salt tax.

"With these remarks, I beg to place my amendment before the Council."

The Hon'ble Pandit Madan Mohan Malaviya:—"I support the amendment which has been moved by my Hon'ble friend Sir Ibrahim Rahimtoola I know very well that with the expression of opinion which we have before us of the Hon'ble the Finance Member of the Government of India, there is absolutely no chance of this amendment being accepted by this Council as it is constituted. And yet if I think it my duty to join with my friend in supporting it, it is only to record a protest, a respectful but firm protest, against the action of His Majesty's Government in this matter.

"Sir, we fully realise the position of the Government of India. We feel grateful to them for having placed our view of the matter fully and clearly before His Majesty's Government; but we wish that His Majesty's Ministers, the Secretary of State for India and others who might have advised him in this matter, realised how their refusal to permit the Government of India to make a material increase in the cotton import duties is regarded in India. They have done so on the ground that, in their opinion, the raising of this question at the present time would provoke a revival of controversies at a time when they

[7TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

specially desired to avoid them, and that this might prejudice the ultimate settlement of the larger issues raised by the war. But if, Sir, this gives us an idea of the way in which the settlement of those larger questions after the war is to be made, I must say that I do not feel happy or hopeful. Here is the present crisis, when in order to meet the new demands which have to be met owing to the conditions generated by the war, the Government of India have to resort to additional taxation. They have to resort to taxation not in one direction but in various directions, to taxation from top to bottom; to taxation which, it may be said with perfect truth, does not leave one single man untouched in this country. If at such a juncture, the Government of India made an appeal to the Government in England to allow them to increase the import duty on cotton goods, as the import duty on numerous other articles was being increased, there could not be a more reasonable, a more just, request made to them. And what is the reason for which this request has not been granted? Because, say they, there is likely to be a controversy over it, but a controversy is not avoided by refusing a reasonable request. It would have been avoided to a far greater extent if His Majesty's Ministers had recognised that this was just the time when, in view of the very stringent circumstances in which we were placed, in which we were driven to resort to taxation of numerous other articles, they should in fairness have allowed us to increase the duty on cotton goods.

"It has been said, Sir, that after the war, the question of an Inter-Imperial trade is to be taken up, and in that connection one of the speakers, the Hon'ble Sir Gangadhar Chitnavis, referred to the question of Preferential Tariffs. Might I warn my friends that they should be under no delusion in that connection? That they should clearly realise what that might mean? I will refer them to what was said in one of the Preferential Tariff Reform League pamphlets a few years ago on this subject. I quote from an article in the 'Indian Year Book,' in which it is stated:—

'Some idea of the direction in which a scheme of Inter-Imperial Preferential Trade would tend, so far as India is concerned, may be gathered from the following extract from the Official Handbook of the Tariff Reform League:—

'Preference would mean to India that the United Kingdom and the Colonies would give freer entry to Indian tea, coffee, sugar, wheat and all Indian staple products; and it would mean to us that the Indian import duty on a large number of British manufactures would be either abolished or reduced.'

That shows that that is one of the directions in which the ultimate settlement may come about. But I do not want to allow my judgment on the question before us to be affected too much by a consideration of what may possibly happen, because nobody can feel certain what will happen. I wish, however, to say that His Majesty's Ministers in England would have inspired greater hope and confidence in the minds of Indians regarding the character of the ultimate settlement of the larger issues after the war, if in a matter in which the Government of India, supported by the Indian public, have for the last 30 or 40 years asked for freedom of action, they had allowed them that freedom, allowed them to increase the import duty on cotton goods, when they felt it their duty to increase them. It is not, Sir, they who send manufactured cotton goods to India who would have had to bear the burden of the increased duty. It is the people of India, the consumers, who would have had to bear it, to pay a larger price for the articles on which the duty were levied. But they would not be the poorest of the poor, but the richer classes who consume the finer imported fabrics. From every point of view, therefore, His Majesty's Ministers should have allowed the Government of India, who are in possession of all the facts of the case, who are in possession of the opinion of the public of India, to increase the import duty on cotton goods when they considered it to be just and equitable in the circumstances of the case to do so, and we cannot too strongly protest against their refusal to do so.

"With these remarks, I support the amendment proposed by my Hon'ble friend opposite."

[*Sir William Meyer; Sir Ibrahim Rahimtoola.*] [7TH MARCH, 1916.]

The Hon'ble Sir William Meyer:—"Sir, I had hoped that after what I said a little time ago, the Hon'ble Sir Ibrahim Rahimtoola would consent to drop this amendment. My appeal has been ineffective, as he has thought it his duty to press it, principally as I gather, in order that he may air his objections to paying increased income-tax, objections which might have been more suitable on another occasion. I have however nothing to complain of in the tone of his speech, or in that of my Hon'ble friend Pandit Madan Mohan Malaviya. But the matter is a practical matter. The Council know that the Government of India would have been glad had they been able to increase the import duty on cotton goods; but His Majesty's Government, for reasons of Imperial policy, have said it is not desirable to do this at present. Obviously, however much the Hon'ble Sir Ibrahim Rahimtoola may object to it, we in India are, in political and Imperial matters, subordinate to His Majesty's Government at home. We must look at facts as they are, not as he might wish them to be. We cannot, therefore, accept an amendment which involves practically going against the views expressed by His Majesty's Government. We cannot possibly do that. Supposing even a state of things in which the official majority might become inoperative, and such an amendment could be got through; what would happen? We should have to drop the Bill altogether, because the Secretary of State would certainly veto a Bill which contained a provision of this sort. So that the proposal is not really practical.

"The Hon'ble Sir Ibrahim Rahimtoola says that his object in moving this amendment is to get sufficient money just to meet the deficit, and therefore to drop the salt tax, and above all the income-tax. Well, in the first place, I do not accept the statement. But supposing we had had our way in this matter, suppose we had been able to increase the duty on imported cotton goods, I deny that we should necessarily have raised a full £2,600,000 from the customs instead of £2,100,000. We should have had to consider other matters. I will say this, that the Government of India would certainly not have been a party, at a time when increased taxation was necessary, to leaving the well-to-do alone in the matter of income-tax. Whatever had happened we should have put on the tax there.

"Then I must protest against the implication that it is His Majesty's Government that is specifically responsible for the increase in the salt tax. As I said when replying to another amendment just now, we considered it only safe that we should have a fairly large surplus for the current year, and towards that the increase in the salt tax is contributive It is not right that the Council should assume that if we had been able to tax cotton goods somewhat more, the salt tax would necessarily have remained as it was before. I cannot argue upon hypotheticals; the Council won't expect me to do so. But I do protest against the unfairness of branding His Majesty's Government, so to speak, as being specifically responsible for the increase in the duty on salt. I trust that now the Hon'ble Sir Ibrahim Rahimtoola will withdraw his amendment, but if not, I must ask the Council to reject it."

The Hon'ble Sir Ibrahim Rahimtoola:—"Sir, I will be very brief in replying to the debate on the question of this amendment. There is one particular point to which I crave your leave to refer, and that is in regard to the reply given to the statement made by me that but for this refusal to allow additional taxation on textile fabrics the salt tax would not have been necessary. Sir, the scheme of additional taxation in the Financial Statement so lucidly expounded to us, as I said before, by the Hon'ble Sir William Meyer is that there is an Imperial deficit of £2,600,000, and that the additional revenue proposed to be recovered is £3,600,000, leaving a surplus of £1,000,000. Does it not stand to reason, in view of these facts, that if you had from £500,000 to £600,000 of additional revenue from the increased taxation on cotton fabrics, you would have a corresponding reduction in other directions? Does it not follow, in view of the opinion held by the Hon'ble the Finance Minister that the well-to-do should be taxed and the income-tax should there-

[7TH MARCH, 1916.] [*Sir Ibrahim Rahimtoola; Pandit Madan Mohan Malaviya; Mr. Dadabhoy.*]

fore remain, that the necessary and logical conclusion would be that, if you could have secured an additional 5 or 6 hundred thousand pounds from cotton fabrics, you would not have increased the tax on salt? I think that the connection is so apparent that it cannot be disputed. Even assuming that a case exists—which I think does not—for getting a surplus in a year like this by additional taxation, here you have from 5 to 6 hundred thousand pounds to be obtained from this additional duty; and surely with the great sympathy which the Hon'ble Sir William Meyer really has for the poor, the tax on salt would have been knocked on the head. Therefore, by refusing to sanction this as represented by the Government of India, the increase of salt tax has become essential and necessary, and therefore, in spite of what the Finance Minister has said, I remain unconvinced and attribute this increased taxation to the refusal of His Majesty's Government. Sir, I know that the Government of India are subordinate to His Majesty's Government. It is no new thing; the Non-official Members have been constantly and repeatedly told that, though they call themselves the Government of India, they are, in reality, the agents of the Secretary of State, and that as such they have got to carry out the orders and the mandates of the Secretary of State. That is, it will be conceded, for a country of the dimensions and importance of India, a very humiliating position; and if we, the Non-official Members, have been and are in season and out of season pressing this point, it is in the firm conviction that our considered views will have ultimately the desired effect of having the Government of India, being really the Government of India, co-operating with us the Non-official Members, and justifying each measure in answer to our criticism and not sheltering themselves behind the orders of the Secretary of State. Sir, that is a consummation pre-eminently to be desired, and I may assure you, Sir, that we, the Non-official Members, will keep on pressing the point to give more powers to the Government of India in order that the administration may be carried on in co-operation between the officials and the people of this conntry. If this subject comes on repeatedly before this Council for consideration, it will be excused because we mean to bring it constantly and repeatedly before this Council. Sir, I have given an opportunity to Government to get the additional £500,000 they need to make up the deficit. If they will not have it, if they will not have Mr. Dadabhoy's amendment for additional jute duty, if they do not want additional revenue from the sources we indicate and which we are prepared to pay, I hope that they will, when I oppose the income-tax increase and the salt tax increase, give me sympathetic hearing and agree, for reasons which I propose to advance, that no case exists for any increase in these directions. At all events, if there is a case, the Government of India are themselves responsible in refusing to take the £500,000 which we are ready and willing to offer to them to make up the deficit. For these reasons, Sir, I will not withdraw my amendment; I will let it be defeated, because I wish to show, and I hold, that the responsibility of rejecting it is the official majority."

The amendment was put and negatived.

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, in view of the discussion on the previous amendment, I beg leave to withdraw the amendment that stands in my name, namely:—

'That in column 4 headed 'Rate of duty' against item 51, Part II, new Schedule II, for the figures and words '3½ per cent,' the figures and words '7½ per cent.' shall be substituted."

The amendment was, by permission, withdrawn.

The Hon'ble Mr. Dadabhoy:—"Sir, it is unnecessary for me to press this amendment now. I may say that I particularly selected jute as I got the cue from the able speech delivered by the Hon'ble Mr. Stewart, as President of the Bengal Chamber of Commerce on 29th February last, when referring to the expected export duty, he pointed out that the 'proposed tax as a means of raising revenue, is not at all an unattractive proposition.' But as

my amendment about the reduction of salt duty has been withdrawn, I now formally withdraw this amendment also namely:—

'That in column 4 headed "Rate of duty" against items 1 and 2, new Schedule III, the following amendments shall be made, namely:—

1-4	shall be substituted for	. . . . .	. . .	0-10
4-8	" "	" "	. . .	2-4
20-0	" "	" "	. . .	10-0
32-0	" "	" "	. . .	16-0'

The amendment was, by permission, withdrawn.

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, I beg to move—

'That in new Schedule III, after item 3, the following item shall be inserted:—

'3A	Wheat	Indian maund of 82⅔ lbs. avoirdupois weight	0	4'.

I see from the figures mentioned by the Hon'ble the Finance Member in his speech, that last year a profit of about 22 lakhs was made on the transactions on wheat. The proposal which I put forward would bring in about 39 lakhs at export duty. If it were not for the fact that a profit of £150,000 was made last year, and as I understand from the speech of the Hon'ble Finance Member, that it is proposed to keep up the same arrangements this year, I would not have proposed an export duty on wheat at this time. If the wheat scheme is to continue, then I submit it would be a better policy to impose an export duty on wheat. We have an export duty on rice, and it is desirable that we should have an export duty on wheat for two reasons, firstly, because it will bring us a fair amount of revenue which we need, and secondly, because it will help somewhat to keep down the price of wheat in the country. In the speech of the Finance Member we are reminded in many places that it was largely in the interests of the Indian consumer that the wheat scheme was taken up and is to be continued. My proposal will work towards the same end. Of course, we do not want any wheat of ours to go to the enemy; we want it to go to the United Kingdom, and to those whom the Government of His Majesty wish to help; we want that policy also to be kept up; but if that policy is kept up, and if about 22 lakhs or so is to be made as profits of that policy, it seems to me that the Government might well recognise the propriety of putting an export duty of 4 annas a maund on wheat. With these remarks, I leave the amendment in the hands of the Council."

The Hon'ble Mr. Low:—"Sir, I regret that I must oppose this amendment. The Hon'ble Pandit Madan Mohan Malaviya has stated that, in his opinion, an export tax is preferable in its operation to the wheat scheme. I trust I correctly understood him in his statement, for it filled me with a certain amount of surprise. It was explained by you, Sir, in your place in this Council about a year ago, under what circumstances the Government of India found it necessary to undertake the conduct of the wheat scheme."

The Hon'ble Pandit Madan Mohan Malaviya:—"May I interrupt my friend for a minute? I do not wish that any arrangements under which our wheat is supplied to His Majesty's Government, and at their wishes to other countries, should be altered. I do not in the least desire that it should be left to anybody and everybody to export wheat wherever he liked. I only wish that an export duty should be imposed on wheat without prejudice to the present arrangements. My suggestion does not go against them; it seeks to impose an export duty on wheat without discontinuing the present arrangements for regulating its supply to selected places and peoples."

The Hon'ble Mr. Low:—"I fully understand the suggestion which underlies the Hon'ble Member's amendment, and I defend the position on that basis. We have first of all to consider what will be the incidence of the proposed tax from the point of view of the person who, I shall presently show, will really be affected, namely, the producer. Without entering into

[7TH MARCH, 1916.] [*Mr. Low.*]

any such vexed questions as to what is a fair price for the producer to expect, I do not think anybody will quarrel with me if I take as an assumption the price of wheat at R3-8 a maund at an up-country, Punjab, wheat market like Lyallpur. The Hon'ble Member's proposed tax of 4 annas on the maund on that amount would come, if I am correct, to something like 7 per cent. Now, that is from some points of view a heavy tax, and from another and perhaps more important point of view, as I shall explain later, by no means heavy enough to accomplish what the Hon'ble Member has in mind. I have said that the producer in this country is the man who will have to pay that tax. I do not think I need labour the point at any great length. All over the world, large wheat-producing countries like Australia, Argentine, the States, Canada, and, in ordinary times of peace, Russia, grow enormous areas of wheat, mostly or very largely in some cases with a view to export. Their financial and transport arrangements are highly organised, far more highly organised than in this country; freights for many of them are a good deal less, and in the case of Canada at any rate, if not in other countries, the quality of wheat is superior to that grown in India.

"The Indian producer is, therefore, competing against these people for the sale of his wheat, and if we super-impose a tax, that is a tax of 7 per cent., it is quite obvious that the deficiency will have to be met by him. Other people will continue to charge their present prices for the wheat that they send to England; India will be able to charge no more for her wheat; the Indian producer will therefore receive so much less, *viz.*, 7 per cent. It is not an uncommon result of such a discouragement, in fact a result which may be predicted in this case with some degree of confidence, to find a reduction in the wheat area in India. I do not say a large reduction but some reduction; I don't think that is a prospect which the Hon'ble Member would care to contemplate, and I don't think that his proposal to protect what I may call the wheat-eating industry at the expense of the wheat-producing industry would be attained, and the figures for wheat cultivation after the lapse of say 5 to 10 years would exhibit a reduction which would not be to his satisfaction. During the last 18 months especially, the Government of India have tried to strike a fair and just balance between the claims of the producer and the claims of the consumer; and I think the Hon'ble Member will admit that the Government of India will not show any reluctance in making this attempt or being deterred by the magnitude of the schemes or the complications involved in doing their best to this end when they think it really necessary. The really high prices at this time last year compelled the Government of India to step in; the Hon'ble Member asks us in future, whether wheat prices are high or low, to fine the producer 7 per cent at the expense of the consumer. I think it will be admitted that the proposal is scarcely a fair one. I said at the beginning of my speech that the Hon'ble Member's proposed tax was in some points of view too low. I ask you to consider the position that would arise with the really high prices in England which have been from time to time in force during the past year. Prices have been as high—I am speaking from memory—as 67 to 68 shillings a quarter; a 7 per cent tax on this would be absolutely ineffective; it would require a tax of many times 4 annas to have the influence which the Hon'ble Member no doubt desires. I admit of course that his proposal pre-supposes the maintenance of existing safeguards in respect of restriction of exports and their control and direction, but we have really to rely on the restriction of export against high prices; in the case of medium and low prices the sole effect of this duty would be as I say to inflict an unfair fine on the producer. The only means of dealing with the situation by means of an export tax would be to have the export tax a sliding one, either on the difference between Indian and English prices or on Indian and on English prices. Sufficient reasons were given in your speech last year, Sir, to show the impossibility of this from the disturbance of trade that would result, and the undoubted complications and the upsetting of the market. The Hon'ble Member has, I think, alluded to the tax on rice, or if he has not he will correct me; at any rate some Hon'ble Members have done so during this morning's discussion. I will explain the position in regard to the export duty on rice. It was imposed at a time when the Government of India were under the fond impression that India had a monopoly of the export of rice; this we now

know is very far from being the case; however, the tax remains and owing to the fact among others that rice is a much more widely grown crop than wheat, and that a larger proportion of it is consumed in the country, not very much harm has resulted from it; for that reason the Government of India have decided to let sleeping dogs lie, and have not touched it. We don't, however, want to embark on a fresh experiment of the same sort in regard to wheat. We have had sufficient experience of the wheat trade during the past year to be quite certain that the result will be undesirable from the point of view of the Indian producer, and unsatisfactory from the point of view of the Indian consumer. For these reasons, Sir, I must ask the Council to reject the amendment."

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, I desire to point out a certain inconsistency in the attitude of the Government of India on this question. I find that grain and pulse imported into the country has to pay a duty of 2½ per cent *ad valorem*. In the speech of the Hon'ble the Finance Member introducing the Financial Statement, he said:—'While taxing grain and pulse at 2½ per cent in ordinary circumstances, the Government will be prepared, when necessary, to consider the question of exempting them by executive order in famine years.' I find from the Schedule at page 10 that flour imported into the country is liable to a duty of 7½ per cent *ad valorem*. If a duty of 7½ per cent is levied on flour and of 2½ per cent on grain and pulse which are imported into the country, is it very unreasonable to suggest that there should be a duty of 4 annas a maund on wheat which is exported out of the country? Government knows and the Council knows that wheat is the staple food of a large portion of the people, and that the rise in the price of wheat has been a source of real hardship to the great bulk of them; the price of wheat in India has gone up by leaps and bounds. But there has not been anything like a corresponding rise in the incomes of the people. In other countries to which our wheat is exported, the average annual income per head of the population is several times greater than the average annual income of the Indian people. Therefore the great bulk of the consumers in India are put to a great disadvantage in wheat being allowed to be exported free of any duty. I readily concede that if my proposal were accepted, it would impose a certain amount of restriction on the profits which the producer at present earns. I put forward the proposal with that result clearly before my mind's eye. And I am supported in doing so by the Government of India. There are several passages in the speech of the Hon'ble Finance Member in which he has been good enough to say that the wheat arrangement has been kept up in the interest of the consumer, and I think, Sir, that that is the right policy to adopt. In no country can the Government allow any one section of the community to derive unreasonably large profits at the expense of the other sections of the community, particularly where food-stuffs are concerned. For these reasons, I wish the Government would accept my proposal. But I see clearly, that it will not be passed to-day. I beg the Hon'ble Finance Member and the Government of India, however, to take this proposal into consideration, and, if possible, to accept it, when they are framing their Budget next year. I recognise that from one point of view, this is not perhaps the right time to press the proposal. I will not, therefore, press t at present; but I do ask the Government to take the matter into consideration next year, and to take up a position which would be both consistent and reasonable and which would commend itself to the general consumer of wheat in India. I do not press the amendment."

The amendment was, by permission, withdrawn.

The Hon'ble Sir William Meyer:—"I now move, Sir, that the Bill be passed with the slight amendment introduced in it by the Select Committee.

"I think I may congratulate the Government and the Council on the business-like way in which the Bill has been dealt with here, and on the fact that we have been able to carry this very urgent measure into law. We have been able to do so in a reasonably short time, and at the same time have elicited all

[7TH MARCH, 1916.] [*Sir William Meyer; The Vice-President; Sir Gangadhar Chitnavis; Sir Ibrahim Rahimtoola.*]

reasonable objections. I may also, as I said before, congratulate the Council on the ready acquiescence that the Schedules have received.

"I now move that the Bill be passed as amended by the Select Committee."

The motion was put and agreed to.

The Council here adjourned for Lunch.

THE INDIAN INCOME TAX (AMENDMENT) BILL.

The Hon'ble Sir William Meyer:—"Sir, I beg to present the Report of the Select Committee on the Bill further to amend the Indian Income-tax Act, 1886.

"The Report is in the hands of the members. We have made one or two small alterations in drafting to make things more clear, and Sir G. M. Chitnavis has pointed out that in Select Committee he raised the point that the minimum assessable income should be raised from Rs. 1,000 to Rs. 1,200, but the Committee thought this was out of place in view of the financial difficulties of Government. This is a time for increasing taxation, and not for dispensing with taxes, or portions of taxes, already levied.

"I now move, Sir, that you will be pleased to suspend the Rules of Business to admit the report of the Select Committee being taken into consideration."

The Hon'ble the Vice-President:—"I suspend the Rules of Business."

The Hon'ble Sir William Meyer:—"I now move that the Report of the Select Committee be taken into consideration. I need not say more on the merits of the Bill than what I have already said in my speech introducing the Financial Statement and in that introducing the Bill itself."

The Hon'ble Sir Gangadhar Chitnavis:—"Sir, I beg to support the Income-tax Bill. The only points on which I need address the Council are three. In the first place, it is necessary that it should be made clear that the scheme of enhanced taxation which the Bill embodies is accepted by the country as a war measure. Such taxation cannot be tolerated on restoration of normal conditions. It should, therefore, be distinctly understood that I support it only as a temporary arrangement for strengthening the hands of Government during the war. In the next place, I think the assessable minimum should be raised from Rs. 1,000 to Rs. 1,200, in view of the large increase of a permanent nature in the cost of living. It is reasonable that some consideration should be shown to the poorer middle classes with fixed incomes which have deteriorated in value through the abnormal rise in prices. I suggested the amendment in Select Committee, but for reasons which appeared to me reasonable, it could not be incorporated in the Bill. I hope, however, Government will consider the point after the war is over and the financial condition improves. Lastly, in order that the higher rates do not press heavily upon the poorer holders of securities, it is absolutely necessary that the procedure for claiming a refund should be simplified, and I hope that this will be done by the rules framed in accordance with the rule-making power that has been provided in the Act."

The Hon'ble Sir Ibrahim Rahimtoola:—"Sir, as I indicated in the course of the previous debates to-day, I rise to oppose the increase in the income-tax proposed by this Bill. I beg to submit that there is no case for any increase in the income-tax at present. I do not wish, Sir, to be misunderstood. I am not opposed in principle to the increase in the income-tax or in the salt tax if there was justification for it. My submission on the present occasion is, that no justification has been made

out for either increasing the income-tax or raising the salt tax In dealing with this point, I will have to go a little exhaustively into the financial position of the Government of India. Looking at it as a whole, it appears to me that the salt tax has been levied, as I have already contended, to make up the deficiency in the Tariff Bill due to exempting cotton piece-goods from the necessary increase of 2½ per cent. I now contend that the increase in the income-tax, which represents a revenue of £900,000, is to provide Government with a surplus, which is estimated at a million pounds. I therefore oppose the increase in the income-tax, primarily on the ground that it is proposed to be levied for the purpose of giving Government a surplus. Now, Sir, in connection with that, my submission is that at a time like the present when the country has suffered so much in various directions in consequence of the war, the requirements of Government in the shape of additional taxation should be confined to the actual expenditure estimated by them, and that anything beyond an equilibrium between revenue and expenditure ought not to be sanctioned. To levy, at a time like this, additional taxation for the purpose of providing a surplus appears to me to be totally indefensible. I will deal with the reasons which the Hon'ble Finance Member gave in support of wanting a surplus, after I have pointed out why, in the first instance, I think that the strength of the financial position of the Government of India is so great that no justification can be satisfactorily proved in favour of taxing even the so-called well-to-do people in India with this £900,000 in the shape of additional taxation. Sir, with your permission, I may refer once more very briefly to the broad results of the Financial Statement. The deficit is £2,600,000. The revenue from the Tariff Act which we have passed is £2,100,000 ; the additional revenue of £500,000 which I wish to give them has been refused. When an equilibrium could have been obtained by means of one form of taxation and one alone, it has been declined. Therefore, I submit that Government will have to be content with opening the new Budget with a deficit of £500,000 for which they are themselves responsible, and not levy any additional taxation in the form of income-tax or salt tax. I may incidentally mention, in answer to the point that it is the well-to-do that will have to pay the tax, that I am opposing, not only the increased taxation against the well-to-do, but also against the poor in the shape of the salt tax—I am opposing both.

"Now, Sir, assuming, for argument's sake, that my view prevails, and that the Budget in which I wanted to have an equilibrium is allowed to open with a deficit of £500,000, what will be the net result ?

"Is the financial position of the Government of India sufficiently strong to justify having a Budget of that description ? In this connection you will permit me, Sir, to trouble the Council with a few statistics. Our invariable experience has been that on most occasions the actuals show better results than those anticipated at the time of framing the Budget. Every Finance Minister will naturally exercise caution in framing his estimates. That is a procedure which I do not want to contest. In the Financial Statement which was placed before us on the 1st, the Hon'ble Member has said in more than one place that estimates have been framed with a great deal of caution. I recognise the soundness of this, and I hold that the principle of caution in underestimating, however slightly, your revenue and overestimating, however slightly again, your expenditure, has led in the past in most cases to results of better surpluses than were provided for, or surpluses where small deficits had been anticipated. If the same experience works out for the ensuing year, then even a deficit of £500,000 may reasonably be expected to turn into a surplus, however small it may be, because after all the deficit is only £500,000 in a Budget representing 86 millions.

"Sir, I have compared the estimates with the actuals from 1907-08. In that year the estimated surplus was over £700,000, while the actual was £300,000, which was less. In 1908-09, the surplus estimated was £571,000 and the deficit was £3,737,000. This is the one year during the last 11 years during which there has been a deficit, and it immediately led to increased taxation. Sir, I will deal later on with the point as to the policy of having recourse to increased taxation immediately a deficit is noticed,

[7TH MARCH, 1916.] [*Sir Ibrahim Rahimtoola; Mr. Brunyate.*]

while, when surpluses are noticed, on only a few occasions has decrease of taxation been allowed I will deal with the point later on. In 1909-10, the estimated surplus was £230,000, the actual surplus was £606,000; in 1910-11, the estimated surplus was £400,000 and the actual surplus was £4 millions. I am giving round figures. In 1911-12, the estimated surplus was £800,000, the actual surplus was £4 millions; in 1912-13, the estimated surplus was £1,500,000, the actual surplus was £3,100,000; in 1913-14, the surplus estimated was £1,400,000 and the actual surplus was £2,400,000; in 1914-15, which represented 8 months of war, the estimated surplus was £1,256,000 and the deficit was £2,785,000 That was because war supervened and converted the surplus into a deficit. In the current year, which is the year when Budget estimates were framed at a time when war was on, and in anticipation of the war lasting throughout the year, the deficit estimated was £2,900,000 and the actual deficit was £2,100,000, showing a difference to the good of over £800,000. If you take even the year in which the conditions of war were present, and estimates were framed in consideration of that contingency, the results are over £800,000 better than anticipated. Surely, Sir, if that is so, we may reasonably expect, now that the present Budget has been framed with even greater caution and in full view of the present circumstances of the war, that that caution will lead to better results than those provided for in the Budget. If they prove to be better only to the extent of £500,000, then there will be an equilibrium, and, I beg to submit, that there is no case for additional taxation, either income-tax or salt tax

"Let us take a comprehensive view of another aspect of the question. What has been the net result of the financial policy adopted by the Government of India during the last 11 years for which figures are available in the Statistical Abstract relating to British India published in England. The figures given are from 1903-04."

The Hon'ble Mr. Brunyate :—"Page?"

The Hon'ble Sir Ibrahim Rahimtoola :—"'Page 47.' In the year 1903-04, the surplus is nearly £3 millions. In the next year the surplus is £3,500,000; in 1905-06, £2,100,000; in 1906-07, £1,500,000, in the next year, £306,000; in 1908-09, in which, as I have already stated, there was a deficit of £3,737,000. In 1909-10, there was a surplus of £600,000; in the next year £4 millions; in the next year £4 millions again; in the following year £3,100,000, and in 1913-14, for which this statement is compiled, £2,300,000.
